Water-Use Permit Application Processing

1. **Completeness Determination**

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050 (www.oregon.gov/owrd/law.oar). The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus $200. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is $350.00 for the applicant and $700.00 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest and will schedule a contested case hearing if necessary.

RECEIVED
SEP 12 2016
OWRD

6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

SECTION 6: RESOURCE PROTECTION

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

☒ Diversion will be screened to prevent uptake of fish and other aquatic life.
Describe planned actions: All Columbia River Diversions will have approved fish screens installed consistent with current criteria of regulating agencies

☒ Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.
Describe planned actions: No new construction is proposed at POD's E, F, G, H, and I. The applicant is proposing to utilize existing capacity during periods of off-peak demand (when capacity is available) at POD's E-I. All excavation at POD J will be completed in compliance with the conditions of the diversion owners permit granted by the United States Army Corps of Engineers.

☒ Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.
Describe: No improvements are anticipated for POD's E, F, G, H and I. Proposed construction and improvements to POD J will be in compliance with applicable state and federal permitting agencies and applicable in-water permits.

☒ Water quality will be protected by preventing erosion and run-off of waste or chemical products.
Describe: No improvements are anticipated for POD's E, F, G, H and I. Proposed construction and improvements to POD J will be in compliance with applicable state and federal permitting agencies and applicable in-water permits

SECTION 7: PROJECT SCHEDULE

SECTION 9: REMARKS

Use this space to clarify any information you have provided in the application.

Place of Use Acreage

The East Improvement District and NOWA have indicated the full boundary where new water supplies from this permit may be used. Final place of use, as well as total primary and total supplemental acreages will be detailed prior to final proof survey. In addition to final details, the Port of Umatilla will provide a map annually, detailing the annual place of use of the new water and whether the water will be utilized for either primary or supplemental irrigation.

Period of Use Division 33 Mitigation Proposed

The East Improvement District and NOWA proposes a period of use from March 1 to November 1of each year. Water from the Columbia River will be subject to mitigation from April 15 to September 30. From March 1 to April 14 and from October 1 to November 1of each year, the East Improvement District may pump out of the Columbia River without the need for mitigation. The East Improvement District proposes to secure mitigation at the appropriate level required by regulating agencies to pump Columbia River water from April 15 to September 30. Sources of mitigation will be documented and reported to OWRD prior to the start of the mitigation season and the pumping rate during the mitigation season will be directly proportionate to the mitigation secured. The period for mitigation requirements is currently 169 days of the period of use. EID, through NOWA has option agreements with mitigation water sources to have all mitigation to satisfy the max rate (39.3 cfs) for the maximum mitigation duration (169 days) in place by 2016.

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
   a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
   b) The application involves a change in place of use only;
   c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
   d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

EAST IMPROVEMENT DISTRICT

MODIFIED EAST POTENTIAL PIPELINE SYSTEM

FEASIBILITY STUDY – 156 CFS

Prepared by IRZ Consulting, LLC
December 10, 2015

BACKGROUND

Based on the studies done in the past for the Northeast Oregon Water Association (NOWA) for the East Potential Pipeline System, a modified version of the findings is presented here for the East Improvement District (EID). The goal is to present an approximate capital cost of constructing a pipeline from the Columbia River to the water users in Northern Umatilla County, Oregon. The water would be used for irrigation. This study considers a (LOW) flow scenario of 156 cubic feet per second (cfs), The other study for a (HIGH) flow of 284 cfs is provided in a separate report.

SYSTEM DESCRIPTION

Delivery Points

There are five proposed delivery points in the study. See Table 1 below for the associated delivery rates. Also see the Overview map in the Appendix. The first delivery point is about .6 miles south of the Columbia River and the last one is about 8.6 miles south.

3	11	4,900
4	21	9,400
5	58	26,100
TOTAL	**156**	**70,000**

The proposed pipeline route is based on the previous study done for NOWA. Water delivery will be made at the delivery points shown, and participating users would be responsible for the system from the delivery points to their desired field locations.

River Pumping Station

The proposed river pump station is located at the bank of the Columbia River about two miles northeast of Hermiston, Oregon, near the existing Stahl-G2-JSH pump stations. The water will be harvested via an intake structure and screen placed on the bed of the river. The maximum capacity of the river station would be 156 cfs (70,000 gpm) with a lift of 425 ft. The total power load at the river station would be 8,800 brake horsepower (bhp). There will be a total of 6 – 1500 horsepower pumps at the station. A steel common manifold will connect to a 72" steel mainline that runs up hill to the booster station.

Booster Pumping Station

The proposed booster station is located after the first delivery point approximately .6 miles south of the river. The maximum capacity of the booster station would be 111 cfs (50,000 gpm) with a lift of 193 ft. The total power load at the station would be 2,860 bhp. There will be a total of 5 – 800 horsepower pumps at the booster station.

Table 2 below shows the pump capacities at the two stations.

Pipe Layout

There will be a total of approximately 48,000 ft. of pipe installed. Table 3 below provides the footage for each pipe size.

Road and Railroad crossings
There will be three major road crossings and one railroad crossing that the pipeline will be required to make. The first road to cross is Highway 730 close to the river. This would entail 120 ft. of 72" steel carrier pipe (78" diameter steel sleeve) bored under the paved road.

The second major road crossing is Highway 37. It would be 80 ft. of 60" steel carrier pipe (66" diameter steel sleeve) bored under the paved road.

The third major road crossing is the 42" steel carrier pipeline crossing Despain Gulch Road near the end of the system. This will also be an 80 ft. of bored crossing with a 48" steel sleeve.

The railroad crossing will occur about 400 ft. south of the river pumping station. This will be about 330 ft. of boring through the rocks under the railroad with 72" steel carrier pipe (78" diameter steel sleeve).

Utilities Upgrade
The total demand at the new river station would be 8,840 Kilowatt (KW) and at the booster station would be 2,860 KW. This study assumes that utilities upgrade will be done to supply the power.

COST ESTIMATE

Capital Cost
The cost estimates have been based on the previous feasibility study reports submitted to NOWA. They are calculated based on pump station locations and sizes, pipe routes, and obvious obstacles. Cost estimates are based on experience with agricultural irrigation system pumping station and pipeline construction in the Columbia Basin and should be considered feasibility level approximations. It is prudent, in studies of this scale, to account for unforeseen challenges and expenses by including a contingency cost. A total contingency of 15% was determined reasonable for this study. There is also an additional 20% to cover prevailing wage if required and 8% for engineering and legal services based on the size and complexity of the proposed system. The legal costs do not expressly include expenses for obtaining easements and crossing agreements, above that which might be typical. A summary of the estimated capital costs for the project is found in Table 4. The estimated total capital cost for the system is approximately **$46.1 million.**

Note: The cost for installing the portion of the mainline running up the hill has been intentionally increased to take into account the need to deal with very rocky terrain. The actual cost for installing this portion of the pipeline will be dependent upon the amount of rock actually encountered. Significant field testing will be required in order to determine length, design and associated costs associated with

installing this pipeline. The material costs are based upon the best estimate for costs as of the date of the report, and will need to be verified upon final design.

The following cost breakdown table indicates the cost of the various sections of the system located between the various delivery points shown on the attached map. For example, Section 3 is located between the Delivery 2 and Delivery 3 on the map.

Eastern Oregon communities are all centered on agriculture. With the abundant sunshine and the long growing season, the region is considered prime farm ground. With the variety of crops that are grown in the area, it allows numerous food processing facilities to be based here providing employment for many citizens. The output of their product is shipped around the state for further processing providing jobs for other areas in Oregon. The thriving communities in Eastern Oregon all depend on agriculture to provide them with a living wage. The basis for agriculture that keeps this area alive is water.

Many excellent quality high value crops are grown in the area by using Good Agricultural Practices. This entails taking care of the soil all year round instead of only when there is a crop planted.

In the fall it is considered a Good Agricultural Practice to plant a cover crop to shelter the soil through the winter until planting the following spring. This practice is used to suppress weeds by choking them out, and reduces soil water evaporation by increasing shade. Cover crops also improve soil health by creating channels in the soil with the plant's roots, and reduces soil erosion caused by wind and water runoff. A cover crop can consume upwards of 3 to 4 inches of water depending on the time of year it is planted.

Before tillage and planting can occur, there needs to be an optimal amount of moisture available in the soil. Our primary soil type in the region is the sandy loam. If the sandy loam does not have enough moisture, the equipment will be unable to produce the desired effects that are needed from tillage. Optimal amount of moisture needs to be in place for the seeds to germinate. After planting has occurred, 1 to 2 inches of water is typically irrigated on the field in order to achieve prime germination.

Crop water needs vary by plant variety, but one thing is true for all plants; they need the right amount of water at keys stages of plant growth in order to produce a viable product. In this area, water usage can range from 36 to 40 inches of water per season for high quality food output.

With these Good Agricultural Practices in place in the area, it can take upwards of 38-42 inches of irrigation a year.
