

Drought Report for the Week of August 31, 2015

<u>Current Water Conditions</u>: In the final Water Supply Outlook for 2015, the NRCS reported that State-wide, Oregon's snowpack this winter peaked at the lowest levels measured in the last 35 years. Many snow monitoring sites set records for the lowest peak snowpack and earliest melt-out date since measurements began. For the three month period of May through July 2015, Oregon recorded the warmest average temperatures since 1895. Consequently, streamflow is expected to be well below normal through the end of summer, especially in the more arid regions of the state. The current statewide average precipitation is 89%.

County-wide drought declarations go through a three-part process before securing a drought declaration from the Governor's Office.

First, County Commissions meet to determine whether they want to seek a Governor's declaration.

Second, these recommendations go to the Water Availability Committee (chaired by the Oregon Water Resources Department) and then the Oregon Drought Council (chaired by Oregon Emergency Management) for technical review. The Oregon's Drought Council will meet if needed. The Water Availability Committee will convene if requested by the Drought Council.

Finally, if approved for drought declaration, the Governor's Office issues an Executive Order, declaring drought in specific counties. In recent years, these Executive Order have been set to expire at the end of a calendar year. A Governor's declared drought is in place for 2015 in the following counties: Baker, Coos, Crook, Curry, Deschutes, Douglas, Gilliam, Grant, Harney, Hood River, Jackson, Jefferson, Josephine, Klamath, Lake, Lane, Linn, Malheur, Morrow, Sherman, Umatilla, Union, Wasco and Wheeler. A Governor's Drought Declaration allows the Water Resources Department to issue emergency drought permits to applicants, using an expedited process.

Oregon Basin Outlook Report

June 1, 2015

Final Report for 2015

Oregon Snowpack Lowest on Record
2015 Water Year

State-wide, Oregon's snowpack this winter peaked at the lowest levels measured in the last 35 years. The chart above puts this year's record low snowpack into historical context. The height of each bar reflects the peak snowpack—from across the state of Oregon—for each water year. This year, 2015, is shown in red at the far right. Many snow monitoring sites set records for the lowest peak snowpack and earliest melt-out date since measurements began. In western Oregon, the snowpack peaked 60-90% below the normal amounts and the snow melted up to 3 months early. The snowpack in the eastern part of the state was only slightly better, peaking 30-80% below normal levels and up to 2 months earlier than normal. Lack of normal mountain snowpack has led to well below normal streamflow forecasts for the state. Currently, most of Oregon is included in the severe to extreme drought category, according to the National Drought Monitor. Water shortages across Oregon are expected this summer and Governor Kate Brown has declared a drought state of emergency in 15 counties as a result.

Current Basin Water Status

| Basin # | <u>Basin Name</u> | <u>Basin Status</u> | <u>Reason</u> |
|---------|---------------------|---------------------|--|
| 1 | North Coast | Drought Unavoidable | Record low flows |
| 2 | Willamette | Drought Unavoidable | Corps Reservoirs 50% |
| 3 | Sandy | Drought Unavoidable | Near record low streams |
| 4 | Hood | Drought Unavoidable | Very low streamflow |
| 5 | Deschutes | Drought Unavoidable | Very low tributary flows |
| 6 | John Day | Drought Unavoidable | Very low flows |
| 7 | Umatilla | Drought Unavoidable | Very low flows |
| 8 | Grande Ronde | Drought Unavoidable | Flows dropping rapidly |
| 9 | Powder | Drought Unavoidable | Very low tributary flows |
| 10 | Malheur | Drought Unavoidable | Reservoir storage is near empty |
| 11 | Owyhee | Drought Unavoidable | Reservoir storage is near empty |
| 12 | Malheur Lake | Drought Unavoidable | No reservoir storage; Very low flows |
| 13 | Goose & Summer Lake | Drought Unavoidable | Reservoir storage is near empty; low flows |
| 14 | Klamath | Drought Unavoidable | Low flows |
| 15 | Rogue | Drought Unavoidable | Low flows |
| 16 | Umpqua | Drought Unavoidable | Low flows |
| 17 | South Coast | Drought Unavoidable | Record low flows |
| 18 | Middle Coast | Drought Unavoidable | Record low flows |

| Definitions | | | | | | | |
|---------------------|---|--|--|--|--|--|--|
| Normal | Water supply is not atypical. | | | | | | |
| Below Normal | Water supply under what is needed to meet normal demands. | | | | | | |
| Drought Likely | Water supply likely to fall well short of meeting normal demands. | | | | | | |
| Drought Unavoidable | Water supply will fall well short of meeting normal demands. | | | | | | |
