FINAL ORDER

Dear Mr. Miller:

The Special Standards Request Form you submitted for owner: City of Portland, Start Card number 1016396, is hereby approved for the following: You may construct this collector dewatering well system with three foot bentonite seals and no well monuments. The collector well points may only be connected to a single header and they may only be constructed into the uppermost aquifer. The wells may not commingle aquifers when completed. As a reminder, a well I.D. label is required to be attached to the dewatering system. *A stipulation of this special standard is that these wells must be permanently abandoned within 60 days from the date of this final order.* Your Special Standards Request Form is enclosed. All other standards must be adhered to.

The Well Construction Standards serve to protect ground water resources. By approving and issuing this special construction standard the Oregon Water Resources Department is not representing that a well constructed in accordance with this condition will maintain structural integrity or that it meets engineering standards. The well constructor/or landowner is responsible for ensuring that a well is constructed in a manner that protects ground water resources as required under Oregon Administrative Rules 690-200 through 690-240.

If you have any questions regarding this letter, I may be contacted at (503) 986-0851, or by e-mail at Kristopher.R.Byrd@ wrd.state.or.us.

Sincerely,

Kristopher Byrd, Coordinator
Well Construction Program
Well Construction and Compliance Section

File

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Special Standards Request Form

REQUEST FOR WRITTEN APPROVAL TO USE CONSTRUCTION METHODS NOT INCLUDED IN OREGON ADMINISTRATIVE RULES 690-200 THROUGH 690-240

Before the request can be considered, this form must be completed. Requests shall be submitted to the Well Construction Program Coordinator, Water Resources Department, 725 Summer Street NE, Suite A, Salem OR 97301-1266. Requests may also be considered by the appropriate Regional Manager.

Date of request: 4-25-2012 Oral approval date (if applicable): _____

Bonded Well Constructor (name, license #, and mailing address): Robert D Miller #10230

PO Box 514, West Linn, OR 97068

(1) Location of Well: NE 1/4 SW 1/4 Tax lot street Section 26,
Township 2 N, Range 1 W, Multnomah County
Address at well site: 9500 N Ramsey Blvd, Portland, OR

(2) Start Card Number(s)(for work to be done): 1016396

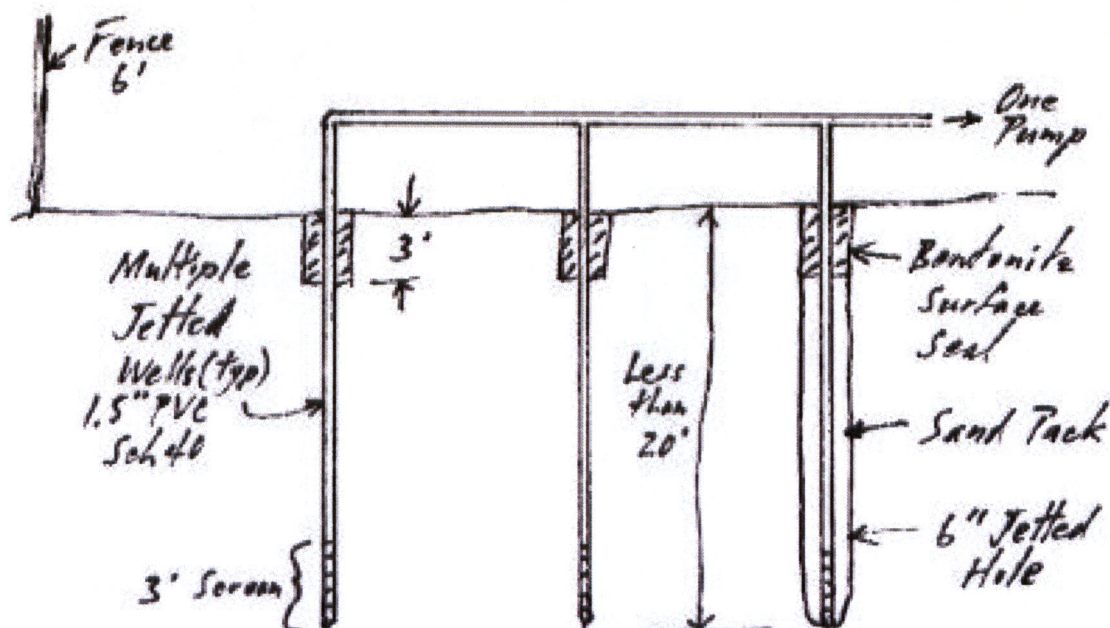

(3) Name and Address of Land Owner: City of Portland
1221 SW 4th Ave, Portland, OR 97204

(4) Distance to the nearest septic tank, drainfield, closed sewage line (if water supply well)
greater than 200 feet

(5) The unusual site conditions which necessitate this request: Not practical to flush finish,
or to place bollards around each temporary dewatering well point in single pumping system. Location is
fenced in construction area in middle of street.

(6) The proposed construction methods that the bonded well constructor believes will be adequate for this well: (attach additional pages if needed)
1. Temporary well points will be abandoned within 60 days.
2. Well points are located within a 6 feet high fenced construction site.
3. Intend to finish each well point connected to a single system pump.

- (7) Diagram showing the pertinent features of the proposed well design and construction: (attach additional pages if needed)

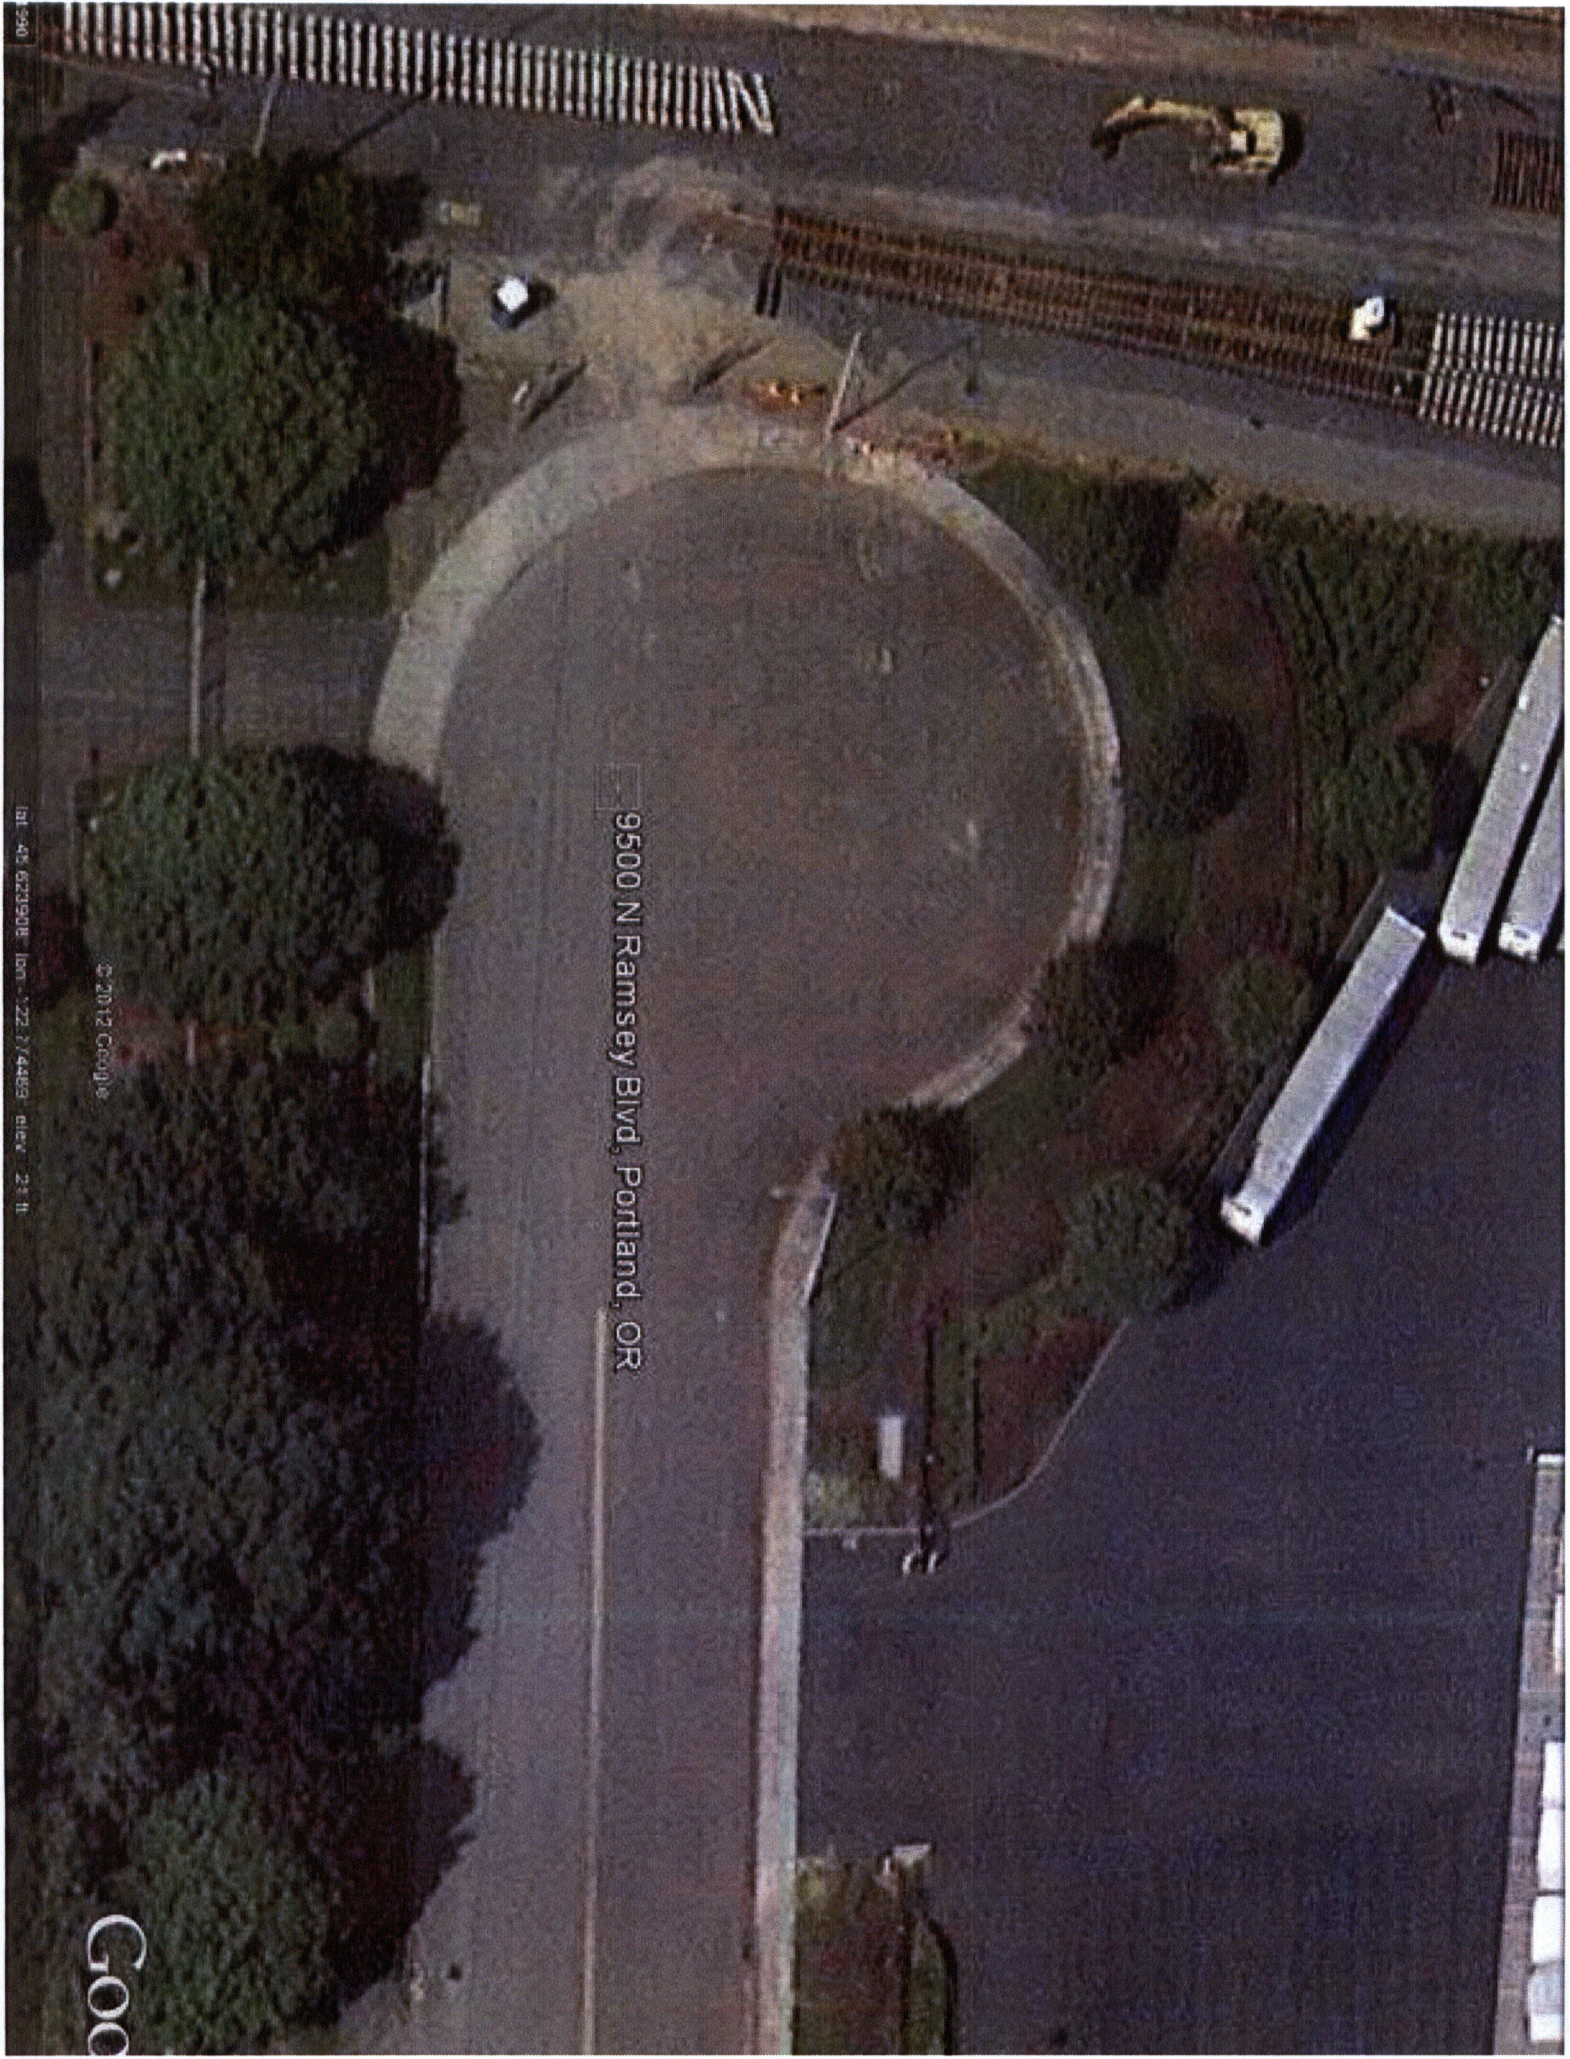

PLEASE NOTE:

- (1) The Well Construction Standards serve to protect ground water resources. By approving and issuing this special construction standard the Oregon Water Resources Department is not representing that a well constructed in accordance with this condition will maintain structural integrity or that it meets engineering standards. The well constructor/or landowner is responsible for ensuring that a well is constructed in a manner that protects ground water resources as required under Oregon Administrative Rules 690-200 through 690-240.
- (2) If it should be determined at some future date that the well, due to its construction, is allowing ground water contamination, waste or loss of artesian pressure, the undersigned shall return to the site and rectify the problem.
- (3) If oral approval was granted, a written request must be submitted to the Department either within three (3) working days of the date of oral approval or prior to the completion of the associated well work. Failure to submit a written request as described above may void prior oral approval.

I have read and understand the above information. I further attest that the information provided is accurate to the best of my knowledge.

Kris,

I just filed the Start Card, #1016396. Attached is another request, identical to one I submitted for SC#195181. This is the other side of the RR tracks on N Ramsey Blvd, but same client and job. We intend to install the well points on Friday this week.

Bob
