FINAL ORDER

Dear Steve:

The Special Standard request you submitted for owner: Canby Excavating Inc., Start Card number 181910 is hereby approved for the following: You may abandon the six inch liner in this well in place because of your inability to perforate it. The upper eight inch casing shall be thoroughly ripped, perforated or pulled prior to abandonment. All other abandonment standards must be adhered to. See Oregon Administrative Rule (OAR) 690-220-0060. Your Special Standard request form is enclosed. This Special Standard was verbally approved on October 24, 2005.

The Well Construction Standards serve to protect ground water resources. By approving and issuing this special construction standard the Oregon Water Resources Department is not representing that a well constructed in accordance with this condition will maintain structural integrity or that it meets engineering standards. The well constructor/or landowner is responsible for ensuring that a well is constructed in a manner that protects ground water resources as required under Oregon Administrative Rules 690-200 through 690-240.

If you have any questions concerning this letter, please contact me at (503) 986-0851, or by e-mail at Kristopher.R.Byrd@wrд.state.or.us.

Sincerely,

Kristopher Byrd
