## FINAL ORDER

Dear Mr. Stadel:

The Special Standards Request Form you submitted for owner: City of Portland, Bureau of Water Works, Start Card number 1074093, is hereby approved for the following: You may alter this water supply well (MULT 1264), without the 8-foot overlap of inner casing, as described on your Special Standards Request Form dated June 10, 2024. All other well construction standards apply as required under Oregon Administrative Rules 690-210. A copy of your Special Standards Request Form is enclosed.

Approval of this Special Standards Request was provided on June 10, 2024, due to communication with Jack Dahl, Portland Water Bureau, regarding the site constraints of the well location.

Verbal approval of this Special Standards Request was provided on June 10, 2024.

The Well Construction Standards serve to protect ground water resources. By approving and issuing this special construction standard the Oregon Water Resources Department is not representing that a well constructed in accordance with this condition will maintain structural integrity or that it meets engineering standards. The well constructor/or landowner is responsible for ensuring that a well is constructed in a manner that protects ground water resources as required under Oregon Administrative Rules 690-200 through 690-240.

If you have any questions regarding this letter, I may be contacted at (503) 302-8618, or by e-mail at [tommy.k.laird@water.oregon.gov](mailto:tommy.k.laird@water.oregon.gov).

Sincerely,

Tommy Laird  
Well Construction Program Coordinator  
Well Construction Section

Josh Lucas, Well Inspector, Northwest Region

**This is a FINAL ORDER other than contested case. This final order is subject to judicial review under ORS 183.484. Any petition for judicial review of the final order must be filed within the time specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.**

- Diagram and written description showing the pertinent features of the proposed well design, construction or abandonment. Include any setback constraints.

| Title   | Type    | Summary   |
|---------|---------|---|
| Drawing | DIAGRAM | The new pipe with grout behind will actually be 20" not 22" as in the drawing |

**Note:**

(1) The Well Construction Standards serve to protect ground water resources. By approving and issuing special construction standards, the Oregon Water Resources Department is not representing that a well constructed in accordance with this condition will maintain structural integrity or that it meets engineering standards. The well constructor or landowner is responsible for ensuring that a well is constructed in a manner that protects groundwater resources as required under Oregon Administrative Rules 690-200 through 690-240.

(2) If it should be determined at some future date that the well, due to its construction, is allowing groundwater contamination, waste or loss of artesian pressure, the undersigned shall return to the site and rectify the problem.

(3) If oral approval was granted, a written request must be submitted to the Department either within three (3) working days of the date of oral approval or prior to completion of the associated well work. Failure to submit a written request as described above may void prior oral approval.
