a tributary of Foley Slough for the purpose of supplemental irrigation of 282.8 acres

under Permit No. G-7766 and that said right to the use of said waters has been perfected in accordance with the laws of Oregon; that the priority of the right hereby confirmed dates from August 5, 1977 that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not exceed 3.45 cubic feet per second

or its equivalent in case of rotation, measured at the point of diversion from the well. The well is located in the SW 1/4 NW 1/4, Section 4, T23S, R31E, WM; 4,530 feet West from E 1/4 Corner, Section 4.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-eightieth of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre-feet per acre for each acre irrigated during the irrigation season of each year;

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

* While processing the application towards issuance of the permit, it appears that a clerical error was inadvertently made in limiting the quantity of water to be appropriated to 2.54 cubic feet per second. In the issuance of this certificate, the quantity of water allowed under this right has been increased to the equivalent requested or 3.45 cubic feet per second in keeping with the customary policy and determination of this office of the proper maximum limits.

The right to the use of the water for the purposes aforesaid is restricted to the lands or place of use herein described.
