This right was perfected under Permit G-11261. The date of priority is JUNE 5, 1989. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.10 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the point of diversion from the source.

The well is located as follows:

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

When required by the department, the user shall install and maintain a weir, meter or other suitable measuring device and shall keep a complete record of the amount of ground water withdrawn.

The Director may require water level or pump test results every ten years.

The use of water shall be limited when it interferes with the prior SURFACE OR GROUND WATER rights of others.

This use may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of this right or as those quantities may be subsequently reduced.

Failure to comply with any of the provisions of this right may result in action including, but not limited to restrictions on the use, civil penalties, or cancellation of the right.
