

STATE OF OREGON
COUNTY OF MARION
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

STEPHEN F. DOAK AND TURA L. ANDERSON-DOAK
13744 FRENCH PRAIRIE ROAD NE
GERVAIS, OREGON 97026

confirms the right to use the waters of A WELL in the CHAMPOEG CREEK BASIN for IRRIGATION OF 30.9 ACRES.

This right was perfected under Permit G-12143. The date of priority is JULY 31, 1992. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.39 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 SW 1/4, SECTION 20, AS PROJECTED WITHIN T. MARCHETTI DLC 90,
TOWNSHIP 5 SOUTH, RANGE 2 WEST, W.M.; 173 FEET NORTH AND 2455 FEET WEST
FROM THE SE CORNER OF DLC 90.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year. The period of allowed use is March 1 through October 31.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

NE 1/4 SW 1/4	10.7 ACRES
NW 1/4 SW 1/4	5.0 ACRES
SW 1/4 SW 1/4	2.4 ACRES
SE 1/4 SW 1/4	6.2 ACRES
NW 1/4 SE 1/4	4.2 ACRES
SW 1/4 SE 1/4	2.4 ACRES

ALL AS PROJECTED WITHIN T. MARCHETTI DLC 90
SECTION 20
TOWNSHIP 5 SOUTH, RANGE 2 WEST, W.M.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

Measurement, recording and reporting conditions:

- A. The water user shall install a meter or other suitable measuring device as approved by the Director. The water user shall maintain the meter or measuring device in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

SEE NEXT PAGE

- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The water user shall report a static water-level in the well by April 15 of each year. The measurements shall be sent to the Director, Attention: Groundwater/Hydrology Section. The initial measurement shall be made during the first March after the priority date of the water right or during the first March after the well has been constructed whichever is later. All water level measurements shall be made by a qualified individual. Qualified individuals are: certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well constructors, licensed pump installers, or the permittee/appropriator. Water levels shall be measured and reported to the nearest tenth of a foot as depth-to-water below ground surface and shall be accompanied by supporting calculations. Each measurement and set of calculations shall clearly indicate the well with which they are associated.

The second annual measurement taken after water use begins under the terms of this right shall be the reference level. The measurement shall be made annually for seven consecutive years after water use begins. When required by the Director, the water user shall obtain and report, as outlined above, additional March static water level measurements beyond the initial seven. If a well listed on this right displays a total static water-level decline of 25 or more feet over any period of years, as compared to the referenced level, the water user shall reduce the withdrawal rate from the well or discontinue use of the well. Such action shall be undertaken until the water level recovers to above the 25-foot decline level or until the Department determines that such action is not necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. Such determination could be based on the water users data or the Department's data and analysis. The Director may provide an opportunity to the water user to submit alternative measurement and reporting procedures for review and approval.

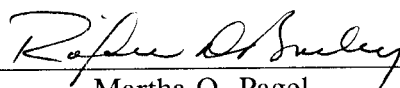

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The right to the use of the water for the above purpose is restricted to beneficial use without waste on the lands or place of use described. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use confirmed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

WITNESS the signature of the Water Resources Director, affixed MARCH 31, 1999.

Martha O. Pagel

Recorded in State Record of Water Right Certificates numbered 76064.
