The use of water allowed herein may be made only at time when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include air lines and pressure gauges or an access ports for measuring line, adequate to determine water level elevation in the wells at all times.

The user shall maintain weirs, meters, or other suitable devices, and shall keep a complete record of the amount of ground water withdrawn.

This use may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of this right or as those quantities may be subsequently reduced.

This certificate is issued to confirm a change in point of appropriation approved by transfer 7708, and NOT modified by the provisions of orders of the Water Resources Director entered MAY 02 2000, approving Transfer Applications 7739 and 8192.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed MAY 02 2000.
