If the Director notifies the water user to install a meter or other measuring device, the water user shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review of the order must be filed within the 60 days of the date of service.

Once installed, the water user shall maintain the meter or measuring device in good working order for the water user to submit alternative measuring procedures for review and approval.

The water user shall install, maintain, and operate fish screening to prevent fish from entering the diversion. The water user shall also install a fishway at the obstruction that will provide adequate upstream and downstream passage for fish. The required screen is to be in place, functional, and approved by Oregon Department of Fish and Wildlife.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream unless a fishway is provided. The water user is hereby directed to contact a ODFW Fish Passage Program coordinator, Portland, Oregon, before beginning construction of any in-channel obstruction.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The right to the use of the water for the above purpose is restricted to beneficial use without waste on the lands or place of use described. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use confirmed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

The Director finds the use of water described by this right, as conditioned, will not impair or be detrimental to the public interest. WITNESS the signature of the Water Resources Director, affixed September 3, 2002.
