Certificate Number 80144

When in the judgment of the Watermaster it becomes necessary to install measuring devices:

the pump system shall include an access port for measuring the water level;

the diversion works shall include an in-line flow meter or other suitable device for measuring the water to which the water user is entitled;

the type and plans of the measuring device be approved by the Watermaster before the beginning of construction work and that the measuring device be installed under the general supervision of said Watermaster.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

This certificate is issued to confirm a change in POINT OF APPROPRIATION approved by an order of the Water Resources Director entered JULY 27, 1987, and supersedes Certificate 44628, State Record of Water Right Certificates.

Issued July 16, 2003

Raul R. Sealeary, Director
Water Resources Department
