

STATE OF OREGON

COUNTY OF LANE

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

DONALD THIENES  
PO BOX 7  
WALTERVILLE OR 97489

confirms the right to store water perfected under the terms of Permit R-14480. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION NUMBER: R-86803

SOURCE: SPRING SEEPAGE AND SURFACE RUNOFF, TRIBUTARY TO CEDAR CREEK

STORAGE FACILITY: POND #3

PURPOSE or USE: MULTIPLE PURPOSE

MAXIMUM STORAGE VOLUME: 0.06 ACRE FOOT EACH YEAR

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: YEAR ROUND

DATE OF PRIORITY: MARCH 12, 2007

DAM LOCATION: SW ¼ NE ¼ SECTION 32, T17S, R1W, W.M.

The point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
17 S	1 W	WM	32	SW NE	830 FEET NORTH AND 600 FEET EAST FROM C1/4 CORNER, SECTION 32

The area submerged by this reservoir is as follows:

MULTIPLE PURPOSE				
Twp	Rng	Mer	Sec	Q-Q
17 S	1 W	WM	32	SW NE

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate at any time before it has issued, and after the time has expired for the completion of the appropriation under the permit, or within three months after issuance of the certificate.

## CONDITIONS OF USE

### 1. Measurement, recording and reporting:

A. The Director may require the water user to install a staff gage that measures the entire range and stage between full reservoir level and dead pool level in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E or I. Additionally, if the reservoir is located in-channel, then weirs or other suitable measuring devices may be required upstream and downstream of the reservoir, and a gated outlet valve may be required. A written waiver may be obtained from the local Watermaster if, in his judgment, the installation of the weir(s) will provide no public benefit. If the Director notifies the water user to install a staff gage, weirs or other suitable measuring devices, the water user shall install such devices within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the water user shall maintain the meter or measuring device in good working order, and shall allow the watermaster access to the measuring device. The Director may provide an opportunity for the water user to submit alternative measuring procedures for review and approval.

B. The Director may require the water user to keep and maintain a record of the amount (volume) of water used, and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water-use information, the periods of water use, and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

2. This right may be regulated if, in the judgment of the watermaster, the use of water constitutes a threat to public health or real property.
3. The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.
4. The water user shall pass all live flow outside the storage season described above.
5. The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the water user has requested and been granted a fish passage waiver by the Oregon Department of Fish and Wildlife Commission. The water user is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator before beginning construction of any in-channel obstruction.
6. This right does not provide for the appropriation of water for any out-of-reservoir uses, the maintenance of the water level, or maintaining a suitable freshwater condition. If any water is used for out-of-reservoir uses, or any live flow is appropriated to maintain either the water level or a suitable freshwater condition, a secondary water right is required.
7. Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.
8. This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
9. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
10. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

11. This right does not authorize the water user to interfere with or affect adjacent property not under the ownership of the water user.

Issued JUL 03 2008

  
Phillip C. Ward, Director  
Water Resources Department
