This right shall be further limited to the use of water only to the extent that use of water from the wells does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others. Use of water from Wells 4, 5, & 7 has potential to cause substantial interference with surface water flows of the Willamette River. Whenever water flows in the Willamette River downstream from Well 5 are insufficient to satisfy prior surface water rights, minimum stream flows or instream water rights, use of water from Wells 4, 5 and 7 will be regulated along with subsequent surface water rights of others.

The water user shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.
