

STATE OF OREGON

COUNTY OF LANE

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

MICHAEL A. HILL  
PO BOX 487  
WALTERVILLE OR 97489

confirms the right to store water perfected under the terms of Permit R-14707. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION NUMBER: R-87155

SOURCE: A SPRING, TRIBUTARY TO MCKENZIE RIVER

STORAGE FACILITY: A RESERVOIR

MAXIMUM STORAGE VOLUME: 0.02 ACRE FOOT

DATE OF PRIORITY: APRIL 23, 2008

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: YEAR-ROUND

USE: MULTIPLE PURPOSE

DAM LOCATION/AUTHORIZED POINT OF DIVERSION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
17 S	1 W	WM	32	NW NE	1565 FEET NORTH AND 150 FEET EAST FROM C1/4 CORNER, SECTION 32

The area submerged by this reservoir is as follows:

Twp	Rng	Mer	Sec	Q-Q
17 S	1 W	WM	32	NW NE

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate at any time before it has issued, and after the time has expired for the completion of the appropriation under the permit, or within three months after issuance of the certificate.

## CONDITIONS OF USE

### 1. Measurement, recording and reporting:

- A. The Director may require the water user to install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of diversion. If the Director notifies the water user to install a totalizing flow meter or other measuring device, the water user shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the water user shall maintain the meter or measuring device in good working order and shall allow the watermaster access to the meter or measuring device.
  - B. The Director may require the water user to keep and maintain a record of the amount (volume) of water used, and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water-use information, the periods of water use and the place and nature of use of water under the permit.
2. The storage of water allowed herein is subject to the maintenance of an outlet pipe, or the provision of other means to evacuate water when determined necessary by the Director to satisfy prior downstream rights.
  3. The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.
  4. Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish and/or by-pass devices are not necessary, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.
  5. This Right allows an annual appropriation not to exceed the specified volume. This right does not provide for the appropriation of water for any out-of-reservoir uses, the maintenance of the water level, or maintaining a suitable freshwater condition. If any water is used for out-of-reservoir uses, or any live flow is appropriated to maintain either the water level or a suitable freshwater condition, a secondary water right is required.
  6. Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.
  7. This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
  8. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
  9. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

10. The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

Issued JUL 30 2010

Dwight W. French  
Administrator Water Rights and Adjudications, for  
Phillip C. Ward, Director  
Water Resources Department
