

STATE OF OREGON  
COUNTY OF CLACKAMAS  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

CITY OF LAKE OSWEGO  
PO BOX 369  
LAKE OSWEGO OR 97034

confirms the right to use the waters of A WELL in the PECAN CREEK BASIN for IRRIGATION of 18.08 ACRES and DOMESTIC USE FOR ONE HOUSEHOLD.

This right was perfected under Permit G-15222. The date of priority is JANUARY 31, 2002. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.24 CUBIC FOOT PER SECOND (CFS), being 0.23 for IRRIGATION and 0.01 CFS for DOMESTIC USE, or its equivalent in case of rotation, measured at the well.

The period of use is April 1 through September 30 of each year for IRRIGATION and YEAR ROUND FOR DOMESTIC USE.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
2 S	1 E	WM	16	NE SE	1430 FEET NORTH & 1240 FEET WEST FROM SE CORNER, SECTION 16

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

A description of the place of use is as follows:

DOMESTIC				
Twp	Rng	Mer	Sec	Q-Q
2 S	1 E	WM	16	SE SE

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
2 S	1 E	WM	16	NE SE	8.38
2 S	1 E	WM	16	NW SE	7.06
2 S	1 E	WM	16	SW SE	0.95
2 S	1 E	WM	16	SE SE	1.69

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.

- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The well(s) shall produce groundwater from no shallower than 340 below land surface.

- (1) Use of water from the well, as allowed herein, shall be controlled or shut off if the well displays:
  - (a) An average water level decline of three or more feet per year for five consecutive years; or
  - (b) A total water level decline of fifteen or more feet; or
  - (c) A hydraulic interference decline of fifteen or more feet in any neighboring well providing water for senior exempt uses or wells covered by prior rights.
- (2) The water user shall submit an annual report of water used to the Department by December 1 of each year.
- (3) The water user shall be responsible for complying with each of the following requirements for measuring water levels in the well.
  - (a) A water level measurement shall be made each year during the period March 1 through March 31.
  - (b) All water level measurements shall be made by a qualified individual. Qualified individuals are certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well constructor, licensed pump installer, or the water user.
  - (c) Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment shall be available from the Department.
  - (d) The water user shall submit a record of the measurement to the Department on a form available from the Department. The record of measurement shall include both measurements and calculations, shall include a certification as to their accuracy signed by the individual making the measurements, and shall be submitted to the Department within 90 days from the date of measurement. The Department shall determine when any of the declines cited in section (1) are evidenced by the well measurement required in section (3).

The use of water under terms of this certificate is subject to regulation concurrent with or prior to regulation of a senior right competing for water from the same source when regulation is the result of water level declines that exceed limits specified in the senior right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years.

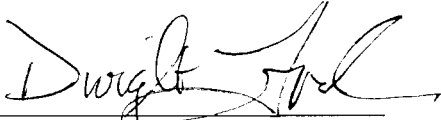

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Issued MAR 01 2013.

Dwight W. French  
Water Right Services Administrator, for  
Phillip C. Ward, Director  
Water Resources Department
