confirms the right to use the waters of WELL #3 and WELL #4 in MILL CREEK BASIN for IRRIGATION of 19.4 ACRES and SUPPLEMENTAL IRRIGATION of 19.3 ACRES.

This right was perfected under Permit G-12802. The date of priority is APRIL 20, 1995. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.20 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
1 N	13 E	WM	6	SW NE	ORIGINAL (WELL #3) - 1122 FEET NORTH AND 400 FEET EAST FROM C1/4 CORNER, SECTION 6
1 N	13 E	WM	6	NW SE	NEW (WELL #4) - 20 FEET SOUTH AND 376 FEET EAST FROM C1/4 CORNER, SECTION 6

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use is as follows:

IRRIGATION						
Twp	Rng	Mer	Sec	Q-Q	Acres	Tax Lot
1 N	13 E	WM	6	SW NE	19.4	1500

SUPPLEMENTAL IRRIGATION						
Twp	Rng	Mer	Sec	Q-Q	Acres	Tax Lot
1 N	13 E	WM	6	SW NE	19.3	1600

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Measurement, recording and reporting conditions:

- A. The water user shall maintain and operate the existing measurement device on Well #3 and shall make such improvements as may be required by the Department. The water user shall maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted from Well #4.
- B. The water user shall maintain the meter or measuring device in good working order.
- C. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

Water shall be acquired from the same aquifer (water source) as the original point of appropriation (WASC 2203).

The quantity of water diverted at the new point of appropriation (well), together with that diverted at the old point of appropriation, shall not exceed the quantity of water available from the original point of appropriation.

If substantial interference with a senior water right occurs due to withdrawal of water from the well listed on the certificate, then use of water from the well shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

In the event of a request for a change in point of appropriation, an additional point of appropriation, or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works shall be equipped with a usable access port, and may also include an air line and pressure gauge to determine the water level elevation in the well at all times.

The Director may require water level or pump tests every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

This certificate is issued to confirm an ADDITIONAL POINT OF APPROPRIATION approved by an order of the Water Resources Director entered MAY 13, 2009, at Special Order Volume 77, Page 732, approving Transfer Application 8733, and supercedes Certificate 83495, State record of Water Right Certificates.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Issued OCT 04 2013.
