

STATE OF OREGON

COUNTY OF CURRY

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

COVENTRY FARMS LLC  
PO BOX 1579  
SANTA CLARITA CA 91386-1579

confirms the right to store water perfected under the terms of Permit R-14877. The amount of water to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION NUMBER: R-87021

SOURCE: UNNAMED DRAINAGE AND RUNOFF, TRIBUTARIES TO BOULDER CREEK

STORAGE FACILITY: RESERVOIR 2

MAXIMUM VOLUME: 2.0 ACRE FEET

DATE OF PRIORITY: OCTOBER 31, 2007

MAY BE APPROPRIATED AS FOLLOWS: DECEMBER 1 THORUGH MARCH 31

USE: MULTIPLE PURPOSE

Dam Location/ Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
31 S	15 W	WM	33	NE NE	215 FEET SOUTH AND 1150 FEET WEST FROM NE CORNER, SECTION 33

The area submerged by this reservoir is as follows:

MULTIPLE PURPOSE				
Twp	Rng	Mer	Sec	Q-Q
31 S	15 W	WM	33	NE NE

Measurement, recording and reporting conditions:

- A. The Director may require the water user to install a staff gage or other suitable measuring device(s) as approved by the Director. If the Director notifies the water user to install a measuring device(s), the water user shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the water user shall maintain the devices in good working order and shall allow the Watermaster access to the meter or measuring devices. The Director may provide an opportunity for the water user to submit alternative measuring procedures for review and approval.
  
- B. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water-use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir) or the provision of other means determined by the Department capable of evacuating the water when necessary.

The water user shall pass all live flow outside the storage season described above.

The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

This right allows an annual appropriation (not to exceed the specified volume). This right does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The use may be restricted if the quality of the source stream decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Issued FEB 19 2014

  
Dwight W. French  
Administrator, Water Right Services, for  
Phillip C. Ward, Director  
Oregon Water Resources Department
