The quantity of water diverted at the new points of diversion, together with that diverted at the old points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.

The water user shall maintain a headgate, or an in-line flow meter for measuring and recording the quantity of water diverted at all points of diversion. When required by the Department the water user or irrigation district shall operate and maintain the headgate and measuring device, as needed. The Watermaster may operate the headgate and monitor the accuracy of the measuring device, as needed.

The water user shall begin a monitoring program that shall include the rate and duty of water appropriated. The flow data shall be available to the Watermaster promptly on request. The water user shall supply to the Watermaster promptly upon request annual report of water use and monitoring data. Monitoring data shall be provided to the Watermaster in a reasonable summary format, approved by the Watermaster, upon request.

Water shall be acquired from the same surface source as the original points of diversion.

The water user shall maintain a fish screen on the pump locations.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to the existing minimum flow policies established by the Water Policy Review Board.

This certificate is issued to confirm ADDITIONAL POINTS OF DIVERSION approved by an order of the Water Resources Director entered MAY 15, 2002, at Special Order Volume 56, Page 305, approving Transfer Application 8430, supercedes Certificate 49495, State record of Water Right Certificates.
