

STATE OF OREGON

COUNTY OF CROOK

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

MILL CREEK LAND LLC
7900 NE MILL CREEK RD
PRINEVILLE OR 97754

confirms the right to use the waters of FOUR WELLS in the OCHOCO CREEK BASIN for IRRIGATION of 30.6 ACRES AND SUPPLEMENTAL IRRIGATION of 191.8 ACRES.

This right was perfected under Permit G-12971. The date of priority is FEBRUARY 29, 1996. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.49 CUBIC FOOT PER SECOND (CFS), further limited to no more than 0.38 CFS for IRRIGATION OF 30.6 ACRES, or its equivalent in case of rotation, measured at the well.

The period of use is February 1 through November 30.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
14 S	17 E	WM	23	SE SE	WELL 1 - 528 FEET NORTH AND 26 FEET WEST FROM SE CORNER, SECTION 23
14 S	17 E	WM	23	SE SE	WELL 2 - 431 FEET NORTH AND 441 FEET WEST FROM SE CORNER, SECTION 23
14 S	17 E	WM	23	SE SE	WELL 3 - 304 FEET NORTH AND 900 FEET WEST FROM SE CORNER, SECTION 23
14 S	17 E	WM	23	SE SE	WELL 4 - 330 FEET NORTH AND 1014 FEET WEST FROM SE CORNER, SECTION 23

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-foot per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use is as follows:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
14 S	17 E	WM	26	NE NE	0.2
14 S	17 E	WM	26	NW NE	5.3
14 S	17 E	WM	26	SW NE	7.8
14 S	17 E	WM	26	SE SW	6.3
14 S	17 E	WM	26	SW SE	11.0

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

SUPPLEMENTAL IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
14 S	17 E	WM	26	NE NE	4.0
14 S	17 E	WM	26	NW NE	5.0

14 S	17 E	WM	26	SW SE	4.1
14 S	17 E	WM	35	NW NW	1.3

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device as approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The right is limited to any deficiency in the available supply of any prior right existing for the same land.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

Use of water under authority of this right may be regulated if analysis of data available after the right is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

To monitor the effect of water use from the wells authorized under this right, the Director may require the water user to make and report annual static water level measurements. The static water levels shall be measured in the month of March. The measurements may be required in a different month. Reports shall be submitted to the Department within 30 days of measurement. If the measurement requirement is stopped, the Director may restart it at any time.

The reference levels against which any future measurements will be compared for the four wells are:

Well	Reference Level (feet above or below land surface)
Well 1	8.93 feet above land surface
Well 2	6.12 feet above land surface
Well 3	8.5 feet below land surface
Well 4	16.5 feet below land surface

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued SEP 30 2015

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
