NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The water user shall maintain, in good working order, a totalizing flow meter, as identified in OAR 690-507-645, or other suitable measuring device as approved by the watermaster at each diversion point. The water user shall keep a complete record of the amount of water used each month. The water user shall submit a report which includes the recorded water use measurements to the Department at its request. The water user may be required to report annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

The storage of water allowed herein is subject to the maintenance of an outlet pipe, with a minimum diameter of eight inches, or the provision of other means to evacuate water when determined necessary for public safety, to satisfy prior downstream users rights, or pass natural inflow as determined by the Water Resources Director.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plans.

The storage of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued NOV 13 2015
