Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or measuring device, as approved by the Director, in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided, however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.
- D. For the authorized points of diversion on Cow Creek and the South Umpqua River and the points of withdrawal for water released from Galesville Reservoir, where the amount of water authorized for diversion (withdrawal) is less than 0.10 cfs a measuring device shall not be required at this time.

For those points of withdrawal for water released from Galesville Reservoir where the water is being used as a supplemental supply on existing rights of record, a measuring device shall not be required at this time.

The Director may, in the future, require the water user to install a meter or other suitable measuring device as approved by the Director. If the Director notifies the water user to install a meter or other measuring device, the water user shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the water user shall maintain the meter or measuring device in good working order and shall allow the watermaster access to the meter or measuring device. The Director may provide an opportunity for the water user to submit alternative measuring procedures for review and approval.

The use of water under this right is subject to the terms and conditions of contract No.s I-88-8, I-88-9, I-88-10, I-88-11, I-88-12, I-88-13, I-88-14, I-88-15, I-88-16, I-88-17, I-88-18, I-88-19, I-88-20, I-88-22, I-89-1, I-89-3, I-89-4, I-89-5, I-89-6, I-89-8, I-90-1, I-90-3, I-90-7, and I-90-9 (or satisfactory replacements) between Douglas County and individual water users, and copies of which are on file in the records of the Water Resources Department.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

At the points of diversion on Cow Creek and the South Umpqua River and at the points of withdrawal for water released from Galesville Reservoir the water user shall maintain and operate fish screening to prevent fish from entering the proposed diversion.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject streams without providing a fishway to ensure adequate upstream and downstream passage for fish. The water user is hereby directed to contact the Oregon Department of Fish and Wildlife Fish Passage Coordinator, Portland, Oregon before beginning construction of any in-channel obstruction.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

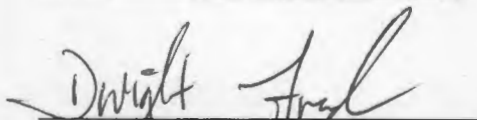

This certificate describes that portion of the water right confirmed by Certificate 91507, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered MAR 2 02017, approving Transfer Application T-12496.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.
