The use of water allowed herein may be made only at time when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include air lines and pressure gauges or access ports for measuring line, adequate to determine water level elevation in the wells at all times.

The water user shall maintain weirs, meters or other suitable devices and shall keep a complete record of the amount of groundwater withdrawn.

This use may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of this right or as those quantities may be subsequently reduced.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm a change in POINT OF APPROPRIATION approved by an order of the Water Resources Director entered May 2, 2000, at Special Order Volume 54, Page 309, approving Transfer Application 7739, and together with Certificate 76525, supercedes Certificate 68756, as modified by Transfer Application 7708, at Special Order Volume 51, Page 640.
