The well(s) shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include the proper capping and control valves to prevent the waste of ground water.

The water user shall maintain a weir, meter, or other suitable measuring device at the new point of appropriation, and shall keep a complete record of the amount of ground water withdrawn.

The combined quantity of water diverted at the new point of appropriation (well), together with that diverted at the old point of appropriation, shall not exceed the maximum rate and duty allowed under Permit G-6881 described as follows:
