

STATE OF OREGON
 COUNTY OF CLACKAMAS
 CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

GUIDE DOGS FOR THE BLIND INC.
 32901 SE KELSO RD
 BORING OR 97009

confirms the right to the use of water perfected under the terms of Permit G-11621. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-13178

SOURCE OF WATER: A WELL IN THE NORTH FORK DEEP CREEK BASIN

PURPOSE or USE: COMMERCIAL USE AND IRRIGATION OF 3.28 ACRES

MAXIMUM RATE: NOT TO EXCEED 200 GALLONS PER MINUTE (GPM), BEING 200 GPM FOR COMMERCIAL USE AND 18.4 GPM FOR IRRIGATION

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31 FOR IRRIGATION AND YEAR ROUND FOR COMMERCIAL USE

DATE OF PRIORITY: NOVEMBER 9, 1992

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
2 S	4 E	WM	4	SE SW	NORTH 75 DEGREES 46 MINUTES 42 SECONDS EAST, 1713.7 FEET FROM SW CORNER, SECTION 4

The amount of water used for irrigation under this right, together with the amount secured under any other right existing on the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
2 S	4 E	WM	4	SE SW	3.28

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The construction and maintenance practices used shall assure that the natural seals that exist between discrete aquifers at the site are not compromised during or after construction of the well. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The source of water allowed herein is limited to a confined aquifer with the Columbia River Basalt geologic unit only.

Groundwater production shall be from an aquifer no shallower than 1100 feet below land surface.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The water user shall monitor and report the impact of water use under this right in accordance with the approved water level monitoring plan on file with the Department. If any well listed on this right displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.
