

STATE OF OREGON  
COUNTY OF DESCHUTES  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

CASCADE ACADEMY OF CENTRAL OREGON  
19860 TUMALO RESERVOIR RD  
BEND OR 97703

confirms the right to the use of water perfected under the terms of Permit G-16947. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-17341

SOURCE OF WATER: A WELL IN DESCHUTES RIVER BASIN

RATE: 0.053 CUBIC FOOT PER SECOND (CFS), BEING 0.037 CFS FOR IRRIGATION OF 3.0 ACRES AND 0.016 CFS FOR COMMERCIAL USE, FURTHER LIMITED TO 15.75 ACRE-FEET (AF), BEING 9.0 AF FOR IRRIGATION AND 6.75 AF FOR COMMERCIAL USE

DATE OF PRIORITY: APRIL 5, 2010

USE: IRRIGATION OF 3.0 ACRES AND COMMERCIAL USE

PERIOD OF USE: IRRIGATION – APRIL 1 THROUGH OCTOBER 31  
COMMERCIAL USE – SEPTEMBER 1 THROUGH JUNE 30

Authorized Point of Appropriation:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
17 S	12 E	WM	6	SW NE	WELL 1 – 595 FEET NORTH AND 575 FEET EAST FROM C1/4 CORNER, SECTION 6

Authorized Place of Use:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
17 S	12 E	WM	6	SW NE	3.0

COMMERCIAL USE				
Twp	Rng	Mer	Sec	Q-Q
17 S	12 E	WM	6	SW NE

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

**Measurement, Recording and Reporting Conditions:**

- A. The water user shall maintain, in good working order, a totalizing flow meter at each point of appropriation. The water user shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water-use measurements to the Department annually, or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where any meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The water user shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

The well shall produce ground water from no shallower than 100 feet below land surface.

**Groundwater Mitigation Conditions:**

- 1. Mitigation Obligation: 6.4 AF of mitigation water in the General Zone of Impact, located anywhere in the Deschutes Basin above the Madras gage, which is located on the Deschutes River below Lake Billy Chinook.
- 2. Mitigation Source: 6.4 mitigation credits from mitigation project MP-126, established by instream water right certificate 93237, within the General Zone of Impact.
- 3. Mitigation water must be legally protected instream in the General Zone of Impact for the life of this right and subsequent certificate(s). Regulation of the use and/or cancellation of this right, or subsequent certificate(s) will occur if the required mitigation is not maintained.
- 4. The water user shall provide additional mitigation if the Department determines that average annual consumptive use of the subject appropriation has increased beyond the originally mitigated amount.
- 5. If mitigation is from a secondary right for stored water from a storage project not owned or operated by the water user, the use of water under this right is subject to the maintenance and terms and conditions of a valid contract or satisfactory replacement, with the owner/operator of the storage project, a copy of which must be on file in the records of the Water Resources Department.
- 6. Failure to comply with these mitigation conditions shall result in the Department regulating this ground water right, or subsequent certificate(s), and proposing to cancel this ground water right, or subsequent certificate(s).

**Scenic Waterway Condition:**

Use of water under authority of this right may be regulated if analysis of data available after the right is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right, or as those quantities may be reduced subsequently. However, the use of groundwater allowed under the terms of this right will not be subject to regulation for Scenic Waterway flows, provided the required mitigation is maintained.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

The Director may require water level or pump test results every ten years thereafter.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best-practice technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged comprehensive land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued         JUN 14 2018        

Dwight French  
Water Right Services Division Administrator, for  
Thomas M. Byler, Director  
Oregon Water Resources Department
