The additional duty as allowed herein is for the irrigation of blueberries. Should the water user change the type of crop, the water user must submit evidence that demonstrates additional duty is necessary for the beneficial irrigation of the new crop. If review of the evidence demonstrates to the satisfaction of the Director that such additional duty is necessary and constitutes beneficial use without waste, the additional duty may be allowed provided all other right conditions are met. The amount of water used under this right shall not exceed 4.0 acre-feet per acre.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device as approved by the Director in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The use of water under this right is subject to the terms and conditions of contract I-94-6, dated March 1, 2001, or a satisfactory replacement, between Douglas County and the water user, a copy of which is on file in the records of the Water Resources Department.

The water user shall maintain and operate fish screening as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the diversion.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued OCT 26 2018
