

STATE OF OREGON  
COUNTY OF UMATILLA  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

STATE OF OREGON  
WATER RESOURCES DEPARTMENT

confirms the right to use the waters of the LITTLE WALLA WALLA RIVER, a tributary of the WALLA WALLA RIVER, for instream use for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.

The right was confirmed by decree of the Circuit Court of the State of Oregon for Umatilla County. The decree is of record at Salem, in the Order Record of the Water Resources Director, in Volume 12 at Page 9. The dates of priority are 1887, 1888, and 1900, plus one minute.

The amount of water to which this right is entitled is limited to an amount actually beneficially used, and shall not exceed 0.163 CUBIC FEET PER SECOND (cfs) as described below.

The description of the stream reach in which flows are to be maintained is as follows:

Walla Walla River from the authorized point of diversion, also known as the Little Walla Walla River headgate diversion, located at approximately RM 45.4:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 N	35 E	WM	12	SW NE	1030 FEET NORTH AND 900 FEET EAST FROM THE CENTER OF SECTION 12

To the Oregon-Washington state line at approximately RM 40.0. The instream right shall allow the use and protection of flows as follows:

Priority Date	Period Protected Instream	Rate (CFS)
1887, <i>plus one minute</i>	April 1 through October 31	0.043
1888, <i>plus one minute</i>	April 1 through October 31	0.061
1900, <i>plus one minute</i>	April 1 through October 31	0.059
Total		0.163

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Water rights upstream of the original point of diversion shall not be subject to regulation for flows in excess of the quantities to which this instream water right is entitled at the original point of diversion.

Within the described instream reach, stream channel losses and gains calculated based on available data and the use of senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion and within the specified stream reach from the authorized point of diversion at approximately RM 45.4 and whether the described instream flows below the point of diversion may be adjusted. If adjusted, instream flows from immediately below the point of diversion to the Oregon-Washington state line at approximately RM 40.0 may not exceed the quantities specified at the point of diversion.

The instream right established by this conserved water application shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to instream water rights established pursuant to ORS 537.348 or 537.470 unless otherwise specified by a subsequent order establishing a new instream water right.

The right is subject to all other terms and conditions of Certificates 92402, 92403, 92405, and 92538, and any related decree.

This certificate is issued to confirm an ALLOCATION OF CONSERVED WATER approved by an order of the Water Resources Director recorded in Special Order Volume 112, Page 51, approving Conserved Water Application CW-14 which modifies Certificates 92402, 92403, 92405, and 92538, State Record of Water Rights.

WITNESS the signature of the Water Resources Director, affixed DEC 12 2018.
