

STATE OF OREGON
COUNTY OF UMATILLA
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

STATE OF OREGON
WATER RESOURCES DEPARTMENT

confirms the right to use the waters of the LITTLE WALLA WALLA RIVER, a tributary of the WALLA WALLA RIVER, for instream use for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.

The right was confirmed by decree of the Circuit Court of the State of Oregon for Umatilla County. The decree is of record at Salem, in the Order Record of the Water Resources Director, in Volume 12 at Page 9.

The amount of water to which this right is entitled is limited to an amount actually beneficially used, and shall not exceed 0.078 CUBIC FEET PER SECOND (cfs) as described below.

The description of the stream reach in which flows are to be maintained is as follows:

Walla Walla River from the authorized point of diversion, also known as the Little Walla Walla River headgate diversion, located at approximately RM 45.4:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 N	35 E	WM	12	SW NE	1030 FEET NORTH AND 900 FEET EAST FROM THE CENTER OF SECTION 12

To the Oregon-Washington state line at approximately RM 40.0. The instream right shall allow the use and protection of flows as follows:

Priority Date	Period	Rate (cfs)
1886	April 1 through October 31	0.038
1898	April 1 through October 31	0.040
Total		0.078

Water rights upstream of the original point of diversion shall not be subject to regulation for flows in excess of the quantities to which this instream water right is entitled at the original point of diversion.

Within the described instream reach, stream channel losses and gains calculated based on available data and the use of senior appropriators will determine the amount of water to which this right is

entitled downstream from the original point of diversion and within the specified stream reach from the authorized point of diversion at approximately RM 45.4 and whether the described instream flows below the point of diversion may be adjusted. If adjusted, instream flows from immediately below the point of diversion to the Oregon-Washington state line at approximately RM 40.0 may not exceed the quantities specified at the point of diversion.

The instream right established by this conserved water application shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to instream water rights established pursuant to ORS 537.348 or 537.470 unless otherwise specified by a subsequent order establishing a new instream water right.

The right is subject to all other terms and conditions of Certificates 92440 and 92473, and any related decree.

This certificate is issued to confirm an ALLOCATION OF CONSERVED WATER approved by an order of the Water Resources Director recorded in Special Order Volume 112, Page 158, approving Conserved Water Application CW-28. This certificate together with Certificates 94139, 94140, 94142, 94143, a portion of Certificate 94144, and portions of the Applicant's portions of conserved water under CW-27 and CW-28, supersedes Certificates 92440 and 92473.

WITNESS the signature of the Water Resources Director, affixed DEC 20 2018.

Dwight French, Water Right Services Administrator, for
THOMAS M. BYLER, DIRECTOR
