

STATE OF OREGON
COUNTY OF WHEELER
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

THREE VALLEYS RANCH LLC
PO BOX 798
HEPPNER OR 97836

confirms the right to store water perfected under the terms of Permit R-14919. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: R-87609

SOURCE OF WATER: SPRINGS (BENEATH RESERVOIR), TRIBUTARIES OF STAHL CANYON

STORAGE FACILITY: WINELAND LAKE

PURPOSE OR USE OF THE STORED WATER: FISH LIFE, RECREATION, LIVESTOCK, AND FIRE PROTECTION

MAXIMUM VOLUME: 165.77 ACRE-FEET EACH YEAR

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: NOVEMBER 1 THROUGH JUNE 30

DATE OF PRIORITY: MAY 11, 2010

The dam is located as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	Measured Distances
7 S	24 E	WM	5	NW NW	4	1150 FEET SOUTH AND 2200 FEET WEST FROM N1/4 CORNER, SECTION 5

The area submerged by this reservoir is as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot
7 S	24 E	WM	5	NW NW	4
7 S	24 E	WM	5	SW NW	1

Measurement, recording, and reporting conditions:

- A. The water user shall maintain the staff gage that measures the entire range and stage between full reservoir level and dead pool storage in good working order. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E or I.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

- B. The water user shall allow the water master access to the device; provided however, where any device is located within a private structure, the water master shall request access upon reasonable notice.
- C. The water user shall keep a complete record of the amount of water stored each month and shall submit a report which includes the recorded water-storage measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- D. The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

The use of water allowed herein may be made only at times when waters from the reservoir, Wineland Lake, would not otherwise flow into a tributary of the John Day River or sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.

The water user shall pass all live flow outside the storage season described above.

The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.

This right allows an annual appropriation (not to exceed to specified volume). This right does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

The water user shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the water user has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The water user is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at this time, the water user may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the diversion, and to provide adequate upstream and downstream passage for fish.

Diversion of water under this right is contingent on designated scenic waterway flows being met downstream. The user is required to monitor streamflow at John Day River at McDonald Ferry, Oregon, gage 14048000, and discontinue diversion when the flows specified below are unmet at the gage. At the discretion of the Director, the location and nature of streamflow monitoring required to protect scenic waterway flows is subject to change. In addition, the watermaster may regulate diversion under this right if it is determined by the Department that the flows listed below are unmet at the gage.

John Day Scenic Waterway	
Month	Minimum Flow (cfs)
November	500
December	500
January	500
February	1000
March	2000
April	2000
May	2000
June	2000

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to store water for the above purpose is restricted to beneficial use at the place of use described.

Issued JAN 18 2019

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
