

STATE OF OREGON  
COUNTY OF DESCHUTES  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

PATRICK DRENNEN  
FRANCES DRENNEN  
17461 FORKED HORN DR  
SISTERS OR 97759

confirms the right to use the waters of a WELL in the DESCHUTES RIVER BASIN for IRRIGATION of 2.0 ACRES.

This right was perfected under Permit G-12549. The date of priority is AUGUST 11, 1993. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.025 CUBIC FOOT PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
15 S	11 E	WM	19	NW NE	665 FEET SOUTH AND 908 FEET EAST FROM N1/4 CORNER, SECTION 19

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The period of use under this right is limited to March 1 through October 31 of each year. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
15 S	11 E	WM	19	NW NE	2.0

Measurement, recording and reporting conditions:

- A. The water user shall maintain a totalizing flow meter, or other suitable measuring device as approved by the Director, in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the water master shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The quantity of water diverted at the new point of appropriation (well), shall not exceed the quantity of water lawfully available at the original point of appropriation described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
16 S	11 E	WM	7	SE NE	806.78 FEET NORTH & 941.70 FEET WEST FROM E ¼ CORNER, SECTION 7

Water shall be acquired from the same source aquifer (water source) as the original point of appropriation.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this right may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The Department may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The right to the use of the water for the above purpose is restricted to beneficial use without waste on the lands or place of use described. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use confirmed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

This certificate is issued to confirm a change in POINT OF APPROPRIATION AND PLACE OF USE approved by an order of the Water Resources Director entered September 27, 2011, at Special Order Volume 85, Page 461, approving Transfer Application 11204, and together with Certificate 87232, supercedes Certificate 86873, State record of Water Right Certificates.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Issued       JUL 12 2019      .

Dwight French  
Water Right Services Division Administrator, for  
Thomas M. Byler, Director  
Oregon Water Resources Department
