Any use of water under this right beyond 18.54 CFS is subject to the fish persistence conditions as identified in the Final Order for Extension of Time for Permit S-49497 entered August 24, 2012, at Special Order Volume 101, Page 153.

The right granted herein is limited to the amount which can be applied to beneficial use and shall not exceed 36.6 CFS measured at the point of diversion, or its equivalent in case of rotation with other water users, from the Columbia River.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described; however, water may be applied to lands which are not specifically described above, provided the holder of this right complies with ORS 540.510(3).

This certificate is issued as the final increment of partial perfection of Permit S-49497, for 36.6 CFS, as described in OAR 690-320-0040 and by an order of the Water Resources Director entered March 31, 2020 at Special Order Volume 116, Pages 312-313.
