

STATE OF OREGON
 COUNTY OF YAMHILL
 CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

DOMAINE DROUHIN OREGON INC.
 PO BOX 700
 DUNDEE OR 97115

confirms the right to the use of water perfected under the terms of Permit G-17741. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-12684

SOURCE OF WATER: WELL 1 AND WELL 2 IN WILLAMETTE BASIN

PURPOSE OR USE: IRRIGATION OF 1.3 ACRES, DEFICIENCY OF RATE FOR IRRIGATION OF 143.4 ACRES UNDER PERMIT G-17740, AND INDUSTRIAL USE

MAXIMUM RATE: 0.19 CUBIC FOOT PER SECOND (CFS), BEING 0.12 CFS FROM WELL 1 FOR IRRIGATION AND INDUSTRIAL USE AND 0.07 CFS FROM WELL 2 FOR IRRIGATION

DATE OF PRIORITY: OCTOBER 1, 1991

THE WELLS ARE LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances	Use
3 S	3 W	WM	34	SW SW	WELL 1 - 1450 FEET SOUTH AND 215 FEET WEST FROM SE CORNER, DLC 55	IRRIGATION INDUSTRIAL USE
4 S	3 W	WM	3	NW NW	WELL 2 - 290 FEET SOUTH AND 685 FEET EAST FROM NW CORNER, SECTION 3	IRRIGATION

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year. The period of use allowed for irrigation is April 1 through October 31.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

The water user shall obtain a static water-level measurement for each well during March of each year and report the measurement to the Department within thirty days. The measurement shall be made by a certified water-rights examiner, register professional geologist, certified engineering geologist, professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board, licensed land surveyor or the water user. Water levels shall be reported as depth-to-water below ground level and shall be accompanied by supporting calculations. Reports and calculations

shall be provided to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements. If a well listed on this right displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The reference level for water-level declines shall be the second annual measurement taken after water use begins under the terms of this right. The water user shall in no instance allow excessive decline to occur with the aquifer as a result of use under this right.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued MAY 27 2022

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
