The quantity of water allowed herein, together with any prior right for the same wells, shall not exceed the maximum rate allowed by this right.

The quantity of water diverted at the new additional point of appropriation (China Hat #3), together with that diverted at the original points of appropriation (Dyer #1, Parrell Rd, Riverbend #1, Riverbend #2, Riverbend #3, Tekampe #3, Tekampe #2, Tekampe #1, China Hat #1, China Hat #2, Deschutes River Woods, Conestoga, Sundance #2), shall not exceed the quantity of water lawfully available from the original points of appropriation (Dyer #1, Parrell Rd, Riverbend #1, Riverbend #2, Riverbend #3, Tekampe #3, Tekampe #2, Tekampe #1, China Hat #1, China Hat #2, Deschutes River Woods, Conestoga, Sundance #2).

For thirteen original wells:

Measurement, recording and reporting conditions:

- A. The water user shall maintain the measuring devices in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

For one new well, China Hat #3:

Water use measurement conditions:

- A. The water user shall maintain, in good working order, a totalizing flow meter or other suitable measuring device as approved by the Director at each new point of appropriation, and shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with these authorized diversions, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

The water user shall monitor and report the impact of water use under this right to the Department as described in the plan approved by the Department. If a well listed on this right displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the WATER USER shall discontinue use of, or reduce the rate or volume of withdrawal from the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the WATER USER'S or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The WATER USER shall in no instance allow excessive decline to occur within the aquifer as a result of use under this certificate.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this certificate, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

Use of water under authority of this certificate may be regulated if analysis of data available after the certificate is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described; however, water may be applied to lands which are not specifically described above, provided the holder of this right complies with ORS 540.510(3).

The right to the use of the water is subject to all other conditions and limitations contained in prior Certificate 84975 and any related decrees.

This certificate is issued to confirm a change in ADDITIONAL POINT OF APPROPRIATION approved by an order of the Water Resources Director entered NOVEMBER 18, 2020, at Special Order Volume 118, Page 57, approving Transfer Application T-13353, supersedes Certificate 84975, State Record of Water Right Certificates.
