THIS CERTIFICATE ISSUED TO

STATE OF OREGON
WATER RESOURCES DEPARTMENT

confirms the right to use the waters of the SOUTH SANTIAM RIVER, a tributary of WILLAMETTE RIVER, for INSTREAM USE for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, and other ecological values.

This right was perfected under Permit S-20904. The date of priority is DECEMBER 10, 1951. The amount of water to which this right is entitled is limited to an amount actually beneficially used, and shall not exceed 0.01 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the point of diversion, from APRIL 1 THROUGH SEPTEMBER 30, further limited to an annual volume of 3.64 ACRE-FEET.

The description of the stream point in which flows are to be maintained is the location of the diversion authorized previously under Certificate 26595, as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
13 S	1 W	WM	2	NE SW	1280 FEET NORTH AND 1850 FEET EAST FROM THE NE CORNER OF DLC 38

Water rights upstream of the original point of diversion shall not be subject to regulation for flows in excess of the quantities to which this instream water right is entitled at the original point of diversion.

Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original points of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion within the specified stream reach.
