

STATE OF OREGON
 COUNTY OF MARION
 CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

ANDREW P. ANGSTROM
 RENEE A. ANGSTROM
 935 78TH AVE NE
 SALEM OR 97317

confirms the right to the use of water perfected under the terms of Permit G-17537. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-18001
 SOURCE OF WATER: WELL 1 IN LITTLE PUDDING RIVER BASIN
 PURPOSE or USE: IRRIGATION OF 39.3 ACRES
 MAXIMUM RATE: 0.49 CUBIC FOOT PER SECOND
 PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31
 DATE OF PRIORITY: FEBRUARY 19, 2015

WELL LOCATION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
7 S	2 W	WM	23	SE SW	455 FEET NORTH AND 1750 FEET EAST FROM SW CORNER, SECTION 23

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q	Acres
7 S	2 W	WM	22	SE SE	8.3
7 S	2 W	WM	23	SW SW	14.0
7 S	2 W	WM	23	SE SW	3.1
7 S	2 W	WM	26	NE NW	3.2

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

7 S	2 W	WM	27	NE NE	1.7

Water use Measurement, Recording and Reporting Conditions:

- A. The water user shall maintain, in good working order, a totalizing flow meter at each point of appropriation.
- B. The water user shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The water user shall keep a complete record of the volume of water diverted each month and shall submit a report which includes water-use measurements to the Department annually, or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- D. The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

Use of water from any well, as allowed herein, shall be controlled or shut off if the well displays:

- A. An average water-level decline of three or more feet per year for five consecutive year; or
- B. A total water-level decline of 15 or more feet;
- C. A Hydraulic interference decline of 15 or more feet in any neighboring well providing water for senior exempt uses or well covered by prior rights.

The water user/appropriator shall be responsible for complying with each of the following requirement for measuring water levels in the well(s).

- A. Water level measurement shall be made each year during the period March 1 through March 31.
- B. All water-level measurements shall be made by a qualified individual. Qualified individuals are certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well constructor, or licensed pump installer.
- C. Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment is available from the Department.
- D. The water user/appropriator shall report the record of measurement to the Department on a form available from the Department. The record of measurement shall include both measurements and calculations, shall include a certification as to their accuracy signed by the individual making the measurements, and shall be submitted to the Department within 90 days from the date of measurement. The Department shall determine when any of the declines cited in the section (1) are evidenced by the well measurement required in section (2).

The well shall be continuously cased and continuously sealed from land surface into hard dense basalt at a minimum depth of 180 feet below land surface to preclude connection to nearby streams.

The well shall be open to a single aquifer of the Columbia River Basalt Group, and shall meet the applicable well-construction standards (OAR 690-200 and OAR 690-210). In addition, the open interval in the well shall be no greater than 100 feet. An open interval of greater than 100 feet may be allowed if substantial evidence of a single aquifer completion can be demonstrated to the satisfaction of the Department Hydrogeologist. Any discernible movement of water within the well bore when the well is not being pumped shall be assumed as evidence of the presence of multiple aquifers in the open interval.

A dedicated water-level measuring tube shall be installed in the well. The measuring tube shall meet the standards described in OAR690-215-0060. When requested, access to the wells shall be provided to Department staff to make water-level measurements.

The water user shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

If substantial interference with surface water or a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Supply Wells in Oregon. The works shall be equipped with a usable access port adequate to determine the water-level elevation in the well at all times.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

The Director may require water level or pump test data every ten years.

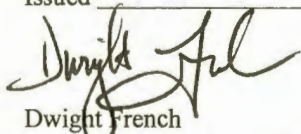

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

APR 07 2023

Issued _____

Dwight French
Water Right Services Division Administrator, for
Douglas E. Woodcock, Acting Director
Oregon Water Resources Department
