The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.

The water user must maintain the totalizing flow meters, or other measurement system as approved by the Department, in good working order according to manufacturer's specifications. A different plan for measurement of diverted water at each field diversion, which is acceptable to, and approved by the Department may be allowed. Testing of the approved measurement devices shall occur at such intervals as deemed appropriate and necessary by the Watermaster.

The totalizing flow meters or other measurement system shall be located as follows:

- a) The point of diversion from the Columbia River and all other points of diversion or appropriation, which supply water to the lands;
- b) The norther boundary connection of the Echo Irrigation District; and
- c) All filed diversions (center pivots or other method of water delivery) used to apply water to the lands described above.

The water user shall maintain a complete record of water usage on a monthly basis and shall submit monthly and annual reports to the Watermaster's office in Pendleton. The water use reports shall include recorded monthly water usage measurements from each point of diversion, the measurement device located at the North Echo ID boundary connection and for each field diversion (center pivot or other means of application). The reports shall also include dates of measurements and other information as may be requested by the Watermaster. The frequency or timing of the reports may be modified upon a determination by the Department that an alternate frequency is needed or appropriate. The reporting frequency may also be modified after the second full season of use, if requested by the water user and approved by the Department. The reports may be e-mailed, faxed or mailed.

The water user shall allow the Watermaster access to the water meters described above. Where a meter is located within a private structure, the Watermaster shall request access upon reasonable notice.

Additional measurement and reporting conditions, including but not limited to, additional measuring sites, general water-use information and the place and nature of water use may be required at the discretion of the Department.

This certificate describes that portion of the water right confirmed by Certificate 91692, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered NOV 14 2023, approving Transfer Application T-12516 for a change in place of use.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed NOV 14 2023.

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for  
DOUGLAS E. WOODCOCK, ACTING DIRECTOR  
Oregon Water Resources Department
