

STATE OF OREGON
COUNTY OF LANE
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

FLORENCE VOLLSTEDT
985 SAINT ANDREWS DR
EUGENE OR 97401

confirms the right to store water perfected under the terms of Permit R-15283. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: R-88182

SOURCE OF WATER: RUNOFF, A TRIBUTARY OF BEAR CREEK

STORAGE FACILITIES: POND 1, POND 2, POND 3, POND 4, POND 5, AND POND 6

PURPOSE OR USE OF THE STORED WATER: STORAGE FOR IRRIGATION, LIVESTOCK, AESTHETICS, FIRE PROTECTION, WILDLIFE, AND FLOOD CONTROL

MAXIMUM VOLUME: 20.0 ACRE FEET (AF) EACH YEAR, BEING 1.7 AF IN POND 1; 10.6 AF IN POND 2, 4.4 AF IN POND 3, 0.4 AF IN POND 4, 0.3 AF IN POND 5, AND 2.6 AF IN POND 6

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: NOVEMBER 1 THROUGH JUNE 30

DATE OF PRIORITY: FEBRUARY 22, 2016

DAM LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	DLC	Measured Distances
16 S	5 W	WM	17	NW NW	63	POND 1 - 490 FEET SOUTH AND 810 FEET EAST FROM NW CORNER, SECTION 17
16 S	5 W	WM	17	NW NW	63	POND 2 - 820 FEET SOUTH AND 960 FEET EAST FROM NW CORNER, SECTION 17
16 S	5 W	WM	17	NE NW	63	POND 3 - 1210 FEET SOUTH AND 1530 FEET EAST FROM NW CORNER, SECTION 17
16 S	5 W	WM	17	NE NW	63	POND 4 - 280 FEET SOUTH AND 1390 FEET EAST FROM NW CORNER, SECTION 17
16 S	5 W	WM	17	NE NW	63	POND 5 - 350 FEET SOUTH AND 1580 FEET EAST FROM NW CORNER, SECTION 17
16 S	5 W	WM	17	NE NW	63	POND 6 - 470 FEET SOUTH AND 1840 FEET EAST FROM NW CORNER, SECTION 17

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

THE AREA TO BE SUBMERGED BY THE RESERVOIRS IS LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q	DLC
16 S	5 W	WM	17	NE NW	63
16 S	5 W	WM	17	NW NW	63
16 S	5 W	WM	17	SW NW	63

Measurement Devices, and Recording/Reporting of Annual Water Storage Conditions:

- A. The water user shall maintain the staff gage that measures the entire range and stage between full reservoir and dead-pool storage in good working order. If no dead-pool, the gage must measure the full depth of the reservoir.
- B. The water user shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the volume of water stored, and may require the water user to report water-storage on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water-use information, the periods of water use and the place and nature of use of water under the right.
- D. The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.

The water user shall pass all live flow outside the storage season described above.

The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.

This right allows an annual appropriation (not to exceed the specified volume). This right does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

The permittee shall maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish.

The water user shall not release polluted off-channel stored water into waters of the state, unless under emergency situations as determined by the State Engineer. For routine maintenance, the water user shall land-apply stored water or provide treatment prior to releasing waters to waters of the state. The water user shall comply with OAR 340-041 and water quality standards shall not be violated.

Water user may not cause pollution of any waters of the state, or place or cause to be placed, any wastes in a location where such wastes are likely to escape or be carried in the waters of the state by any means, per ORS 468B.025(1). If the Department of Environmental Quality (DEQ) determines that pollution of waters of the state is occurring, the water user is not in compliance with ORS 468.025(1), and DEQ shall notify the Department of the violation.

Pond 3 and its adjacent riparian area, which drains directly to Jones Creek, shall be fenced to exclude livestock prior to the diversion of any water. Water must be diverted to a trough or tank through an enclosed water delivery system. The delivery system shall be equipped with an automatic shutoff or limiting flow control mechanism or include a means for returning water to the stream source through an enclosed delivery system.

The water user shall maintain a vegetative buffer around all ponds for the life of the project.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The right to store water for the above purpose is restricted to beneficial use at the place of use described.

Issued JUL 18 2023

Dwight French
Water Right Services Division Administrator, for
Douglas E. Woodcock, Acting Director
Oregon Water Resources Department
