

STATE OF OREGON
COUNTY OF MARION
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

BILLY GYDESEN
PO BOX 85
ELLIS ID 83235

confirms the right to the use of water perfected under the terms of Permit G-11804. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-13454

SOURCE OF WATER: THREE WELLS IN THE LITTLE PUDDING RIVER BASIN

PURPOSE or USE: IRRIGATION OF 270.0 ACRES

MAXIMUM RATE: 3.38 CUBIC FEET PER SECOND

DATE OF PRIORITY: JULY 2, 1993

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
7 S	2 W	WM	14	SW SE	WELL 3 - 860 FEET NORTH AND 150 FEET EAST FROM S1/4 CORNER, SECTION 14
7 S	2 W	WM	14	NW SW	WELL 1 - 1520 FEET NORTH AND 1140 FEET EAST FROM SW CORNER, SECTION 14
7 S	2 W	WM	15	SE SE	WELL 2 - 960 FEET NORTH AND 760 FEET WEST FROM SE CORNER, SECTION 15

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year. The period of allowed use is March 1 through October 31.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
7 S	2 W	WM	14	NW NW	1.9
7 S	2 W	WM	14	SW NW	39.9
7 S	2 W	WM	14	SE NW	17.8
7 S	2 W	WM	14	NE SW	6.7
7 S	2 W	WM	14	NW SW	40.0
7 S	2 W	WM	14	SW SW	16.8
7 S	2 W	WM	14	SE SW	35.6
7 S	2 W	WM	14	SW SE	13.2
7 S	2 W	WM	15	NE NE	0.5
7 S	2 W	WM	15	SE NE	36.7
7 S	2 W	WM	15	NE SE	40.0
7 S	2 W	WM	15	SE SE	12.6
7 S	2 W	WM	23	NW NE	1.9
7 S	2 W	WM	23	NE NW	4.5
7 S	2 W	WM	23	NW NW	1.9

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Alluvium condition: The water user shall obtain a static water-level measurement for each well during MARCH of each year and report the measure to the Department within thirty days. The measurements shall be made by a certified water-rights examiner, registered professional geologist, certified engineering geologist, professional engineer, licensed well constructor or pump install licensed by the Construction Contractors Board. Water levels shall be reported as depth-to-water below ground level and shall be accompanied by supporting calculations. Reports and calculations shall be provided to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements. If a well listed on this right displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of the withdrawal from, the wells. Such action shall be taken until the water level recovers to ablet the 25-foot decline level or until the department determines, based on the water user or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impact the resource or senior water rights. The reference level for water-level declines shall be the second annual measurement taken after water use begins under the terms of this right. The water user shall in no instance allow the excessive decline to occur within the aquifer as a result of use under this right.

Basalt condition: The water user shall report a MARCH static water level in the wells to the Groundwater/Hydrology Section of the Water Resources Department by April 15 of each year. The measurement shall be made and calculations detailed by a certified water rights examiner, registered professional geologist, certified engineering geologist, professional engineer, licensed well constructor or pump install licensed by the Construction Contractors Board, licensed land surveyor or the water user/appropriator. Measurements and calculations shall be provide to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements.

Use of water from the wells shall not be allowed if the wells display an (A) average water level decline of 3 or more feet per year for 5 consecutive years, or (B) a water level decline of 15 or more feet in fewer than 5 consecutive years, or (C) a water level decline of 25 or more feet, or (D) a hydraulic interference decline of 25 or more feet in any neighboring well with a senior priority which provides water for an authorized use.

The Water Resources Department has determined that the initial water level in the wells is those of the initial March report. That is the level from which the cited declines in (A), (B), and (C) above will be referenced.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

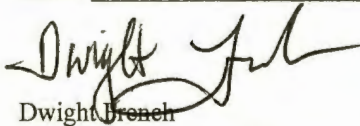

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued **SEP 08 2023**

Dwight French
Water Right Services Division Administrator, for
Douglas E. Woodcock, Acting Director
Oregon Water Resources Department
