

STATE OF OREGON

COUNTY OF MARION

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

BLUE SKY FARMS  
CAM BUCK  
21333 FRENCH PRAIRIE RD  
SAINT PAUL, OR 97137

confirms the right to use the water perfected under the terms of Permit G-13770. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14883

SOURCE OF WATER: A WELL in the CHAMPOEG CREEK BASIN

PURPOSE or USE: NURSERY OPERATIONS on 135.6 ACRES

MAXIMUM RATE: 1.74 CUBIC FEET PER SECOND (CFS)

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: DECEMBER 17, 1998

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	DLC	Measured Distances
5 S	2 W	WM	10	NE NW	81	WELL #1 - 1308 FEET NORTH AND 444 FEET WEST FROM THE SE CORNER OF DLC 81

The amount of water used for NURSERY OPERATIONS is limited to 0.15 cubic foot per second per acre. For irrigation of **containerized nursery plants**, the amount of water diverted is limited to ONE-FORTIETH of one cubic foot per second (or its equivalent) and 5.0 acre feet per acre per year. For irrigation of **in-ground nursery plants**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre per year. The use of water for NURSERY OPERATIONS may be made at any time, during the period of allowed use specified above, that the use is beneficial. For irrigation of **any other crop**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre during the irrigation season of each year.

A description of the place of use is as follows:

NURSERY OPERATIONS						
Twp	Rng	Mer	Sec	Q-Q	DLC	Acres
5 S	2 W	WM	3	SW SW	81	8.9
5 S	2 W	WM	3	SE SW	81	6.8
5 S	2 W	WM	3	SW SE	81	2.6
5 S	2 W	WM	4	SE SW	81	4.8
5 S	2 W	WM	4	SW SE	81	11.4
5 S	2 W	WM	4	SE SE	81	11.0
5 S	2 W	WM	9	NE NE	81	18.2
5 S	2 W	WM	9	NW NE	81	15.2
5 S	2 W	WM	9	NE NW	81	6.3
5 S	2 W	WM	10	NW NE	81	5.4
5 S	2 W	WM	10	NE NW	81	23.7
5 S	2 W	WM	10	NW NW	81	21.3
					Total	135.6

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

To monitor the effect of water use from the well(s) authorized under this right, the Director may require the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement. The measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The reference level against which any future measurements will be compared is 5.80 feet below land surface.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

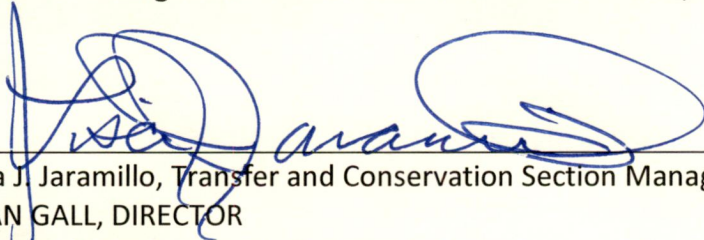

The use of water shall be limited when it interferes with any prior surface or ground water rights.

This certificate describes that portion of water right Certificate 95641, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered NOV 07 2025, approving Transfer Application T-14235.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed NOV 07 2025.

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for  
IVAN GALL, DIRECTOR  
Oregon Water Resources Department
