

STATE OF OREGON  
 COUNTY OF DOUGLAS  
 CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

JAMES E. ALLEN  
 TAMBRA ALLEN  
 155 DENLEY RD  
 SUTHERLIN OR 97479

confirms the right to the use of water perfected under the terms of Permit G-13795. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14776

SOURCE OF WATER: A WELL IN YONCALLA CREEK BASIN

PURPOSE or USE: COMMERCIAL USE AND IRRIGATION OF 3.0 ACRES

MAXIMUM RATE: NO MORE THAN 0.07 CFS FOR COMMERCIAL USE AND 0.038 CFS FOR IRRIGATION NOT TO EXCEED A MAXIMUM CUMULATIVE TOTAL OF 0.072 CUBIC FOOT PER SECOND (CFS) FOR ALL USES.

PERIOD OF USE: COMMERCIAL USE YEAR ROUND AND IRRIGATION MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JUNE 18, 1998

POINT OF DIVERSION LOCATION:

| Twp  | Rng | Mer | Sec | Q-Q   | DLC | Measured Distances   |
|------|-----|-----|-----|-------|-----|--|
| 23 S | 5 W | WM  | 27  | SW NW | 47  | 2020 FEET SOUTH AND 578 FEET EAST FROM NW CORNER, SECTION 27 |

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

| Twp  | Rng | Mer | Sec | Q-Q   | DLC | Acres |
|------|-----|-----|-----|-------|-----|-------|
| 23 S | 5 W | WM  | 27  | SW NW | 47  | 1.35  |
| 23 S | 5 W | WM  | 28  | SE NE | 47  | 1.65  |

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- A. The Director may require the water user to install a meter or other suitable measuring device as approved by the Director. If the Director notifies the water user to install a meter or other measuring device, the water user shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the water user shall maintain the meter or measuring device in good working order and shall allow the watermaster access to the meter or measuring device. The Director may provide an opportunity for the water user to submit alternative measuring procedures for review and approval.
- B. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The water user shall monitor and report the impact of water use under this right in accordance with the approved water level monitoring plan on file with the Department. The reference level against which any future measurements will be compared is -1.00 feet below ground surface for a Well.

If any well listed on this right (or replacement well) displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level established in the approved Groundwater Monitoring Plan on file with the Department, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued **DEC 08 2023**

Dwight French  
Water Right Services Division Administrator, for  
Douglas E. Woodcock, Acting Director  
Oregon Water Resources Department
