The combined quantity of water diverted at the additional point of diversion at Cooper Spring, together with that diverted at the original point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.

Water use measurement conditions:

- A. The water user shall maintain, in good working order, a flow restrictor and valve on the domestic/stock supply line for a rate of 4.25 gallons per minute, and a flow meter and valve on the irrigation pipeline, or, with prior approval of the Director, other suitable measuring devices, at each point of diversion.
- B. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the watermaster shall request access upon reasonable notice.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in said decree.

This certificate is issued to confirm an ADDITIONAL POINT OF DIVERSION approved by an order of the Water Resources Director entered March 30, 2012, at Special Order Volume 87, Page 244, approving Transfer Application T-11304, supercedes Certificate 82504, State record of Water Right Certificates.

Issued DEC 19 2025.
