Water use measurement conditions:

- A. The water user shall maintain, in good working order, the totalizing flow meter or other suitable measuring device as approved by the Director, at each point of appropriation (new and existing).
- B. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

The combined quantity of water diverted at the new points of appropriation (Well 1P, Well 2P and Well 3P), shall not exceed the quantity of water lawfully available at the original points of appropriation (Well 1, Well 2, and Well 3) as described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
24 S	33 E	WM	34	NE SW	WELL 1 – 2030 FEET NORTH AND 190 FEET EAST FROM SW CORNER, SECTION 34

24 S	33 E	WM	34	NE SW	WELL 3 - 1750 FEET NORTH AND 1720 FEET EAST FROM SW CORNER, SECTION 34

The combined quantity of water diverted at the new additional points of appropriation (Well 4 and Well 5), together with that diverted at Wells 1P, 2P, and 3P, shall not exceed the quantity of water lawfully available at the original points of appropriation (Well 1, Well 2, and Well 3) as described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances

Water shall be acquired from the same aquifer as the original points of appropriation.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The Director may require water-level or pump-test data every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.
