- x1. Safe degree of use of range land will be maintained leaving 2 to 3 inches of growth in spring.
- x2. Observe range realifers by allowing new growth in spring before turning out cattle. Also prevent trampling of range land.
- x3. Salt away from water.
4. Develop spring shown in pasture if fails to hold water.
- x5. Develop spring shown in pasture if fails to hold water.
6. Construct cross fence to prevent grazing of cropland in pasture.
7. See cropland in pasture for grazing of cattle.
- x8. Improve channel of stream for further channelization.
