

BEFORE THE STATE ENGINEER OF OREGON

Malheur County.

IN THE MATTER OF THE DETERMINATION OF
THE RELATIVE RIGHTS TO THE USE OF THE
WATERS OF OWYHEE RIVER, AND ITS TRIBUTARIES,
A TRIBUTARY OF SNAKE RIVER.

)
)
) FINDINGS AND ORDER
) OF
) DETERMINATION.
)

Now at this time the above entitled matter coming on for consideration by the State Engineer, and it appearing that all evidence and testimony has been taken in the above entitled proceeding, and the State Engineer having carefully considered all of such evidence and testimony, and the engineering data and information gathered in accordance with law, and being now fully advised in the premises, makes and orders to be entered of record in his office the following:

FINDINGS AND ORDER OF DETERMINATION

1.

That on the 20th day of January, 1911, there was filed in the office of the Board of Control of the State of Oregon (afterwards State Water Board, and now State Engineer) a petition signed by Warren J. Kellogg and others, requesting the determination of the relative rights of the various claimants to the waters of Jordan Creek, and its tributaries, a tributary of Owyhee River; that on the 21st day of September, 1914, there was filed in the office of the State Water Board, a petition signed by R. L. Munger and others, requesting a determination of the relative rights of the various claimants to the waters of Jordan Creek and its tributaries; that on the 20th day of February, 1917, there was filed in the office of the State Water Board, a petition signed by Dennis Driscoll and others, requesting a determination of the relative rights of the various claimants to the waters of Cow Creek and its tributaries, a tributary of Jordan Creek, tributary of Owyhee River; that on the 15th day of March, 1917, there was filed in the office of the State Water Board, a petition signed by Dennis Driscoll and others, requesting a determination of the relative rights of the various claimants to the waters of Cow Creek, and its tributaries; that on the 31st day of December, 1919, there was filed in the office of the State Water Board, a petition signed by Anna D. S. Pratt and others, requesting a determination of the relative rights of the various claimants to the waters of Owyhee River, and its tributaries; all of the said petitioners being water users on the stream named in their respective petitions. That thereafter the State Water Board, after a full investigation and due consideration of said petitions, finding the facts and conditions such as to justify it, made and entered an order

that a determination be had of the relative rights of the various claimants to the waters of Jordan Creek, and its tributaries, fixing a time for the making of the necessary surveys and examinations, and the beginning and taking of such testimony as would enable the Board to determine the rights of the various claimants to the use of water from said stream, as provided by law.

2.

That at the time so fixed by said Board, duly qualified assistants of the State Engineer did proceed to make investigations of the flow of Jordan Creek, and the ditches and canals diverting water therefrom, and of the lands irrigated from such ditches and canals. That prior to the completion of such surveys and investigations, and on the 12th day of January, 1920, there was filed in the office of said Board, an order of the Circuit Court of the State of Oregon for Malheur County, dated September 22, 1919, in the case of the Owyhee Ditch Company, a corporation, plaintiff, vs. Fred Klingback and others, defendants, directing that said cause be referred to the State Water Board for the purpose of adjudicating the relative rights of all the water users from Owyhee River, and its tributaries. That thereupon the State Water Board entered an order directing that such determination be made, and that the State Engineer proceed to make the necessary surveys and examinations in addition to those already made on Jordan Creek and its tributaries, and that the State Water Superintendent proceed to take such evidence and testimony as would enable the Board to determine the relative rights of the various claimants to the waters of Owyhee River and its tributaries.

3.

That a notice was prepared by said Board setting forth the date when the State Engineer or his assistants would begin the investigations of the flow of said Owyhee River and its tributaries, and the ditches diverting water therefrom, and a time and place certain when the State Water Superintendent would begin the taking of testimony as to the relative rights of the various claimants to the use of the waters thereof, and said notice was published in two issues of the Malheur Enterprise, a newspaper published weekly, at Vale, Oregon; said two issues being those of July 18th and 25th, 1921, and said notice was published in two issues of the Ontario Argus, a newspaper published weekly at Ontario, Oregon, said two issues being those of June 16th and 23rd, 1921; and said notice was published in two issues of the Jordan Valley Express, a newspaper published weekly at Jordan Valley, Oregon, said two issues being those of June 17th, and June 24th, 1921; all of said newspapers being of general circulation in the said County of Malheur, State of Oregon, and the date of the last publication of said notice in each instance, being more than 30 days prior to the date fixed for the beginning of the measurements of the stream by the State Engineer, and the beginning of the taking of testimony by the State Water Superintendent.

4.

That the time when the said State Engineer or his assistant should begin the examination of said stream, and its tributaries, was set for Monday the first day of August, 1921, and the times and places when and where the State Water Superintendent or his duly authorized assistant should attend and take the testimony of the various claimants, were set as follows:

On Tuesday, the 2nd day of August, 1921, in the Circuit Court Room of the County Court house at Vale, Oregon;

On Wednesday, the 3rd day of August, 1921, in the City Hall at Ontario, Oregon;

On Friday, the 5th day of August, 1921, in the Hall of the Jordan Valley Hotel at Jordan Valley, Oregon.

And for a period of 30 days beginning on Monday the 15th day of August, 1921, at the office of the State Water Superintendent, at La Grande, Oregon.

5.

That on the 15th day of June, 1921, the State Water Superintendent did send by registered mail, to each person, firm or corporation claiming a right to the waters of said stream, or any tributary thereof, and to each person, firm or corporation owning or being in possession of land bordering on or having access to said stream or its tributaries, insofar as said claimants, owners, firms or corporations could be reasonably ascertained, a notice similar to such published notice, setting forth the date when the State Engineer or his assistant would commence the examination of the stream, and the time and place when the State Water Superintendent would commence the taking of testimony as to the relative rights of the various claimants to the waters of said stream or its tributaries. And said Superintendent did enclose with each of said notices, a blank form upon which said claimant or person in possession could present in writing all the particulars necessary for the determination of his rights to the waters of said stream, or a tributary thereof, under oath.

That due proof of publication of said notice, and of the sending of said notice by registered mail, has been made and is duly filed as a part of the record hereof.

6.

That at the time specified in said notice, a duly qualified assistant of the State Engineer did proceed to make an examination of said stream and its tributaries, and of the ditches^{and canals} diverting water therefrom, and of the land irrigated from said ditches or canals, which observations and measurements were reduced to writing, and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats, on a scale of measurement of four inches to the mile, showing with substantial accuracy the course of said stream and its tributaries, the location of the various ditches diverting water therefrom, and the number of acres of land which had been irrigated in each legal subdivision; blue prints of said maps

and plats being now on file and a part of the record herein.

7.

That during the period specified in said notice for the taking of testimony, the State Water Superintendent did attend and take the testimony of the various claimants. That statements and proofs of claim to the use of the waters of said stream or its tributaries were filed by the following parties, to-wit:-

Owyhee River

Acordagortia, Simon Jordan Valley, Oregon by D.D. Joslyn, Agt. Jordan Valley, Ore.

9.

That upon the completion of the taking of testimony and proofs of claim, as aforesaid, the State Water Superintendent did on the 30th day of August, 1922, give notice by registered mail to each of the various claimants to the use of the waters of said stream, or its tributaries, that at the times and places named in the said notice, to-wit:

On Tuesday the 12th day of September, 1922, in the Circuit Court Room of the County Court House at Vale, Oregon;

On Wednesday the 13th day of September, 1922, at the City Hall at Ontario, Oregon;

On Friday the 15th day of September, 1922 in the hall of the Jordan Valley Hotel, Jordan Valley, Oregon;

And for a period of 22 days (Sundays excepted) beginning on Wednesday the 20th day of September, 1922, and until Saturday the 14th day of October, 1922, at the office of the State Water Superintendent at La Grande, Oregon, all of said testimony and proofs of claim would be open to inspection by the various claimants or owners. That a duly authorized representative of said Superintendent did, in accordance with said notice, keep said evidence open to inspection for the periods aforesaid. That said notice did also state therein the county in which the determination of the State Water Board would be heard by the Circuit Court, to-wit:- The County of Malheur.

That due proof of the sending of said notice by registered mail, and the holding of said inspection, has been made and filed as a part of the record herein.

10.

That within the time fixed by law therefor, the following contests were initiated by the filing with said Superintendent of notices of contest in writing:

Contest #1. W. F. Stine, et al. vs. J. R. McDonnell, et al.

Contest #2. Laura E. Dinwiddie, et al. vs. J. R. Blackaby, et al.

Contest #3. L. R. Duncan vs. Hollister A. Parks.

Contest # 4. J. C. Brandon, et al. vs. Owyhee Ditch Co., et al.

Contest # 5. Juan Yturriondabeitia vs. L. R. Duncan.

Contest # 6. Short Line Ditch Co., and R. R. Overstreet vs. W. W. Smith.

Contest # 7. L. R. Duncan vs. Fred J. Palmer and W. S. Skinner.

Contest # 8. James P. Anderson vs. Pacific Livestock Co.

Contest # 9. James A. Ditton vs. Maud Haylett.

11.

That after the filing of said statements of contest, the State Water Superintendent did fix a time and place for the hearing of each and every of said contests and did on the 16th day of June, 1923, serve notice of hearing of said contests on each of the parties to each and every of said contests, the dates fixed for hearing in each instance being more than 30 days and less than 60 days from the date the notice of hearing was served upon said parties. That due proof of serving of said notices has been made and filed as a part of the record herein.

That the time so set by said notices was later extended to suit the convenience of the interested parties. That upon the dates as finally fixed for the hearing of each of the respective contests, the taking of testimony upon said contests was commenced before a duly authorized reporter, and continued until each and every of said contests were fully heard, settled, or otherwise disposed of.

12.

Contest No. 1

W. F. Stine, Wm. Wiedman and Carleton Fretwell,

Contestants,

vs.

J. E. McDonnell, W. S. Skinner and F. P. Rose,

Contestees.

The water rights through the Happy Valley Ditch were initiated by the posting of a notice of appropriation in November, 1908. Construction work was commenced soon thereafter, and completed in the year 1910. Up to the year 1923 approximately 175.2 acres had been reclaimed and irrigated under the ditch, and claim is made for an inchoate right for the irrigation of approximately 306 acres, additional. The annual increase in cultivated and irrigated area under the ditch since it has been completed is less than 15 acres per year, or less than 5 acres for each owner, notwithstanding the fact that the land is comparatively easy to clear and bring under cultivation. At the same rate of increase, it would require 20 years

longer for the completion of this small project. This rate of progress cannot be considered due diligence, and therefore the rights of Contestees will be limited to the irrigation of the lands that have heretofore been reclaimed and irrigated as set forth in the tabulated statement herein, and additional water rights must be secured, from new appropriations made in accordance with law.

It is further found that the present owners of the Happy Valley Ditch are as follows: W. S. Skinner, eight-twentieths; J. E. McDonnell, five-twentieths; Frank P. Rose, seven-twentieths.

13.

Contest No. 2.

Laura E. Dinwiddie, Doris C. Crowford, Elsie L. Brown
and Rufus M. Dinwiddie, (Graydon C. Crawford, Trustee)
Contestants,

vs.

J. R. Blackaby, Wm. E. Lees, Justo Corta, Mrs. Mary Daly,
P. O. Duncan, Pascual Eiguren for Eiguren & Navarro, Jose Eiguren,
Carleton E. Fretwell, Ambrosio Elorriaga, W.M. Lambert, Jerome Long,
John Acarregui, Maria Azouenaga, A. B. Azouenaga, Eulio Madariaga,
W. S. Maher, Harry Looney, R.L. Munger, Fred J. Palmer, Julia A. Parks,
Mrs. Cora Schas, Teresa Scott, W.S. Skinner, F.M. Swisher, John S.
Swisher, Lasaro Urquiaga, John A. Wroten, Jose Zabala, J.B. Duncan,
Mrs. R. E. Dunn and E.L. Dunn.

Contestees.

John Acarregui

That this claimant has 70.6 acres which is entitled to a right under the Goodrich or Hooker ditch, started in 1871. That beginning in 1872 the timber culture claim of Goodrich (SW¹/₄ NW¹/₄ Section 10) and about 20 acres more, were irrigated from the Goodrich-King slough, and 84.7 acres have received benefit by overflow from the sloughs, and dams placed in the channels of the stream since 1874.

Blackaby & Lees

That the first use of water on the lands of these claimants began in 1880, and under this appropriation 104.3 acres have been irrigated, under the Anawalt & Sharpe ditch on the South side of Jordan Creek in Section 1, township 30 south, range 45 east, W.M.. In 1887 the ditch was enlarged and extended to cover 143 acres in section 36, township 29 south, range 45 East, W.M.

That an area of 429.6 acres now owned by Iris G. Anawalt has also been irrigated under the Anawalt & Sharpe ditch, with priority of 1880.

That Blackaby & Lees and John Urlezaga stipulated with Contestants that the priority of their water right for their lands south of the channel of Jordan Creek in sections 1 and 2, T. 30 South, Range 45 E.W.M., should be not earlier than 1880, and their rights are so tabulated.

J. B. Duncan

That this claimant has 25.6 acres of land and some lots in the town of Jordan Valley which are entitled to a right through the Town Ditch, which was taken out in the spring of 1873. There is also an area of 69.4 acres which was reclaimed and irrigated by means of the Baxter & Parks ditch. This ditch was started in 1874, but was abandoned and work not resumed until 1886. That an area of 35.3 acres has also been reclaimed either by natural overflow or by dams placed in the sloughs, and that such reclamation was commenced about 1876.

R. E. & E. L. Dunn

That 90.2 acres of the lands of these claimants have been irrigated by the waters of Trout Creek since 1871. A portion of such land, being in Lots 1 & 2 of section 18, has been benefitted by the natural overflow from Jordan Creek, and is entitled to a supplemental right therefrom, with priority of 1871.

Jose Eiguren & Jose Zabala

That Jose Eiguren and Jose Zabala have conceded the superiority of the water rights of Contestants, and in the distribution of water said Contestants shall therefore be entitled to the first right as against said parties. That as between the said Eiguren and Zabala and other water users, however, their respective rights shall be governed by the dates of priority as fixed in the tabulation hereinafter contained.

Eiguren & Navarro

That the land of these claimants is commonly called the Sheep Ranch, and beginning about 1866 it was used as a stage station and crops of wild hay resulting from the natural overflow of Jordan Creek were utilized. During these early years about 40 acres were thus irrigated, about 1880 an increase was made, by 1891 an additional 135 acres had been reclaimed, and after this date 90 acres additional have been irrigated.

W. M. Lambert

That this claimant has 334 acres of land which was reclaimed by means of the Hooker ditch, built in 1871, and 87.2 acres reclaimed under the Williams ditch, built in 1888. Water is also used from Hooker Creek to irrigate 71.7 acres additional, and to furnish a supplemental supply for the lands under the Hooker and Williams ditches.

Jerome Long

That 20.7 acres of land belonging to Mr. Long, and also several lots in the town of Jordan Valley, are irrigated through the Town ditch, under priority 1873, and 120.6 acres have been reclaimed through the Parks-weir-irrigation-slough ditch, under priority of 1875.

Eulogio Madariaga

That this claimant has 56 acres under the Town ditch, in addition to some lots in the town of Jordan Valley, and has stipulated that his priority shall be 1895 and his rights inferior to those of Contestants. An inchoate right was also claimed for an additional 28.6 acres of raw land under the Town ditch, which is denied because of the great lapse of time since the initiation of the right.

W. S. Maher

That 107.4 acres have been irrigated under the Town ditch, and 286.8 acres irrigated mostly on the south side of Jordan Creek beginning with 1874, by various dams and ditches; and 121.4 acres irrigated under the Maher ditch built in 1902.

R. L. Munger

That an area of 45 acres of this ranch is entitled to a water right with priority of 1869, by virtue of settlement on and use of naturally overflowed lands. In addition, 74.7 acres were irrigated under the Munger-Cowgill Fretwell ditch, with priority of 1887, 24 acres under the Lambert-West or Williams ditch which was built in 1888, and 33 acres under the Lambert-East or Hooker ditch which was built in 1871.

In addition to the lands of this claimant under the Munger-Cowgill-Fretwell ditch, considerable land now owned by Cowgill, Fretwell and others has been irrigated under this ditch, with priority of 1887.

Fred J. Palmer

That in the year 1869 settlement was made on lands now owned by Fred J. Palmer, being a part of what is known as the "Ruby Ranch", and that wild meadow hay was cut on the meadows along the creek bottoms where the waters of Jordan Creek naturally overflowed. That an area of about 150 acres was irrigated in this manner, and about 25 or 30 acres artificially irrigated, making about 175 acres that is entitled to a water right dating from the first use, or 1869. In the year 1888 construction was started on artificial works for the irrigation of additional land, and within a reasonable time about 247.2 acres were irrigated thereby. That the land in section 15 was cleared up and irrigated after 1902, and is not entitled to a water right earlier than that date. Up to the commencement of this adjudication some 486.6 acres had been reclaimed in this section. On account of the delay in applying the water to beneficial use the right for any lands irrigated since the commencement of this proceeding cannot relate back for priority to the dates of the above appropriations, but should be covered by a permit obtained from the State Engineer.

Julia A. Parks

That Mrs. Parks has 37.2 acres and some lots in the town of Jordan Valley under the Town ditch, taken out in 1873, and 60 acres irrigated through the Parks-Weir-irrigation-slough ditch, the water right for such land having been initiated in 1875. In addition there is 65 acres under the Baxter & Parks ditch, which was first started in 1874, but on which work was abandoned and not resumed until 1886.

W. S. Skinner

That in the year 1868 settlement was made on a portion of the land now owned by W. S. Skinner, commonly called the Goose Ranch, and crops of wild meadow hay were cut from the lands which were naturally overflowed along the channel of Jordan Creek. During the next 15 years about 65 acres of land were irrigated on the ranch, including some 25 or 30 acres which were irrigated by a dam and ditch built in 1873. Beginning about 1887, and after additional land was taken up, the irrigated area was increased, and by about 1899 there was a total of about 485 acres which had been reclaimed. All the balance of the land which has been put under irrigation up to the beginning of this proceeding, comprising about 925 acres was reclaimed after the year 1901. There has been some additional land put under irrigation since this proceeding was commenced, and an inchoate right was claimed for a still larger acreage to be reclaimed in the future. The water right for such land, however, must be initiated by a filing made with the State Engineer, and cannot relate back for priority to the appropriations started more than 20 years ago.

John S. Swisher

That the predecessors of this claimant commenced the use of water for raising wild hay crops in 1871, and there are 117.8 acres entitled to a water right as of that date. The water right for the balance of the land, including the Canter desert claim, was initiated in the year 1882, and 192.6 acres have been reclaimed under this appropriation.

The Town Ditch

That the Town ditch was started in the spring of 1873, and the lands now irrigated under it were reclaimed within a reasonable time thereafter. Most of the lands under this ditch are mentioned in the findings as to individual rights, but there are also some town lot owners in Jordan Valley who secure water through the ditch. It was stipulated that such rights should take whatever priority the Town ditch might be found to be entitled to. The Town ditch also takes

water from Trout Creek, although its head is located on Jordan Creek above the mouth of Trout Creek. That the Town ditch was started in the same year as the first appropriation of the Contestants herein, but about a month earlier in the spring. The rights through the Town ditch (except that of Madariaga) shall therefore be superior to the 1873 appropriation of Contestants.

Contestants

That as to the rights of Contestants herein, it is found that a water right was initiated in the spring of 1873 by David R. King for lands to which he subsequently acquired title, described as follows: SE $\frac{1}{4}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, and SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 10 and SE $\frac{1}{4}$ Section 9, T. 30 S. R. 46 E.W.M. In the year 1880 the appropriation was increased to cover the SW $\frac{1}{4}$ of Section 9, and in the year 1894 was again increased to cover what is known as the Spencer place in the SE $\frac{1}{4}$ of Section 8. That these lands shall therefore have a water right with priority as of said respective dates. That Contestants have asserted a right superior to Contestees by adverse user, but it was shown that no substantial infringement has been made by Contestants upon the rights of Contestees, and no rights adverse to Contestees have therefore been acquired by Contestants. Some showing was made by Contestants as to certain rights acquired for lands irrigated under the canal of the Jordan Valley Land & Water Company. However, such rights, if any have been acquired, depend upon the rights possessed by said Company, and as this Company is not a claimant herein, it is presumed that its rights are covered by a permit issued by the State Engineer, and must be perfected as indicated in Paragraph 28 hereof.

14.

Contest No. 3.

L. R. Duncan,

Contestant,

vs.

Hollister A. Parks,

Contestee.

That in his notice of contest, Contestant questions the priority and extent of the right claimed by Contestee, Hollister A. Parks to the waters of a certain spring. That Contestee has furnished sufficient proof to establish his claim, and his rights will therefore be allowed as set forth in his statement and proof of claim. It appears that Contestee also has certain rights to the use of the waters of Cow Creek under a final certificate issued under Permit 183 of the State Engineer, with priority of November 3, 1909. At the beginning of the hearing in this contest, Contestee attempted to amend his claim to include a right with priority of May 20, 1907 for water from Cow Creek as well as from the spring. This claim

is not supported by the testimony, and is denied.

15.

Contest No. 4

J. C. Brandon, Ernest Bensli, Alice P. Brown, K. N. Dahle, Frank Davis, J. M. Eads, Carl W. Fegtly, Frances M. Fegtly, M. N. Fegtly, A. W. Ferguson, Ben Franks, Edw. E. Fretwell, Leonard L. Barclay Van Dyke, Frank P. Ward, H. J. Ward, John A. Ward, Lula S. West, William West, Berwick B. Wood, Alice Howe Wood, Erskine Wood and C.E.S. Wood,

Contestees.

That this contest came on for hearing on Tuesday, March 6, 1923, and considerable evidence was submitted. In their notice of contest the Contestants questioned the priority, diligence, area of land, and quantity of water, as covered by the claim of Contestee Owyhee Ditch Company. Twenty-seven of the forty Contestants claimed to have acquired rights superior to the company by adverse user. At the beginning of the hearing, some of the stockholders of the Owyhee Ditch Company, who were named as co-contestees with the company in the notice of contest, appeared and asserted certain rights adverse to those asserted by the company in its statement and proof of claim, their main contention being that they, and not the company, owned the water rights, and were entitled to individual dates of priority as of the time water was first applied to the respective tracts of land.

That prior to October 20, 1882, Alex Matheson and H. P. Kriss settled on Government lands in Baker County, Oregon (now in Malheur County) with the view of obtaining title thereto, and on October 20, 1882, filed with the County Clerk a

notice of appropriation of water from Owyhee River for irrigation and other purposes, claiming 10,000 inches of water. Pursuant to such notice about 6 miles of ditch was constructed from a point about a mile below the "Hot Springs" near Mitchell Butte, in T. 21 S.R. 45 E.W.M., for the purpose of irrigating the lands of said Matheson & Kriss and of other settlers who acquired an interest in the ditch by helping in the work of construction. Thos. C. Fletcher and Chas. O. Wilson, in the year 1887, finding that some of their lands were too high to be irrigated from this ditch, commenced the construction of another ditch at a point on the river about a quarter of a mile below the Hot Springs, and on August 17, 1887, filed a notice of appropriation claiming 2,000 inches of water. About a year later, after some construction work had been done on the second ditch, and quite a number of settlers had become interested in one or both of the ditches, it was agreed by the parties interested in both ditches that they would thereafter concentrate their efforts on the construction of a larger ditch, with its head at the same point as the second ditch, that could serve not only all of their lands but those of other settlers who might come in later, extending clear down some distance below Malheur River. Accordingly, on October 30, 1888, another notice of appropriation was prepared and posted at the diversion point, signed by nine of the interested parties, claiming 20,000 inches of water to be carried in a ditch 20 feet wide at the bottom, 25 feet wide at the top, and 6 feet deep. A company was then formed, and on December 21, 1888 was incorporated as the Owyhee Ditch Company, the present claimant and Contestee herein.

All the individual users at that time, turned whatever interests they had in the ditches and water rights over to the company, and received shares of stock in the company, therefor. Thereafter additional settlers on lands which could be irrigated under the proposed ditch, purchased stock in the company, and helped in the construction work, and gradually more lands were placed under irrigation by means of said ditch, as it was extended down to them. The stockholders in the company were all of limited means, and it was difficult at times for said company to raise funds with which to carry on the construction work on the ditch. However, some work was done every year, and in about the years 1894, and 1895 a much larger force of men was used, in extending the lower end of the ditch and cleaning out the sections already constructed, and the ditch was completed about the year 1896, of a size practically the same as at present.

It would appear that the company was diligent in prosecuting the work for the utilization of the water, and the water rights shall therefore relate

back for priority to the first step taken towards the appropriation. There was some testimony to the effect that the parties interested in the scheme from the very first, beginning with the filing of the notice in 1882 by Matheson and Kriss, had in mind the construction of a large canal and the irrigation of practically the same lands as have since been irrigated. But the preponderance of evidence does not support this contention, and it appears that not until the posting of the notice in 1888 was there in contemplation anything like as large an enterprise as that which was eventually carried out. That no rights were perfected under the 1882 and 1887 notices, and Contestee's water rights shall therefore date from October 30, 1888.

An appropriator of water for irrigation is entitled to a reasonable time after he has diverted and carried the water to the place of use, in which to actually apply the water to the land. At the time of taking testimony herein, 26 years had elapsed since the completion of the Owyhee Ditch, and it would appear that a reasonable time has elapsed for the application of water to lands which were proposed to be served by the appropriation initiated in 1888. The evidence submitted by Contestee Owyhee Ditch Company shows that up to the close of the irrigation season of 1922, 10,997 acres was the largest area ever served in one season under the Owyhee Ditch, although water had been applied, at one time or another, to an acreage aggregating 13,651.4 acres. It would also appear that a shortage has occurred in several seasons when even less than 10,997 acres of land was being served, and the company has been compelled to install a pumping plant on Snake River to supplement its supply from Owyhee River. However, as water has actually been applied to 13,651.4 acres of land, the appropriation of October 30, 1888 is deemed to have been completed and water rights perfected, to that extent.

That when the company completed its appropriation as agent for its stockholders who applied the water to a beneficial use, it became the owner as such agent of a vested right to the use of the water to the extent of that appropriation, and this right has become, and shall remain, appurtenant to the lands to which the water has been applied, as described in the tabulation hereinafter contained, and can only be severed therefrom in the manner prescribed by law. That the quantity of water which may be diverted for the irrigation of said lands shall be governed by the provisions of Paragraph 24 hereof.

That from the articles of incorporation, stock certificates and other evidence submitted herein, it appears that each share of stock in the Owyhee Ditch Company is equal to every other share, in respect to the benefits to which such stock entitles the holder thereof, and the interest of each stockholder in the property owned by the company is in exact proportion to the amount of his stock.

That the water rights perfected under the appropriation of October 30, 1888, were initiated as a whole, for the entire project, and are equal in priority, and each acre of the 13,651.4 acres entitled to water under said appropriation shall be entitled to the same proportion of the water available for the entire area, and shall share equally in any shortage that may occur.

That it appears that some land owners have used water through the Owyhee Ditch, and by such use a water right has become vested and appurtenant to their land, even though such users did not own any shares of stock in the company, or enough shares to entitle them to carry the quantity of water necessary for the irrigation of their land. And this order shall not operate to give such water users a right to use water through the Owyhee Ditch, until such users have secured enough stock in the Corporation to entitle them to carry the quantity of water necessary for the irrigation of their land.

That the water rights under this system cannot be appurtenant to the stock of the company. And therefore, those owners of stock who do not own land to which a water right has become vested under the system, have a proportionate interest in the property and works of the company, only. That all stock which the company has sold but to which it is unable to supply water under the vested rights as herein determined and limited, should either be redeemed by the company or supplied water through additional appropriations.

That as to the claim made by some of the Contestants to a right superior to Contestee, by adverse user, we find a stipulation in the record to the effect that Contestants' use of water has never shortened the supply of water in the Owyhee Ditch, and Contestants have thus waived any claim of that nature.

16.

Contest No. 5.

Juan Yturriondabeitia

Contestant,

vs.

L. R. Duncan,

Contestee.

That the Contestee in this contest filed a claim for a water right from Jordan Creek with priority of 1891 for 186 acres of land, part of which has not yet been irrigated, but for which an inchoate right is claimed. Contestant questions the priority and extent of the claim. That construction work was commenced on Contestee's ditch in 1891, and the first section, consisting of about two and one-half miles extending down to Owyhee River, was

OWYHEE RIVER -17-

completed by 1898, where a small area of land was irrigated. The main objective in building the ditch, however, was land across the Owyhee River, and in 1908 the ditch was continued across by means of a syphon, and about 35 acres were irrigated in 1909. Sufficient diligence is deemed to have been displayed in the construction of the ditch and other works for carrying the water to the land, so that the appropriation, to the extent perfected, may relate back for priority to the year 1891. It would appear that Contestee has had a reasonable time in which to make actual application of the water to beneficial use, and his rights under the 1891 appropriation will be limited to the area which had been reclaimed at the time of taking testimony herein. That Contestee's land at the lower end of the ditch in section 10 was filed on as a homestead about 1901, and was not a part of the land contemplated to be irrigated at the time of initiation in the 1891 right. The right for the land irrigated in section 10 shall therefore take a priority of 1901.

That Contestee also has an interest in certain rights under permits issued by the State Engineer covering storage in Upper Cow Lake which rights may be completed in accordance with the statute and the regulations of the State Engineer pertaining to such filings.

17.

Contest No. 6

Short Line Ditch Company, and R. R. Overstreet,

Contestants,

vs.

W. W. Smith,

Contestee.

That the main issue involved in this contest was the effect of the moving of Contestee's point of diversion. The Contestee and his predecessors had, since about 1884, diverted water from Owyhee River through what is known as the Collins ditch, but in 1920 the point of diversion was changed to a point about three miles down stream, where the water was diverted by means of a pump. Prior to the year 1920, the Contestants filed applications with the State Engineer, and received permits for the appropriation of the waters of the Owyhee River for irrigation, their points of diversion being below the present pumping plant of Contestee. It is contended by the Contestants that Contestee is now able to pump more water than he could divert formerly at the Collins dam, on account of certain accretions from seepage and waste water coming into the stream between the Collins dam and the present diversion.

The rule has been established by our Courts that an appropriator may change his point of diversion at any time, providing such change does not work

an injury on the rights of others. It would seem that the change involved herein could be made without interfering with the rights of Contestants, and that Contestee should be allowed to make the change and retain his priority, but that his rights should be limited to the same extent as they were when the water was diverted through the Collins ditch.

That after the initiation of Contestee's right in 1884, there had been a gradual increase in the amount of land reclaimed and irrigated, until at the time of filing the claim in 1921 there was approximately 90 acres of Contestee's land under irrigation. That a sufficient length of time has elapsed for the completion of this right, and that Contestee should be limited to sufficient water for 90 acres, under priority of 1884, and that the right for any additional acreage should be covered by a filing made with the State Engineer. That under the former method of diversion of the water through the Collins ditch there was considerable loss of water by seepage and evaporation, and through breaks and gopher holes in the ditch, and that practically all of such losses have been eliminated by pumping the water from the river directly onto the land. That Contestee shall be entitled to pump from the river at his present diversion, the same amount of water that he could have diverted at the head of the Collins ditch under the former conditions, and shall at no time pump more water at his present place of diversion than the quantity that would be available to him at the head of the Collins ditch at that particular time. And the amount of water to which Contestee shall be entitled for the irrigation of said 90 acres of land shall also be limited by the provisions of Paragraph 24 hereof.

18.

Contest No. 7

L. R. Duncan,

Contestant,

vs.

Fred J. Palmer and W. S. Skinner,

Contestees.

That this contest was set down for hearing and the parties appeared and entered into a stipulation, whereby the Contestees conceded the superiority of the Contestant's rights except for 15 acres of Palmer's land irrigated through the Garden ditch. It appearing that this is about the extent of the lands upon which water from Cow Creek has been used by the said Fred J. Palmer, his claim is reduced to that extent.

The rights of the Contestees to the use of water from Jordan Creek are limited as set forth in Paragraph 13 hereof.

As to the rights of Contestee W. S. Skinner, it appears that 710 acres of land have been irrigated from Cow Creek by a ditch on which construction

was started in 1908.

19.

Contest No. 8

James P. Anderson,

Contestant,

vs.

Pacific Livestock Company,

Contestee.

This contest was settled by a stipulation, as follows:

"Whereas there is now pending before the State Water Board a proceeding for the adjudication of the relative rights to the use of the waters of the Owyhee River, in Malheur County, Oregon, and

Whereas a contest has been filed by James P. Anderson, contesting the rights claimed by the Pacific Livestock Company, a corporation to the use of the waters on Crooked Creek, a tributary of said Owyhee River, and

Whereas the relative rights of these parties and their predecessors in interest have been, to a large extent, determined by the Supreme Court of the State of Oregon in that certain case entitled J. H. Seaward, et al., against the Pacific Livestock Company, reported in 49 Oregon Reports, at page 157, and the case of Seaward against Duncan, reported in 47 Oregon Reports, at page 640, and in which first mentioned case the Court made a final decree awarding to the Pacific Livestock Company the right to the use of 100 miners inches of water, measured under a six inch pressure, to be taken from said Crooked Creek, said right to be prior in time to the other users mentioned in said decree, and the Court made a decree in awarding to J. H. Seaward 120 inches, to Anderson Loveland 150 inches, and to P. O. Duncan 80 inches, and

Whereas the said James P. Anderson has succeeded to the rights of the said Seaward, Loveland and Duncan, and is now the owner of the lands and water rights of said parties, and these parties are now willing that such decree should control the amount of water awarded to each of the parties herein;

NOW, THEREFORE, it is agreed that the State Engineer's office, in its findings and decree to be made and entered in this matter should find that the said Pacific Livestock Company shall have a prior right to the use of the waters of Crooked Creek to the extent of 100 miners inches, measured under a six inch pressure, to be used as it sees fit on the lands of said Company in the Southwest quarter and the Southeast quarter of Section 14, and its lands in the Northeast quarter of Section 22, Township 33, S. R. 39 E.W.M., and that the said James P. Anderson shall be entitled to the use of 350 miners inches of water, measured under a six inch pressure, for the irrigation of his lands in Sections 20, 17 and 4 in Township 33, South, Range 40 E. W. M.

Except as to the prior right of said Pacific Livestock Company to said 100 inches, this stipulation is not to affect any right that the said James P. Anderson might have to the use of said waters by virtue of any permits from the office of the State Engineer for the use and storage of said waters of Crooked Creek.

IT IS FURTHER AGREED that as to the waters rising on the lands of said Anderson in Section 15, Township 33 South, Range 39 E. W.M., that said water shall be used by both parties in the future as same have been in the past, and that neither party shall make nor attempt to make any use of said waters that will take the said waters away from the premises of the other party as the same are now used.

This agreement is made in consideration of the mutual benefits that a settlement of the issues may be to each of said parties, and that in consideration thereof, the said contest herein mentioned may be dismissed."

Dated at Ontario, Oregon this 27th day of March, 1923.

PACIFIC LIVESTOCK COMPANY

By W. A. TRUMP

Secretary.

JAMES P. ANDERSON

OWYHEE RIVER-20-

In the administration of the water rights allowed herein to the parties to this contest, and their successors in interest, the water master shall distribute the water as between said parties in accordance with the terms of said stipulation and the decree mentioned therein, insofar as practicable; provided, that the quantity of water used by said parties shall be governed by Paragraph 24 hereof; and provided further, that as against other water users the rights of said parties shall be governed by their dates of priority as set forth in the tabulation hereinafter contained.

20.

Contest No. 9

James A. Ditton,

Contestant,

vs.

Maude Haylett,

Contestee.

That this contest was set down for hearing, and the parties appeared and entered into a stipulation, which appears on page 481 of the testimony. By the terms of said stipulation Contestee Maude Haylett is to have an equal right with Contestant for $9\frac{1}{2}$ acres irrigated through the Shea ditch, and an inferior right to Contestant for a second $9\frac{1}{2}$ acres irrigated through said ditch; and Contestee's other rights from Cow Creek are to be inferior to Contestants. The rights of said parties have been tabulated in accordance with said stipulation.

21.

That J. B. McCain filed claims in this proceeding, for water rights from Cow Creek after the period fixed for public inspection of claims had expired. Said McCain at the time of filing such claims gave due notice thereof by registered mail to all other claimants to water from Cow Creek, and said claims were held open to inspection and subject to contest at the hearings on other contests filed herein. That no contests were filed against said claim, but during said hearings a stipulation was entered into modifying the rights claimed by said J. B. McCain, as follows:

It is hereby stipulated by and between James A. Ditton, and J. B. McCain, that

Whereas the said J. B. McCain has recently filed his proof of claim in this matter, claiming priorities for the use of water from Cow Creek as of March 18, 1885, and that

Whereas said proofs of claim having been filed at this time are subject to contest, and said James A. Ditton objects to said priorities, therefore it is stipulated, for the purpose of adjusting said priorities that the said J. B. McCain should have a priority as of 1886, and of equal date with the said James A. Ditton for the Purser-Shea ditch of the said James A. Ditton, for all of the following ditches of the said J. B. McCain, to-wit:

Purser-Shea ditch for the irrigation of lands in Section 27, the Hart Desert ditch for the irrigation of lands in sections 28 and 27, the Hart No. 8 ditch for the irrigation of lands in section 28, the Hart No. 7 ditch for the irrigation of lands in section 28, the Baltzor and McConnell

ditch for the irrigation of lands in Section 28, the Purser-Shea and Hart No. 4 ditch for the irrigation of lands in Sections 27 and 28, and the Garden ditch for the irrigation of lands in Section 28, and the Hart No. 6 ditch and slough for the irrigation of lands in Section 28, all of said lands being in T. 28 S. R. 46 E.W.M., that as to all of the above described lands, they should have an equal priority as aforesaid, with the lands of James A. Ditton, being 1886, being the same priority as claimed by said Ditton for lands in Sections 23, 26 and 27, T. 28 S.R. 46 E.

And the rights of said claimant J. B. McCain are tabulated in accordance with said stipulation.

22.

That an agreement was filed between L. R. Duncan and Pascual Eiguren as follows:

" This agreement, made and entered into this 26th day of May, 1923, by and between Pascual Eiguren and L.R. Duncan, both of Jordan Valley, Oregon; WITNESSETH:

That whereas, Pascual Eiguren is the owner of certain lands in Sections 26, 27, 34, and 35, T. 30 S.R. 42 E.W.M., and L.R. Duncan is the owner of certain lands in Sections 10, 11, 14 and 15, T. 31 S. R. 41 E.W.M., and

WHEREAS, said lands of both parties are irrigated from and by the waters of Jordan Creek and of Cow Creek, a tributary thereof; and

WHEREAS, during the later part of the irrigation season of each year the flow of water of said streams become low and there may in some years not be enough water in said streams to equal the amount of the appropriation of each of said parties; and

WHEREAS, it would be impossible under such conditions to fulfill the requirements for irrigation of both of said appropriators; and

WHEREAS, by reason of the long distance between the lands of the two said parties, the nature of the stream bed and other difficulties, it is not deemed to be feasible to rotate the use of said waters;

NOW, THEREFORE, in consideration of the mutual benefit, the settlement of the difficulties and other valuable considerations, it is hereby mutually agreed by and between the said parties hereto, that whenever the flow of said streams becomes so low that by reason of prior appropriation and of the flow of said streams, the appropriation allotted and decreed to L.R. Duncan cannot be filled, then that the amount of water flowing in said streams that reaches the point of diversion of the ditch of the said Pascual Eiguren shall be divided between the said parties at the diversion point of said ditch, the said Pascual Eiguren to receive two-thirds of the said water, the said L. R. Duncan to receive one-third of the said water continuous flow so long as the said water continues to flow to the said point of diversion of the said ditch of the said Pascual Eiguren.

THIS AGREEMENT shall bind each of said parties and their heirs, successors or assigns, and is made to become a part of the findings of the Water Board of the State of Oregon and of the decree of the Court to be made herein, determining this matter of the adjudication of the relative rights to the use of waters of the Owyhee River and its tributaries.

IN TESTIMONY WHEREOF, the said parties hereto have hereunto set their hands and seals on the day and date first hereinabove written.

(Signed) Pascual Eiguren (Seal)

(Signed L.R. Duncan (Seal) "

Witnesses to the execution
hereof:

P. J. Gallagher

D. D. Joslyn

In the distribution of water on Jordan Creek, this agreement shall be enforced so long as the rights of other parties are not thereby interfered with, but in such event the water shall be distributed in accordance with the relative priorities of the rights of said parties.

23.

That the Owyhee River rises in the southwestern part of the State of Idaho, and flows in a general northerly direction through Malheur County in the southeastern portion of the State of Oregon, becoming tributary of the Snake River near Nyssa, Oregon. The area drained by said stream and its tributaries comprises some 11,000 square miles of rolling or broken sage brush land, which is devoid of timber except at the extreme headwaters. About 13 miles from its mouth the stream emerges from a narrow canyon into the Snake River Valley, in which the major portion of the irrigated lands is situated. Above Snake River Valley, there are small areas of irrigated lands where the canyons widen out in places and form small valleys, and a considerable area in the wider valley of Jordan Creek, a tributary rising in Idaho and flowing westerly to its junction with the main river about midway in its course. The lands irrigated from Jordan Creek are mostly contained in two comparatively level valleys, with an area of some 8,000 acres across which the stream flows through numerous channels and sloughs.

That the lands irrigated from Owyhee River and its tributaries are arid lands, and require artificial irrigation for the raising of profitable crops. The crops raised on the lands in the Snake River Valley, and on the lower end of the stream, consist of alfalfa, clover, orchards, grain and various kinds of vegetables. On the upper parts of the stream and particularly on Jordan Creek, the main crop is wild meadow hay, with some hardy root crops, alfalfa and grain.

24.

That the rights to the use of water from Owyhee River and its tributaries as herein determined shall be limited to the diversion of the amount of water which can be applied to beneficial use, and shall be further limited as follows:

The amount of water diverted from main Owyhee River for irrigation purposes shall not exceed one acre foot per acre during any calendar month prior to June 1st, and three-fourths acre foot per acre during any calendar month after June 1st, of each year; and the total quantity diverted during the irrigation season, from April 1st to October 15th, shall not exceed three acre feet per acre.

The amount of water diverted from tributaries of Owyhee River for

irrigation purposes shall not exceed three-fourths acre foot per acre during any calendar month prior to June 1st, and one-half acre foot per acre during any calendar month after June 1st, of each year; and the total quantity diverted during the irrigation season from April 1st to July 15th, shall not exceed two and one-half acre feet per acre.

That the rate of flow or head of water diverted for any lands shall not exceed one-fortieth of a cubic foot per second per acre (one inch per acre) prior to June 1st, and one-eightieth of a cubic foot per second per acre (one-half inch per acre) after June 1st, of each year, except where rotation is practiced, as herein provided.

That the water master of the district in which Owyhee River and its tributaries are situated, shall arrange such system or systems of rotation as may be best applicable, either by giving a greater quantity of water for a proportionately less time, or by arranging such appropriators in groups or systems of rotation, first giving the appropriator who is first in priority an amount of water equal to the combined appropriations of all the appropriators in said group or system for a length of time bearing the same ratio to the whole time required to make complete rotation through the whole group or system as the appropriation of the first appropriator bears to the combined appropriations of said appropriators, and shall serve the next appropriator in priority next with a like amount of water for his proportionate time, and so on until all the appropriators in said group are served. Then the distribution of water shall be repeated in the same manner throughout the irrigating season. In case any two or more appropriators in said group shall have the same priority, then the said water master shall distribute the water as between those having the same priority to the one whose ditch taps the stream next its source first, and the next lower down next, and so on. And when two or more appropriators agree among themselves as to a manner and system of rotation to the use of their water, the said water master shall distribute their water in accordance with such agreement. (Provided, however, that nothing contained in these findings shall operate to interfere with the prior rights of any appropriator not a member of any of such groups or systems of rotation.)

That in case the water flowing in the channel of a stream sinks or fails to flow down the channel thereof so as to be of beneficial use to the appropriator having the prior right to its use, the water master shall allow the diversion thereof by the next in order of priority who can make a beneficial use of such water.

25.

That all parties herein allowed a right to the use of water for irrigation shall be entitled to use such water for stock and domestic purposes, and the right of use of water for stock and domestic purposes as hereby confirmed entitles the owner of such right to divert and use such a quantity of water as is reasonably necessary for his domestic and household use and for stock purposes; that the right to divert and use water for stock and domestic purposes shall continue throughout the year. That outside of the irrigation season, the amount so diverted and used shall not exceed the rate of one-fortieth of one cubic foot per second for each one thousand head of stock, but during the irrigation season appropriators of water for irrigation purposes shall not be entitled to divert any water for stock and domestic purposes in addition to the amount which they are entitled to divert for irrigation purposes.

26.

That the rights to the use of water for irrigation purposes hereby confirmed are appurtenant to the lands herein described, and the rights of use of the waters of said stream and its tributaries by virtue of such rights are limited and confined to the irrigation of the lands described herein to the extent of said lands herein set forth, and the priorities of right herein confirmed confer no right of use of the waters of said stream and its tributaries on any lands other than those specified tracts to which such rights are herein set forth as appurtenant, and each and every person shall be and hereby is prohibited, restrained, and enjoined from diverting and using water from said stream on such other lands without lawful permit first obtained from the State Engineer.

27.

That except as otherwise determined herein, the order of the rights of the respective appropriators of the waters of said stream and its tributaries, and in which order they are entitled to divert and use the said water shall be and is according to the date of the relative priority of the rights as herein set forth and determined, and the first in order of time according to the date of relative priority shall be and is the first in order of right, and so on down to the date of the latest right, and those having prior rights are entitled to divert and use the waters of said stream and its tributaries when necessary for beneficial use in connection with the irrigation of their respective lands or other useful and beneficial purposes for which they are decreed the right of use, at all times against those having subsequent rights without let or hindrance, and whenever the

water is not required by the appropriator having a prior right to its use for the purpose for which said water was appropriated, he must and shall permit it to flow down the natural channel of the stream as it was wont to flow in its natural course without hindrance or diversion thereof, and those having subsequent rights are entitled to the use of such water and to divert the same to the extent of their rights of appropriation according to the order of priority of their rights; and at all times the waters shall be beneficially, economically and reasonably used without waste by those having a right to the use of such water, and no rights of appropriation are hereby confirmed to divert a greater quantity of water into the head of the ditch or ditches of the appropriator having valid right to divert water than such appropriator can beneficially use for the purpose to which the water is to be put.

28.

That each and every appropriator holding a permit or permits covering the right to appropriate water from said Owyhee River or its tributaries, whether a claim thereunder was filed in this proceeding or not, shall have such water rights thereunder as are provided by law, and the rights of such parties shall be completed and established in the manner provided by law for the completion of such rights. That the rights of each and every appropriator holding a water right certificate or certificates covering a right to appropriate water from said Owyhee River or its tributaries, whether a claim thereunder was filed in this proceeding or not, shall be as defined and limited in such certificates, except where such rights have been abandoned subsequent to the issuance of the certificate.

29.

That except as otherwise modified herein, the rights of the various appropriators of water from Owyhee River and its tributaries, arranged in a tabulated form, with the dates of relative priority of such appropriations, the number of acres to which such appropriations are applied and are now limited, the use or uses for which said water was applied, the name of the ditch or other means by which the water so appropriated has been diverted, the name of the stream or other source from which the water has been used, and the description of the lands upon which the water has been used, the tabulated rights of each appropriator being set opposite and following his name and postoffice address, are as follows, to-wit:

And the State Engineer of the State of Oregon, being fully advised in the premises, it is hereby CONSIDERED and ORDERED that the relative rights to the use of the waters of the said OWYHEE RIVER and its tributaries are hereby adjudicated, determined and settled in accordance with and as set forth in the foregoing findings.

Dated this 17th day of April, 1925, at Salem, Oregon.

RHEA LUPER,
STATE ENGINEER.
