

BEFORE THE STATE ENGINEER OF OREGON

Wheeler County.

IN THE MATTER OF THE DETERMINATION OF)
THE RELATIVE RIGHTS TO THE USE OF THE)
WATERS OF BRIDGE CREEK AND ITS TRIBU-)
TARIES, A TRIBUTARY OF THE JOHN DAY)
RIVER.)
-----)

FINDINGS AND ORDER
OF
DETERMINATION.

Now at this time the above entitled matter coming on for consideration by the State Engineer, and it appearing that all evidence and testimony has been taken in the above entitled proceeding, and the State Engineer having carefully considered all of such evidence and testimony, and the engineering data and information gathered in accordance with law, and being now fully advised in the premises, makes and orders to be entered of record in his office the following:

FINDINGS AND ORDER OF DETERMINATION

1.

That on the 4th day of June, 1923, there was filed in the office of the State Engineer an order of the Circuit Court of the State of Oregon for Wheeler County, dated May 14, 1923, in the case of Nellie Siedow, plaintiff, vs. Milton Belcher, David Biggerstaff, George E. Jacobson and Emile H. Jacobson, defendants, directing that said cause be referred to the State Water Board for the purpose of adjudicating the relative rights of all water users from Bridge Creek and its tributaries. That the State Engineer thereupon entered an order directing that such determination be made, fixing a time for the making of the necessary surveys and examination, and the beginning and taking of such testimony as would enable him to determine the rights of the various claimants to the use of water from said stream, as provided by law.

2.

That a notice was prepared by said State Engineer setting forth the date when he, or his assistants, would begin the investigation of the flow of said Bridge Creek and its tributaries, and the ditches diverting water therefrom, and said notice was published in two issues of the Mitchell Sentinel, a newspaper published weekly at Mitchell, Wheeler County, Oregon, and of general circulation in said county; said two issues being those of September 27th and October 4th, 1923, and the date of the last publication of said notice being more than ten days prior to the date fixed for the beginning of the measurements of said stream by the State Engineer.

3.

That the time when the State Engineer or his assistants should begin the examination of said stream, and its tributaries, was set for the 15th day of October,

1923. That at the time so specified, duly qualified assistants of the State Engineer did proceed to make an examination of said stream and its tributaries, and of the ditches and canals diverting water therefrom, and of the land irrigated by the waters of said stream or its tributaries, which observations and measurements were reduced to writing and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats, on a scale of measurement of four inches to the mile, showing with substantial accuracy the course of said stream and its tributaries, the location of the various ditches diverting water therefrom, and the number of acres of land which had been irrigated in each legal subdivision; blue prints of said maps and plats being now on file and a part of the record herein.

4.

That after said examination and measurements were completed, a notice was prepared by the State Engineer setting forth a time and place certain when he would begin the taking of testimony as to the relative rights of the various claimants to the use of the waters of said stream, and said notice was published in two issues of the Fossil Journal, a newspaper published weekly at Fossil, Wheeler County, Oregon, said two issues being those of April 11th and 18th, 1924; and said notice was published in two issues of the Mitchell Sentinel, a newspaper published weekly at Mitchell, Wheeler County, Oregon, said two issues being those of April 10th and 17th, 1924; both of said newspapers being of general circulation in said county, and the date of the last publication of said notice in each case being more than thirty days prior to the date fixed for the beginning of the taking of testimony by the State Engineer.

5.

That on the 1st day of April, 1924, the State Engineer did send by registered mail to each person, firm, or corporation claiming a right to the waters of said stream, or any tributary thereof, and to each person, firm or corporation owning or being in possession of land bordering on or having access to said stream, or its tributaries, insofar as the names of said claimants, owners, firms or corporations could be reasonably ascertained, a notice similar to such published notice, setting forth a time and place when the State Engineer would commence the taking of testimony as to the relative rights of the various claimants to the waters of said stream, or its tributaries. And said State Engineer did enclose with each of said notices a blank form upon which said claimant or person in possession could present in writing all the particulars necessary for the determination of his rights to the waters of said stream, under oath.

That the times and places when and where the said State Engineer or his duly authorized assistant should attend and take the testimony of the various claimants, were fixed as follows, to-wit:

On Tuesday, the 20th of May, 1924, in the City Hall at Mitchell, Oregon.

On Wednesday, the 21st day of May, 1924, in the Circuit Court of the County Court House Room at Fossil, Oregon.

And for a period of 20 days beginning Friday, May 23, 1924, at the office of the State Engineer in the Capitol Building at Salem, Oregon.

That during the period so specified in said notice for the taking of testimony and statements and proofs of claim, claims to the use of the waters of said stream or its tributaries, were filed by the following parties, to-wit:

That upon the completion of the taking of such testimony and claims, the State Engineer did on the 27th day of August, 1924, give notice by registered mail to each of the various claimants to the use of the waters of said stream, or its tributaries, that at the times and places named in the said notice, to-wit:

On Wednesday and Thursday, September 17 and 18, 1924, at the City Hall at Mitchell, Oregon.

On Friday, September 19, 1924, in the Circuit Court Room of the County Court House at Fossil, Oregon.

And for a period of 11 days beginning with Tuesday, September 23, 1924 and ending with Saturday, October 4, 1924 (Sunday excepted) at the office of the State Engineer in the Capitol Building at Salem, Oregon;

the testimony and proofs of claim would be open to public inspection by the various claimants or owners. That a duly authorized representative of said State Engineer did, in accordance with said notice, keep said evidence and claims open to inspection at the times and places aforesaid.

That said notice did also state therein the county in which the determination of the State Engineer in said matter would be heard by the Circuit Court of the State of Oregon, to-wit: The County of Wheeler.

That due proof of the sending of said notice by registered mail, and the holding of said inspection, has been made and filed as a part of the record herein.

9.

12.

Contest No. 1:

Barbara Belcher,

Contestant,

v.

E. M. Stephens and Mary Stephens,

Contestees.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest;

"It is hereby stipulated by and between the Contestant and the Contestee herein, and agreed, that the rights of the Contestees shall be as set forth in their statement and proof of claim filed herein, to-wit, 71.3 acres, except that as to the four and four tenths acres of said land irrigated by means of a pump, that the priority of said four and four tenths acres shall be subsequent to the priority of the lands of the contestant as set forth in her statement and proof of claim filed herein, and the above contest is hereby dismissed and the answer thereto is also dismissed. "

13.

Contest No. 3:

Barbara Belcher,

Contestant,

v.

Ben Taylor,

Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

"It is stipulated and agreed by and between Barbara Belcher, by Paul W. Childers, her attorney, and Ben Taylor, by Jay H. Upton, his attorney, that said Ben Taylor is entitled to a priority date of 1868 for 159 acres of land, and that said Barbara Belcher shall be entitled, by right of prescription and adverse user, to irrigate 98.4 acres with the waters of Gable Creek prior to all of the balance of the lands belonging to said Ben Taylor.

"It is further stipulated and agreed that this agreement shall in no way be deemed as a waiver of the rights of priority claimed by the said Ben Taylor against any of the other users of the waters of said Bridge Creek and its tributaries. "

Contest No. 6.

Barbara Belcher,

Contestant,

v.

A. Creason & Shoemaker,

Contestees.
-----Contest No. 38:

Creason & Shoemaker,

Contestants,

v.

Barbara Belcher,

Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contests;

"In Contest #6, Barbara Belcher against Creason & Shoemaker Bros., and in Contest #38, Creason & Shoemaker Brothers against Barbara Belcher, it is STIPULATED and agreed by and between the attorneys of record for the above mentioned parties that Creason & Shoemaker Bros., shall have a right to the diversion and use of the waters of Bridge Creek sufficient for the irrigation of 100 acres of land prior to Barbara Belcher's claim, and that Barbara Belcher shall then have a right to the irrigation of 98.4 acres of land, and that all other lands for which a water right may be allowed under the claims of Creason & Shoemaker Bros. to the waters of Bridge Creek or its tributaries, shall have a water right subsequent to the above mentioned right for 98.4 acres belonging to Barbara Belcher.

"It is understood and agreed, however, that in entering into this stipulation as between said contestant and said contestee that neither party thereto waives any rights or priority or otherwise as against any other claimants to the waters of Bridge Creek or its tributaries.

"Based upon the above stipulation, the two contests above mentioned are hereby withdrawn. "

Contest No. 7:

Barbara Belcher,

Contestant,

v.

L. L. Jones,

Contestee.
-----Contest No. 18:

L. L. Jones,

Contestant,

v.

Barbara Belcher,

Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contests:

"Now as to Contest #7, Barbara Belcher against L. L. Jones, and Contest #18, L. L. Jones against Barbara Belcher, it is agreed that Barbara Belcher is claiming a right to the use of the waters of Gable Creek for the irrigation of 98.4 acres with a date of priority of 1878, and that L. L. Jones is claiming a right to the use of the waters of Gable Creek for the irrigation of 22 acres with a date of priority of 1876, and it is further stipulated and agreed by and between the parties above named through their respective attorneys that each be given a right to the use of said waters to the amounts claimed, and that as to dates of priority the rights to said use shall be equal.

"Based upon the above mentioned stipulation, these two contests may be dismissed."

Contest No. 8:

Barbara Belcher,
Contestant,
v.
Nellie Siedow,
Contestee.

Contest No. 11:

Nellie Siedow,
Contestant,
v.
Barbara Belcher,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contests:

"It is hereby stipulated by and between Barbara Belcher and Nellie Siedow that Contests Nos. 8 and 11, Barbara Belcher against Nellie Siedow and Nellie Siedow against Barbara Belcher, respectively, shall be settled as follows: It is agreed that Barbara Belcher shall have the right to irrigate 98.4 acres of land as claimed in her application, and Nellie Siedow shall have the right to irrigate 77.8 acres of land under proof #82, and as between the parties hereto they shall take equal priority.

"However, it is further stipulated and agreed that in the event of a shortage of water during any season hereafter, that a system of rotation shall be invoked, and that Barbara Belcher shall have a use of the water of Gable Creek under such rotation for a period of two days and Nellie Siedow shall have the use of the water of Gable Creek under such rotation for a period of one day. Provided, however, that at all times the said Nellie Siedow shall be entitled to, and receive, a sufficient amount of water for household, stock and domestic use, and said Barbara Belcher shall also have a right to the waters of said stream for household, stock and domestic use. And that the use of the water herein stipulated shall be and become appurtenant to the land."

Contest No. 9:

Nellie Siedow,
Contestant,
v.
A. Creason & Shoemaker Bros.,
Contestees.

Contest No. 52:

Creason & Shoemaker Bros.,
Contestants,

v.

Nellie Siedow,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contests;

"In Contest #9, Nellie Siedow against Creason & Shoemaker Bros., and in Contest #52, Creason & Shoemaker Bros. against Nellie Siedow, it is hereby STIPULATED and agreed by and between the attorneys of record for the above mentioned parties that Creason & Shoemaker Bros. shall have a right to diversion and use of the waters of Bridge Creek sufficient for the irrigation of 100 acres of land prior to Nellie Siedow's claim, and that Nellie Siedow shall then have a right to irrigation of 77.8 acres of land, and that all other lands for which a water right may be allowed under the claims of Creason & Shoemaker Bros. to the waters of Bridge Creek or its tributaries, shall have a water right subsequent to the above mentioned right of 77.8 acres belonging to Nellie Siedow.

"It is understood and agreed, however, that in entering into this stipulation as between said contestant and said contestee that neither party thereto waives any rights of priority or otherwise as against any other claimants to the waters of Bridge Creek or its tributaries. "

18.

Contest No. 10:

Nellie Siedow,
Contestant,

v.

Ben Taylor,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

It is stipulated by and between Nellie Siedow, by her attorney, R.C. Bradshaw, and Ben Taylor, by his attorney, Jay H. Upton, that the said Ben Taylor has a priority date of the year 1868 for the irrigation of 159 acres of land on Bridge Creek and its tributaries, and that Nellie Siedow, an appropriator of the waters of Gable Creek, shall have the right, by right of prescription and adverse use, to the use of the waters for the irrigation of 77.8 acres prior to the remaining portion of the lands of the said Ben Taylor now irrigated from the waters of Bridge Creek and its tributaries.

"It is expressly stipulated and agreed, however, that said Ben Taylor in entering into this stipulation does not waive any date of priority for any of the water of Bridge Creek or its tributaries as against any other person or claimants on said stream."

19.

Contest No. 13:

Nellie Siedow,
Contestant,

v.

E. M. Stephens & Mary E. Stephens,
Contestees.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

"It is hereby stipulated by and between the Contestant and the Contestees herein, and agreed, that the rights of the Contestees shall be as set forth in their statement and proof of claim filed herein except that as to the four and four-tenths acres of land irrigated by means of a pump, that the priority of said four and four-tenths acres shall be subsequent to the priority of the lands of the Contestant as set forth in her statement and proof of claim filed herein, and the above contest is hereby dismissed and the answer thereto is also dismissed."

20.

Contest No. 14:

Ben Taylor,
Contestant,

v.

E. M. Stephens & Mary E. Stephens,
Contestees.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

"It is hereby stipulated and agreed by and between the Contestant and the Contestees herein that the rights of the contestees shall be as set forth in their statement and proof of claim filed herein except that as to 4 and four-tenths acres of said land irrigated by means of a pump, that the priority of said four and four-tenths acres shall be subsequent to the priority of the lands of the Contestant as set forth in his statement and proof of claim filed herein, and the above contest is hereby dismissed and the answer thereto is also dismissed."

Contestant,

v.

Creason & Shoemaker, Bros.,
Contestees.

Contest No. 45:

Creason & Shoemaker Bros.,
Contestants,

v.

L. L. Jones,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contests:

"In Contest #16, L. L. Jones against Creason & Shoemaker Bros., and also in the contest of Creason & Shoemaker Bros., against L. L. Jones, #45, it is STIPULATED and agreed by and between the respective parties, both Contestee and Contestant, through their respective attorneys that Creason & Shoemaker Bros., shall be awarded a right to the use of water sufficient to irrigate 100 acres, as of a date prior in time to that of L. L. Jones, but that any other rights to the use of the waters of Bridge Creek or its tributaries by Creason & Shoemaker Bros., shall be inferior and subsequent in time to the rights claimed by L. L. Jones to said water.

"It is understood and agreed, however, that in entering into this stipulation as between said Contestants and said Contestees, that neither party thereto waives any rights of priority or otherwise, as against any other claimants to the waters of Bridge Creek or its tributaries."

22.

Contest No. 19:

L. L. Jones,
Contestant,
v.
Ben Taylor,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

"It is stipulated by and between N. G. Wallace and Donald M. Graham, attorneys for L. L. Jones, Contestant, and Jay H. Upton, attorney for Ben Taylor, Contestee, that Ben Taylor is entitled to and shall be given a date of priority of the year 1868 for 159 acres, and that L. L. Jones shall be allowed a date of priority of 1871 for 100 acres; and the said Ben Taylor a right for 120.1 acres, and the said L. L. Jones a right for 53.5 acres, with an equal date of priority, immediately subsequent to the prior date of 1871 for which the 100 acres of L. L. Jones' claim heretofore mentioned has been stipulated. The above stipulation has no reference to the Ben Taylor claim to the waters of Bear Creek on which was filed no contest.

"It is understood and agreed, however, that in entering into this stipulation, as between the said Contestant and said Contestee, that neither party thereto waives any right of priority or otherwise, as against any other claimants to the waters of Bridge Creek or its tributaries."

25.

Contest No. 27:

Creason & Shoemaker Bros.,
Contestants,

v.

Ben Taylor,
Contestee.

That upon the date fixed for the beginning of the taking of testimony in this proceeding, the following stipulation was entered into in settlement of the above contest:

"It is stipulated by and between Creason & Shoemaker Brothers by John H. Lewis, their attorney, and Ben Taylor by Jay H. Upton, his attorney, that Ben Taylor shall be entitled to a water right for 159 acres with a priority date of 1868, and that Creason & Shoemaker Brothers are entitled to a right for 100 acres with a priority date of 1872, and that Ben Taylor is entitled to a right

for 120.1 acres with a date immediately subsequent to the aforesaid priority of the said Creason & Shoemaker Bros., and that the said Creason & Shoemaker Bros., are entitled to a right for 100 acres with a date of priority immediately subsequent to the aforesaid 120.1 acres allotted to Ben Taylor.

"It is understood and agreed, however, that in entering into this stipulation as between said Contestant and said Contestee, that neither party thereto waives any rights of priority or otherwise, as against any other claimants to the waters of Bridge Creek or its tributaries.

"It is further understood and agreed that the water rights aforesaid shall be appurtenant to all of the lands claimed under the various proofs of claim, and not to any particular subdivision thereof."

26.

That a stipulation was filed in this proceeding by and between Sarah E. Keyes and Custer T. Keyes, as follows:

"IT IS HEREBY STIPULATED, by and between Sarah E. Keyes and Custer T. Keyes, that the right of Custer T. Keyes as set forth in his statement and proof of claim in these proceedings to the waters of Keyes Creek are prior and superior to the rights of Sarah E. Keyes to the waters of said stream as set forth in her statement and proof of claim filed herein.

"In witness whereof the parties hereto have hereunto set their hands at Mitchell, Oregon, this 25th day of May, 1925.

(SGD) SARAH E. KEYES

(SGD) CUSTER T. KEYES "

27.

That in the distribution of water on Bridge Creek and its tributaries, the water/^{master} shall observe the provisions of the foregoing stipulations, as between the parties thereto. As against other water users on the stream, however, who are not parties to such stipulations, the rights of the parties shall be administered in accordance with their relative dates of priority as set forth in the tabulation hereinafter contained.

It appears that in some cases the carrying out of the provisions of the stipulations above quoted, affecting the distribution of water to certain appropriators, may at times be so complicated as to render it impossible to enforce them without interfering with the rights of third parties, who are not bound by such stipulations. In the distribution of water by the water master, therefore, the provisions of such stipulations shall be observed and enforced, as between the parties thereto, only when the enforcement thereof will not be injurious to the rights of third parties. In the event of such injury the stipulations shall be disregarded by the water master, and the rights of the parties affected shall be administered in accordance with their relative dates of

priority as set forth in the tabulation hereinafter contained. It further appears that the rights mutually recognized in each other by the parties to some of the stipulations, are not in fact in accordance with the true rights of said parties as decreed herein. It shall be expressly understood that such stipulations do not add to the rights of the parties thereto, as set forth in the tabulation hereinafter contained and that such stipulations apply only to the particular rights and lands designated in such stipulations as involved in this proceeding and recognized herein.

Where reference is made in a stipulation to a certain acreage owned by a claimant, it is to be understood that the stipulation applies to the water right claimed for that acreage, and no other. Where the particular acreage to which the stipulation is intended to apply is not clearly designated, it shall be deemed to apply to the acreage and rights involved in this proceeding, and in the particular contest disposed of by such stipulation.

The several stipulations wherein it is agreed that Creason & Shoemaker Brothers shall have a superior right to sufficient water for the irrigation of 100 acres (See Paragraph 14, 17, 21, 25) shall be construed as applying to a certain 100 acres of the 152.9 acres of land for which a water right was claimed in this proceeding by said Creason & Shoemaker under priority of 1872, which 100 acres shall be selected and such selection adhered to by said Creason & Shoemaker throughout each irrigation season.

The same provision is made with respect to the rights of Ben Taylor involved in the stipulation entered into in Contest No. 27. The tracts of 159 and 120 acres may be selected by Ben Taylor, but during any one irrigation season shall remain fixed, notwithstanding the provision of the third paragraph of said stipulation.

28.

That Bridge Creek watershed, comprising an area of about 540 square miles, lies in three adjoining counties, - Wheeler, Crook and Jefferson, with the greater portion in Wheeler County. The creek drains a portion of a spur of the Blue Mountains and empties into the John Day River near the Burnt Ranch Post Office. The general direction of the main creek is northwesterly, with all principal tributaries flowing into it from the southwest slope, which

is situated in the mountains, and is partially forested, while the northeastern slope is high, open desert land. The tributaries of Bridge Creek, in order of occurrence from its mouth upward, are: Bear Creek, Taylor Creek (or West Branch), Gable Creek, Nelson Creek and Mill Creek, from the southwest slope, and Keyes Creek from the northeast slope.

That the soils of the lands under irrigation consist of sandy and gravelly loams on the higher areas, and sedimentary deposits on the valley bottom areas. Irrigation is necessary for the raising of profitable crops. The crops raised consist of hardy grains, alfalfa, forage and root crops, garden truck and some orchard products.

That said Bridge Creek and its tributaries are perennial streams and their waters are subject to appropriation under the laws of the State of Oregon.

29.

That at the time the various contests hereinbefore described came on for hearing and were settled by stipulation, a general stipulation was also entered into, suggesting that jurisdiction be retained by the State Engineer for a period of two years for the purpose of making engineering studies of stream flow and return seepage from upper irrigated tracts, so that proper provisions might be made in the final decree for the administration of the various rights to the best advantage of all, with necessary restrictions on the individual diversions. The stipulation also provided a temporary duty of water to be used during the two-year period. It was urged by certain of the upper users that the more water that is taken out and used by them in the early part of the season, the more water is available for the users below during the dry part of the season later on, on the theory that the upper irrigated lands act as a storage of the early flood water so used, which later returns to the stream in the form of seepage.

It was also suggested that the stream be divided into two or more units for administrative purposes, and that the water be distributed in each unit without regard to the priorities of the rights in the other units.

Two irrigation seasons have elapsed since the above proceedings were had, during which there has been a water master in charge of the distribution of water on the stream under the direction of the State Engineer. The stipulations entered into in settlement of contests have been enforced to some extent and the rights in general have been administered according to relative priorities. From the information afforded by this opportunity of putting the proposed regulations into actual operation, and from the observations and studies made prior thereto, it seems best not to divide the stream into units as above indicated. Considering all available data, the following limitations are made for the administration of the rights involved herein:

The rights to the use of the waters of Bridge Creek and its tributaries as involved herein, shall entitle the holders thereof to the use of the quantity of water which may be applied to a beneficial use, within the following limitations: The use of water for irrigation purposes shall be confined to an irrigation season from March 1st to October 1st of each year, during which period the water diverted from all streams except Gable Creek and its tributaries shall not exceed a rate of one-fortieth of a cubic foot per second per acre of land irrigated before June 15th, and a rate of one-eightieth of a cubic foot per second per acre of land irrigated after June 15th. The records and evidence herein show that conditions on Gable Creek are radically different from those on the rest of the stream system. The water supply of that stream has been very deficient, and the water users have been compelled to exact a high duty from the available flow. On Gable Creek and its tributaries the water diverted shall not exceed a rate of one-eightieth of a cubic foot per second per acre of land irrigated before June 15th, and a rate of one-hundredth of a cubic foot per second per acre of land irrigated after June 15th. The water used under these limitations shall be measured at the point of diversion from the stream. The basis of determining the quantity to which an appropriator is entitled at any time under the above limitations shall be the acreage actually prepared for irrigation and to which water may be beneficially applied in the production of crops.

30.

That the water master of the district in which Bridge Creek and its tributaries are situated may arrange such system or systems of rotation as

may be best applicable to the conditions arising from time to time in the distribution of water on such stream. When two or more appropriators agree between themselves as to a manner and system of rotation in the use of their water, the water master shall distribute such water in accordance with such agreement, providing that in so doing, he does not interfere with the rights of any appropriator not a member of such group or system of rotation.

That in case the water flowing in the channel of a stream or ditch sinks or fails to flow down the channel so as to be of beneficial use to an appropriator having the prior right to its use, the water master shall allow the diversion thereof by the next appropriator in order of priority who can make a beneficial use of such water.

31.

That all parties herein allowed the right to the use of water for irrigation shall be entitled to use such water for stock and domestic purposes; provided, that during the irrigation season such appropriators shall not be entitled to divert any water for stock or domestic purposes in addition to the amount which they are entitled to divert for irrigation purposes. That outside of the irrigation season, the right to the use of water for stock and domestic purposes as herein confirmed, entitles the owner of such right to divert and use such a quantity of water as is reasonably necessary for stock and domestic purposes, and to prevent the water in the ditches and channels used for such purposes from being completely frozen; provided, that the amount diverted for stock uses shall not exceed one-tenth of one cubic foot per second for each ranch or appropriator.

32.

That the rights to the use of water for irrigation purposes hereby confirmed are appurtenant to the lands herein described, and the rights of use of the waters of said stream and its tributaries by virtue of such rights are limited and confined to the irrigation of the lands described herein to the extent of said lands herein set forth, and the priorities of right herein confirmed confer no right of use of the waters of said stream and its tributaries on any lands than those specified tracts to which such rights are herein set forth as appurtenant, and each and every person shall be and hereby is prohibited, restrained, and enjoined from diverting and using water from said stream on such other lands without lawful permit first obtained from the State Engineer.

That except as otherwise determined herein, the order of the rights of the respective appropriators of the waters of said stream and its tributaries, and in which order they are entitled to divert and use the said water shall be and is according to the date of the relative priority of the rights as herein set forth and determined, and the first in order of time according to the date of relative priority shall be and is the first in order of right, and so on down to the date of the latest right, and those having prior rights are entitled to divert and use the waters of said stream and its tributaries when necessary for beneficial use in connection with the irrigation of their respective lands or other useful and beneficial purposes for which they are decreed the right of use, at all times against those having subsequent rights without let or hindrance, and whenever the water is not required by the appropriator having a prior right to its use for the purpose for which said water was appropriated, he must and shall permit it to flow down the natural channel of the stream as it was wont to flow in its natural course without hindrance or diversion thereof, and those having subsequent rights are entitled to the use of such water and to divert the same to the extent of their rights of appropriation according to the order of priority of their rights; and at all times the waters shall be beneficially, economically and reasonably used without waste by those having a right to the use of such water, and no rights of appropriation are hereby confirmed to divert a greater quantity of water than such appropriator can beneficially use for the purpose to which the water is to be put.

That each and every appropriator holding a permit or permits covering the right to appropriate water from said Bridge Creek, or its tributaries, whether a claim thereunder was filed in this proceeding or not, shall have such water rights thereunder as are provided by law, and the rights of such parties shall be completed and established in the manner provided by law for the completion of such rights. That the rights of each and every appropriator holding a water right certificate or certificates covering a right to appropriate water from said Bridge Creek or its tributaries, whether a claim thereunder was filed in this proceeding or not, shall be as defined and limited in such certificates, except where such rights have been abandoned subsequent to the issuance of the certificate.

That except as otherwise modified herein, the rights of the various appropriators of water from Bridge Creek and its tributaries, arranged in tabulated form, with the dates of relative priority of such appropriations, the number of acres to which such appropriations are applied and are now limited, the use or uses to which said water is applied, the name of the ditch or other means by which the water so appropriated has been diverted, the name of the stream or other source from which the water has been used, and the description of the lands upon which the water has been used, the tabulated rights of each appropriator being set opposite and following his name and post office address, are as follows, to-wit:
