IN THE CIRCUIT COURT OF THE STATE OF OREGON

FOR UMATILLA COUNTY

- - - - -

IN THE MATTER OF THE DETERMINATION )  
OF THE RELATIVE RIGHTS TO THE USE )  
OF THE WATERS OF THE WALLA WALLA )  
RIVER AND ITS TRIBUTARIES, A TRIBU- )  
TARY OF COLUMBIA RIVER. )  
----- )

MODIFIED FINDINGS  
and  
DECREE

The State Engineer having heretofore made his findings of fact and order of determination herein, determining and establishing the several rights to the use of the waters of the above named stream and its tributaries, and there having been filed with the Clerk of this Court on the 24th day of December, 1930, the original evidence filed with the State Engineer in connection with such determination, together with a copy of the findings of fact and order of determination of said State Engineer as the same appears of record in his office, and said State Engineer having thereupon procured from this Court an order fixing the 9th day of March, 1931 as the time at which the determination herein would be heard by this Court, and notice of said hearing and of the time fixed therefor having been duly and regularly given to all parties interested in the matter and within the time required by law, and exceptions in writing to the findings and order of determination of said State Engineer having been duly and regularly served in the manner required by law and filed herein prior to the time for said hearing, the Court made an order fixing May 11, 1931, at 10 o'clock A.M. for the hearing upon the exceptions. The Court also appointed J. S. Beckwith as referee to take testimony in event any party or parties desired to take further testimony upon the exceptions filed, and the order provided that a notice to take further testimony should be served on the adverse parties ten days before the date of the hearing, and that no further testimony should be taken on any of the exceptions filed unless notice thereof be served prior to March 20, 1931 except upon proper showing made to the Court. Testimony having been taken on various of the exceptions filed, and briefs having been filed by the parties interested upon all the exceptions filed and the cause now being before this Court for decision and having considered all of the evidence herein and the Court being fully advised in the premises, finds as follows:

1.

That the Walla Walla River is situated partly in the northeastern part of Umatilla County, Oregon, and partly in the southern portion of Walla Walla County, Washington, and is a non-navigable, natural water course, tributary to the Columbia River, and that said stream and its tributaries and the lands irrigated therefrom, for the purpose of these findings, are situated in Umatilla County, Oregon.

2.

That on the 10th day of May, 1913 there was filed with the Board of Control of the State of Oregon (later State Water Board, and now State Engineer) a petition signed by Mary A. Wilson, Harry A. Wells, Mrs. Perry, Frank Eiffert, W. H. Kintner and Fred Eiffert, requesting a determination of the relative rights of the various claimants to the use of the waters of the Little Walla Walla River, a tributary of Walla Walla River; that on the 10th day of June, 1918, there was filed with the State Water Board of the State of Oregon (now State Engineer) a petition signed by Fred Eiffert, J. W. Keen, W. E. McDaniel et al, requesting a determination of the relative rights to the use of the waters of the East Prong of the Little Walla Walla River, tributary of Walla Walla River; that on the 22nd day of March, 1919, there was filed with the State Water Board a petition signed by Jasper R. Sams requesting a determination of the relative rights to the use of the waters of Couse Creek and its tributaries, a tributary of Walla Walla River; That on the 20th day of May, 1920, there was filed with the State Water Board a petition signed by T. J. Green, C. E. Harrah et al requesting a determination of the relative rights to the use of the waters from Wilson and Wells ditch, diverting water from the Middle Fork Walla Walla River, a tributary of the Walla Walla River; that on the 11th day of January, 1922, there was filed with the State Water Board a petition signed by M. A. Harrah, Minnie S. Mitchell, et al requesting a determination of the relative rights to the use of the waters of Spring Creek, tributary of Walla Walla River; that on the 6th day of October, 1923, there was filed with the State Water Board a petition signed by A. L. Kintner requesting the determination of the relative rights to the use of the waters of an unnamed spring, tributary to the Walla Walla River; that on the 8th day of July, 1925, there was filed with the State Engineer a petition signed by F. B. Clark and Ed Lewis, requesting the determination of the relative rights to the use of the waters of Lewis Spring Creek, a tributary of Walla Walla River; that on the 9th day of January, 1926, there was filed in the office of the State Engineer of the State of Oregon, a petition signed by J. E. Alexander, et al, requesting the determination of the relative rights to the use of waters from the Milton, Freewater Hudson Bay Irrigation Company Canal diverting water from the Walla Walla River; that on the 21st day of April, 1926,

there was filed with the State Engineer a petition signed by Alta Rogers et al, requesting the determination of the relative rights to the use of the waters of the Walla Walla River and its tributaries. That the State Engineer, after a full investigation and due consideration of said petition, finding the facts and conditions such as to justify it, fixed a time for the beginning of such examinations and investigations and surveys as would enable him to determine the relative rights of the various claimants to the use of the waters of Walla Walla River and all of its tributaries, except those upon which such a determination had heretofore been made.

3.

That a notice was prepared by the State Engineer setting forth the fact that such examinations, surveys and investigations of the flow of the stream and of the ditches diverting water therefrom were being conducted, and said notice was published in two issues of the Milton Eagle, a newspaper printed and published weekly at Milton, County of Umatilla, State of Oregon, said publications being made for two consecutive weeks of the following dates, to-wit: September 9th, 1926 and September 16th, 1926; and said notice was published in two issues of the Freewater Times, a newspaper printed and published weekly at Freewater, County of Umatilla, State of Oregon, said publications being made for two consecutive weeks of the following dates, to-wit: September 10th, 1926 and September 17th, 1926; said newspapers having general circulation in said Umatilla County.

4.

That duly qualified assistants of the State Engineer did proceed to make examinations, surveys and measurements of said stream and its tributaries, and of the ditches and canals or other works diverting water therefrom and surveys of the land irrigated, and gathered such other data and information as were essential to the proper determination of the relative rights of the parties interested; which said observations and measurements were reduced to writing and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats on a scale of more than one inch to the mile, showing with substantial accuracy the course of said stream and its tributaries, the location of each ditch or canal diverting water therefrom, and the number of acres of land which had been irrigated in each legal subdivision; blue prints of said maps and plats being now on file and a part of the record herein.

5.

That as soon as practicable after the examination and measurements were completed as described in the preceding paragraph, the State Engineer did prepare a notice setting forth a place and time certain when he would begin the taking of testi-

mony (in form of written statements and proofs of claim) as to the relative rights of the various claimants to the use of the waters of said stream and its tributaries; that said notice was published in two issues of the Milton Eagle, a newspaper printed and published weekly at Milton, County of Umatilla, State of Oregon, said publication being made for two consecutive weeks of the following dates, to-wit: August 4th, 1927 and August 11th, 1927, and said notice was published in two issues of the Freewater Times, a newspaper printed and published weekly at Freewater, County of Umatilla, State of Oregon, said publication being made for two consecutive weeks of the following dates, to-wit: August 5th, 1927 and August 12th, 1927; said newspapers having general circulation in Umatilla County, the last publication of said notice in each case being at least 30 days prior to the first date fixed for taking claims by the State Engineer.

6.

That the State Engineer did send by registered mail to each person, firm or corporation claiming a right to the use of any of the waters of said stream, and to each person, firm or corporation owning or being in possession of lands bordering on or having access to said stream or its tributaries, insofar as said claimants and owners and persons in possession could reasonably be ascertained, a notice similar to such published notice, setting forth the date when the State Engineer or his authorized assistants would receive the statements and proofs of claims of the various claimants to the waters of said stream and its tributaries. That said notice was mailed at least 30 days prior to the date set therein for the receiving of claims in each instance. And the State Engineer did enclose with each of said notices a blank form upon which the claimant or owner could prepare in writing all the particulars necessary for the determination of his right, under oath.

7.

That the times and places when and where the State Engineer, or his duly authorized assistant should attend and receive the claims of the various parties were fixed as follows:

On Monday, Tuesday and Wednesday, September 12th, 13th and 14th, 1927, at the City Library Hall at Milton, Umatilla County, Oregon,

And for a period of 30 days beginning Monday, September 19, 1927, at the office of the State Engineer in the Capitol Building, at Salem, Oregon.

8.

That the following persons were duly notified of the proceeding by registered mail and by publication of said notices, as set forth by paragraphs 3 and 5 hereof, and by the affidavits of publication and post office registry receipts in Volume 1, (pages 16 to 89) of the evidence herein, having failed, neglected and refused

to appear herein and submit proof of a right to the use of the waters of said stream or its tributaries, if any they have or claim, and that such parties are in default, and that such default is here entered against them, and each of them, and such parties are hereby enjoined and inhibited from using or asserting any rights to the use of the waters of said stream or any tributary thereof included in this proceeding, except by, through or under the rights of the persons whose water rights are defined herein, or under and by virtue of the permits issued by the State Engineer:

9.

That upon the completion of the taking of testimony and proofs of claim, as aforesaid, the State Engineer did, on the 2nd day of July, 1928, give notice by registered mail to each of the various claimants to the use of the waters of said stream, or its tributaries here involved, that at the times and places named in the said notice, to-wit:

From Monday, July 23, to Friday, July 27, 1928, inclusive, at the office of the State Engineer in the Capitol Building at Salem, Oregon.

On Monday, Tuesday, Wednesday and Thursday, July 30 and 31, and August 1 and 2, 1928, at the City Library Hall at Milton, Oregon.

From Monday, August 6, to Friday, August 17, 1928, inclusive (Sundays excepted), at the office of the State Engineer in the Capitol Building at Salem, Oregon, all of said testimony and proofs of claim would be open to public inspection by the various claimants or owners. That a duly authorized representative of the State Engineer did, in accordance with said notice, keep said evidence open to inspection for the periods aforesaid. That said notice did also state therein the County in which the determination of the State Engineer would be heard by the Circuit Court, to-wit: the County of Umatilla.

That due proof of the sending of said notice by registered mail of said inspection, has been made and filed as a part of the record herein. (Vol.I.P.91 - 136)

That within the time fixed by law therefor, the following contests were initiated by the filing with said State Engineer of notice of contests in writing:

Contest No. 1

J. W. Kliphardt, Phillip Fritzler, M. C. Hanley, Successor in interest of Carl McDaniel; Gertie Hunter, Wm. Pomeroy, Emma Chappell, F. G. Metz, C. R. Garrett, E. F. Seal, Albert Webber, A. T. 11.

That after filing of said statements of contest, the State Engineer did fix a time and place for the hearing of each and every of said contests and did, on the 23rd day of October, 1928, serve notice of hearing of said contests on each of the parties to each and every of said contests, the dates fixed for hearing in each instance being more than 30 days and less than 60 days from the date the notice of hearing was served upon said parties. That due proof of serving of said notices has been made

and filed as a part of the record herein. (Vol. 1, 137 - 144). That upon the date as fixed for the hearing of said contests, the taking of testimony was commenced before a duly authorized reporter, and continued until each of said contests were fully heard, settled by stipulation or otherwise disposed of.

12.

Contest No. 1

J.W.Kliphardt, Phillip Fritsler,  
M.C.Hanley, successor to Carl Mc-  
Daniel, Gertie Hunter, Wm. Pomeroy,  
Emma Chappell, F.G.Metz, C.R.Garrett,  
E.F.Seal, Albert Webber, A.T.Cannady,  
W.A.Hart, O. L. Simmons, successor to  
J.E.Ward, G.L.Carey, and Bank of  
Freewater, a corporation,  
Contestants,

v.

Hibernia Commercial and Savings Bank,  
a corporation,  
Contestee.

This contest came on for hearing, but the contestee after due notice failed to make an appearance or submit any evidence in support of its claim. The contest was directed against Proof No. 357 under which a right is claimed for the irrigation of 60 acres, with a priority of 1871. It does not appear that the Contestee or its predecessor have ever made an actual diversion of the water upon the land, but rely upon the initiation of its right by virtue of subirrigation from certain springs arising and spring branches flowing through the land, and that of being a riparian owner. It also appears that the Contestee would claim as an appropriator.

The common law riparian doctrine only applies in this State in a modified form and the proof filed by the Contestee is insufficient to substantiate a right by appropriation, therefore the claim is denied.

13.

Contest No. 2

Pleasantview Irrigation Company,  
Contestant,

v.

Clara Anspach, William Gordon McMillan,  
Francis Duncan McMillan, Harold Edward  
McMillan (by W.L.Sterling, Agent),  
Contestees.

This contest was disposed of by stipulation and the rights of the Contestees are hereby settled in accordance with the terms thereof, subject to the general findings herein, and as more specifically set forth in the tabulation of water rights and made a part hereof.

DECREE - WALLA WALLA RIVER

Page 27.

14.

Contest No. 3

Pleasantview Irrigation Company,  
Contestant,

v.

Belle Arbogast, Warren F. Eifert,  
A. Lefor, Warren W. and Cinderella  
Roder,

Contestees.

The rights of the contestees were settled by stipulation and allowed in accordance with the terms thereof, and as set forth in the tabulation herein-after set forth.

15.

Contest No. 4

Pleasantview Irrigation Company,  
Contestant,

v.

Ida M. Avey, Contestee.

On motion of Contestant, this contest was dismissed and the claims of Contestee are hereby allowed as set forth in Proofs Nos. 19 and 20, and as herein-after tabulated.

Exceptions were filed to the above findings of the State Engineer. A stipulation was filed as settling the exceptions by which it was agreed that the allowance under said proof number 19 should remain the same but under proof number 20 the tabulation of the State Engineer should be changed so as to allow the claimant 10 acres with priority as of October 1, 1908. The findings of the State Engineer and the tabulation thereof will be modified to conform to this stipulation.

16.

Contest No. 5

Pleasantview Irrigation Company,  
Contestant,

v.

Dr. F. G. A. Bardenheir, L.L. Johnson,  
Lenius Johnson, Geo. H. Durrie, Arthur  
M. Koon, and George Starkel,

Contestees.

This contest was settled by stipulation and the rights of Contestees allowed as hereinafter tabulated.

17.

Contest No. 6

Pleasantview Irrigation Company,  
Contestant,

v.

J.L. Balliett, F.A. Wilkinson, and John  
Dougherty,

Contestees.

DECREE - WALLA WALLA RIVER

Page 28.

This contest came on for hearing but no evidence was offered by Contestees in support of their claim. Under Proof No. 24 Contestees J. L. Balliett and F. A. Wilkinson claim a right to the use of the waters of the Walla Walla River conveyed through the Milton Ditch, for the irrigation of 7.8 acres lying within the E $\frac{1}{2}$  of the NW $\frac{1}{4}$ , Section 3, Tp. 5 N., R. 35 E., W. M. It would appear from testimony offered by Contestant that no water was ever diverted from the Walla Walla River through the Milton Ditch for use on the Contestees' land but they have appropriated and used waters wasting from adjoining land on the east and belonging to J. N. Stone. The claim of Contestees as to the waters of the Walla Walla River and through the Milton Ditch is denied. Contestees are entitled, however, to the use of the water wasting from the adjoining property of J. N. Stone to the extent hereinafter tabulated, but nothing herein shall be construed as giving the Contestees a right against said adjoining property owner or his successors in interest to maintain such waste for Contestees' benefit.

Contestee John Dougherty filed his Proof No. 171 for a right to use the waters of the Walla Walla River, and carried through the Milton Ditch for the irrigation of 2 acres located in the NE $\frac{1}{4}$  NW $\frac{1}{4}$ , and 3 acres in the SE $\frac{1}{4}$  NW $\frac{1}{4}$ , Section 3, Tp. 5 N., R. 35 E., W. M. No evidence was introduced by Contestee in support of said proof but the Contestant offered testimony showing no water from the Walla Walla River or Milton Ditch was ever used on Contestee's land and that such land received its irrigation water from waters wasting from the lands adjoining those of Contestee on the east, and belonging to R. W. Dougherty. The claim of Contestee for a water right from the Walla Walla River and through the Milton Ditch is denied. The Contestee will be allowed the right to the use of such waste water as hereinafter tabulated, but nothing herein shall be construed as to give the Contestee a right against the adjoining property owner or his successor in interest to maintain such waste for the benefit of the Contestee.

18.

Contest No. 7

Pleasantview Irrigation Company,  
Contestant,

v.

Walter R. Bitney,  
Contestee.

The rights of the Contestee were settled by stipulation and allowed in accordance therewith and as hereinafter set forth in the tabulation.

19.

Contest No. 8

Pleasantview Irrigation Company,  
Contestant,

v.

Ben D. Bolt, E.C.Collins, E.J.Davis,  
E.W.Orr, and F.E.Wilcox,  
Contestees.

This contest came on for hearing and was partly settled by Stipulation. It

appears that the lands owned by Contestees were at one time held under one ownership in the name of Andrew J. Crigler. By decree in the suit entitled "Little Walla Walla River Irrigation Union et al v. Finis Irrigation Co. et al", the Crigler tract was awarded a water right of one and one-half inches per acre for 3 acres with 1878 priority and 13.45 acres with 1895 priority. A stipulation was entered into between the parties to this contest distributing this decreed right among the contestees as follows:

|                |            |                |
|----------------|------------|----------------|
| Ben D. Bolt,   | 2.1 acres, | priority 1895. |
| E. C. Collins, | 2.1 acres, | priority 1895. |
| E. J. Davis,   | 1.5 acres, | priority 1878. |
|                | 0.6 acres, | priority 1895. |
| E. W. Orr,     | 1.5 acres, | priority 1878. |
|                | 4.6 acres, | priority 1895. |
| F.E.Wilcox,    | 4.0 acres, | priority 1895. |

Under the respective proofs as filed by the Contestees herein an additional acreage to the decreed rights were claimed with a priority of 1908. It is against these rights that this contest is directed, the Contestant contending that its rights are superior and prior in time to those of Contestees and that the use of the water by Contestant was adverse to that of Contestees. The evidence does not substantiate the contentions of the Contestant but to the contrary indicates that the lands for which a water right is sought, have been under irrigation from the date claimed and that profitable crops have been raised each year up to the time of these proceedings, which could not have been done without the application of water. The claims of the Contestees are allowed, subject to the stipulation herein filed and as hereinafter tabulated.

20.

Contest No. 9

Pleasantview Irrigation Company,  
Contestant,

v.

C. H. Borstler,  
Contestee.

The Contestee claimed a water right for the irrigation of 7 acres within the NE $\frac{1}{4}$ NW $\frac{1}{4}$ , Section 26, Tp. 6 N., R. 35 E., W. M. At the time this contest came on for hearing no appearance was made by the Contestee. Testimony was introduced by the Contestant indicating that but one acre of land had been irrigated. A water right for the irrigation of this acre was decreed in a previous suit, allowing a priority of 1872. The maps prepared under the direction of the State Engineer and now a part of this record show none of the land irrigated. No map was filed by the Contestee. The claim will be denied with the exception of the right to irrigate one acre as formerly decreed.

21.

Contest No. 10

Pleasantview Irrigation Company,  
Contestant,

v.

Lena M. Clark and R. C. Sheets,  
Contestees.

DECREE - WALLA WALLA RIVER

Page 30.

Contest No 10 - continued

Contestee R. C. Sheets filed Proof No. 753 claiming water from the Little Walla Walla River for the irrigation of 2 acres with priority of 1898; Proof No. 754 claiming water from the same source for the irrigation of 7 acres, with priority of 1905, and Proof No. 755 claiming a right to irrigate 7 acres, the source of the appropriation being designated as underground water, with priority of 1919. As to the latter (Proof No. 755) the claim is rejected for lack of jurisdiction. A stipulation was filed in settlement of this contest wherein the 1898 right was conceded and the 1905 right under Proof No. 754 is denied. The rights will be tabulated accordingly. (See Findings under Contest No. 78, Paragraph 85, page 79).

Contestee Lena Clark filed Proof No. 110 for the irrigation of 3 acres from the Walla Walla River, with priority of 1875, and Proof No. 111 for water from the Walla Walla River for the irrigation of 3 acres with priority of 1905. By stipulation this acreage under Proof No. 111 was reduced to 1.22 acres. Also, Contestee Clark filed Proof No. 112 for the appropriation of underground water with priority of 1924, which claim will be rejected on jurisdictional grounds, The tabulation will set forth the rights as stipulated.

22.

Contest No. 11

Pleasantview Irrigation Company,  
Contestant,

v.

Ben D. Bolt, and Anne E. Golden,  
Contestees.

Contestee Ben D. Bolt filed Proof No. 928 claiming a right to irrigate 4.27 acres lying within the  $S\frac{1}{2} SW\frac{1}{4} NE\frac{1}{4}$ , Section 26, Tp. 6 N., R. 35 E., W. M., with a priority of 1890, and a right to irrigate 1.73 acres within the same described subdivision with a priority of 1905.

Contestee Anne E. Golden submitted Proof No. 256 for a right to irrigate 5 acres, 1890 priority, and 0.9 acre, 1908 priority; said lands being within the  $W\frac{1}{2}$  of the  $SW\frac{1}{4} NE\frac{1}{4}$ , Section 26, Tp. 6 N., R. 35 E., W. M.

It appears that at one time the lands belonging to the Contestees were owned by J. C. Pritchett and it would indicate by the stipulation filed, in part settlement of this contest, that said Pritchett was a party to the Little Walla Walla Irrigation Union et al v. Finis Irrigation Company et al, suit, and was decreed a water right for 8.57 acres of land with priority of 1887. The stipulation between the parties in this contest would allow contestees a water right equally distributed between them for 8.7 acres with a priority of 1887 as successors to Pritchett, which in effect would allow them an earlier priority than claimed. A motion to amend the claim was not made. Other users on the stream did not have notice of the change

Contest No. 11 - continued

therefore the stipulation will be disregarded. The evidence shows that Contestees beneficially applied the water to their lands and raised crops thereon to entitle them to the use of the water as claimed, and the rights will be so tabulated. The contention of the Contestant that it has an adverse and superior right is not supported by the evidence.

23.

Contest No. 12

Pleasantview Irrigation Company,  
Contestant,

v.

Pearl M. Cochran and J. N. Simmons,  
Contestees.

This contest was settled by stipulation and the Contestees are hereby allowed a water right for their lands as claimed, with the exception that Contestee Pearl M. Cochran shall only be entitled to a water right for 2.5 acres instead of 4 acres.

24.

Contest No. 13

Pleasantview Irrigation Company,  
Contestant,

v.

Milan Cook, J. E. Fredericks, T.A. Williams, (Chas. McCraw, successor in interest), R.E.Osborn and F.N.Olson,  
Contestees.

A stipulation was filed in full settlement of this contest and the rights of the Contestees are tabulated in accordance therewith.

It appears that T. A. Williams filed Proof No. 902 and subsequently conveyed his interest to Chas. McCraw. The right should be tabulated in the name of Chas. McCraw.

25.

Contest No. 14

Pleasantview Irrigation Company,  
Contestant,

v.

C. P. Collins,  
Contestee.

The Contestee filed in these proceedings his Proof No. 127, claiming a right to irrigate 8.7 acres with priority of 1893, from the waters of the Walla Walla River. At the time of hearing a stipulation was entered into and filed between the parties to this contest, wherein the Contestee agreed to take a date of priority of 1904 for the irrigation of 8.7 acres up to June 1st of each year, after which time this right would be inferior to that of the Contestant.

The rights of Contestee were also involved in Contests Nos. 73 and 75 wherein

DECREE - WALLA WALLA RIVER

Page 32.

Contest No. 14 - continued.

the findings pertaining to the users from the Finis Ditch are more thoroughly set forth. The Contestee will be allowed a water right from the Walla Walla River for the irrigation of 8.7 acres with a priority of 1904 but such right shall be inferior to all rights subsequent to 1904 and prior to 1928, when these proceedings were first initiated. Nothing herein shall be construed to give Contestee any right or interest in the Milton Ditch for any purpose whatsoever.

Exceptions were filed by the Finis Ditch claimants to the above findings as to the rights of C. P. Collins under Proof No. 127. A stipulation was filed between the exceptors and the claimant, C. P. Collins, reducing the right of the claimant to waste waters running from the H. S. Shangle ranch. The claimant will be allowed a right to the use of the waste water running from the H. S. Shangle ranch but shall have no right to water from the Walla Walla River and no right to the use of the Finis Ditch. The tabulation is modified to conform to the stipulation and shall read as follows: under head of relative priority, 1904; number of acres, 8.7; name of ditch, none; stream, waste water from H. S. Shangle ranch.

26.

Contest No. 15

Pleasantview Irrigation Company,  
Contestant,

v.

H. M. Connell,  
Contestee.

This contest was settled by stipulation and the rights of Contestee allowed as claimed with the exception that right of Contestee to the use of water for 1.98 acres was limited to be used from October 15th of each year to June 1st of the following year. The right will be tabulated in accordance with the above.

27.

Contest No. 16

Pleasantview Irrigation Company,  
Contestant,

v.

Henry Eiffert,  
Contestee.

This contest was settled by stipulation and the rights of Contestee are settled in accordance with the provisions thereof and carried forward in the tabulation herein.

28.

Contest No. 17

Pleasantview Irrigation Company,  
Contestant,

v.

John E. Dougherty,  
Contestee.

The rights of this Contestee were involved in Contest No. 6, Paragraph 17,

Contest No. 17 - continued.

Page 28 herein and are settled in accordance with such findings.

29.

Contest No. 18

Pleasantview Irrigation Company,  
Contestant,

v.

Farmers Security Bank of Milton,  
Oregon, and William Roth,  
Contestees.

This contest was settled by stipulation and the rights will be tabulated in accordance with the terms thereof with the exception of that part of said stipulation which attempts to award Contestee William Roth a water right for the irrigation of 6 acres with a priority of 1915. These proceedings are confined to the determination of those rights initiated prior to 1909, and since said date it is necessary for one desiring to secure a water right to follow the statutory procedure as set forth by the Water Code of this State. There is no evidence which indicates that this has been done by the Contestee and the stipulation in so far as the 1915 right is concerned will be considered ineffective and the right denied.

30.

Contest No. 19

Pleasantview Irrigation Company,  
Contestant,

v.

A. C. Franklin,  
Contestee.

For the purpose of taking testimony this contest was consolidated with No. 48 and the rights of Contestees appearing in both contests (Nos. 19 and 48) will be considered in this finding.

The contest in so far as W. A. Propeck is concerned (appearing as Contestee in Contest No. 48) was dismissed and his rights are allowed as claimed and will be so tabulated.

Exceptions were filed to the above findings on proof of claim No. 658 filed by W. A. Propeck. A stipulation was filed by the exceptors and the claimants limiting the use of the water by the claimant under said proof after June 1, of each year wherein the rights should be limited to such water as is available in excess of the amount required to fill the appropriations and rights having a priority of 1908 or earlier. In all other respects the findings on this proof to be affirmed. The findings of the State Engineer with reference to this claim will be modified to conform to the stipulation and affirmed as modified.

Contestee A. C. Franklin filed Proof No. 225 claiming a right to the use of

Contest No. 19 - continued

the waters of the east branch of the west branch of Crockett Branch of the Little Walla Walla River, for the irrigation of 5.6 acres with a priority of 1908. The testimony is convincing that the land was irrigated in 1908 and has been each year since to the time of these proceedings. The right will be allowed as claimed.

Contestee Mary Shackelford filed her Proof No. 743 for the use of water from the same source as Contestee Franklin for the irrigation of 6.4 acres with a priority of 1906. The testimony shows that ditches were on the Shackelford land in 1906 when the place was bought and that irrigation had been practiced prior to that time and crops raised each year since. The right will be allowed as claimed.

There is no evidence of material character in support of adverse use on part of Contestant nor that Contestant's rights are prior to those of Contestees.

31.

Contest No. 20

Pleasantview Irrigation Company,  
Contestant,

v.

Edna Goodman,  
Contestee.

The Contestee filed Proof No. 258 claiming a right to irrigate 17.8 acres from the West Fork of the Crockett Branch with priorities as follows:

- 3 acres with 1878 priority
- 6 acres with 1893 priority
- 7 acres with 1905 priority
- 1.8 acres with 1906 priority, all the acreage being within

the S $\frac{1}{2}$  of the SE $\frac{1}{4}$  SW $\frac{1}{4}$ , Section 26, Tp. 6 N., R. 35 E., W. M. A stipulation was entered in settlement of the contest wherein the Contestee relinquished the right for the irrigation of 1.8 acres with 1906 priority. The claim will be allowed in accordance with the stipulation.

32.

Contest No. 21

Pleasantview Irrigation Company,  
Contestant,

v.

Clara E. Hardy,  
Contestee.

The contest was settled by stipulation, the Contestee limiting the right for 4.7 acres with priority of 1908 to be used from October 15th of each year to June 1st the following year. The claim will be tabulated noting the limitation.

33.

Contest No. 22

Pleasantview Irrigation Company,  
Contestant,

v.

H. F. Green,  
Contestee.

DECREE - WALLA WALLA RIVER

Contestee filed Proof No. 268 claiming a right for the irrigation of 2.7 acres with a priority of 1905, the source of the appropriation being the East Branch of the Ford Branch of Little Walla Walla River. A stipulation was filed in settlement of the contest wherein Contestee agreed to a priority of 1908 instead of 1905. The claim will be allowed with the exception that the date of priority will be changed to 1908.

34.

Contest No. 23

Pleasantview Irrigation Company,  
Contestant,

v.

C. E. Herr and H. A. Herr,  
Contestees.

A stipulation was entered in settlement of this contest and no testimony was offered by either party. The Contestees claimed as follows:

Herr, C. E.

Filed Proofs Nos. 346 and 347. Under Proof No. 346 a water right from the East Branch of the Ford Branch of the Little Walla Walla River was claimed for the irrigation of 2 acres with a priority of 1885 and 2 acres with priority of 1900. The claim under Proof No. 347 was not contested and will not be considered.

Exceptions were filed to the above findings with reference to the claim of C. E. Herr. The claimant seeks permission to amend his claim No. 346 so as to claim 4 acres with a priority of 1885. A stipulation was filed with the State Engineer settling this contest and stipulating that C. E. Herr under Proof No. 346 should have a right for 4 acres with a priority of 1885. He failed to amend his proof before the State Engineer and therefore the stipulation was not followed. The claimant will be allowed to amend his Proof No. 346 so as to claim a right for 4 acres with a priority of 1885 to be irrigated through a private ditch from the east prong of the Ford Branch of the Little Walla Walla River. The findings of the State Engineer and the tabulation will be modified accordingly.

Herr, H. A.

Filed Proofs Nos. 349 and 350. As Contestee's claim filed under Proof No. 350 was not involved in this contest, this finding will only relate to Proof No. 349 of Contestee H. A. Herr, by which a water right from the Ford Branch of Little Walla Walla River is claimed for the irrigation of 5 acres of land, with priority of 1882 for 2 acres and 1897 for 3 acres.

The provisions of the stipulation would allow the Contestee C. E. Herr a water right for 4 acres with a priority of 1885 and H. A. Herr a priority of 1885 for 0.5 acre and 1897 for 3.5 acres. In that the claim was not amended and other parties who might

Contest No. 23 - continued

be interested notified, the stipulation will be set aside in so far as it affects the claim of C. E. Herr, and his water right will be tabulated as claimed. The provisions of the stipulation will be operative as to H. A. Herr and his rights will be tabulated accordingly.

35.

Contest No. 24

Pleasantview Irrigation Company,  
Contestant,

v.

John Hess (S.Eaton, successor in interest), G.Q.Pearson, Ruth Townsend (successor in interest to A.Richards), Blanche Weiss, Frank Derrick, and John L. Wilson,

Contestees.

The rights of the Contestees in this contest were settled by stipulation and the tabulation will set forth their respective rights in accordance therewith.

36.

Contest No. 25

Pleasantview Irrigation Company,  
Contestant,

v.

Herman Hurst (J.E.Irons, successor in interest),

Contestee.

This contest was dismissed and J. E. Irons as successor in interest to Herman Hurst, is allowed a water right for the irrigation of 9 acres with priority of 1886 from the Little Walla Walla River.

37.

Contest No. 26

Pleasantview Irrigation Company,  
Contestant,

v.

A.E.Hull, W.H.Hull, J.W.Taylor, J.C.Ruby, F.P.Ransome, J.Frank Ray, and Chas. L. Stewart,

Contestees.

This contest was settled by stipulation and the provisions thereof will be incorporated in these findings with the exception that where an earlier date of priority is allowed contestee than that claimed.

Hull, A.E.

Filed Proof No. 394, claiming a right to irrigate 4.8 acres from waters of the East Fork of Crockett Branch of Little Walla Walla River with priority of 1892 for

DECREE - WALLA WALLA RIVER

Page 37

Contest No. 26 - continued

4.0 acres and 1908 for 0.8 acre. In accordance with the stipulation filed in settlement of this contest, A.E.Hull will be allowed a water right for 4.0 acres with a priority of 1900.

Hull, W. H.

Filed Proof No. 395, claiming a water right from the East Fork of Crockett Branch of the Little Walla Walla River, for the irrigation of 4.5 acres with priority of 1892. The provisions of the stipulation filed would allow Contestee W.H.Hull a right to irrigate 4.0 acres with a priority of 1891 or one year earlier than claimed; this part of the stipulation will be disregarded and the tabulation will show Contestee W.H.Hull to have a water right for 4.0 acres with priority of 1892.

Taylor, John W.

Filed Proof No. 824 for the irrigation of 5.5 acres from the East Fork of the Crockett Branch with priority of 1892. The stipulation would give him a priority of 1891 and will therefore be disregarded in the tabulating of this right.

Ruby, J.C.

Filed Proof No. 709 claiming a right to irrigate 13.5 acres from the East and West Branch of the Crockett Branch of the Little Walla Walla River with acreages and priorities as follows:

|                         |
|-------------------------|
| 5.5 acres - 1892        |
| 4.0 acres - 1898        |
| 1.5 acres - 1900        |
| 1.0 acre - 1902         |
| <u>1.5 acres - 1906</u> |
| 13.5 acres              |

According to the stipulation the rights would be:

|                         |
|-------------------------|
| 3.5 acres - 1891        |
| 3.0 acres - 1892        |
| 4.0 acres - 1898        |
| <u>3.0 acres - 1903</u> |
| 13.5 acres -            |

The right will be allowed as follows:

|                         |
|-------------------------|
| 5.5 acres - 1892        |
| 4.0 acres - 1898        |
| <u>4.0 acres - 1903</u> |
| 13.5 acres.             |

Ransome, F.P.

Filed Proof No. 663 for the irrigation of 8.2 acres with priority of 1892 for 5.0 acres, and 1900 for 3.2 acres, from the waters of the East Fork of Crockett Branch of the Walla Walla River. In accordance with the stipulation Contestee F.P. Ransome will be allowed the right to irrigate 5.0 acres with priority of 1900.

Ray, J. Frank

Filed Proof No. 667 for the irrigation of 3.4 acres with priority of 1889. The right will be allowed as stipulated with a date of priority of 1892 instead of 1889.

Contest No. 26 - continued

Stewart, Chas. L.

Filed Proofs Nos. 799 and 800, under which he claimed respectively the right to irrigate 9.3 acres from the East Branch of Crockett Branch of Little Walla Walla River with priority of 1889 and 5.4 acres with priority of 1897. By the terms of the stipulation he would be allowed to irrigate 11.76 acres with priority of 1892 and 1.0 acre with priority of 1900. His right will be tabulated and allowed as follows:

9.3 acres - 1892  
3.46 acres - 1900

Exceptions were filed to the above findings as it relates to the rights of Charles L. Stewart under Proof No. 800. A stipulation was filed settling this contest, in which stipulation it is provided that the claimant should have a right for 2.46 acres with a priority of 1892, and 1 acre with a priority of 1900. Claimant will be permitted to amend his claim No. 800 to conform to the stipulation and his rights will be tabulated accordingly.

38.

Contest No. 27

Pleasantview Irrigation Company,  
Contestant,

v.

Edith Ireland,  
Contestee.

Contestee claimed a water right from the Little Walla Walla River for the irrigation of 5.61 acres with priority of 1890. The contest was settled by stipulation and Contestee's right will be tabulated in accordance with the provisions thereof.

39.

Contest No. 28

Pleasantview Irrigation Company,  
Contestant,

v.

Otto Jeckal,  
Contestee.

This contest was settled by stipulation and the rights of Contestee will be tabulated as stipulated.

40.

Contest No. 29

Pleasantview Irrigation Company,  
Contestant,

v.

Geo.E.James and Hattie James,  
Contestees.

This contest was settled by stipulation wherein Contestees will be allowed a water right for 3.65 acres from the Walla Walla River with priority of 1894 for 2 acres and 1900 for 1.65 acres.

Contest No. 30Pleasantview Irrigation Company,  
Contestant,

v.

Dan Herndon, Laura and Kyle Kendall,  
Clarence Morse, Alta Rogers, Lola B.  
Morse, and S. Potter,  
Contestees.

A stipulation was filed in settlement of this contest and rights of Contestee will be allowed as follows:

Herndon, D. B.

Filed Proof No. 344 claiming a right to irrigate 3.0 acres with priority of 1883. By stipulation the right will be allowed for 2.41 acres with priority of 1898.

The above findings will be modified in accordance with a stipulation filed by the exceptors and claimants, providing that D. B. Herndon under Proof No. 345 will be permitted to amend his claim changing his priority to 1875 and the source of the water right to the East Prong of the Little Walla Walla River Spring Branch. The tabulation will be modified accordingly.

Kendall, Laura and Kyle.

Filed proof No. 443 claiming a right to irrigate 9.8 acres from Ford Branch of Walla Walla River with priority of 1 acre; 1886; 1 acre, 1898; and 7.8 acres, 1908. The stipulation wherein it would allow Contestees 2 acres with priority of 1886 will be disregarded and Contestees rights will be tabulated as claimed.

Exceptions were filed to the above findings and a stipulation was filed by the exceptors and the claimants limiting the rights under said filing to the period between October 15th and June 1st, of each year. The tabulation will be modified to conform to the stipulation limiting the claimants rights under Proof No. 443 to the period between October 15th and June 1st, of each year.

Morse, Clarence L.

Contestee's right will be tabulated as claimed and the stipulation disregarded.

Exceptions were filed to the above findings in connection with Proof No. 574 filed by Clarence L. Morse. This claim was included in Contest No. 30 in which a stipulation was filed allowing the claimant 5 acres with priority of 1886. The claimant did not amend his proof to conform to the stipulation and it was therefore ignored by the State Engineer. The claimant now seeks to amend his claim to correspond to the stipulation. This amendment will be allowed and the claimant will be allowed 5 acres with a priority of 1886 and the tabulation will be modified accordingly.

Contest No. 30 - continued

Rogers, Alta

Filed Proofs Nos. 693 and 694. By stipulation the claim under Proof No. 693 was withdrawn and will not be included in the tabulation.

The claim under Proof No. 694 was for 10 acres and reduced to 9.2 acres, by stipulation.

Morse, Lola

Filed Proof No. 943 which was withdrawn by stipulation and will not be tabulated.

Potter, Samuel G.

Filed Proof No. 646, claiming a right to irrigate 3 acres with priority of 1895; by stipulation the priority was advanced to 1898 and will be so tabulated.

42.

Contest No. 31

Pleasantview Irrigation Company,  
Contestant,

v.

Ben Knight, and Jas. H. Knight,  
Contestees.

A stipulation was filed in settlement of this Contest and the rights of Contestees will be tabulated in accordance therewith.

43.

Contest No. 32

Pleasantview Irrigation Company,  
Contestant,

v.

M. C. Lamke,  
Contestee.

Contestee filed Proof No. 463, claiming a right to irrigate 14 acres with priority of 1890. The contest was settled by stipulation wherein Contestee was agreed to have a right for 3.39 acres with priority of 1888, 2.5 acres, 1900; 2.0 acres, 1905 and 6.0 acres, 1908, the latter being limited to use from October 15th each year to June 1st the following year. The stipulation as to the 1888 right will be disregarded and the Contestee will be allowed a right for 3.39 acres with priority of 1890. With this exception the rights of Contestee will be allowed as stipulated.

44.

Contest No. 33

Pleasantview Irrigation Company,  
Contestant,

v.

Wm. Lloyd Estate (By Henry Lloyd, Admr.)  
Contestee.

This contest was settled by stipulation and the rights of Contestee will be tabulated in accordance with the terms thereof, with the exception that the acreage

Contest No. 33 - continued

as claimed under Proof No. 487 will be allowed as claimed instead of as stipulated.

The duty of water for the land covered by Contestee's Proofs Nos. 487 and 488 is hereby fixed (as stipulated) to be one inch per acre.

Exceptions were filed by the Milton-Freewater & Hudson Bay Irrigation Company to the above findings. A stipulation was filed by the exceptors and the claimant to the effect that as between the claimant, William Lloyd Estate and the exceptors on claimant's Proofs Nos. 487 and 488, the claimant's right to the use of water shall be limited to a period prior to June 1st of each year. This restriction to apply as between the Milton-Freewater & Hudson Bay Irrigation Company and the William Lloyd Estate only. The tabulation of claimant's right is hereby modified to conform to the stipulation.

45.

Contest No. 34

Pleasantview Irrigation Company,  
Contestant,

v.

Wm. R., And Zola Helen Love,  
Contestees.

This contest was settled by stipulation wherein Contestees were allowed 20 miners inches of water for the irrigation of 25 acres from the Walla Walla River with date of priority of 1892, up to and including June 15th of each irrigation season. The right will be tabulated accordingly.

Exceptions were filed by the Milton-Freewater & Hudson Bay Irrigation Company to the above findings as to the rights of William R. Love and Zola Helen Love under Proof No. 493. A stipulation was also filed, signed by the exceptors and claimants limiting the rights of the claimants, as between the claimants and exceptor, to the use of water prior to June 1st of each year. The tabulation will be modified as stipulated.

46.

Contest No. 35

Pleasantview Irrigation Company,  
Contestant,

v.

Mrs. Sam Lynd,  
Contestee.

Contestee filed Proof No. 495 claiming a right to irrigate 4.63 acres with priority of 1886; 5.54 acres with priority of 1903, and 0.73 acre with priority of 1906. This contest was settled by stipulation wherein the right for 0.73 acre with priority of 1906 was withdrawn. The rights of Contestee will be tabulated accordingly.

47.

Contest No. 36

Pleasantview Irrigation Company,  
Contestant,

v.

John McEwan and H. S. Shangle,  
Contestees.

Contest No. 36 - continued

A stipulation was entered in settlement of this contest, the terms of which will be modified in certain particulars:

McEwan, John:

The above named contestee filed Proofs Nos. 508, 509, 510, 511 and 512, all of which were contested with the exception of Proof No. 510.

Under Proof No. 508 Contestee claims the right to irrigate 15 acres with priority of 1876. It appears that the source of the appropriation is waste water accumulating on what is known as the "Wilder Place", being the NE $\frac{1}{4}$ NE $\frac{1}{4}$  Sec. 4, Tp. 5 N., R. 35 E., W. M. The claim will be allowed with the exception that the appropriation will be designated as waste water instead of water from the Walla Walla River, but nothing herein shall be construed which would compel the parties responsible for such waste to continue the same for the benefit of Contestee. The right will also be subject to the stipulation filed in settlement of Contests Nos. 66 and 67 which is set out in full hereinafter, being Paragraph 76 of these findings.

The Contestee claimed under Proof No. 509 the right to irrigate 15 acres with priority of 1892, the source of the appropriation being designated as the Walla Walla River. It appears however, that the water is waste originating on the "Burns" place, being in the NW $\frac{1}{4}$ NW $\frac{1}{4}$  Section 3, Tp. 5 N., R. 35 E., W. M. The right will be allowed subject to the stipulation changing the date of priority to be 1901 instead of 1892. The source of the appropriation will be designated as waste water instead of the Walla Walla River, but nothing herein shall be construed as to compel the parties responsible for such waste to continue the same for the benefit of Contestee. This right will also be subject to the stipulation entered in settlement of Contests Nos. 66 and 67 and hereinafter set forth in full, being Paragraph 76 of these findings.

Under Proof No. 511 Contestee claims the right to irrigate 25 acres from the waters of the Ford Branch of Little Walla Walla River with priority of 1880 for 10 acres and 1901 for 15 acres. The stipulation filed in settlement of this contest would appear to deprive Contestee of the 1901-right and confine his claims to the irrigation of 25 acres instead of 40.3, apparently on the theory that Proofs Nos. 508 and 509 are supplemental to each other and that Proof No. 512 is supplemental to Proof No. 511. Taking into consideration the claims filed by Contestee, the stipulation filed by the parties to this contest, the brief filed in behalf of Contestant and the State Engineer's maps showing the irrigable area, it appears that Proofs Nos. 508 and 509 are supplemental to Proof No. 512 and the total right of Contestee should be 40.3 acres instead of 25 acres. The right of Contestee under Proof No. 511 will be allowed as claimed.

By Proof No. 512 Contestee would claim a right to irrigate 15.3 acres from the waters of the Walla Walla River through the Finis Ditch with dates of priority

DECREE - WALLA WALLA RIVER

Page 43

Contest No. 36 - Continued

of 1883 - 1901. The rights of Contestee under this appropriation will be governed by the findings under Contests Nos. 73 and 75, Paragraphs Nos. 81 and 83, pages 67 and 69 which dispose of the rights of the Finis Ditch users. The stipulation in so far as it advances the date of priority under this claim will be recognized and tabulated as of 1902 in accordance therewith.

H. S. Shangle:

Filed Proofs Nos. 746, 747 and 748. Under Proofs Nos. 747 and 748 it appears the source of the appropriation is waste water and is the same as that claimed by Contestee McEwan under Proofs Nos. 508 and 509. The rights of Contestee under Proofs Nos. 747 and 748 were acquired under Permits issued by the State Engineer, being Permits Nos. 5437 and 5537 respectively. The rights will be allowed as claimed subject to the use of the water as set forth in the stipulation filed in settlement of Contests Nos. 66 and 67 and hereinafter found on Page 58 of these findings.

Contestee Shangle under Proof No. 746 claimed a right to irrigate 18.6 acres from the Walla Walla River through the Finis Ditch with priority of 1883 and 1901. By the terms of the stipulation the priorities of 1883 and 1901 were waived and the Contestee will be allowed a right with priority of 1902 as stipulated. The rights of Contestee under said Proof No. 746 will be more thoroughly considered by the findings disposing of Contests Nos. 73 and 75 and will be governed thereby,

48.

Contest No. 37

Pleasantview Irrigation Company,  
Contestant,

v.

The City of Milton, and Milton Ditch  
Company, Contestees.

A stipulation was filed in settlement of the rights of the Milton Ditch Company and in part settlement of the contest against the City of Milton. As the City rights are involved in other contests, such rights will be more thoroughly considered under Contest No. 76, Page 60 herein.

It was claimed by Contestant that the City of Milton and the Milton Ditch Company were supplying water for irrigation purposes to the same land and thus causing a duplication of water rights. In order to care for this situation it was stipulated by the parties to this contest that in those cases where an individual was receiving water from the City of Milton for the irrigation of his or her premises that the Milton Ditch Company would not have the right to furnish water for the same land during the same time and visa versa. The record does not disclose that the City of Milton is claiming a

DECREE - WALLA WALLA RIVER

Page 44

water right for irrigation purposes other than for one acre located within the SW $\frac{1}{4}$  NE $\frac{1}{4}$  Section 12, Tp. 5 N., R. 35 E., W. M. under Proof No. 564. That the City has a right to supply its people with water from its domestic or municipal right can not be denied nor can the water users from the City be restrained from using the water for general domestic purposes, which includes the watering of a lawn and small family gardens; beyond this the City should have no right to distribute water for irrigation purposes, and will be restrained from doing so. The stipulation, in so far as attempting to define the irrigation rights of the City of Milton, will be disregarded and its rights will be limited as hereinbefore set forth.

Milton Ditch Company:

Filed its Proof No. 565 claiming a right to irrigate 407.79 acres from the Walla Walla River with dates of priority as set out in the Proof of Claim specifying each individual right under the Milton Ditch. The rights of the Milton Ditch Company were involved in a previous suit entitled "Little Walla Walla River Irrigation Union et al vs. Finis Irrigation Company et al. (62 Or. 348)" by which it was decreed 445 miners inches of water with priority previous to 1888 and an additional 215.25 miners inches with priority previous to 1898, but subsequent to 1888. With the exception of 85 acres the duty of water was fixed by the Court to be 1-1/2 miners inches per acre. Two inches per acre was allowed 85 acres which were classified as lands producing vegetables and small fruits. There is nothing in the record which would indicate the character of the different lands or what is being raised thereon. Under the circumstances it is impossible to determine which acre is entitled to two or which should be allowed one and one-half miners inches per acre. It is reasonable to assume that a portion of the 85 acres which previously raised vegetables and small fruits are now raising different crops. Under the circumstances all the land under the Milton Ditch will be allowed the same duty, namely: one and one-half inches per acre.

In addition to the claim filed by the Milton Ditch Company practically all the individual users also filed a claim. In a few instances parties filed proof of claim which were not included in the blanket claim made by the Company. None of these claims were contested and therefore will be allowed and their rights tabulated with those under the Milton Ditch Company. In other cases claim was made by the Ditch Company for certain individuals who did not file a separate claim. The rights of these parties will be allowed as claimed by the Company. The priority allowed the Company by the Court in the previous suit is indefinite and difficult to administer, therefore each individual tract will be awarded a water right with priority as claimed and in those cases where the claim made by the Company for a certain priority varies with that of the individual, the latter's priority will govern and the rights will be so tabulated.

Contest No. 38:Pleasantview Irrigation Company,  
Contestant,

v.

F.S.McMahan Estate (by Margaret J.  
McMahan, executrix), J.M.Morris,  
J.H.Piper, and H.E.Winn,  
Contestees.

This contest was settled by stipulation, the results of which will be incorporated in the tabulation herein, with the exception where said stipulation attempts to give to Contestee F.S.McMahan Estate an earlier date of priority than claimed for 8.0 acres of his land, and Contestee H. E. Winn an earlier priority than claimed for 3.0 acres.

Exceptions were filed to the above findings. The claimant, F. S. McMahan Estate, has petitioned the Court for permission to amend its claim to conform to a stipulation in settlement of said contest before the State Engineer. Claimant will be permitted to amend its claim No. 520 so as to claim the right for irrigation for 8 acres with priority of 1894 and the claimant's rights will be allowed as stipulated and the tabulation modified accordingly.

50.

Contest No. 39Pleasantview Irrigation Company,  
Contestant,

v.

F.E.McSherry and S.S.Shields,  
Contestees.

A stipulation was filed in settlement of this contest wherein it was attempted to divide equally between the Contestees herein a right to irrigate 7.0 acres with priority of 1878, and in addition thereto to allow each of the Contestees a right to irrigate 1.3 acres from surplus waters with priority of 1908. Contestee McSherry, under Proof No. 524, claimed a right to irrigate 4.8 acres with priority of 1878 and Contestee Shields the right to irrigate 4.8 acres with priority of 1895. The Proofs of Claim were not amended to conform with the terms of the stipulation. The rights of Contestees will be tabulated giving each the right to irrigate 2.4 acres with priority of 1878 and 2.4 acres with priority of 1908, the latter to be a surplus water right and subject to be used so long as such water is available under said date of priority.

Exceptions were filed to the above findings on Proof No. 524, filed by F. E. McSherry. The claimant seeks permission to amend his claim No. 524 to conform to the stipulation filed before the State Engineer in settlement of said Contest. The claimant will be permitted to amend said claim as requested and will be awarded a water right for 3.5 acres with a priority of 1878, and 1.3 acres with a priority of 1908, the latter being surplus water only and the tabulation will be modified accordingly.

Exceptions were also filed on Proof No. 759, filed by S.S.Shields. The claimant seeks permission to amend his claim No. 759 to conform to the stipulation filed with

the State Engineer in settlement of said contest. The claimant will be permitted to amend said claim as requested and will be awarded a water right for 3.5 acres with priority of 1878 and 1.3 acres with a priority of 1908, the latter being surplus water only, and the tabulation will be modified accordingly.

51.

Contest No. 40

Pleasantview Irrigation Company,  
Contestant,

v.

W. E. Mack and C. E. Herr,  
Contestees.

This contest was directed mainly against Proof No. 525 wherein Contestee W. E. Mack claimed a right to irrigate 0.5 acre with priority of 1894, and 2.5 acres with priority of 1901. It appears at the time of the previous suit (Little Walla Walla Irrigation Union et al vs. Finis Irrigation Co., et al), the lands owned by the Contestees herein were under one ownership and allowed a water right for 2.5 acres. Two acres being that land for which a water right is claimed by Contestee C. E. Herr under Proof No. 347 with priority of 1896 and one-half acre under Proof No. 525 with priority of 1894. It appears the information upon which the Court based this decreed right was collected by a committee selected from the water users and in all probability is more reliable than the memory of witnesses testifying at the time of these proceedings. From the evidence it seems as though the 2.5 acres should be allowed the same date of priority, namely: 1894, and will be so tabulated. The evidence would indicate beyond a doubt that the remaining 2.5 acres for which a priority of 1901 is claimed was not irrigated at the time the data was collected for the Court, which appears to have been some time beginning in 1905. In 1906, however, it is apparent that this acreage was set out in orchard and could not have been raised to maturity without irrigation. This acreage will be allowed a priority of 1906.

The record indicates that the lands since the beginning of these proceedings and described under Proof No. 525, (filed by Contestee W. E. Mack), are now owned by Contestee C. E. Herr, and the water right for these lands will be tabulated under the latter's name.

52.

Contest No. 41

Pleasantview Irrigation Company,  
Contestant,

v.

F. Mauch and Margaretha Mauch,  
Contestees.

This contest was settled by stipulation wherein the Contestees were allowed a water right for the irrigation of 2.0 acres with priority of 1905 and the duty of

Contest No. 41 - Continued

water fixed thereby at two inches per acre. With the exception of the duty of water, the right will be tabulated in accordance with the stipulation. The duty of water for this acreage will be as claimed: one and one-half inches per acre.

Exceptions were filed to the above findings on Proof No. 543, filed by F. Mauch and Margaretha Mauch. The contest was settled by stipulation awarding the claimants a water right for 2 acres of land with a priority of 1905 for 2 inches of water miners measurements per acre. The claimants are successors in interest to persons by the name of Bartlett, who were parties to the case of Little Walla Walla Irrigation Union et al vs. Finis Irrigation Company et al, and in that case the former owners of this land were awarded 2 inches miners measurement per acre for the 2 acres of land described in the claimant's proof. The State Engineer adopted the settlement between the parties as stipulated except as to the 2 inches per acre, which he rejected. Additional evidence was taken before the Court on the exceptions filed and the former decree in the case of Little Walla Walla Irrigation Union versus Finis Ditch Company, et al, was introduced in evidence. Evidence was also introduced to the effect that the water master had always allowed this land 2 inches of water per acre since the former decree and that 2 inches of water was necessary for the irrigation of this particular land. The claimants therefore will be awarded 2 inches of water miners measurements per acre for the 2 acres of land described in their proof and the tabulation modified accordingly.

53.

Contest No. 42

Pleasantview Irrigation Company,  
Contestant,

v.

Milton Nursery Company,  
Contestee.

The Contestee filed Proof No. 568 claiming a right to irrigate 82.19 acres of land with a priority of 1896. By stipulation it was agreed that the quantity of water which Contestee would require would be: that amount raised onto the land by means of a pump having a capacity of 250 gallons per minute, and operating twenty-four hours each day, which would be equivalent to 22.23 miners inches. It was also stipulated that the date of priority for the water right would be advanced to 1897. No mention was made in the stipulation of the acreage to which this water might be applied, therefore the acreage will be allowed as claimed and shown by the tabulation, but the quantity of water decreed to the land should be limited to 22.23 miners inches.

54.

Contest No. 43

Pleasantview Irrigation Company,  
Contestant,

v.

L. H. Moon,  
Contestee.

This contest was settled by stipulation and the rights of Contestee will be allowed in accordance with the provisions thereof and hereinafter tabulated.

55.

Contest No. 44

Pleasantview Irrigation Company,  
Contestant,

v.

Laura F. Johnson, and D. E. Newell,  
Contestees.

Contestee Laura F. Johnson, filed Proof No. 425, claiming a right to irrigate 7 acres with priority of 1885, and Contestee D. E. Newell filed Proof No. 590, claiming a right to irrigate 2 acres with priority of 1897. It appears that the lands of Contestees were at one time owned by Helen M. Russell, who was a party to the previous suit (Little Walla Walla Irrigation Union et al, vs. Finis Irrigation Company, et al), and was decreed a water right for 7 acres with priority of 1895. The parties to this contest disposed of the same by stipulation wherein it was agreed that Contestee Johnson would be allowed a water right for 5 acres with priority of 1895 and Contestee Newell 2 acres with priority of 1895. Whereas the acreage as claimed under Proof No. 425 is not increased and a later priority is taken than claimed, the terms of the stipulation will be included in the tabulation and the rights of the Contestees governed thereby.

56.

Contest No. 45

Pleasantview Irrigation Company,  
Contestant,

v.

E. L. Ownbey and Amanda Wilder,  
Contestees.

This contest was settled by stipulation between the parties hereto, and the rights of Contestees will be incorporated in the tabulation in accordance with the provisions of said stipulation.

57.

Contest No. 46

Pleasantview Irrigation Company,  
Contestant,

v.

Geo. Parman Estate, (Mrs. Geo. Parman,  
Executrix), and Carl Feigner,  
Contestees.

A stipulation was filed in settlement of this contest and the rights of Contestees will be tabulated in accordance therewith.

58.

Contest No. 47

Pleasantview Irrigation Company,  
Contestant,  
v.  
Fred Parr,  
Contestee.

This contest was settled by stipulation wherein the Contestee was allowed a water right for 1 acre with priority of 1885 and for 9 acres with priority of 1908, the latter right to be limited to the use of the water between October 15th of each year and June 1st, of the following year. The rights will be tabulated accordingly.

59.

Contest No. 48

Pleasantview Irrigation Company,  
Contestant,  
v.  
W.A.Propeck, M.Shackelford, and  
A.C.Franklin  
Contestees.

The rights of the Contestees involved in this contest were disposed of by the findings made in Contest No. 19, Paragraph 30, page 34 herein.

60.

Contest No. 49

Pleasantview Irrigation Company,  
Contestant,  
v.  
Jacob Radomske,  
Contestee.

Contestee filed Proof No. 659 claiming a right to irrigate 8.4 acres with priority of 1893 and 1.3 acres with priority of 1908. A stipulation was filed in settlement of the Contest wherein the 1908 right would be changed to 1.0 acre with priority of 1904. The stipulation in so far as it would give the Contestee an earlier right than claimed will be disregarded and the rights of Contestee allowed in all other respects as stipulated.

Exceptions were filed by the Walla Walla Union to the above findings, on claim No. 659 filed by Jacob Radomake. The contest was settled by stipulation filed with the State Engineer, which stipulation gave the claimant 8.4 acres with a priority of 1893 and 1 acre with a priority of 1904. The claimant seeks permission to amend his claim No. 659 to conform to the stipulation. The claimant will be permitted to amend his claim to conform to the stipulation and his rights allowed accordingly and the tabulation will be modified to conform to the amended claim.

61.

Contest No. 50

Pleasantview Irrigation Company,  
Contestant,  
v.  
C.G.Rogers, Elba Rogers, Geo.Shortridge,  
World War Veterans' State Aid Commission,  
(by Frank M. Moore, Secretary),  
Contestees.

DECREE - WALLA WALLA RIVER

Contest No. 50 - continued

This contest came on for hearing and testimony was offered in support of the respective proofs filed by Contestees herein, with the exception of C. G. Rogers, the rights for his land having been settled by stipulation, and said Contestee will be allowed a water right for the irrigation of 3.7 acres with priority of 1898.

Elba Rogers

Filed Proof No. 697 for the right to irrigate 4.4 acres of land with date of priority of 1906. From the testimony offered in support of this claim it appears that practically all of the land was irrigated in 1906 and the remainder in 1907. The land will be allowed a water right for 4.4 acres with priority of 1906.

George Shortridge

Filed Proof No. 762 claiming a right to irrigate 4.8 acres with priority of 1906. Witnesses who appeared to be familiar with the tract testified that the land was mostly irrigated in 1906 and all of it in 1907; the right will be allowed as claimed.

World War Veterans State Aid Commission

Filed Proof No. 935 claiming a right to irrigate 5 acres with priority of 1906. The testimony is not clear just when the total acreage was first irrigated but it does appear that at least 2 acres were irrigated and produced crops as early as 1906. The remainder of the land was not levelled until 1917 when a party by the name of McSherry came into possession. There was evidence, however, indicating that water had been applied to this land prior to the levelling thereof but as to when this was first done is not certain. The Contestee will be allowed a right for 3 acres with priority of 1908.

There is no evidence of sufficient nature to allow the Contestant a prior right to that of Contestees.

62.

Contest No. 51

Pleasantview Irrigation Company,  
Contestant,  
v.  
Scott Redfern, Annie McDonald, and  
Mrs. E. M. Rexroth  
Contestees,

This contest was dismissed as to Contestees Scott Redfern and Mrs. E. M. Rexroth and the respective rights will be tabulated in accordance with the proofs of claim.

A stipulation was filed in settlement of the contest directed against Proof No. 503 filed by Contestee Annie McDonald. Under said Proof No. 503 Contestee claimed a right for the irrigation of 7 acres with priority of 1905. The acreage claimed was reduced to 3.31 by the stipulation and will be so tabulated.

63.

Contest No. 52

Pleasantview Irrigation Company,  
Contestant,  
v.  
E.J.Schmidt,  
Contestee.

This contest was dismissed and the rights of Contestee will be tabulated as claimed.

64.

Contest No. 53

Pleasantview Irrigation Company,  
Contestant,

v.

Bruce Shangle, Stillman Dempsey, and  
Farmers Brokerage Company,  
Contestees.

This contest was disposed of by stipulation and the rights of Contestees will be tabulated in accordance with the provisions thereof.

Exceptions were filed to the above findings under Claim No. 949 filed by the Farmers' Brokerage Company. The exceptions were settled by stipulation providing that the priority of the Farmers' Brokerage Company should be October 1, 1908. The tabulation will be modified to conform to the stipulation and the Farmers' Brokerage Company, under Proof No. 949 will be awarded the right to irrigate 11.2 acres with a priority of October 1, 1908.

65.

Contest No. 54

Pleasantview Irrigation Company,  
Contestant,

v.

S. S. Shields,  
Contestee.

This contest was directed against Proofs Nos. 760 and 761 filed by Contestee herein. The rights of Contestee under his Proof of Claim No. 761 will be disposed of under the findings made in Contests Nos. 73 and 75 and will not be here considered.

The rights of Contestee as claimed under Proof No. 760 were settled by stipulation and will be tabulated accordingly.

66.

Contest No. 55

Pleasantview Irrigation Company,  
Contestant,

v.

Katherine Shortridge,  
Contestee.

This contest was settled by stipulation, the provisions of which will be followed in the tabulation of rights hereinafter set forth.

67.

Contest No. 56

Pleasantview Irrigation Company,  
Contestant,

v.

Otto C. Spragg,  
Contestee.

This contest was settled by stipulation wherein the Contestee waived his claim under Proof No. 785 and the right of Contestee will be such as acquired under State Engineer's Permit No. 2765.

DECREE - WALLA WALLA RIVER

Page 52.

Contest No. 57Pleasantview Irrigation Company,  
Contestant,

v.

Nels Swanson, and Mabel Redfern,  
Contestees.

Contestee Swanson filed Proof No. 820 wherein a right to irrigate 5.7 acres was claimed with priority of 1890. A stipulation was filed in settlement of the contest and it was agreed that the Contestee should have a water right for 1.61 acres with priority of 1888 and 0.77 acre with priority of 1890. No amendment to the claim or testimony was introduced in support of the earlier priority and therefore should be denied. Said Contestee will be allowed a right for the irrigation of 2.38 acres with priority of 1890.

Contestee Redfern filed Proof No. 670. A stipulation was filed in settlement of the rights claimed and such rights will be tabulated in accordance therewith.

69.

Contest No. 58Pleasantview Irrigation Company,  
Contestant,

v.

Geo. Tillotson, and S.A. Miller,  
successor in interest in part.  
Contestees.

Contestee George Tillotson filed Proofs Nos. 829 and 830. By Proof No. 829 said Contestee claimed a right to irrigate 13.87 acres with priority of 1883 and 6 acres with priority of 1908. By stipulation the rights under Proof No. 829 were settled to be 13.9 acres with priority of 1883 and 5 acres with priority of 1905.

Since the beginning of these proceedings it appears that the First National Bank of Milton has succeeded to the rights of Contestee Tillotson to 11.4 acres of the 1883 right and the 5.0 acre right of 1908, which rights will be tabulated in the name of said bank.

Under Proof 830 Contestee Tillotson claimed a right to irrigate 19.42 acres with priority of 1901 and 10.28 acres with priority of 1908. A stipulation was filed by the parties hereto in settlement of the contest directed against said Proof No. 830 wherein Contestee was allowed the right to irrigate 19.42 acres with priority of 1901 and 10.28 acres with priority of 1908, the latter right to be limited to the use of water each year between October 15th to June 1st of the following year.

It appears that S. A. Miller now owns the land covered by Proof No. 830 as successor in interest to Contestee Tillotson. The rights will be tabulated as settled by the stipulation and in the name of S. A. Miller.

Exceptions were filed to the above findings of the State Engineer as to the rights of S. A. Miller on Claim No. 830. The exceptors and the claimant, S.A. Miller, filed a stipulation settling the exceptions in which stipulation Miller's rights are

DECREE - WALLA WALLA RIVER

Contest No. 58 - continued.

limited to the water available in excess of what is required to fill the permanent rights having a priority of 1908 or earlier. The tabulation will be modified to conform to the stipulation.

70.

Contest No. 59

Pleasantview Irrigation Company,  
Contestant,

v.

Anna M. Truitt, and A.F. Heartgraves,  
Contestees.

Contestee Truitt filed Proofs Nos. 838 and 839. Contestee Heartgraves filed Proof No. 321. A stipulation was filed in settlement of the contest wherein Contestee Truitt waived the claim made under Proof No. 839 for the irrigation of 1.0 acre with priority of 1905. In all other respects the rights will be tabulated as claimed.

71.

Contest No. 60

Pleasantview Irrigation Company,  
Contestant,

v.

Chas. Walden,  
Contestee.

This contest was settled by stipulation and the right will be tabulated in accordance with the provisions thereof.

72.

Contest No. 61

Pleasantview Irrigation Company,  
Contestant,

v.

Geo. Wharton,  
Contestee.

Contestee filed Proofs Nos. 889 and 890. The right under Proof No. 889 will be allowed as claimed and that under Proof No. 890 will be allowed as stipulated wherein Contestee will be given a right to irrigate 6.25 acres with priority of 1908 instead of 1894.

Exceptions were filed to the above findings on Claim No. 890, filed by George Wharton. A stipulation was filed by the exceptor and claimant limiting the claimant's priority to October 1, 1908, and the tabulation will be modified to conform to the stipulation and the claimant's priority placed as of October 1, 1908.

73.

Contest No. 62

Pleasantview Irrigation Company,  
Contestant,

v.

Henry V. Whiting, Contestee.

The rights of Contestee were settled by stipulation and will be tabulated in accordance with the provisions of said stipulation.

Contestants,

v.

Milton, Freewater & Hudson Bay Irrigation Co  
Contestee.

The above contests were consolidated with Nos. 68, 69, 74, 77 and 79 for the purpose of hearing and taking testimony, and it was stipulated by the attorneys representing the parties to said contests that any evidence received during the hearing of said contests should be considered in determining the rights of the Milton, Freewater & Hudson Bay Irrigation Company and the Pleasantview Irrigation Company in so far as applicable.

Contest No. 64 was directed against the company and certain individual water users of said company who filed separate claims in these proceedings. In Contest No. 65 certain water users of the company appear as contestants and the company as contestee. The issues raised in both contests are somewhat related and the rights of contestee company will be fully disposed of by the findings made hereunder.

The contestee company was organized in 1903 and thereafter posted notices to appropriate 12,000 inches of water from the Tumalum and Little Walla Walla Rivers and in the same year began construction of its ditches and diversion works. In 1905 a suit

DECREE - WALLA WALLA RIVER

Contests Nos. 64 and 65 - continued.

was started (Little Walla Walla Irrigation Company vs. Finis Irrigation Company, 62 Ore. 348) which involved practically all of the water users from the Walla Walla River and its branches. The contestee company was a party defendant to the suit and was decreed a right to use two-fifths of all the water flowing naturally in the Little Walla Walla River between the 15th day of October of each year and the 1st day of the following April, and between the 1st day of April and the 15th day of October of each year any surplus water flowing in the said Little Walla Walla River in excess of 4,000 miner's inches. In addition to the right from the Little Walla Walla River the company was allowed to divert into its ditch where the same taps the Tumalum River, flood waters which may be flowing in said Tumalum River, after the water users from said river had been supplied with not to exceed 751.27 miner's inches of water, and the Peacock Mills Company had been supplied with water to the extent of 2,750 miner's inches plus the amount of water required to supply prior rights of all irrigators and water users who receive water from the Little Walla Walla River above the Peacock Mill.

The main branch of the Walla Walla River commences from the junction of the North and South Forks in the SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Section 22, Township 5 North, Range 36 East, W.M. Near the northeast corner of NE $\frac{1}{4}$  NW $\frac{1}{2}$  of Section 12, Township 5 North, Range 35 East, W.M., the branch called the Little Walla Walla River diverts from a slough of the main stream and the main river north of this point is known as the Tumalum River.

The contestee company diverts from both the Tumalum and Little Walla Walla Rivers. From the former its diversion is located within the NE $\frac{1}{4}$  NW $\frac{1}{4}$  of Section 1, Township 5 North, Range 35 East, W.M., and crosses to the Little Walla Walla River, into which it discharges above the company's diversion from the Little Walla Walla River. No lands are irrigated from the canal leading to the Little Walla Walla River and it appears that the canal is only used during the high water season and in case of emergency when the channel of the Little Walla Walla River might be obstructed at the point where it leaves the main river. The main diversion is that from the Little Walla Walla and it has been the practice when the waters in the Walla Walla River recede, to place a dam in the stream at the point where the Little Walla Walla River leaves the main river and force the water down the channel to supply the rights of those diverting water from the Little Walla Walla River, after allowing sufficient water to flow down to satisfy the Tumalum rights.

There was considerable testimony offered as to the capacity of the company's canal leading from the Little Walla Walla River, but little of which could be considered of value as it was based mostly on observation rather than on actual measurements.

According to the report prepared by the State Engineer in connection with these proceedings and made a part of the record, the largest quantity of water carried through the canal was 75 second feet or 3,000 miner's inches. The contestants caused

a survey to be made and introduced in evidence a profile of the canal which would indicate the capacity to be 75 second-feet or 3,000 miner's inches.

The company under its proof No. 566 claims a right to divert from the Walla Walla River 6,000 miner's inches of water or 150 second feet, to be used for the irrigation of 5,974.73 acres of land and for stock and domestic purposes. In filing its proof of claim no distinction was made between the acreage irrigated and that which was not irrigated. At the request of the State Engineer the company furnished a map showing the acreage within each forty-acre tract which was irrigated at the time its claim was filed. The lands which were originally intended to be irrigated by the company, as indicated by the company's answer filed in the former suit, (Little Walla Walla Irrigation Company vs. Finis Irrigation Company) consisted of 12,000 acres located within Sections 19, 20, 21, 30, 29, 28, 31, 32, 33, 34 and 35 of Township 6 North, Range 35 East, W. M., and Sections 22, 23, 24, 25, 26, 27, 28, 33, 34, 35 and 36 of Township 6 North, Range 34 East, W. M. The major portion of the lands designated as irrigated by the company are included within said sections.

Since the beginning of construction of the distribution system in 1903, the company has built ditches and canals to the extent of approximately forty miles. Most of this work was done prior to 1912. From 1912 to 1917 no construction work was done. In 1918-1919 the main canal was extended from the SE $\frac{1}{4}$  SE $\frac{1}{4}$ , Section 26, the point to which it was built in 1905, to the SE $\frac{1}{4}$  NE $\frac{1}{4}$ , of Section 29, Township 6 North, Range 34 East, W.M., a distance of approximately 9 $\frac{1}{2}$  miles. In 1920 certain ditches were extended leading from the main canal to the extent of approximately 3 miles. No further work was done until 1926 when a portion of the main canal was replaced by a pipe line. During 1927, 100 feet of new ditch was built.

The records show that when the water flowing in the Little Walla Walla River does not exceed 4,000 miner's inches the contestee company's ditch is closed. The testimony in regard to the quantity of water required by prior rights below the Company's diversion on the Little Walla Walla River is conflicting but it appears that the Pleasantview Irrigation Company continued to use the water from said stream from one to three weeks longer each season than the contestee company and continued to divert the water until the flow in the stream (Little Walla Walla River) was less than 3,000 miner's inches. During the early spring months there is ample water for all users but during the month of May the waters generally begin to recede and fall rapidly, till both the contestee company and Pleasantview Company are without water. This condition usually occurs some time in June, depending entirely upon the particular season. During the winter and early spring it has been the practice of the water users to apply the water to their lands, the result being to raise the water table and enable them to pump from wells after no water is available from the river.

At one time the contestee company furnished water to some nine hundred acres of land now irrigated under the Pleasantview Irrigation Company's system. It appears that it was the practice of the contestee company to rent and sell its water right to the various users under its ditches. For this purpose two forms of contracts were used, one for the rentals which were renewed each year and the other for the purchase of a permanent water right. About 1911 or 1912 the control of the contestee company passed into other hands and shortly thereafter the company increased the cost of the water right and new contracts were prepared. Among other provisions the new contract provided for the delivery of one miner's inch of water per acre to begin October 15th of each year and to end May 15th of the following. Many of the water users became dissatisfied with the new management and organized the Pleasantview Irrigation Company and proceeded to build its own distribution system. The Pleasantview Canal parallels that of the contestee company's for some distance and furnishes water to users in the same territory.

These proceedings are for the purpose of determining the relative rights of the various users to the waters of the Walla Walla River and its tributaries, necessarily the quantity of water allowed each user and the acreage upon which it is to be applied must be made definite, otherwise the decree to be entered would be difficult to administer.

It does not appear that the contestee company has used that degree of diligence in the construction of its irrigation system and applying the water to beneficial use which would entitle it to the amount of water as claimed. According to the maps filed the contestee company was irrigating at the time it filed its claim 2673.76 acres, 195 of which are located within the State of Washington.

The company will be allowed 3,000 miner's inches or 75 cubic second feet of water per second which appears to be the capacity of its main canal, under date of priority of February 16, 1903, measured at its intake from the Tumalum or Little Walla Walla River for the irrigation of 2673.76 acres of land as hereinafter described in the tabulation. The balance of the land for which the company claims a water right, mostly appears to be beyond the present development and not included in the original plan for which the appropriation was made and would require an enlargement of the system if water was furnished such lands. If it is desired to irrigate these lands the contestee company should make its appropriation under the 1909 law.

The following individuals filed separate proofs of claim in these proceedings claiming a right to irrigate their lands from the Walla Walla River through the Hudson Bay Canal:

|                       |                              |
|                       | Zint, Roy.                   |

As these claims are based upon the appropriation made by the Contestee Company and the lands for which a water right is claimed are included under the Company's blanket claim and being a part of those lands for which a water right was allowed the Company, their rights will be tabulated under the name of the Contestee Company, with the exceptions of those lands for which a water right was claimed by Chris Hellberg under Proof No. 336 for a right to irrigate 80 acres located within the NE $\frac{1}{4}$  NE $\frac{1}{4}$  and the NW $\frac{1}{4}$  NE $\frac{1}{4}$ , Section 13, Tp. 6 N., Range 34 E., W.M., which lands were not shown as irrigated on the map filed by the Company at the request of the State Engineer and the right for the irrigation of 19.7 acres within the N $\frac{1}{2}$  of the NW $\frac{1}{4}$ NW $\frac{1}{4}$ , Section 2, Tp. 5 N., Range 35 E., W.M. claimed by Clyde H. Harris under Proof No. 311, which lands appear to be far beyond the reach of the Company's ditches and not included in its claim, therefore the rights here excepted will be denied. In those cases where there appears a discrepancy in the acreage claimed by the individual and that by the Company, the latter will govern and be tabulated accordingly.

Contest No. 65 was initiated by certain individual water users from the Contestee Company and who contend that their rights are superior and earlier in priority than those individuals to whom water was delivered by the Company subsequent to 1915. The main ground upon which the contest is based is, that the Company never used the amount of water appropriated in 1903 and 1904 and only constructed its ditches to carry 1300 miner's inches of water to be applied to 1300 acres of land. That in 1915 the Company enlarged its ditch and began the irrigation of lands beyond its intended development,

Contests Nos. 64 and 65 - continued

which amounted to a new appropriation, and the lands irrigated thereafter should take a later date of priority. The evidence does not support the contentions of the Contestants and the relief asked for will be denied. At the hearing it was shown the name of J. H. Marshall was used as Contestant. This appears to be of error and therefore his name will be omitted as a contestant.

Exceptions were filed to the above findings wherein the State Engineer uses the following language: (Line 8, Page 58) "Among other provisions the new contract provided for the delivery of one miners inch of water per acre to begin October 15th, each year, and to end May 15th of the following year". The new contract provided for the delivery of one miners inch of water per acre to begin October 15th each year and to end May 15th of the following year, but the contract contained a further provision: "Said water may be used, however, at all seasons of the year when there is sufficient water available to the Company in the Little Walla Walla River, or Tumalum River, or from any other source and which may be legally diverted therefrom by the Company, except at those times when from the natural condition or causes beyond the control of the Company, the flow of water would injure the ditch", and said finding is modified to include this provision of the contract.

A stipulation was filed in full settlement of these contests as follows:

"BEFORE THE STATE ENGINEER OF OREGON  
Umatilla County.

|   |  |
|---|--|
| In the matter of the determination )<br>of the relative rights to the waters )<br>of the Walla Walla River and its )<br>tributaries, a tributary of the )<br>Columbia River. )<br>***** )<br>John McEwan, Contestant, )<br>vs. )<br>H.S.Shangle, Contestee. )<br>----- )<br>John McEwan, Contestant, )<br>vs. )<br>Bruce Shangle, Contestee. )<br>----- ) | Contest Against Proof 748<br>Contest Against Proof 745<br>Stipulation<br>of<br>Agreement |
|---|--|

It is hereby stipulated and agreed by and between the contstant, John McEwan,

DECREE - WALLA WALLA RIVER

in each of the foregoing contests, and the respective contestees, H. S. Shangle and Bruce Shangle, that the contests have been adjusted between the parties upon the following basis:

1. - That these contests are kindred in character and relate to two small streams of water (sometimes called waste water) located near the Northwest corner of the Northwest quarter of Section 3, Township 5 North, Range 35, E. W. M., in Umatilla County, Oregon, known as the "Burns" place and likewise to two small streams (sometimes called waste water) near the center of the extreme northerly portion of the Northeast quarter of the Northeast quarter of Section 4, Township 5, North Range 35, E. W. M., in Umatilla County, Oregon, known as the "Wilder" place. For the location of said lands and said streams see maps of the State Engineer, and especially to Map D filed as an exhibit in claims 508 and 509 by said John McEwan in his proofs in this proceeding.

2. - That this contestant is the owner of fifteen acres in Section 33, Township 6, North Range 35, E. W. M., in Umatilla County, Oregon, being about eleven acres in the Southeast quarter of the Southeast quarter and about four acres in the Southwest quarter of the Southeast quarter of Section 33, Township 6, North, Range 35, E. W. M., in Umatilla County, Oregon; and that Contestee H. S. Shangle is the owner of ten acres of land in the Southwest quarter and ten acres of land in the Northwest quarter of the Southeast quarter of Section 33, Township 6, North, Range 35, E. W. M.; and that contestee Bruce Shangle is the owner of the Northeast quarter of the Northeast quarter of Section 4, Township 5, North, Range 35, E. W. M., Umatilla County, Oregon, known as the "Wilder" place and that said Bruce Shangle is likewise the owner of a part of the Northwest quarter of the Northwest quarter of Section 3, Township 5, North, Range 35, E.W.M., Umatilla County, Oregon, known as the "Burns" place.

3. - That the dispute between the parties is over the water of said small streams (sometimes called waste water) located upon said "Burns" place and said "Wilder" place, and that the dispute has been composed by an agreement that from the first day of October in each year until the fifteenth day of May the following year, all the waste or surplus water from said "Burns" place shall enter a tail ditch running north and south between the Northeast quarter of the Northeast quarter of said Section 4, and the Northwest quarter of the Northwest quarter of said Sec. 3, Township 5, North, Range 35, E. W. M., and that said water from said tail ditch shall, during said period, flow through a tile crossing from the Northwest corner of said "Burns" place to near the Southeast corner of said McEwan place, and there enter what is known as the Finis Ditch, and shall become a part of the Finis Ditch water, to be divided during said period by the said John McEwan and said H. S. Shangle, (who at that point are the only persons interested in the Finis Ditch Company or the waters there flowing through the Finis Ditch), one-third of such water to belong to said H. S. Shangle and two-thirds thereof to said John McEwan.

Contests Nos. 66 and 67 - continued.

Provided that said McEwan shall maintain said flume at the point where said water crosses from Northwest corner of the Burns place to said Finis Ditch; and that H. S. Shangle shall maintain flume at point where the tail ditch on Wilder place crosses therefrom to said Finis Ditch.

5. - That during the period from said May 15th to October 1st in each year said waste or surplus water shall be deemed to belong to said Bruce Shangle, or his successors in interest, and he or they are to have the sole benefit and use of the same, and to apply the same on the lands hereinbefore described, wherever they desire.

6. - That during said period from October 1st in each year to the 15th day of May following, all the waste or surplus water from that part of said "Wilder" place lying immediately west of said "Burns" place and east of a line drawn due south from the Southeast corner of the John McEwan prune orchard, as the same now exists, shall enter a tail ditch on said line drawn due south from said Southeast corner of said prune orchard, and the water shall run due north and shall enter said Finis Ditch 180 yards west from the southeast corner of said McEwan land, and shall become Finis Ditch water, and shall be divided between said McEwan and said H. S. Shangle in the proportion above set forth.

7. - That during the period above set forth from May 15th in each year to October 1st in each year said waste or surplus water from the "Wilder" place shall be used solely and exclusively by said Bruce Shangle, or his successors in interest, as their interests may require.

8. - Likewise it is agreed that said water in the future shall be administered and distributed by the State Engineer in the same manner, and under the same rules, as he administers and distributes other waters within that portion of Oregon known as the Walla Walla Valley. And the State Engineer shall have authority, as part of his administrative duties under this paragraph, to enter upon the lands of either party, and to see to it that the ditches referred to herein are kept clean and free-running.

9. - It is agreed that nothing herein contained shall give to said John McEwan, his agents, servants, successors, or assigns, any right which will allow him or them to enter upon either said "Burns" place or said "Wilder" place to adjust or interfere with the flow of water, or with the ditches or headgates, except as he may be directed by the State Engineer when any emergency shall arise; it being understood however, that during all said periods from October 1st to May 15th following the flow of said waters must be permitted to move freely in all of said streams.

10. - It is furthermore agreed that during the periods when said waters are accorded to said Bruce Shangle they are to be turned into the ditches on his own lands, and are not to be allowed to enter upon said Finis ditch at any point, except that H.S. Shangle shall have the exclusive right to turn water on and after May 15th and until October 1st in each year into that portion of the Finis Ditch which lies at extreme west

end of the McEwan place on the line between the McEwan place and the H. S. Shangle place, being approximately 500 feet, said H. S. Shangle to keep and maintain said portion of said ditch in good condition at his own expense. The reason of this paragraph being in the danger of dispute as to use if any of the water shall commingle, during said periods of Shangle sole ownership, with water running into the Finis Ditch, in which water contestant would have a two-thirds interest; and that these contests are hereby fully settled.

John McEwan  
Contestant

H.S.Shangle  
Contestee,  
By Bruce Shangle, his Agent.

Bruce Shangle  
Contestee."

The rights of the Contestees in the above contest will be governed by the stipulation herein incorporated and the water will be distributed accordingly.

Pleasantview Irrigation Company,  
Contestee.

(Contest No. 79)

L. L. Johnson, et al,  
Contestants,  
v.

Pleasantview Irrigation Company,  
Contestee.

For the purpose of hearing and taking testimony the above contests were consolidated with Contests Nos. 64 and 65, and it was agreed by the attorneys representing the parties of interest that any testimony or evidence received during the hearing

of said contests should be considered in determining the rights of the Pleasantview Irrigation Company in so far as the same is applicable.

In contests Nos. 68, 69, 77 and 79 the contestants are individuals claiming prior rights to those of Contestee, while in Contest No. 74 the Milton-Freewater Hudson Bay Company appears as Contestant.

The Contestee (Pleasantview Irrigation Company) under its Proof No. 638, claims a right to the use of the waters of the Little Walla Walla River for the irrigation of 1247.6 acres of land, under dates of priority of 1880, 1881, 1883, 1885, 1886 and 1895. At the hearing of the above contests the attorneys for Contestee stipulated that outside of the decreed rights which use water through the Contestee's ditch, and two 10-acre tracts which are claimed to have been irrigated through the Powell Ditch, that the Contestee would not claim land irrigated prior to 1903. A written stipulation between the parties was then filed showing the dates and extent of irrigation by the parties now using water from the irrigation system of the Contestee. According to the stipulation no water was shown to have been used from other sources than the Milton-Freewater Hudson Bay system, and that of the Contestee's.

The records show that approximately 900 acres of land which are now irrigated from the Contestee's irrigation system were at one time irrigated from the Milton-Freewater Hudson Bay system, and it is contended by the Contestee herein that by virtue of using the water beneficially upon such lands that the water became appurtenant thereto and should be entitled to the same date of priority as that of the Milton-Freewater Hudson Bay Company. This contention is resisted by the contestant Company on the grounds that the rights of said Contestant were determined in the former suit (Little Walla Walla Irrigation Union vs. Finis Irrigation Company) that the water right was thereby decreed to the Contestant Company, that the company was organized for profit and for the purpose of renting and selling water and not a mutual irrigation company organized merely for the convenience of distributing water to its users. It was the practice of the Contestant Company to enter into annual contracts with its users for the purpose of furnishing water for the particular season and a charge was made for such service. In some cases the Company sold permanent water rights but it does not appear that any of the parties who entered into contracts of this kind are now using water through the Contestee's irrigation system, but purchased the water on a rental basis, for the particular year, and in the amount necessary for the particular acreage desired to be irrigated. The individuals were not the appropriators of the water and their rights were dependent upon the contractual relationship with the Company. In the case of those renting water, they were at liberty to terminate their contract at the end of each year.

When the individuals who previously received water through the Milton-Freewater Hudson Bay Irrigation system organized the Contestee Company (Pleasantview Irrigation Company) and proceeded to make an appropriation of the water under the

Water Code of 1909, such acts amounted to a new appropriation independent from that of the Milton-Freewater Hudson Bay Company.

In constructing its irrigation system the Contestee Company made arrangements for the enlargement of the Powell Ditch and took over various other ditches already built and completed its distribution system with due diligence.

That any of the users from the Contestee's irrigation system acquired a water right prior to the Milton-Freewater Hudson Bay Irrigation Company or from a different source is not substantiated by the evidence. The Contestee will be allowed a water right in accordance with its water right certificates and permits issued by the State Engineer plus 20% of the total quantity of water allowed thereby, to care for transmission losses, the total quantity of water so allowed to be measured at the intake of Contestee's canal from the Little Walla Walla River.

The testimony indicates that the lands irrigated require more than one-half miner's inch of water per acre and if it is found that the quantity of water allowed the Company is not sufficient to properly irrigate the lands, an application should be made to the State Engineer for a permit to appropriate additional waters for a supplemental supply.

City of Milton, and Milton Nursery Co.  
Contestees.

DECREE - WALLA WALLA RIVER

Contestee Fields filed Proof No. 217 claiming a water right from the Tualum River to irrigate 6 acres of land with priority of 1872. The testimony tends to show that the water used by Contestee comes from a small creek which is sometimes referred to as the McCoy Ditch. Just where the water originally came from is uncertain but it does appear that crops were raised on the lands from an early date which could not have been done had the lands not been irrigated. The Contestee has introduced no testimony showing water was used in 1872 but it seems the evidence is clear that water was applied to the land in 1906. It further appears that not more than 2 or 3 acres were ever irrigated. The Contestee will be allowed a water right from the Tualum River for 3 acres with priority of 1906.

Contestee Hubbs' claim is based upon the same facts as the Fields right but it appears contestee has irrigated 5 acres and will be allowed a water right from the Tualum River for said acreage with date of priority of 1906.

The contest as to Samaria Miller was settled by stipulation and the rights will be allowed and tabulated accordingly.

80.

Contest No. 72

L. L. Johnson, et al,  
Contestants,  
v.

W.G.Coleman, Woodson Cummings, Wm.  
Curl, A.L.Demaris, Geo. H. Durrie, Chas.  
Garred, Ozro Graham, Clarence Harris,  
Hans Hellberg, S.H.Hopkins, W.C.Hopson,  
Wm. Nichols, Ernest Scheuch, Edward B.  
Smith, Mary L. Vonderahe, Amanda Wilder,  
Contestees.

This contest came on for hearing and was partly settled by stipulation and in certain cases dismissals were made. The rights of the Contestees will be considered under the name of each Contestee.

W. J. Coleman

The contest as to W. J. Coleman was settled by stipulation and the right will be tabulated accordingly.

Woodson Cummings

Contestee Cummings made no appearance at the time of hearing. The Contestants introduced testimony indicating the right was involved in the former suit (Little Walla Walla Irrigation Co. vs. Finis Irrigation Co.) and Contestee was allowed a water right for the irrigation of .90 of an acre. With the exception of the acreage, Contestee will be allowed the right as claimed.

William Curl

Contestee Curl filed Proof of Claim No. 145 claiming a right for the irrigation of 8.7 acres with date of priority of 1885. It appears that the land was allowed a water right

DECREE - WALLA WALLA RIVER

Page 66

for 5.15 acres with priority of 1885 by the previous adjudication. (Little Walla Walla Irrigation Co. v Finis Irrigation Co.) Just when the balance of the land for which a water right is claimed in these proceedings was first irrigated is not clear, but it is apparent that it was prior to 1910. The Contestee will be allowed a right with priority of 1885 for 5.15 acres and a right with priority of 1909 for 3.55 acres.

A. L. Demaris

The contest was dismissed as to A. L. Demaris and the water right will be allowed as claimed.

Geo. H. Durrie

This contest was settled by stipulation and the right will be tabulated accordingly.

Charles Garred

Contestee Garred filed Proof No. 241 for the right to irrigate 13 acres of land with a priority of 1898. It appears that in 1906 but six acres of land were irrigated but by 1908, 11.5 additional acres were irrigated. Just when the 11.5 acres were first irrigated is not clear. The Contestee will be allowed a right to irrigate 6 acres with a priority of 1898 and 11.5 acres with priority of 1908.

Exceptions were filed to the above findings with reference to the water rights of Charles Garred. An examination of the record discloses that claimant filed Proof No. 241 as claiming only 13 acres in all instead of 17.5 acres as allowed. Claimant will be allowed 6 acres with a priority of 1898 and 7 acres with a priority of 1908 and the tabulation will be modified accordingly.

Osro Graham

A stipulation was filed in settlement of this contest. The terms of the stipulation will be allowed with the exception of wherein Contestee was allowed a water right for the irrigation of 2.6 acres with priority of 1895. The earliest date claimed by Contestee was 1897. No motion was made to amend the claim nor was evidence introduced showing contestee to be entitled to an earlier date of priority. The stipulation will be disregarded in so far as the 1895 priority is concerned and Contestee will be allowed a right for 2.6 acres with priority of 1897.

It was further stipulated that Contestee should be allowed a right for the irrigation of 2.5 acres with priority of May 1, 1909. The Water Code went into effect February 24, 1909. The Contestee will be allowed a right for the irrigation of this acreage (2.5) with date of priority of February 1, 1909. In all other respects the rights of Contestee will be governed by this stipulation and will be so tabulated.

DECREE - WALLA WALLA RIVER

Page 67

Clarence Harris

The contest against the Clarence Harris claim was settled by stipulation and the rights will be tabulated accordingly.

Hans Hellberg

This contest was settled by stipulation and the rights will be tabulated in accordance therewith.

S.H.Hopkins

The rights as claimed by Contestee Hopkins were settled by stipulation and will be tabulated accordingly.

W. C. Hopson

A stipulation was entered into by the parties to this contest and will be recognized with exception of where it attempts to change the priority under Proof No. 377 from 1906 to 1900. Otherwise the rights of Contestee will be allowed and tabulated as claimed.

Ernest Scheuch

The rights of Contestee Scheuch were stipulated as will be allowed and tabulated accordingly.

Ed B. Smith

The rights of Contestee Smith will be allowed and tabulated as stipulated.

Mary L. Vondershe

This contest was settled by stipulation and rights will be allowed in accordance therewith and will be so tabulated.

Amanda Wilder

The rights of Contestee were settled by stipulation and will be tabulated accordingly.

William Nichols

The contest was dismissed as to William Nichols and the rights will be allowed as claimed.

John Ritter, H.S.Shangle and S.S.Shields.  
Contestees.

DECREE - WALLA WALLA RIVER Page 68

J. L. Balliett, and F. A. Wilkinson

The rights of the Contestees were disposed of by the findings made in regard to Contest No. 6, Paragraph 17 herein and will be governed accordingly.

James N. and Melvina Chapman

This contest was settled by stipulation and the rights of Contestees will be tabulated accordingly.

Robert R. Chapman

Contestee Chapman's rights were settled by stipulation and will be tabulated according to the provisions thereof.

John E. Dougherty

The findings made in Contest No. 6, Paragraph 17 herein will govern the rights of Contestee Dougherty.

Raleigh J. Gray

Contestee Gray filed Proof No. 265 claiming a right to irrigate 6.9 acres with priority of 1902, and the tabulation hereinafter made will show the right as claimed.

Claude Harris

The rights of Contestee Harris will be allowed as stipulated and hereinafter tabulated, with the exception of the right for 1.91 acres under Proof No. 307 with priority of 1918, which is denied.

Robert A. Smith

Contestee Smith Filed Proof No. 776 for the right to irrigate 13.2 acres with priority of 1887. The contest was stipulated and the right will be allowed in accordance with the terms therein with the exception of the right for 1.09 acres with priority of 1918, which is denied.

Harry L. Obert

Contestee Obert filed Proof No. 597 claiming a right to irrigate 4.2 acres from the waters of the North Fork of the Walla Walla River under date of priority of 1889. It appears that 1.5 acres were irrigated prior to 1909 and the remainder of the land was not reclaimed until about 1920. The Contestee will be allowed a right for 1.5 acres with priority of 1889. If it is desired to irrigate the balance of the land, Contestee should file an application to secure a permit from the State Engineer.

H. R. Poulsen

This contest was settled by stipulation and the rights of Contestee will be allowed in accordance with the terms thereof and so tabulated.

Sarah West

Contestee West filed Proof No. 888, claiming a water right from the Walla Walla River for the irrigation of 20 acres with date of priority of 1885. It appears from the record that none of the lands were irrigated prior to 1906. In 1907 and 1908 two acres of the land were put into cultivation and crops raised. The remainder of the tract was not irrigated until after 1909. The Contestee will be allowed a water right for the irrigation of 2 acres of land with priority of 1907 and the water right for the balance of the land is denied. Should Contestee desire to secure a right to irrigate the remaining 18 acres, an application to secure a permit should be filed with the State Engineer.

James Wilson

This contest was settled by stipulation. The Contestee claimed a right to irrigate 3.5 acres with priority of 1889. By the provisions of the stipulation the acreage was reduced to 2.5 acres with date of priority of May 1, 1909. The Water Code became effective February 24th, 1909. The Contestee will be allowed a priority of February 1, 1909 for the irrigation of 2.5 acres.

City of Milton

Contestees.

In the above contest many contestees appear and probably each should have been named in a separate contest. The disposition of the rights will be considered under the name of the particular contestee.

C.H.Boerstler

(Findings disposing of this right were made under Contest No. 9, Paragraph 20 herein.)

Anna Brinker

(Contest was dismissed and Contestee will be allowed water right as claimed.)

Charles H. Brinker

(Contest was dismissed and water right will be allowed Contestee as claimed).

Lena Clark

(Rights were settled by stipulation. See findings under Contest No. 10.)

Anna G. Carrol

Contestee filed Proofs Nos. 85 and 86. Proof No. 85 was the only one involved in the contest. The Contestee claimed (Proof No. 85) a right to irrigate 8 acres of land from Middle Creek, tributary of the Walla Walla River, with date of priority of 1890. The Contestee was not represented at the hearing but contestants put on testimony showing the waters used upon the lands of Contestee as described in Proof No. 85 received its water from the East Prong of the Little Walla Walla Spring Branch; that during the summer months the stream dries up and that Contestee is dependent upon whatever water is present in the channel from the flow of springs and never has used the waters from the Walla Walla River itself, during this period. The Contestee will be allowed a water right for the irrigation of 8 acres with priority of 1890 from the waters flowing in the East Prong of the Little Walla Walla Spring Branch but such right will be restricted to the use of the water naturally flowing in said Branch and Contestee will not be entitled to have any water turned down said branch from the Walla Walla River to satisfy the right herein allowed.

Chas.Eiffert, Lester Green, Ulrich Ellis, Jesse S.Green, Nellie L. Green, W. W. Green, Mattie Piper, Galen F. Ramsay, Chas. Lightle, Mrs. Emma Lewis.

All the above named Contestees are water users from the East Prong of the Little Walla Walla Spring Branch and entered into a stipulation in settlement of contests wherein the use of the water by Contestees would be limited to that naturally flowing in said stream and springs arising in the channel. The acreage and priorities will be allowed as claimed and will be so tabulated.

Exceptions were filed to the above findings involving the following claimants: Charles Eiffert (Proof No. 481); Lester Green, (Proof No. 270); Ulrich Z. Ellis, (Proof No. 196); W. W. Green, (Proof No. 274); Mattie Piper, (Proof No. 636); Galen F. Ramsay, (Proof No. 660); Charles Lightle, (Proofs Nos. 480 and 481), and Emma Lewis, (Proof No. 476).

Charles Eiffert

The exceptions were settled by stipulation, changing the claimant's priority to 1875, except as to Anna G. Carrol, and as to her, the priorities of the claimant and Anna G. Carrol shall be equal. The claimant will be permitted to amend his claim to conform to the stipulation and the claimant's rights will be allowed and tabulated accordingly.

Ulrich Z. Ellis

The exceptions were settled by stipulation which allowed the claimant a priority of 1875, except as to Anna G. Carrol, and as to the claimant Anna G. Carrol, the priorities shall be equal. The claimant will be permitted to amend his claim to conform to the stipulation and his rights will be awarded and tabulated accordingly.

Lester Green

W.W.Green

Mattie Piper

Galen F. Ramsey

Emma Lewis

The exceptions of the above named parties were settled by stipulation allowing the claimants a priority of 1875. The claimants will be permitted to amend their claims to conform to the stipulations and their rights will be allowed and tabulated accordingly.

Charles Lightle

A stipulation was filed settling the exceptions and changing the claimant's priority under Proof No. 480 to 1875, and under Proof No. 481 to 1892. The claimant will be permitted to amend his proof to conform to the stipulation and his rights will be allowed and tabulated accordingly.

Estate of John W. Keen

The Contestee herein claimed a right to irrigate 5.27 acres of land from what is known as the spring branch (being a stream having its source from springs located east from the Ferndale school) and 3 acres from the East Prong of the Little Walla Walla Spring Branch with date of priority of 1870. A stipulation was filed in settlement of this contest wherein it was provided that Contestee would be restricted to the use of waters naturally flowing in said stream and not from any other source. The rights of Contestee will be tabulated accordingly.

Exceptions were filed to the above findings with reference to Proof No. 432, filed by the Estate of John W. Keen. The exceptions were settled by stipulation filed changing claimant's priority to 1875. The claimant will be permitted to amend its claim to conform to the stipulation and its rights will be tabulated accordingly.

C. F. Collins

Contestee Collins was not represented at the hearing and the only grounds of

contest was directed against the means used by Contestee in conveying the water to his lands. The Contestants put on testimony indicating that Contestee had no right or interest in the so-called Williams and Cochran ditch but had a right to have his water delivered through the Johnson pipe line. The Contestee will be restrained from using the Williams and Cochran ditch and from interfering with said ditch in any way unless he gets the consent or secures an interest in said ditch from its owners. The water right will be allowed as claimed under Contestee's Proof No. 126, and as hereinafter tabulated.

Federated Church of Freewater

This contest was dismissed and the rights of Contestee will be allowed as claimed.

William Lloyd Estate

The rights of this Contestee will be allowed as stipulated in settlement of this contest and as hereinafter tabulated.

William R., and Zola Helen Love

This contest was settled by stipulation and rights of Contestees will be tabulated according to the provisions therein.

C.P.Collins, John McEwan, John D.Ritter, H.S.Shangle, S.S.Shields:

The above named Contestees claimed certain water rights from the Walla Walla River and through the Finis Ditch. It appears that the Contestees' predecessors in interest were parties to the former suit (Little Walla Walla Irrigation Company et al vs. Finis Ditch Company et al, 62 Or. 348) and were decreed the right to use whatever surplus water which might be found at any time in the Milton Ditch.

The said Finis Ditch has its intake at the end of the Milton Ditch, having no direct contact with the Walla Walla River, nor does it appear that the users therefrom have ever made an appropriation of the water from the river itself, they being entirely dependent upon the presence of that water at the end of the Milton Ditch for their use. The testimony would indicate that no water was ever turned in the Milton Ditch for the purpose of supplying the Finis users, nor have said users an interest in the Milton Ditch entitling them to convey the water through said ditch. If there was water present at the end of the Milton Ditch it was used by the Contestees herein, and if there was not they had to look elsewhere for their water. No intent has been shown by the Contestees to make an appropriation of the water but it does appear that their lands have been irrigated and crops raised successfully. At the time of the former suit hereinbefore referred to, the Finis Ditch users made no attempt to establish a water right but entered into a stipulation wherein they confined their use to the waters present in the Milton Ditch and claimed no interest, right or control of the Milton Ditch or the waters flowing therein. From the evidence submitted it appears that the Contestees have been able to irrigate their lands from the surplus water present in the Milton Ditch to some extent. The Contestees herein

will be allowed a water right as claimed but such right will be inferior to all rights subsequent to the date of priority claimed and those rights prior to 1928 during which year the proof of claims filed in these proceedings were open for public inspection. Nothing herein contained, however, shall be construed as entitling the Contestees herein or their successors in interest to compel the Milton Ditch Company to convey water through its irrigation system for the use of the Contestees herein nor allow said Contestees or the Finis Ditch Company any right whatsoever to the water or ditches of said Milton Ditch Company or its water users.

Exceptions were filed to the above findings as to the claimants C. P. Collins, John McEwan, John D. Ritter, H. S. Shangle and S. S. Shields. So far as the findings refer to the rights of C. P. Collins under Proof No. 127, a stipulation was filed signed by the exceptors and the claimant, C. P. Collins, limiting his water right to waste water through the H. S. Shangle place and eliminating all claim to water through the Finis Ditch therefor. With reference to the claim of C. P. Collins, the findings under Proof No. 127 will be modified to conform to the stipulation limiting the claimant's rights to waste water from the H. S. Shangle place and the claimant shall have no rights to any water flowing in the Finis Ditch. As to the other claimants, who are Finis Ditch Claimants, their rights will be confined to the surplus water coming from the Milton Ditch as awarded in the former decree in the case of Little Walla Walla Irrigation Company versus Finis Ditch Company reported in 62 Oregon, page 348. The claimant's rights are limited by the former adjudication and said claimants have no right to waters from any stream except the surplus waters flowing from the Milton Ditch, and the tabulation of the rights of the claimants herein named will be modified accordingly.

Milton City

(See findings under Contest No. 37, Paragraph 48, and also findings under Contest No. 76, Paragraph 84, page 75 herein.)

Milton Nursery Company

This contest was settled by stipulation and the rights of Contestee will be tabulated in accordance with the provisions thereof.

Northwest Joint Stock Land Bank

A stipulation was entered into in settlement of this contest and the rights of Contestee will be tabulated according to the provisions thereof.

G. R. Shortridge

This contest was dismissed and the rights of Contestee will be tabulated as claimed.

Katherine Shortridge

This contest was dismissed and the rights of Contestee will be allowed as stipulated in settlement of Contest No. 55.

Carrie M. Spence

This contest in so far as it concerned Proof No. 781 was stipulated and rights will be tabulated accordingly.

The contest in so far as Proof No. 782 wherein Contestee claimed the right to irrigate 0.74 acre and develop  $\frac{1}{2}$  H.P. was heard, and from the testimony introduced it would appear Contestee is entitled to the water as claimed and the right will be so tabulated.

World War Veterans' State Aid Commission

(See findings under Contest No. 50, Paragraph 61, Page 50.)

W. H. Blahn

This contest came on for hearing but Contestee was not represented by an attorney. Testimony was introduced on part of the Contestants which would indicate Contestee never received water direct from the Walla Walla River but depended upon the water present in the East Prong of the Little Walla Walla River Spring Branch which is fed mainly by springs arising in its channel. The Contestee will be allowed a water right as claimed with the restriction that such right is to be limited to the use of the waters naturally flowing in said stream.

84.

Contest No. 76

L. L. Johnson, et al,  
Contestants,  
v.

Samaria Miller, M.F. Hubbs, Annie Fields,  
City of Milton, and Milton Nursery Com-  
pany, Contestees.

This contest as to M. F. Hubbs, Annie Fields and Samaria Miller, was disposed of under Contest No. 71, Paragraph 79, Page 65 herein. As to the Milton Nursery Company the contest was settled by stipulation as heretofore indicated under the findings made under Contest No. 75 and its rights will be tabulated in accordance therewith. The findings made hereunder will be confined to those rights as claimed by the City of Milton.

The Contestee City filed four proofs of claim in these proceedings. Proof No. 561 for the development of 6,400 theoretical horse power, with priority of 1926; Proof No. 562 for the development of 699 theoretical horse power, with priority of 1902; Proof No. 563 for 3.8 cubic second feet of water for domestic and municipal purposes and Proof No. 564 for the irrigation of 2.84 acres. All of the Contestee's claims for the use of water are from the Walla Walla River.

This contest in so far as Proof No. 564 is concerned, was settled by stipulation

DECREE - WALLA WALLA RIVER

and the rights of the City will be tabulated accordingly.

The main grounds of contest as to the Proofs of Claim made by the City were based upon the following grounds:

That the Contestants have a superior right to the use of the waters of the Walla Walla River for irrigation purposes, and that the Contestee's use of the water from said stream under Proof No. 561 (based on State Engineer's Permit) is not so restricted as not to interfere with the use of the water by the Contestants, in that the use by the Contestee is and will cause a fluctuation of the waters in said stream and thus make it difficult to properly regulate the flow of water through the ditches of Contestants.

That under Proof No. 562 the Contestee has not installed the proper devices to prevent fluctuation in the stream, resulting in damage to the Contestants herein.

That under Proof No. 563 the Contestee has changed its point of diversion and has not installed a measuring device to measure the water taken from the river and is using more water than Contestee was allowed under the former decree (Little Walla Walla Irrigation Company vs. Finis Irrigation Company.)

It appears that the Contestee has two power plants on the Walla Walla River above the City of Milton and above the diversions made from the said river by the Contestants herein. Both plants have proper devices for the control of the water used so as to prevent fluctuation in the stream. The Contestee, however, has not always utilized the equipment it has and as a result caused fluctuations to occur to the injury to prior rights on the river below. The Contestee should operate its plant in such a manner so as to prevent this condition from occurring. Under Proof No. 562 the Contestee will be allowed a water right as claimed and its right under Proof No. 561, which was initiated since the Water Code of 1909 became effective, will be governed by the law applicable thereto, and a water right certificate will be issued in accordance with the statutory provisions thereof when the Contestee has completed its project.

The Contestee under its Proof No. 563 claimed a right for the use of 3.8 cubic feet per second of water for domestic and municipal purposes. During the hearing and after the Contestee had put on its case a motion was made to amend its claim to conform with the proof. The Contestee was permitted to file an amended claim (Proof No. 563-A). The purpose of the amended claim was to allow the Contestee a like quantity of water as was allowed in the former suit (Little Walla Walla Irrigation Co., et al vs. Finis Ditch Co. et al). It appears that the Contestee stipulated its right and based thereon the Court made the following findings:

"It is further decreed that the City of Milton is entitled and shall receive at all times through the present 14-inch intake water pipe, located on the west bank of the Little Walla Walla River, and having its intake about 1- $\frac{1}{4}$  miles above the Bank Building on Main Street in said City, a continuous flow of water measured under a pressure

of 3 feet of water above the upper surface of its pipe for domestic, irrigation, street sprinkling, fire protection, and other purposes in pursuance of the stipulation heretofore filed herein."

The stipulation mentioned read in part: "a continuous flow of water measured under a pressure of three feet above the orifice of said pipe." The quantity of water in terms of miner's inches or cubic feet per second was not set forth. The decree is indefinite in this respect although it does appear a method for measuring the quantity of water was specified. When construing the decree together with the stipulation referred to in said decree and made a part thereof, it is believed the intention was that the Contestee (City of Milton) is entitled to that quantity of water flowing through a 14-inch orifice under a head of 3.58 feet above the center of the orifice which will deliver approximately 9.7 cubic feet per second.

The Contestee has installed a filter plant with a maximum capacity of 2.3 second feet. The testimony would indicate that this quantity of water is ample for the present needs of Contestee. It is doubtful that this much water is actually used at the present time but the Contestee should be allowed an ample supply for future needs. Some evidence was submitted showing the use by the Contestee was wasteful; that its system was old and permitted considerable leakage. This should be curtailed as much as possible and it is reasonable to assume that this will be done from year to year.

The change in point of diversion by the City does not appear to have injured anyone and will therefore be allowed. The Contestee did not file a claim for irrigation purposes other than under Proof No. 564, which is allowed (See Findings under Contest No. 37, Paragraph 48 herein) as stipulated, and Contestee will be restricted to the use of water for such purposes in accordance with said claim. For domestic and municipal use the Contestee will be allowed the right to 9.7 second feet of water with a date of priority of 1890 but in no case shall the Contestee be permitted to use more water than it can beneficially use at any one time.

Exceptions were filed to the above findings of the State Engineer against the City of Milton. The findings with reference to Claim No. 562 will be modified by the requirement that the City of Milton must use all reasonable equipment and devices and operate its plant in such manner as to cause as little fluctuation in the stream as possible.

The finding relating to Proof No. 563, filed by the City of Milton, awards to the city a right to 9.7 cubic feet per second. This is the State Engineer's interpretation of the decree in the case of the Little Walla Walla Irrigation Company versus the Finis Ditch Company, et al. The decree is somewhat ambiguous as to the actual amount of water awarded the City and is subject to different interpretations. The testimony of John H. Lewis, the Civil Engineer who testified on behalf of the city, was to the effect that at the time of the former decree the pipe line from the intake to the City of Milton was approximately 7,000 feet in length (Page 756, volume 8 of the Transcript) and on page 757 of the same volume he testified that the pipe line at the time of the former decree would

deliver to the city 7.24 second feet of water. This was based on the assumption that there was a fourteen inch pipe from the intake to the city and a fall of 11 feet to the mile with a pressure of 3 feet of water above the upper surface of the pipe at the intake. This is as near the exact conditions existing at the time of the former decree as can be ascertained from the testimony. The words used by the Court in the former decree are as follows: "It is further decreed that the City of Milton is entitled and shall receive at all times through its present 14 inch intake water pipe located on the West bank of the Little Walla Walla River and having its intake about one and one-fourth miles above the bank building on Main Street in the said City, a continuous flow of water measured under a pressure of 3 feet of water above the upper surface of its pipe for domestic, irrigation, and street sprinkling, fire protection and other purposes."

This Court is of the opinion from the language used by the Supreme Court, to - wit: "14 inch intake water pipe" meant an intake with a 14 inch conduit to the City; and under this interpretation of the decree the amount of water which the City was awarded was 7.24 second feet at point of delivery to the City at City limits. This would give the City more than three times the amount of water that it now uses under this present system of distribution and by the installation of a more efficient system of distribution 7.24 second feet of water would supply a city of many times the size of the City of Milton and this should be an ample provision for future needs. The City has not used the amount of water herein awarded but the City is entitled to a water right reasonably adequate to supply future needs created by normal growth. Some objection is made that the City is wasting water and should install meters. The Court is impressed by the claim that the City of Milton may require more water per capita than the average city of its size because there are perhaps more gardens, orchards and large lawns in the City of Milton than in most small towns. It also appears that the water used by the City may not be entirely lost to irrigation because most of the irrigated land is below the City and the water used by the City seeks the water table and is again pumped on to the gardens and orchards below, but the time may come and no doubt will when the City will be required to install meters to measure the water to its inhabitants, but the Court does not feel justified in compelling the City to conform to that degree of efficiency at the present time and under present economic conditions.

The City of Milton is awarded 7.24 second feet, measured at the point where the pipe line enters the City, with a priority of 1890. The amount measured at the intake will be 7.24 second feet plus the amount of natural loss in transmission to the City.

Exceptions were also filed to the findings of the State Engineer with reference to Proof No. 563 filed by the City of Milton. A question has arisen between the City of Milton and the exceptors as to whether the City has authority to sell water from its domestic water supply to persons residing outside of the boundaries of the City. The City

of Milton has no right to furnish water to persons residing outside the boundaries of the City from its domestic water supply. Cities have a right to sell water beyond their boundaries when they have a supply of water which may be used for that purpose without interfering with the rights of other water users, but this is not the situation with reference to the City of Milton and the use of the domestic water supply under Proof No. 563, filed by the City of Milton, will be confined within the boundaries of the City of Milton.

85.

Contest No. 78

S. J. Campbell, et al,  
Contestants,  
v.

John McAuslan, Adda C. Ruckman,  
R. C. Sheets, and Carrie M. Shields,  
Contestees.

This contest was dismissed as to John McAuslan and said Contestee will be allowed a water right as claimed under Proof No. 496. Stipulations were filed in settlement of contest against Ada C. Ruckman and Carrie M. Shields involving Proofs of Claim Nos. 710 and 757 respectively, and the rights of said Contestees will be tabulated in accordance with the provisions of the stipulations.

Contestee R. C. Sheets filed Proof No. 754 claiming a right to irrigate 7 acres from the waters of the Little Walla Walla River with date of priority of 1905. This claim was contested and at the hearing Contestee was represented but did not put on any testimony in support of the claim. The Contestants introduced testimony indicating the lands were not irrigated prior to 1925, and that no permit for a water right had ever been issued by the State Engineer covering this land. The claim will therefore be denied.

86.

The Milton-Freewater & Hudson Bay Irrigation Company and the Little Walla Walla Irrigation Union, both incorporated, have filed a stipulation in this proceeding which stipulation reads as follows:

(Omitting title)

IT IS HEREBY STIPULATED AND AGREED by and between the Milton-Freewater & Hudson Bay Irrigation Company, a corporation, acting by and through its President and Secretary, pursuant to a duly adopted Resolution of its Board of Directors, as party of the first part and the Little Walla Walla River Irrigation Union, a corporation, acting by and through its President and Secretary, pursuant to a duly adopted Resolution of its Board of Directors, as party of the second part.

That if there shall be flowing in the channel of the Little Walla Walla River below the Peacock Mill at the headgate of the Milton-Freewater & Hudson Bay Irrigation Company's dam on June 1st of each year 2,585 inches of water and from June 1st to June 15th 2,462 inches and after June 15th in each year 2,337 inches of water to October 15th of each year, that the said Milton-Freewater & Hudson Bay Irrigation Company shall per-

mit said amounts to flow down to the users of the water of said Little Walla Walla River to the Little Walla Walla River Irrigation Union lands, but if at any time between said dates in any year said Little Walla Walla River Irrigation Union and those entitled to take and use water from and through its system of ditches are not using the quantity of water flowing down past said point upon the lands under said Little Walla Walla River Irrigation Union and being used thereon, then said Milton-Freewater & Hudson Bay Irrigation Company shall have the right to diminish and return to the Milton-Freewater & Hudson Bay Irrigation Company's ditch any amount of water hereinbefore stipulated in excess of the actual amount flowing to and being used upon said lands under said Little Walla Walla River Irrigation Union's system of ditches, until said lands and the users thereon are prepared to apply said water upon said lands to beneficial use and purpose thereon.

DATED this 4th day of March, 1931.

MILTON-FREEWATER & HUDSON BAY IRRIGATION CO.,

By E. C. Burlingame,

Its President,

and By E. C. Burlingame, Jr.,

Its Secretary.

THE LITTLE WALLA WALLA RIVER IRRIGATION UNION,

By G. W. Wharton,

Its President,

and By W. F. Eiffert,

Its Secretary.

(SEAL)

As between the parties to said stipulation the stipulation is adopted as findings of this Court, and shall be binding as between the parties, but the provisions of the stipulation shall not in any way interfere with the rights of any person not a party to this stipulation.

87.

Exceptions were filed to the tabulation of the State Engineer on Page 85 with reference to the claim of Amanda E. Bostwick. A hearing was had on the exceptions filed at which time the exceptors and the claimant presented evidence before the referee and the Court having read the transcript of the evidence and the briefs filed by the parties and being fully advised, the tabulation of the State Engineer awarding to the claimant a right for 7 acres with a priority of 1895, through the Eastside ditch is eliminated and disallowed, otherwise the tabulation is confirmed.

88.

Exceptions were filed to the tabulation of the State Engineer in Proof No. 73,

DECREE - WALLA WALLA RIVER

Page 80

filed by W. B. Brooks. A stipulation was filed signed by Brooks and the exceptors changing his priority to 1908 instead of 1905. The tabulation will be modified to conform to the stipulation and the claimant's rights will be allowed with a priority of 1908.

89.

Exceptions were filed to the tabulation of the State Engineer on page 89 on Proofs Nos. 99 and 103, filed by Mrs. Kate Christensen. A stipulation was filed signed by the claimant and the exceptors that the right of claimant be restricted to the use of water each year prior to June 15th, except when there is water available in excess of that required to supply permanent rights having a priority of 1908 or earlier. The tabulation of the State Engineer will be modified to conform to the stipulation.

90.

Exceptions were filed to the tabulation of the State Engineer on page 91 on Proof No. 117, filed by Vena B. Cochran. The matter was settled by stipulation filed, signed by the exceptor and the claimant, which stipulation provided that the claimant should have a right to the irrigation of 5.8 acres with a priority of 1882, and 11 acres with a priority of 1907. The finding will be modified to conform to the stipulation and the claimant's rights allowed and tabulated accordingly.

91.

Exceptions were filed to the tabulation of the State Engineer on page 95 on Proof No. 138, filed by G. A. Cowl and Mary A. McCoy. The matter was settled by stipulation filed and signed by the exceptors and claimants, changing the claimants' rights to 7 acres with a priority of 1870 instead of 10 acres. The State Engineer's findings will be modified to conform to the stipulation allowing claimants 7 acres as of 1870.

92.

Exceptions were filed to the tabulation of the State Engineer on page 98 on Proof No. 164 filed by A. C. Denny. The matter was settled by stipulation signed by the exceptors and claimant allowing the claimant a priority of 1891 for 6 acres and a priority of 1894 for 2.5 acres, and claimant will be awarded water rights in accordance with the stipulation and the State Engineer's findings will be modified accordingly.

93.

Exceptions were filed to the tabulation of the State Engineer on page 102 on Claim No. 185 filed by Frank C. Eiffert. The matter was settled by stipulation signed by the parties changing the source of the water right to the water naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch, and changing the date of priority to 1875. The claimant will be permitted to amend his claim to conform to the stipulation and his rights will be awarded accordingly.

Exceptions were filed to the tabulation of the State Engineer on Proof No. 186, filed by Fred Eiffert. The matter was settled by the filing of a stipulation signed by the exceptors and the claimant providing that the source of the water right could be changed to the water naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch. The tabulation of the State Engineer will be modified to conform to this stipulation.

Exceptions were filed to the tabulation of the State Engineer on page 102, Claim No. 187, filed by Henry Eiffert. The matter was settled by the filing of a stipulation which allowed claimant under said proof, 4 acres with a priority of 1885, 5 acres with a priority of 1908, and 4 acres with a priority of 1908 up to June 1st each year. The findings of the State Engineer will be modified to conform to the stipulation and the claimant's rights tabulated accordingly.

Exceptions were filed to the tabulation of the State Engineer on page 103 under Proof No. 190, filed by C. H. Elliott. The matter was settled by stipulation signed and filed by the exceptors and the claimant providing that the source of the water right should be changed to waters naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch. The findings of the State Engineer will be modified to conform to the stipulation.

Exceptions were filed to the tabulation of the State Engineer on page 104 under Proof No. 197, filed by Martha I. Ely, and it appearing to the Court that the claim of Martha I. Ely under Proof No. 197 is a duplicate of a claim filed on her behalf by the Pleasant View Irrigation Company. This tabulation will be stricken.

Exceptions were filed to the tabulation of the State Engineer on page 106 as to Proof No. 829 by the First National Bank of Milton so far as the same awarded to the claimant a water right for the irrigation of 5 acres with a priority of 1908. Testimony was taken on the exceptions but the claimant failed to appear at said hearing. The exception will be sustained and the award of the water right to the First National Bank of Milton under Proof No. 829 for said 5 acres shall be limited to a period prior to June 1st each year and the priority shall be 1908.

Exceptions were filed to the tabulation of the State Engineer on page 107 under Proof No. 221, filed by Hattie O. Forsythe. The matter was settled by stipulation

signed and filed by the exceptors and the claimant providing that the claimant's rights should be limited to June 1st each year but that she might use water available after June 1st each year in excess of the requirement for permanent rights having a priority of 1908 or earlier. The finding and tabulation is modified to conform to the stipulation.

100.

Exceptions were filed to the tabulation of the State Engineer on page 110 under Proof No. 252, filed by Nellie H. Gilmore. The matter was settled by stipulation, signed by the exceptors and claimant, which provides that as between the claimant and Anna G. Carrol the priorities shall be equal. The finding will be modified to conform to the stipulation and the plaintiff's rights allowed and tabulated accordingly.

101.

Exceptions were filed to the tabulation of the State Engineer on page 113 on Proof No. 273 filed by T. J. Green and Louisa M. Green. The matter was settled by stipulation signed by the exceptors and the claimants providing that the source of claimants' water rights should be changed to waters naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch, and priority changed to 1875. The findings and tabulation of the State Engineer is modified to conform to the stipulation.

102.

Exceptions were filed to the tabulation of the State Engineer on page 114 under Proof No. 282, filed by Gerald Groves. The claimant's proof is based on the fact that he has been taking water from the City of Milton for which he paid the City. The claimant showed no right to appropriate water from the Walla Walla River and the claim is disallowed and the finding of the State Engineer modified accordingly.

103.

Exceptions were filed to the tabulation of the State Engineer on page 115 under Proof No. 288, filed by A. S. Hammitt. The matter was settled by stipulation filed and signed by the exceptors and the claimant which provides that as between the claimant and Anna G. Carrol the priorities shall be equal. The findings will be modified to conform to the stipulation and the claimant's rights will be allowed and tabulated accordingly.

104.

Exceptions were filed to the tabulation of the State Engineer on page 115 on Proof No. 289, filed by Charles Hammitt. The matter was settled by stipulation filed and signed by the exceptors and the claimant providing that as between claimant and Anna G. Carrol the priorities shall be equal. The finding will be modified to conform to the stipulation and the claimant's rights tabulated accordingly.

DECREE -- WALLA WALLA RIVER

Page 83

105.

Exceptions were filed to the tabulation of the State Engineer on page 116 under Proof No. 295, filed by E. R. Harden. This right is by sub-irrigation only and the words "Spring Branch" will be stricken from the tabulation.

106.

Exceptions were filed to the tabulation of the State Engineer on page 117 under Proof No. 302, filed by Velma Harrah. The matter was settled by stipulation filed, signed by the exceptor and the claimant, which stipulation provided that the claimant's priority be changed to 1892 and the source of the claimant's rights be changed to the East Prong of the Little Walla Walla River, Spring Branch, but the rights of Anna Carrol to waters from the Ingall Ditch shall be prior to and preferred over this claimant's rights. The finding and tabulation of the State Engineer will be modified to conform to the stipulation and the claimant's rights allowed and tabulated accordingly.

107.

Exceptions were filed to the tabulation of the State Engineer on page 119 under Proof No. 313 filed by Higby Harris and particularly to that portion which allowed Higby Harris water for 27 acres for sub-irrigation with a priority of 1895. It does not appear that the claimant ever appropriated any water from the Walla Walla River for this particular tract of land and that part of the finding of the State Engineer under Proof No. 313 allowing the claimant a water right for 27 acres with a priority of 1895 for sub-irrigation is eliminated and said right disallowed. Under Proof No. 314 filed by Higby Harris which appears on page 119 of the State Engineer's findings, there will be eliminated from said findings that part thereof which allows the claimant, Higby Harris, a water right for 15 acres by sub-irrigation with a priority of 1895 and said claim disallowed.

108.

Exceptions were filed to the tabulation of the State Engineer on page 121, under Proof No. 337, filed by Hans Hellberg. There appears to be an error in the tabulation wherein the State Engineer allowed the claimant 7 acres as of 1907. This portion of the finding will be eliminated and the tabulation modified accordingly.

109.

Exceptions were filed to the tabulation of the State Engineer on page 121, under Proof No. 339, filed by J. O. Hendrickson. The matter was settled by stipulation providing that the source of claimant's right should be changed to the West Prong of the Little Walla Walla River, Spring Branch. The tabulation will be modified accordingly.

DECREE - WALLA WALLA RIVER

Page 84

110.

Exceptions were filed to the tabulation of the State Engineer on page 125 under Proof No. 364, filed by Wm. Hodgen and Mary E. Hodgen. It appears that the claim is a duplicate of one filed by the Pleasant View Irrigation Company on behalf of the claimants. The finding will, therefore, be eliminated and the claim under this proof disallowed.

111.

Exceptions were filed to the tabulation of the State Engineer on page 125 under Proof No. 365 filed by Edgar Holm. The matter was settled by stipulation filed and signed by the exceptors and the claimant which stipulation provides that claimant shall have a right for the irrigation of 5 acres with a priority of 1875 and 15 acres with a priority of 1892 but as between the claimant and Anna G. Carrol the priority shall be equal. The State Engineer's tabulation will be modified to conform to the stipulation and the claimant's rights awarded and tabulated accordingly.

112.

Exceptions were filed to the tabulation of the State Engineer on page 127 under Proof No. 377 filed by W. C. Hopson. The matter was settled by stipulation filed signed by the exceptors and the claimant, changing the priority from 1906 to 1909 and limiting the use of water from October 15th to May 15th each year. The findings will be modified to conform to the stipulation.

113.

Exceptions were filed to the tabulation of the State Engineer on page 138 under Proof No. 473 filed by Austin Leo. The matter was settled by stipulation filed signed by the exceptors and the claimant providing that the source of claimant's rights should be changed to the East Prong of the Little Walla Walla River, Spring Branch, and that the priority should be changed to 1875. The claimant will be permitted to amend his claim to conform to the stipulation and his rights are awarded and will be tabulated accordingly.

114.

Exceptions were filed to the tabulation of the State Engineer on page 141 under Proof No. 497, filed by the McCoy claimants. These claimants or their predecessors in interest were parties to the case of Little Walla Walla Irrigation Company versus the Finis Ditch Company reported in 62 Oregon at page 348 in which case they were awarded 50 inches of water miners measurement for stock and domestic purposes. The tabulation in the State Engineer's findings on page 141 under Proof No. 497 will be modified so as to allow the claimants 50 miners inches of water for domestic and stock purposes, otherwise the finding will be confirmed.

Exceptions were filed by Anna G. Carrol to the State Engineer's award to Laura A. McElrath on Proof No. 506 on page 142 of the findings. The exceptions were settled by stipulation providing that as between Laura A. McElrath and Anna G. Carrol their priorities shall be equal. The findings of the State Engineer are modified to conform to the stipulation and the rights of Laura A. McElrath, under Proof No. 506, are awarded and will be tabulated in accordance with the stipulation.

## 116.

Exceptions were filed to the tabulation of the State Engineer on page 148 on Claim No. 551 filed by Conrad Miller. The matter was settled by stipulation filed and signed by the exceptors and the claimant providing that the source of the water right should be changed to waters naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch, and changing the priority to 1875 and claimant will be permitted to amend his proof to conform to the stipulation and his rights will be allowed and tabulated accordingly.

## 117.

Exceptions were filed to the tabulation of the right of Hattie Beardsley on page 151 under Proof No. 41, calling the Court's attention to an error in the description of the land to which the water right is appurtenant. The words "Block 7" in said description are changed to the words "Block 8"; otherwise the finding is confirmed.

## 118.

Exceptions were filed to the tabulation of the State Engineer on page 181 on Proof No. 915, filed by H. E. Winn. This claim was settled by stipulation filed, signed by the exceptors and the claimant, in Contest No. 38, but the claimant failed to amend his claim to conform to the stipulation and claimant now seeks permission to amend his proof to conform to the stipulation. The claimant will be permitted to amend his proof to conform to the stipulation and the claimant's rights will be allowed and tabulated as follows: 3 acres with priority of 1881, 2 acres with a priority of 1894, and 3 acres with a priority of 1896.

## 119.

From an examination of the tabulations of the water rights of Milton-Freewater Hudson Bay Irrigation Company under Proof No. 566, on page 183 of the findings, and a comparison of the same with the claim filed, it appears that there is a clerical error in the tabulation. The State Engineer has described "27.6 acres in the Northeast quarter of the Northwest quarter of Section 19, Township 6, North Range 35 E. W. M.," apparently in an attempt to describe the lands of Mrs. Wellman shown by stipulation to be irrigated from the Company's ditch. This description is corrected to read as follows:

"27.6 acres in the Northwest Quarter of the Northwest Quarter of Section 19, Township 6, North Range 35, E. W. M." A like error appears on the same page of the State Engineer's findings where the tabulation is as follows: "10 acres in the Northeast quarter of the Northwest quarter of Section 29, Township 6, North Range 35, E. W. M." apparently intended to cover the land of Carl Mason shown by stipulation to be irrigated from the Company's ditch. This description is corrected to read as follows: "10 acres in the Southeast quarter of the Northwest quarter of Section 29, Township 6, North Range 35, E. W. M."

120.

Exceptions were filed to the tabulation of the State Engineer on page 194 under Proof No. 649 filed by Henry Priester. The matter was settled by stipulation filed, signed by the exceptors and the claimant, which stipulation provided that the name of the claimant should be changed to Henry Brunner, who has acquired the rights of the claimant, Henry Priester, and the rights should be limited to one inch to the acre instead of one and one-half inches. The finding will be modified to conform to the stipulation and the claimant's rights awarded accordingly.

121.

Exceptions were filed to the tabulation of the State Engineer on page 195 on Proof No. 661, filed by Mrs. John L. Ramsay. The matter was settled by stipulation filed, and signed by the exceptors and the claimant limiting the claimant's rights under said proof to waters naturally flowing in the East Prong of the Little Walla Walla River, Spring Branch, and that the rights should be tabulated under the name of Stanley Armstrong, who succeeded to the interest of the claimant, Mrs. John L. Ramsay. The finding of the State Engineer will be modified to conform to the stipulation and the rights allowed and tabulated accordingly.

122.

Exceptions were filed to the tabulation of the State Engineer on page 198 on Proof No. 683 filed by Chris Ridkenberg. The matter was settled by stipulation signed by the exceptors and claimant that the claimant's name should be changed to Rickenberg and that his rights should be tabulated as follows: 3.5 acres with a priority of 1901, 3.56 acres with a priority of 1903, 2.64 acres with a priority of 1905. The Findings will be modified to conform to the stipulation and the claimant's rights allowed and tabulated accordingly.

123.

C. G. Rogers was awarded a water right for 3.7 acres with a priority of 1898 on lands described in the tabulation on page 200 of the findings under Proof No. 695. Exceptions were filed by C. G. Rogers calling the Court's attention to an error in the

DECREE - WALLA WALLA RIVER

Page 87

description of the lands to which said right was appurtenant. The tabulation of the rights of C. G. Rogers under Proof No. 695 on page 200 will be corrected by substituting the following description of lands for the description therein contained, to-wit: 3.7 acres in the East half of the Northeast quarter of the Southwest quarter of the Northeast quarter of Section 35, in Township 6, North Range 35, E. W. M.

124.

Exceptions were filed to the tabulation of the State Engineer on page 204 on Proof No. 741, filed by Charles F. Schwald. The matter was settled by stipulation signed by the exceptors and the claimant limiting the claimant's rights to flood waters, or such water as is available in excess of what is required to fill permanent rights having a priority of 1908 or earlier, and which rights run during the irrigation season. The finding will be modified to conform to the stipulation and the claimant's rights allowed accordingly.

125.

Exceptions were filed to the State Engineer's tabulation on page 205 under Proof No. 744, filed by Bruce Shangle wherein the claimant was awarded a water right for 24.86 acres with priority of 1908 from waste water from the Burns' place from the Walla Walla River. The words "Walla Walla River" will be stricken from said tabulation.

126.

Exceptions were filed to the State Engineer's tabulation on page 206 on Proofs Nos. 749 and 750, filed by W. A. Sharp. It appears from the exceptions filed that S. A. Fulton has succeeded to the rights of W. A. Sharp and that the priority should be 1882. The claimant will be permitted to amend the claims showing S. A. Fulton as the owner and changing the priority from 1895 to 1882 and said rights will be allowed and tabulated accordingly.

127.

Exceptions were filed to the tabulation of the State Engineer on page 207 under Claim No. 759-A, filed by S. S. Shields on the ground that the claim is a duplicate of one filed by the Pleasant View Irrigation Company on behalf of the claimant, and it appearing to the Court that said claim is a duplicate of one filed by the Pleasant View Irrigation Company on behalf of this claimant and allowed by the State Engineer. This findings of the State Engineer is stricken and the claim disallowed.

128.

Exceptions were filed to the tabulation of the State Engineer on page 218 on Proof No. 842, filed by the Valley Fruit Company, Inc. This finding will be modified allowing the claimant on said proof two acres with a priority of 1885, in the Southwest corner of the Northeast quarter of the Southeast quarter of Section 14, Township 6, North, Range 35, E. W. M. Under Proof No. 843, filed by the Valley Fruit Company, Inc.,

the acreage is changed to 38 acres with a priority of 1907 but this right is prior to the 1907 right of Vena B. Cochran under Proof No. 117. This modification is in accordance with a stipulation filed herein by the exceptors and claimant.

129.

Exceptions were filed to the State Engineer's findings as to the rights of J. H. Wells Estate under Proof No. 885 on page 222 of the findings, and as to the rights of L. H. Ebbert under Proof No. 183 on page 101 of the findings. And as to the rights of W. Martin under Proof No. 537 on page 146 of the findings, and as to the rights of John M. Gunn under Proof No. 285 on page 115 of the findings, and as to the rights of W. E. McDaniel under Proof No. 502, page 142 of the findings, and as to the rights of J. D. Harrah under Proof No. 300, page 116 of the findings, and as to the rights of W. H. Blahn under Proof No. 57, page 84 of the findings, and as to the rights of W. W. Harrah, under Proof No. 303, page 117 of the findings, and as to the rights of Hazel Lewis under Proof No. 478, Page 139 of the findings, and as to the rights of Charles E. Yox under Proof No. 923, page 226 of the findings, and as to the rights of C. H. Spencer under Proof No. 784, page 210 of the findings, and as to the rights of Fred G. Stevens under Proof No. 795, page 212 of the findings, and as to the rights of Mrs. J. L. Ramsay, under Proof No. 661 on page 195 of the findings. All of these exceptions were settled by stipulation filed, signed by the exceptors and the claimants in which it is provided that all of said parties should have a priority of 1875 and the source of the rights is the East Prong of the Little Walla Walla River, Spring Branch. The parties named will be permitted to amend their proof to conform to the stipulation and their rights will be allowed and tabulated accordingly.

130.

#### WATER RIGHTS OF CORPORATIONS.

Wherever in these proceedings water rights are acquired by a corporation for the purpose of sale for irrigation, the company shall not lose the water right by reason of any land owner ceasing to use water from any such company, but the company may apply to the State Engineer for a change of location of use of the water.

131.

#### DUTY OF WATER

The Walla Walla River is situated partly in the northeastern part of Umatilla County, Oregon, and partly in the southern portion of Walla Walla County, Washington. It rises in several main branches in the elevated area which borders the western boundary of the Grande Ronde River watershed and flowing in a northwesterly direction, enters the Columbia River near Wallula, Washington.

The principal tributaries are Dry Creek and Mill Creek, which are situated

almost wholly within the State of Washington, and the North Fork, Birch Creek, Pine Creek and Couse Creek, which are located mostly within Oregon in the vicinity of the cities of Milton and Freewater.

The most compact and most intensively cultivated body of land irrigated within the watershed in Oregon lies between Milton and the State line, where the area is largely planted to fruit crops. The river divides here into numerous natural prongs or branches in the nature of sloughs which are used and controlled as ditches. The water in these branches is used intensively for irrigation, thus causing it to be distributed over an area of several miles in width and as a consequence of this and the nature of the soil, it seeps into the ground and over a fairly well defined area it appears to be temporarily lost for surface use. Beyond this area part of the water is returned to the surface for further use by means of natural springs and artificial wells.

The soils of the Walla Walla Valley, as a whole, are comparatively shallow and porous, underlain with a loose gravelly soil, the condition changing to a more tight soil in the northern end of the valley near the State line. Based upon the testimony and other available data as to the needs, the duty of water is hereby fixed and determined to be one and one-half miner's inches per acre measured at the point of diversion, provided that in no case shall more water be applied to the lands than can be beneficially used thereon.

In case the water flowing the channel of the stream sinks or fails to flow down the channel so as to be of benefit to an appropriator having the right to its use, the water master shall allow the diversion thereof by the next appropriator in order of priority who can make beneficial use of such water.

Unlike most irrigated sections, the water users in the Walla Walla Valley apply the water to their lands throughout the year. Such use tends to saturate the ground and build up the water table so as to retard and reservoir the water, making it available for use later in the season. This practice appears to be beneficial and necessary for the production of good crops and therefore no limitation shall be fixed as to the period or season that the water allowed may be used.

Exceptions were filed to the above findings as to the duty of water so far as it applies to fractional acres. Exceptions were filed by the Perkins Ditch exceptors, and it appears that in many instances the claimants own less than an acre of land, and it further appears that to reduce the amount of water in proportion to the amount of land where the same is less than one acre, would in some instances render it impossible to irrigate the land properly. The State Engineer's finding will be modified as follows: "where the water user's tract of land consists of less than one acre the user shall be allowed one and one-half inches of water where the tract exceeds one-half acre, and one inch where the tract is one-half acre or less."

STOCK AND DOMESTIC USE

All parties herein allowed the right to the use of water for irrigation shall be entitled to use such water for stock and domestic purposes but the quantity of water allowed shall not be increased over the amount they are entitled to divert for irrigation purposes. It is further provided that all parties filing a claim or claims for the use of water for domestic and/or stock purposes only, shall be entitled to one-tenth of a cubic foot per second for such purpose.

Exceptions were filed to the above paragraph relating to stock and domestic water. Said findings will be modified as follows: It is further provided that all parties filing a claim or claims for the use of water for domestic, and/or domestic and stock purposes only, shall be entitled to one tenth of a cubic foot per second for such purpose except where a different amount is specifically awarded in these findings.

133.

ROTATION

The water master may arrange such system or systems of rotation as may be best applicable to the conditions arising from time to time in the distribution of water on the Walla Walla River and its tributaries involved in these proceedings. When two or more appropriators agree between themselves as to a system of rotation, the water master shall distribute water to them in accordance with such agreement, provided that in so doing he does not interfere with the rights of other appropriators.

134.

APPURTENANCY

That the rights to the use of water for irrigation purposes hereby confirmed are appurtenant to the lands herein described, and the rights of use of the waters of said Walla Walla River and its tributaries involved herein, by virtue of such rights are limited and confined to the irrigation of the lands described herein to the extent of said lands herein set forth, and the priorities of right herein confirmed confer no right of use of the waters of said river and its tributaries on any lands other than those specified tracts to which such rights are herein set forth as appurtenant, and each and every person shall be and hereby is prohibited, restrained and enjoined from diverting and using water from said river on such other lands without lawful permit first obtained from the State Engineer.

135.

PRIORITIES

That except as otherwise determined herein, the order of the rights of the respective appropriators of the waters of said Walla Walla River and its tributaries

herein involved, and in which order they are entitled to divert and use the said water shall be and is according to the date of the relative priority of the rights as herein set forth and determined, and the first in order of time according to the date of relative priority shall be and is the first in order of right, and so on down to the date of the date of the latest right, and those having prior rights are entitled to divert and use the waters of said river and its tributaries herein involved when necessary for beneficial use in connection with the irrigation of their respective lands or other useful and beneficial purposes for which they are decreed the right of use, at all times against those having subsequent rights without let or hindrance, and whenever the water is not required by the appropriator having a prior right to its use for the purpose for which said water was appropriated, he must and shall permit it to flow down the natural channel of the stream as it was wont to flow in its natural course without hindrance or diversion thereof, and those having subsequent rights are entitled to the use of such water and to divert the same to the extent of their rights of appropriation according to the order of priority of their rights; and at all times the water shall be beneficially, economically and reasonably used without waste by those having a right to the use of such water, and no rights of appropriation are hereby confirmed to divert a greater quantity of water than such appropriator can beneficially use for the purpose to which the water is to be put.

As to the following named East Side Exceptors, who are successors in interest to the Tum-a-Lum defendants in the former suit of Little Walla Walla Irrigation Union, et al, vs. Finis Irrigation Company, et al, to-wit: L. L. Johnson, proofs 423 and 424; Clark E. Grogan, Proof 275; Lenius Johnson, proof 426; George Starkel, proof 791; E. Hiatt, proof 356; F. O. Hughes, proof 391; John Hughes, proof 392; H. G. Hyde, proof 404; Louis Olson, proof 608; B. F. Koon, proof 456; Arthur M. Koon, proofs 454 and 455; S. W. Gains, proof 238; C. H. Wicks, proof 893; Elijah Williams, proof 897; H. H. Stewart, Estate, proof 803; Jennie Hunter, Proof 397; Walter R. Bitney, proof 53, (1879 priority only); A. C. Kelnhofner and Veronica Kelnhofner, proof 442; Amandus E. Bostwick, proof 929; Evert S. Miller, Proof 552; Henry D. Starkel, proof 792; Walter H. P. Herman, proof 343; Katherine Herman, Profs 341 and 342; Charles Cooper, proof 133; Louis G. Howton, proof 380; R. F. Vancil, proof 845; Asa A. Demaris, proof 155; and as to the particular priority and lands described in the proofs above listed, the exceptors ask leave to amend their exceptions so as to except to the failure of the State Engineer to include in the statement of their priorities, paragraph 19 on page 194 of the decree on the mandate of the Supreme Court in the case of Little Walla Walla Irrigation Union, et al, vs. Finis Irrigation Company, et al, which paragraph reads as follows:

"19

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that the 307.27

inches of water awarded the Tum-a-Lum defendants herein is superior in right to the rights of any other parties to this suit; except the rights of the Milton Irrigation Company and the Cockburn defendants.

As to the appropriation of 444 inches by the said Tum-a-Lum defendants prior to the Peacock Mill Company's appropriation of 1898, the said appropriation of 444 inches in 1898 is prior in time and superior in right to all other appropriations by the plaintiffs or the defendants except the Milton Ditch, which was made subsequent to 1888 and prior to 1898."

Permission to make the amendment to the exceptions is granted, and paragraph 19 of the former decree as herein quoted is adopted as part of this decree and is decreed to be effective as to the rights of the exceptors listed above, and as to the quantity of water awarded in this decree to the several exceptors under their proofs above listed.

136.

That except as otherwise modified herein, the rights of the various appropriators of water from the Walla Walla River and its tributaries herein involved, arranged in a tabulated form, with the dates of relative priority of such appropriations, the number of acres to which such appropriations are applied and are now limited, the use or uses to which said water is applied, the name of the ditch or other means by which the water so appropriated has been diverted, the name of the stream or other source from which the water has been used, and the description of the lands upon which the water has been used, the tabulated rights of each appropriator being set opposite and following his name and post office address, are as follows, to-wit:

DECREE - WALLA WALLA RIVER

12860 Lewis, Mrs. Emma, Cont'd  
(Proof #476) 1875 0.6 Irrigation Private East Prong of Little Walla Walla River, Spring Branch 0.6 acre in SW $\frac{1}{4}$ SW $\frac{1}{4}$ , Section 14, T. 6 N., R. 35 E., W.M.

(SEE Note: Page 154, Proof #475)

The north one-fourth of the following described land:  
Commencing at the southwest corner of Sec. 14, T. 6 N., R. 35 E., W.M., running thence east along the Sec. line 81 rods and 1 ft.; thence at right angles north 60 rods; thence at right angles west 80 rods and 1 ft.; thence south 60 rods to the place of beginning; containing 7.5 acres, more or less.

(NOTE: The right under Proof #476 is restricted to the use of the waters naturally flowing in the East Prong of the Little Walla Walla Spring Branch.)

(NOTE: See Findings, Paragraph 83, Page 70 and 72.)

12861 Lewis, Hazel 1880 1.8 Irrigation Unnamed Lewis Spring Branch 1.8 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$ , Section 14, T. 6 N., R. 35 E., W.M.

12862 (Proof #478) 1875 5.7 Irrigation Winters East Prong of the Little Walla Walla River Spring Branch 5.7 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$ , Section 14, T. 6 N., R. 35 E., W.M.

(NOTE: See Findings, Paragraph 129, Page 89,)

(NOTE: The acreage described under Proofs Nos. 477 and 478 above is within the following described tract:

Commencing at a point 30 rods north of the southwest corner of Sec. 14, T. 6 N., R. 35 E., W.M.; running thence east 80 rods and 1 ft.; thence at right angles north 15 rods; thence at right angles west 80 rods and 1 ft.; thence south 15 rods to the place of beginning, containing 7.5 acres, more or less.

12863 Lewis, Marion H., 1880 10 Irrigation Unnamed Lewis Spring Branch 10 acres in the SE $\frac{1}{4}$  of the SE $\frac{1}{4}$ SE $\frac{1}{4}$ , Section 15, T. 6 N., R. 35 E., W.M.

12864 Lightle, Chas. 1875 4 Irrigation Ingle Mill Race lateral East Prong of Little Walla Walla Spring Branch 4 acres in NE $\frac{1}{4}$ SW $\frac{1}{4}$ , Section 14, T. 6 N., R. 35 E., W.M., being within the following described tracts: the West 4 acres of the following described tracts:

Commencing at a point 682.25 ft. north of the center of the SW $\frac{1}{4}$  of Sec. 14, T. 6 N., R. 35 E., W.M.; thence east 665 ft.; thence north 336.25 ft.; thence west 665 ft.; thence south 337.25 ft. to the place of beginning, containing 5.15 acres, EXCEPTING however, 15 ft. on the north side thereof to be used for road purposes.

ALSO: Commencing at a point 682.25 ft. north and 665 ft. east of the center of the southwest quarter (SW $\frac{1}{4}$ ) of said Sec. 14, T. 6 N., R. 35 E., W.M.; thence east 680 ft. thence north 295.87 ft.; thence N. 58° 45' W. 83.5 ft.; thence west 638 ft.; thence south 336.25 ft. to the place of beginning, containing 5.24 acres, EXCEPTING, however, 15 ft. on the north side used for road purposes.

(NOTE: This right is restricted to the use of the waters naturally flowing in the East Prong of the Little Walla Walla Spring Branch.)

(NOTE: See Findings, Paragraph 85, Pages 70 and 72.)

(NOTE: The acreage described under Proofs Nos. 579, 580 and 581  
above is within the following described tracts:)

Beginning at the northwest corner of NE $\frac{1}{4}$ NW $\frac{1}{4}$  of Sec. 3, T. 5 N., R. 35 E., W.M., and  
running thence south 100 rods; thence east 80 rods; thence north on the center line  
of Sec. 3 to the OWR&N Co.'s railroad right of way; thence northwesterly along the  
right of way to where north line of Sec. 3 crosses it; thence west along said north  
line of Sec. 3 to place of beginning; and  
EXCEPTING therefrom a 5-acre tract in the southeast corner described as follows:  
Beginning at the southeast corner of premises described above and running thence  
west 25 rods; thence north 35.5 rods; thence southeasterly to a point on the  
north and south line through the center of Sec. 3, 28.5 rods north of the place of  
beginning; thence south to the place of beginning;  
ALSO: Less a piece of land described as follows: Beginning at a point 1286.4 ft.  
south and 266 ft. N. 74° 39' west from the northeast corner of the NW $\frac{1}{4}$  of Sec. 3,  
T. 5 N., R. 35 E., W. M., and running thence N. 74° 39' W. 255.1 ft.; thence north 1004  
ft. more or less to the OWR&N Co.'s right of way; thence southeasterly along the  
said right of way 250 ft.; thence south 965.4 ft. to the point of beginning, contain-  
ing 5.55 acres more or less.

13/23 Phelps, Mrs. Frank  
Burton, Wash.  
(Proof #631)

1900 3 Irrigation Tumalum Tumalum 3 acres in NE $\frac{1}{4}$ NW $\frac{1}{4}$ ,  
River Section 1,  
T. 5 N., R. 35 E., W.M.,  
being within the follow-  
ing described tract:

Commencing at a point on the north line of Sec. 1, T. 5 N., R. 35 E., W.M., distant 23.25 rods east of the northwest corner of the NE $\frac{1}{4}$ NW $\frac{1}{4}$  of said Sec. 1; running thence west 23.25 rods to said Northwest corner of the NE $\frac{1}{4}$ NW $\frac{1}{4}$  of said Sec. 1; thence south along the west line of the E $\frac{1}{2}$  of said NW $\frac{1}{4}$  of Sec. 1, 81 rods more or less to the OR&N Co.'s right of way; thence northeasterly along said right of way 51 rods; thence northwesterly 58.5 rods to the place of beginning, containing 16 acres, more or less, SUBJECT, however, to the right of way for an irrigation ditch 3 ft. wide known as "The Loundigan Irrigation Co.'s Ditch" from a point on the west bank of the Tumalum River, 200 ft. above the OR&N railroad bridge, running thence northerly passing under the trestle work of said bridge to the land herein conveyed; RESERVING from this conveyance the following described tract of land, to-wit: Commencing at the southeasterly corner of the tract of land hereinbefore first described; thence running southwesterly along the right of way of the said OR&N Co. to the said Loundigan Irrigation Co. Ditch; thence northwesterly along said right-of-way to the southerly line of the right of way of the Milton-Freewater & Hudson Bay Irrigation Co. Ditch hereinafter described; thence easterly along the said southerly line of said right of way to the easterly line of the premises first hereinbefore described; thence southerly along said easterly line to the point of beginning.

13/24 Piper, Mattie  
Twin Falls, Idaho.  
(Proof #636)

1875 5 Irrigation Unnamed East 5 acres in SW $\frac{1}{4}$ SW $\frac{1}{4}$ .  
Prong Section 14,  
of the T. 6 N., R. 35 E., W.M.,  
Little Walla Walla being within the follow-  
River, Spring ing described tract:  
Branch running thence east 40  
rods; thence at right

angles south 20 rods; thence at right angles west 40 rods; thence at right angles north 20 rods to place of beginning, containing 5 acres, more or less.

(NOTE: This right is restricted to the use of the waters naturally flowing in the East Prong of the Little Walla Walla Spring Branch.)

(NOTE: See Findings, Paragraph 83, Pages 70 and 72.)

Rights under Permits of the State Engineer.

This adjudication proceeding involves principally those water rights which were initiated prior to February 24, 1909, on which date the Oregon Water Code became effective, and which prior rights are tabulated in the preceding Paragraph 91. Rights initiated after that date are evidenced by permits issued by the State Engineer, or by final water right certificate based upon the completion of rights under such permits. Each and every appropriator holding such a permit or certificate for the use of water from the Walla Walla River or its tributaries herein involved, shall have such rights thereunder as are provided by law, and such rights shall be perfected in the manner provided by law for the completion thereof.

Based upon the foregoing Findings as modified by this Court, it is hereby ORDERED, ADJUDGED AND DECREED that the relative rights of the various claimants to the use of the waters of the Walla Walla River and its tributaries herein involved, tributary of Columbia River, be and the same hereby are adjudicated, determined and settled as set forth in the foregoing modified Findings and Decree.

Dated this 16th day of May, 1932, at Pendleton, Oregon.

\_\_\_\_\_  
CALVIN L. SWEET  
CIRCUIT JUDGE

At the time of making the foregoing decree and in open Court the Pleasant View Irrigation Company gave notice of appeal to the Supreme Court of the State of Oregon from said decree and the whole thereof.

\_\_\_\_\_  
CALVIN L. SWEET  
CIRCUIT JUDGE

STATE OF OREGON, )  
County of Umatilla ) ss.

I, E. B. Casteel, County Clerk in and for the said County and State and ex-officio Clerk of the Circuit Court of the State of Oregon for Umatilla County, do hereby certify that the foregoing copy of DECREE has been by me compared with the original, and that it is a correct transcript therefrom, and of the whole of such original as the same appears of record and on file at my office and in my custody.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seal of the said court this 18th day of May, 1932.

E. B. CASTEEL, COUNTY CLERK

By Mary Millsap  
Deputy Clerk.

STATE OF OREGON    )  
                          ( ss  
County of Marion    )

I, CHAS. E. STRICKLIN, State Engineer of Oregon, do hereby certify that the foregoing copy of Decree in the matter of the determination of the relative rights to the use of the waters of the WALLA WALLA RIVER and its tributaries, has been by me compared with the original, and that it is a true and correct copy therefrom, and of the whole thereof, as the same appears of record in my office and custody.

IN WITNESS WHEREOF I have hereunto set my hand this 19th day of July, 1932.

CHAS. E. STRICKLIN,  
State Engineer.
