

BEFORE THE STATE ENGINEER OF OREGON

Washington County

IN THE MATTER OF THE DETERMINATION OF
THE RELATIVE RIGHTS TO THE USE OF THE
WATERS OF TUALATIN RIVER AND ITS
TRIBUTARIES, WASHINGTON AND OTHER
COUNTIES.

FINDINGS OF FACT
AND
ORDER OF DETERMINATION

Now at this time the above-entitled matter coming on for consideration by the State Engineer, and it appearing that all evidence and testimony have been taken in the above-entitled proceeding, and the State Engineer having carefully considered all such evidence and testimony and the engineering data and information gathered in accordance with law, and being fully advised in the premises, makes and orders to be entered of record in his office the following:

FINDINGS OF FACT AND ORDER OF DETERMINATION

-1-

The watershed of the Tualatin River and its tributaries is a large, oval-shaped basin comprising the greater portion of Washington County and parts of Clackamas, Yamhill, Tillamook, Columbia and Multnomah Counties. It is bounded generally, by the Chehalem Mountains on the South, by the Coast Range on the West, on the North by a ridge of the Coast Range extending to the Columbia River drainage basin and on the East by a range known as the Tualatin Mountains.

Tualatin River, one of the major tributaries of the Willamette River, has its origin on the eastern slope of the Coast Range, within Section 15, T.1S., R.6W., W.M. It flows in a general easterly direction to its confluence with the Willamette River within Section 2, T.3S., R.1E., W.M., just south of the town of Willamette.

Tualatin River is a perennial stream, being fed by precipitation and the run-off from melting snow in the Coast Range and by many springs and spring-fed tributary streams. The principal tributary streams which contribute the major portion of the flow, named in the order of their location below the town of Gaston are, Scoggin Creek, Gales Creek, Dairy Creek, Rock Creek and Fanno Creek.

Below the town of Gaston the stream gradient flattens out and the Tualatin River becomes a meandering stream to approximately the town of Tualatin, some eight river-miles above its confluence with the Willamette River. During annual periods of flood stage many acres of rich farm lands are inundated and considerable damage occurs.

The Tualatin River and all of its principal tributaries are heavily appropriated for irrigation and other uses and during the irrigation season of each year the tributary streams contribute very little to the flow of the main stream.

-2-

That on the 8th day of February, 1927, there was filed in the Office of the State Engineer a petition for the determination of the water rights of Beaverdam Creek, tributary of Tualatin River, signed by eleven water users of said stream; that subsequently three other petitions were filed in the Office of the State Engineer for the determination of the water rights on other tributary streams and on the main stream as follows:

- July 29th 1953 - West Dairy Creek, signed by five water users,
- September 8th 1953 - Dairy Creek, signed by four water users,
- July 27th 1955 - Tualatin River, signed by Victor Madsen, a water user,

all of said petitions praying that a determination of the relative rights of the various claimants to the use of the waters of said stream systems be made by the State Engineer in accordance with the provisions of the Oregon Water Code, now the Oregon Water Rights Act.

That the State Engineer thereafter fixed a time for the making of the necessary surveys and examinations and the beginning of the taking of such testimony as would enable him to determine the relative rights of the various claimants to the use of the waters of Tualatin River and its tributaries, as provided by law.

-3-

That a notice was prepared by the State Engineer setting forth the date on or about which the State Engineer, or his authorized assistants, would begin the investigations of the flow of water in the Tualatin River and its tributaries, and ditches or other means of diverting water therefrom, and said notice was published in two issues of each of the following named newspapers:

Hillsboro Argus, Hillsboro - Published each Monday and Thursday.

Enterprise-Courier, Oregon City - Published daily except Monday and Saturday.

News Times, Forest Grove - Published each Thursday.

Valley News, Beaverton - Published each Thursday.

East Washington County Tri-City News, Sherwood - Published each Thursday.

That each of said newspapers are of general circulation in their respective localities and that complete coverage of the Tualatin drainage basin was obtained. That said two issues of said newspapers were those of February 16th and 23rd, 1956, the date of the last publication being more than ten days prior to the date fixed for the beginning of the taking of measurements and the making of investigations of said stream system by the State Engineer, as provided by law.

-4-

That the State Engineer did send by registered mail to each person, firm or corporation, owning or being in possession of lands in, or bordering on or having access to said stream or its tributaries, in so far as said claimants and owners and persons in possession could reasonably be ascertained, a notice similar to such published notice, and included therewith an explanatory statement and a blank form upon which the claimant or owner could prepare in writing his notice of intention to file a statement and proof of claim of his right to the use of the waters of said Tualatin River and its tributaries, if any he had.

-5-

That the following named persons, firms or corporations were duly notified of the proceeding by registered mail, as provided by law, of the commencing of the investigations by the State Engineer, or his duly authorized assistants, and were furnished an explanatory statement and pamphlet of information and a form upon which to declare their notice of intention to file a claim to the use of the waters of said Tualatin River and its tributaries:

-7-

That duly qualified assistants to the State Engineer did proceed to make examinations, surveys and measurements of said Tualatin River and its tributaries, and of ditches, canals and other works diverting water therefrom, and surveys of the lands irrigated, and gathered such other data and information as were essential to the proper determination of the relative rights of the parties interested, which observations and measurements were reduced to writing and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats, showing with substantial accuracy, the location of all streams in the drainage basin, the location of each canal, ditch or other means of conveyance of appropriated water and the points of diversion thereof, and the number of acres of land being irrigated in each legal sub-division, or other character of use of water, prints of said maps or plats being on file and a part of the record herein.

-8-

That as soon as practicable after the examinations and measurements were completed, as described in the preceding finding, the State Engineer did prepare a notice setting forth a place and time certain when he would begin the taking of statements and proofs of claim as to the relative rights of the various claimants to the use of the waters of said Tualatin River and its tributaries; that said notice was published in two issues of each of the following named newspapers, Hillsboro Argus, printed and published at Hillsboro, Washington County Oregon, and Oregonian, printed and published at Portland, Multnomah County, Oregon.

Said issues of each newspaper being those of November 7th and 14th, 1957, the date of the last publication being at least thirty days prior to the first date fixed for the taking of statements and proofs of claim by the State Engineer.

-9-

That the State Engineer did send by certified mail to each person, firm or corporation who had filed a declaration of intention to file a claim to the use of the waters of Tualatin River and its tributaries in this proceeding, in response to the notice described in Finding 4 above, a notice similar to such published notice described in the preceding finding, setting forth the date when the State Engineer, or his authorized assistants, would receive the statements and proofs of claim of the various claimants to the use of the waters of said stream and its tributaries. That said notice was mailed at least thirty days prior to the date set therein for the receiving of such statements and proofs of claim in each instance. And the State Engineer did include with each of said notices a blank form upon which the claimant or owner could prepare in writing, all the particulars necessary for the determination of his right, under oath; and a pamphlet of information for water users in connection with the preparation of their statements and proofs of claim and with the adjudication of water rights.

That the times and places where the State Engineer, or his duly authorized assistants, did appear and receive the statements and proofs of claim of the various parties, were fixed in said notice as follows:

On Monday and Tuesday, December 16 and 17, 1957, in the Circuit Court Room of the County Court House at Hillsboro, Oregon.

And for a period of twenty days beginning with Wednesday, December 18 and ending with Thursday, January 16, 1958, at the Office of the State Engineer in the State Finance Building, 170 - 12th Street, S.E., Salem, Oregon.

That thereafter, it appearing that further time was necessary in which to file said statements and proofs of claim, the State Engineer did, on the 14th day of January, 1958, enter an order directing that the time in which to file said statements and proofs of claim, be extended and continued to include the 31st day of January, 1958.

That thereafter, in response to a request for additional time in which to complete and file a statement and proof of claim, due to a misunderstanding of the expiration date set in the former extension of time, the State Engineer did, on the 31st day of January, 1958, enter an order directing that said time for the filing of statements and proofs of claim, be further extended, and the same thereby was extended and continued to include the 10th day of February, 1958.

That the following named persons, who had filed their notice of intention to file a statement and proof of claim, were duly notified by certified mail, as provided by law, of the commencing of the taking of statements and proofs of claim of their rights to the use of the waters of said Tualatin River and its tributaries:

That all of said claimants submitted statements and proofs of claim which were in ample form and were accompanied by the statutory fees and were filed by the State Engineer.

That in addition to the above tabulated claimants, the following persons submitted statements and proofs of claim which were not filed by the State Engineer for the reason stated following the name and address of claimant:

Duncan, Wesley E.	Rt.1 Box 240, Banks, Oregon	Statutory fees not paid.
Grace, Charles T.	Rt.4 Box 290, Sherwood, Ore.	Statutory fees not paid, claim submitted through misunderstanding.
Heesacker, L.J.	Rt.1 Box 355, Forest Grove, Ore.	Statutory fees not paid.
Portland General Electric Co.	621 S.W. Alder St., Portland 5, Ore.	Claim to waters of Willamette River not involved in this proceeding.
Saucy, David, Jr.	Route 2, Cornelius, Oregon	Statutory fees not paid.
Wilhelm, Frederick S. & Wilma C.	5903 S.E. 14 th Ave., Port.2, Ore.	Statutory fees not paid and claimant decided not to file.

-13-

That all persons, firms or corporations to whom notices were sent by registered or certified mail, as tabulated under Findings 5 and 11 above, except those listed under Finding 6, and who have failed, neglected or refused to appear herein and submit proof of a right or claim to the use of the waters of Tualatin River and its tributaries, initiated prior to the adoption of the Oregon Water Code on February 24, 1909, now the Oregon Water Rights Act, if any they have or claim, are in default; such default is here and now entered against them, and each of them, and such parties are hereby enjoined and inhibited from using or asserting any rights to the use of the waters of said Tualatin River or any tributary thereof included in this proceeding, except by, through or under the rights of persons whose water rights are defined herein, or under and by virtue of permits issued by the State Engineer, as provided by law.

-14-

That after the completion of the taking of such statements and proofs of claim, the State Engineer did, on the 26th day of February 1958, give notice by certified mail to each of the various claimants to the use of the waters of said Tualatin River and its tributaries, as provided by law, that at the times and places named in said notice, to wit:

On Tuesday and Wednesday, March 11 and 12, 1958, in the County Court House at Hillsboro, Oregon.

And for a period of ten days, beginning with Thursday, March 13, 1958, and ending with Wednesday, March 26, 1958, (Saturdays and Sundays excepted) at the Office of the State Engineer, 251 State Finance Building, Salem, Oregon.

the statements and proofs of claim theretofore filed would be open to public inspection between the hours of 8:00 o'clock A.M. and 12:00 M. and from 1:00 o'clock P.M. to 5:00 o'clock P.M. on each of said days. That said notice did state therein the county in which the determination of the State Engineer would be heard by the Circuit Court of the State of Oregon, to wit: the County of Washington.

-15-

That the State Engineer did, in accordance with said notice as described in the preceding Finding No. 14, keep said statements and proofs of claim open to public inspection at said times and places.

-16-

That the time set by law for the filing of statements of contest, within fifteen days after the expiration of the period for public inspection, would expire on April 10, 1958, and it appearing that additional time was required by certain parties to properly prepare and file their statements of contest, the State Engineer did, on the 7th day of April, 1958, enter an order directing that the time within which to file statements of contest, be extended, as provided by law, and the same thereby was extended and continued to include the 30th day of April, 1958. That within the time therefore, as extended by order of the State Engineer, the following Contests were initiated by the filing with the State Engineer of notices of Contest, in writing:

<u>CONTEST NO. 1</u>	Blaine Brown, et al	Contestants.
	vs.	
	Oregon Iron & Steel Company a Corporation	Contestee.
<u>CONTEST NO. 2</u>	Clayton Nyberg, et al	Contestants.
	vs.	
	Oregon Iron & Steel Company a Corporation	Contestee.
<u>CONTEST NO. 3</u>	David Cereghino, et al	Contestants.
	vs.	
	Oregon Iron & Steel Company a Corporation	Contestee.

-17-

That after the filing of said statements of contest the State Engineer did fix a time and place for the hearing of each of said contests, and did, on the 15th day of October 1958, serve notice of said contests, by certified mail, on each of the parties to said contests and on their respective counsel, the date fixed for the hearing being more than thirty days and less than sixty days from the date the notice of said hearing was served on said parties and their counsel.

That the date and time and place set for said hearing was defined in said notice as: Monday, December 8th, 1958 at the hour of 9:00 o'clock A.M., in the County Court House at Hillsboro, Oregon. That prior to the time set for said hearing, a conflict in trial schedule developed and upon request of counsel for one of contestants, the State Engineer, upon agreement of counsel for contestants and contestee, rescheduled said hearing for

Tuesday and Wednesday, January 6th and 7th, 1959 at the County Court House in Hillsboro, Oregon.

That upon the date and at the time and place fixed, as rescheduled, to wit: Tuesday, January 6th, 1959, at the hour of 9:30 o'clock A.M., in the County Court House at Hillsboro, Oregon, the hearing of the contests was commenced before the State Engineer, and his authorized assistant, and was continued through Wednesday, January 7th, 1959, whereupon, by agreement of counsel for contestants and contestee, the hearing was adjourned until a later date.

That thereafter the State Engineer did set a date for resuming said hearing and did prepare and mail a notice to all parties concerned, of the time set, being Wednesday, April 29th, 1959, at the hour of 9:30 o'clock A.M., in the County Court House at Hillsboro, Oregon.

That the State Engineer did appear at said time and place and did resume said hearing on contests and continued until each of said contests was disposed of.

-18-

That due proof of the sending of the various notices by registered and certified mail, as provided by law, and as hereinbefore set forth, has been made and filed as a part of the record herein.

-19-

That each of said contests filed were directed against the Statement and Proof of Claim filed by the Oregon Iron & Steel Company. By agreement of counsel for Contestants and Contestee, it was stipulated that the three contests should be combined and heard as one and that any evidence and testimony adduced on behalf of one contest should be used, where applicable, on behalf of the other contests.

Contestee Oregon Iron & Steel Company, a corporation, by Paul F. Murphy, its President, filed herein Statement and Proof of Claim No. 86, asserting a right to the use of 91.5 cubic feet per second of the waters of Tualatin River by diversion through the Oswego Canal into Oswego Lake, for the development of 934 theoretical horse-power for the generation of electrical energy, and storage during periods of non-operation of its power plant at Oswego, Oregon, with a date of priority of 1878.

To said Statement and Proof of Claim No. 86, Blaine Brown and Vera A. Brown, husband and wife; Edna L. Hayes, individually and Edna L. Hayes and The United States National Bank of Portland, Oregon, Trustees, filed herein Statement of Contest No. 1, being represented by Mr. Carrell F. Bradley of the firm of Bush and Bradley, Attorneys at Law, Hillsboro, Oregon. The pertinent part of the issues set forth therein are as follows:

- A.- The amount of water actually appropriated for any beneficial use by contestee prior to 1909 was much less than the amount claimed in this proceeding, the exact amount being at this time unknown to the contestants.
- B.- The use of storage during non operating periods of the power plant is not a beneficial use within the meaning of the Water Act of 1909 now ORS 539.010 et. seq.
- C.- The contestee did not actually apply for beneficial use, prior to February 24, 1909, or at any other time, the amount of water claimed by it in this proceeding.
- D.- If, in fact, any water was applied to beneficial use prior to 1909, the contestee has abandoned the same for a continuous period of more than two years and has thereby abandoned its right (if any right ever existed) to the same.

To said statement and Proof of Claim No. 86, ninety-nine water users, represented by Clayton Nyberg, one of said water users and agent for the others, filed herein Statement of Contest No. 2, represented by Mr. Carrell F. Bradley of the firm of Bush and Bradley, Attorneys at Law, Hillsboro, Oregon, as counsel. The pertinent part of the issues set forth

therein are, in addition to those set forth in Statement of Contest No. 1, above, as follows:

- E.- If, in fact, the contestee had a perfected and developed water right, it did abandon the same for a continuous period of more than five (5) successive years within the meaning of ORS 540.610.
- F.- If, in fact, the contestee had a water right on the Tualatin River, it has been lost by the open, notorious, adverse, and continuous use of the water by upper users in opposition to the claim of the Oregon Iron and Steel Company and said right has been lost by and through said prescription.

To said Statement and Proof of Claim No. 86, forty-five water users, represented by David Cereghino, one of said water users and agent for the others, filed herein Statement of Contest No. 3, being represented by Mr. Frederick A. Anderson, Attorney at Law, Tigard, Oregon, as counsel.

The pertinent part of the issues set forth therein are as follows:

- 1.- That Contestee lays claim to 91.5 c.f.s. of the waters of the Tualatin River, whereas in truth and in fact the amount of water, if any, appropriated by contestee for beneficial use prior to 1909 was limited by the flow of the Tualatin River and the amounts thereof diverted by or applied to beneficial use on up-stream riparian lands, including lands of the contestants.
- 2.- That the contestee, if at any time obtained a vested right to any waters of the Tualatin River by applying same to beneficial use prior to February 24, 1909, abandoned such right in whole or in part by non-use for a continuous period of more than five (5) successive years within the meaning of Section 540.610, Oregon Revised Statutes.
- 3.- That if any riparian right to the use of the waters of the Tualatin River vested in contestee prior to February 24, 1909, by beneficial use, same was abandoned for a continuous period of two years or more within the meaning of Section 539.010, Oregon Revised Statutes.
- 4.- That the quantities of water set forth in each of contestants' statements and proofs of claim, and the total thereof, were vested by actual application to beneficial use on contestants' lands prior to February 24, 1909, and at all times since and now, and to the extent of any conflict between the use of waters by contestants in relation to the claim of contestee, contestants have been in open, continuous, notorious, adverse, hostile use of said waters in opposition to the claim of contestee, and contestee has lost its right, if any, to that extent by adverse use and prescription.

From a "History of the Oregon Iron and Steel Company and its Predecessors" prepared in chronological form by Mr. James Maletis, Counsel for contestee, which was read into the record, and from documents introduced and received as exhibits, it appears that the beginning of the water usage at the outlet of Oswego Lake, then known as Sucker Lake, was a sawmill founded by Alonzo Durham in 1850. His sawmill was powered by a water wheel operated by the waters of said Sucker Lake. Durham continued the operation of his sawmill until 1865 when he sold his interests to John Corse Trullinger, who continued the operation of the sawmill, and replatted the present townsite of Oswego.

On February 23, 1865, the Oswego Iron Company was organized by W.S. Ladd, Henry D. Green and John Green, for the purpose of reducing to pig iron the iron ore available to mining in the vicinity. The water necessary for the operation of this plant was also secured from Sucker Lake. This plant was continued in operation until 1869 when operation was suspended.

On March 23, 1869 the Tualatin River Navigation and Manufacturing Company was organized and purchased the sawmill interest of John Trullinger, including the Oswego Townsite.

The 1870 Session of the Legislative Assembly of the State of Oregon passed an act entitled, "AN ACT to authorize the Tualatin River Navigation and Manufacturing Company to take water from the Tualatin River, for the purposes of a canal." Omitting the Preamble, the Act read as follows:

Be it enacted by the Legislative Assembly of the State of Oregon:

Section 1. That the said Tualatin River Navigation and Manufacturing Company be, and is hereby authorized and empowered to take and divert from the said Tualatin River, at a point above said falls, and near Colfax upon the said Tualatin River, so much of the waters of said Tualatin River as may be necessary for the purposes of constructing, maintaining and operating a canal and locks, ample and sufficient for the purposes of navigation by all vessels that can navigate said river from a point upon said Tualatin River, at or near Colfax, to Sucker Lake, in the County of Clackamas, and from Sucker Lake to the Willamette River, at Oswego, in said County, and that the right to take and divert from the said Tualatin River, as aforesaid, so much of the waters of said river as may be necessary to maintain and operate said canal and locks, is hereby perpetually granted, upon the conditions hereinafter stated, to the said Tualatin River Navigation and Manufacturing Company, its successors and assigns: Provided, that the said Company shall, in all cases, pay to owner or owners of lands damaged by construction of said canal, such damages, as courts of competent jurisdiction may, in any and all cases, award to parties so aggrieved.

Section 2. And be it further enacted, that the said corporation, to be entitled to the benefit of this act, shall commence the construction of said canal and locks, on or before the first day of August, eighteen hundred and seventy-one, and shall complete the same within two years from said date.

Section 3. And be it further enacted, that the tolls to be charged by said corporation for the passage of steamboats or other water crafts through said canal and locks, shall be subject to the control of the Legislative Assembly. Approved October 26, 1870. (1870 Session Laws, pages 171 - 173)

Said Tualatin River Navigation and Manufacturing Company commenced the construction of a canal from the Tualatin River to Sucker Lake in September, 1880, (10 Ore 371) and completed said canal in 1881, when the first water was diverted from the Tualatin River into Sucker Lake.

A dam had been constructed at the outlet of Sucker Lake which raised the water surface elevation approximately eleven feet above its natural level, providing storage and a total head of sixty feet for the operation of water power facilities at the site of the old Durham sawmill.

In 1873 an agreement was entered into by the Tualatin River Navigation and Manufacturing Company and the Oswego Iron Company in which the respective rights of water usage and water power from Sucker Lake were defined. Said agreement provided, among other covenants, that the Tualatin River Navigation and Manufacturing Company, as owner of the dam at the outlet of said Sucker Lake and the water power and rights attached, was to maintain the said dam in repair at its present height, so as to preserve the surplus water flowing into Sucker Lake to the full capacity of said dam, and to deliver to the Oregon Iron Company an amount equal to thirty cubic feet per second for the operation of the machinery necessary for the operation of a blast furnace for the manufacture of pig iron.

Shortly thereafter, by Sheriff's Deed, recorded May 1, 1877, Book O, pages 287-292, Clackamas County Deed Records, the Oregon Iron Company acquired the assets of the Tualatin River Navigation and Manufacturing Company.

Thereafter the Oregon Iron Company continued operations intermittently until 1877 when financial difficulties developed and its assets were foreclosed upon and sold at Sheriff's Sale. The new Corporation, Oswego Iron Company, rebuilt the plant and continued operation intermittently until on April 22, 1882, the present Oregon Iron and Steel Company was incorporated and purchased the entire assets of the Oswego Iron Company, which included the corporate franchise of the former Tualatin River Navigation and Manufacturing Company, covering the rights to divert water from the Tualatin River into Sucker Lake.

A civil suit had been initiated by a Mr. Shaw, a riparian landowner, to enjoin the Oswego Iron Company from diverting the waters of the Tualatin River into Sucker Lake.

The case was appealed to the Supreme Court of the State of Oregon with the resulting verdict that, "the defendents enjoined from diverting the waters of the Tualatin River from its natural channel, and it is so ordered." (10 Ore 371, Shaw v. Oregon Iron Company. October 1882). It appears that the defendent company, predecessor of the Oregon Iron and Steel Company, bought out Mr. Shaw in order to quiet plaintiff.

Subsequently a similar suit was initiated by Peter A. Weiss, also a riparian landowner, to enjoin the Oregon Iron and Steel Company from diverting the waters of Tualatin River into Sucker Lake for manufacturing purposes. This case was also appealed to the Supreme Court of the State of Oregon, which held, (13 Ore 496, Peter A. Weiss v. Oregon Iron and Steel Company, June 1886) in effect, that the Oregon Iron and Steel Company had no right to divert the waters of Tualatin River into Sucker Lake for Manufacturing purposes without returning the water to to its natural channel for the enjoyment of plaintiff. It appears that the plaintiff was bought out in order to quiet his complaint.

The Oregon Iron and Steel Company continued the operation of its iron ore reduction plant and in addition thereto, constructed and commenced the operation of a pipe foundry in 1888. Water for the operation of said pipe foundry was taken from Sucker Lake by means of a sixteen inch diameter pipe line which was constructed from a point on Sucker Lake adjacent to a smaller swampy area known as "the duck pond", now called Lakewood Bay. Said pipe line was laid in a north-easterly direction through the approximate center of said "duck pond" and thence to the foundry location. This source of water supply was used intermittently, principally for testing pipe under hydrostatic pressure. The actual quantity of water used per day is not definitely known.

The Oregon Iron and Steel Company continued the operation of its iron manufacturing plant until 1894 when economic conditions forced its discontinuance. The only use of the waters of Sucker Lake for several years thereafter was through said sixteen inch pipe line for the operation of the pipe foundry, which was continued until its subsequent sale in 1926.

On July 25, 1906, under the provisions of the Laws of 1899, as set out by Chapter 2 of Title 40, Bellinger & Cotton's Annotated Codes and Statutes of Oregon, the Oregon Iron and Steel Company posted a notice on the Tualatin River declaring its intention to appropriate the equivalent of 750 cubic feet per second of the waters of Tualatin River for the purpose of generating electric power for commercial purposes. A similar notice was filed with the County Recorder of Clackamas County, as provided by law.

On July 25, 1906, William B. Chase, a Civil Engineer, measured the flow of water being diverted from the Tualatin River through the canal into Sucker Lake, and by letter dated July 26, 1906, (Contestee's Ex.16) reported the results of his measurement, made with a Price Current Meter, to be 1616 cubic feet per minute, equivalent to 26.93 cubic feet per second.

The Oregon Iron and Steel Company commenced the construction of its power plant and appurtenances, during the fall months of 1909 and completed construction and placed the plant in operation the following year. The said power plant has been operated for the generation of electric power during each and every year to the present time.

The 1911 Legislative Assembly of the State of Oregon enacted Chapter 236, which provided for the payment of an annual license fee by claimants to the use of water for power purposes, where the water was applied to power generation and power was generated prior to May 22, 1909. In compliance therewith, the Oregon Iron and Steel Company, by its Secretary, A. S. Patullo, filed its original Statement of Water Power Claimant for the year 1912, dated January 11, 1913, and paid the statutory fees plus penalty provided for late filing, to the State Engineer. Said Power Claim was recorded in the name of the Oregon Iron and Steel Company and assigned Power Claim No. 97. An annual statement has been filed and the fees paid thereon

for each and every year thereafter, to and including the year 1959.

The annual statement, dated December 9, 1922, shows an increase in total fall utilized of 10 feet and an increase in the height of the dam at the outlet of Sucker Lake, of 8 feet. The surface area of the lake or reservoir, originally estimated as 450 acres, was reduced to 400 acres, apparently determined from contour surveys of the Oswego Lake area.

The records of the State Engineer do not show that an application was filed or a permit granted under the provisions of the Water Code, now ORS 537.130 to increase the height of the dam.

On the following pages are prints of the Annual Statement of Water Power Claimant filed by the Oregon Iron and Steel Company for the years 1912, 1921 and 1922, which show the changes noted above.

It further appears that after the iron manufacturing plant of the Oregon Iron and Steel Company suspended operations in 1894 due to economic difficulties, no further beneficial use of its water power facilities was attempted or made until its power plant for the generation of electric energy was constructed and placed in operation in 1909 and 1910.

As early as 1895 the Supreme Court of the State of Oregon, in *Wimer v. Simmons*, 27 Ore 1, held that "To constitute an abandonment of a right the appropriator must have intended a relinquishment, but his intent may be inferred from acts as well as from declarations" and that "an abandonment by failure to apply the appropriation to some useful purpose is as effective as a direct act or statement."

Contestee's Exhibit No. 5, being a copy of the Banner-Courier newspaper published at Oregon City, issue dated February 11, 1947, specifically refers to an article entitled, "Oswego's Iron Industry once Great Going Concern", which was prepared from information, (Courtesy W. E. Simonton, Oswego). The article states in the first paragraph, "In 1887 the Oswego Iron Company bought the Oregon Iron Company's property and had made 18,500 tons of pig iron at the time of selling out to the Oregon Iron and Steel Company, October 26, 1882. This last named company operated the works until November 1885, during which time it made 14,663 tons of pig iron. At the last named date the works were closed and have remained so since." (Emphasis supplied.)

Miss Sarah Hill Capon, called as a witness for contestee, (Transcript page 30) testified that she was the Assistant Secretary for the Oregon Iron and Steel Company and had been in the employ of said company for the past thirty-three years. Under direct examination Miss Capon testified, relative to Contestee's Exhibit No. 9, as follows:

Q.- Miss Hill (under which name she testified) I'll hand you a document entitled, "Iron and Steel Manufacture in Oregon" and ask if that is one of the documents you turned over to me?

A.- Yes, it is.

Q.- And who was that prepared by?

A.- I believe it was prepared by Mr. Simonton. Mr. Simonton was our superintendant.

Q.- And why do you believe it is prepared by Mr. Simonton?

A.- Because he wrote a lot of things, articles that were published in the paper about Oswego, and different things about Oswego.

Q.- Mr. Simonton's name does not appear on this document?

A.- Mr. W. O. Simonton was our superintendant for years.

Q.- His name does not appear anywhere on this document?

A.- No.

Q.- He refers to the first person and also makes a reference to other things that would identify it as being Mr. Simonton?

A.- Yes.

For Year 1912

Annual Statement of Water Power Claimant

Required by Chapter 236, Session Laws of 1911

Original filed January 1-1913
Amended filed January 19-1913

Name of Claimant **THE OREGON IRON AND STEEL COMPANY**

P. O. Address **PORTLAND** County **MULTNOMAH**

Stream from which appropriation is claimed **Tualatin**

Date of Initiation of Right **1878**

Maximum amount of Water Claimed **750** Sec. Ft.

Total Average Fall utilized **80** Ft. **6818**

Amount of Power Generated prior to May 22, 1909, **30** Horsepower.

Location of Point of Diversion from Stream, **W. 1/4** of Sec. **20** Tp. **2 S** R. **1 E.**

Location of Point at which Water is Returned, **W. 1/4** Sec. **11** Tp. **2 S** R. **1 E.**

Manner of Developing Power **Turbine Water wheels**

Use to which Power is Applied **Lighting - Pumping - Running Factories**

If Storage is Used:—

Location of Reservoir, Secs. **8, 9 and 10**, Tp. **2 S** R. **1 E.**

Capacity of Reservoir, _____ Acre Feet.

Stream from which Reservoir is Filled **Tualatin River**

Date of Initiation of Storage Right **1878**

Area of Reservoir, **450** Acres.

Height of Dam, **24** Feet; Mean Depth, _____ Feet.

The foregoing statement is true to the best of my knowledge and belief.

IN WITNESS WHEREOF, I have hereunto set my hand this 11 day of January 1913

Secretary

This statement, accompanied by the necessary fees, should be mailed to the State Engineer at Salem, Oregon. See law on back. Checks, drafts, or money orders should be made payable to the State Engineer.

Receipt #1924

14

It appears that this document, Contestee's Exhibit No. 9, was the source of information for the newspaper article appearing in the February 11, 1947 issue of the Banner-Courier and the accompanying pictures, acknowledged by the newspaper editor in their statement, "Courtesy W. E. Simonton, Oswego." which was introduced and received as Contestee's Exhibit No. 4.

It appears that Mr. Simonton, as Superintendent of the Oregon Iron and Steel Company plant for many years, was a trusted employee to have retained his capacity with the company over a long period of time, and as such, would hardly write or prepare any material relative to his employer which would not reflect credit to the organization and its accomplishments.

In said article, Contestee's Exhibit No. 9, the last paragraph on the third page states, (relative to the plant which was rebuilt after operations were suspended in 1885.):

"This plant received its first charge on October 17, 1888, and produced pig iron until 1894, the banner year being 1890 when 12,305 tons were made. Production then declined. Early in 1894 the operation was suspended. Plans had been made to develop an iron property in Lower California to supplement the supply of local ore. An attempt was made to lease the furnace plant to an eastern organization but the negotiations failed and the plant was virtually abandoned. This closed the record of Oregon's activity as a producer of pig iron."

On the following page of said article is presented a tabulation showing the total output of pig iron produced at the plant from 1867 to 1894. The next paragraph states,

"During the period of industrial activity following the declaration of war in 1917, attention was directed to the possibility of reviving the former blast furnace operations at Oswego."

The article was not dated. However, the most recent year referred to therein was 1922 from which it is evident that said article was prepared subsequent to 1922, and probably more nearly the date of the newspaper of 1947. No mention is made in said article of any activities between the time when the plant was "virtually abandoned" shortly after operations were suspended "early in 1894" and "the period of industrial activity following the declaration of war in 1917", therefore the logical conclusion is that during the period 1894 to the posting of notice on July 25, 1906 under the 1899 laws, (Contestee's Exhibit No.10) no beneficial use of its appropriation for power development was made during an interval of twelve years and that Contestee thereby abandoned all rights to the use of the waters of Sucker Creek, Sucker Lake and the Tualatin River, which may have accrued prior to 1894, and it is herein so held.

OREGON IRON & STEEL COMPANY subsequent to 1906.

Contestee's Exhibit No. 10, being a copy of the notice of intention to appropriate the waters of Tualatin River, in accordance with Chapter 2 of Title 40, Bellinger and Cotton's Annotated Codes and Statutes of Oregon, filed with the Recorder of Clackamas County by the Oregon Iron and Steel Company, and bearing the Certificate of Recording dated July 31, 1906, at 1:40 P.M., recorded on page 162 in Book 1, Record of Water Ditches and Flumes, by C. E. Ramsby, County Recorder of Clackamas County, was introduced and received in evidence.

From said document it appears that the Oregon Iron and Steel Company declared its intention and gave notice to all concerned by posting said notice on July 25, 1906, that 750 cubic feet per second of the waters of Tualatin River were to be diverted through the "present ditch" of the Oregon Iron and Steel Company and into Sucker Lake for the generation of electrical power, and that the diversion point of said ditch was on the north bank of the Tualatin River within the Southwest quarter of the Northwest quarter of Section 20, Township 2 South of Range 1 East of the Willamette Meridian.

According to the notice, the water so appropriated would be conveyed through said ditch to Sucker Lake in Sections 8, 9 and 10 of said Township and Range, to its present outlet named Sucker Creek and thence down Sucker Creek to its confluence with the Willamette River. The number of reservoirs to be constructed in carrying out this enterprise was one, and Sucker Lake was to be used as such storage reservoir.

The notice further stated that the size of said ditch or canal from the Tualatin River to Sucker Lake and from Sucker Lake to the Willamette River would be 22 feet wide at the bottom, sloping outwardly to 45 feet wide at the top, and 8 feet deep. Said notice further stated, "This company already owns and claims certain rights to the waters of the Tualatin River and to divert the same by means of its canal into Sucker Lake, and thence to its properties and the Willamette River. This application is not a surrender of any such rights but is in addition thereto and supplementary thereof."

By said declaration it is evident that the Oregon Iron and Steel Company intended to continue the use of the natural inflow and storage in Sucker Lake and the waters of the Tualatin River to the extent of the quantity which had been diverted through its canal from the Tualatin River to Sucker Lake, and in addition thereto, to appropriate 750 cubic feet per second of the waters of Tualatin River.

It appears that the canal was not enlarged to the dimensions specified in said notice. Contestee's Exhibit No. 16, entitled "Canal Notes", consisting of 28 pages of miscellaneous notes and memoranda relating to the canal from the Tualatin River to Sucker Lake, bound together in one document, was introduced and received and counsel for contestee specifically designated page four thereof as their Exhibit No. 16. Thereupon the entire document was introduced and received as Contestant's Exhibit "G".

Pages 20 and 21 of said Exhibit "G" comprise a memorandum entitled, "Report of work done on Canal September and October 1912 - October 16, 1916." The last paragraph on said page 20 reads as follows: "There was very little cleaning found to be necessary except below the gate where rock washed out of the gate had gathered. With the flume in good condition there is evidently sufficient current to keep the canal well scoured out. The canal is a minimum of six feet wide, there having been one or two places just above the county road bridge which Lewis thought of leaving narrower than this, but we ordered widened so as to make a minimum of six feet."

On the first page of said Exhibit "G" appears a typewritten statement dated September 12,

1925, "Went over canal; found that the water in the flume from the bridge to the intake is practically 4' deep all the way up and within about 6" of the top of the flume. Flume about 6' wide."

It thus appears that the canal, although undoubtedly kept cleaned and in repair, has not been enlarged to the dimensions intended, as set out in the notice of appropriation.

In 1928 the United States Geological Survey, Water Resources Branch, established a recorder station on the canal approximately one-half mile below its head and records of flow have been secured there from October 1928 to date. These records have been published and are available to the public.

The following tabulation shows the average daily discharge in cubic feet per second, for each month taken from the published records of this station, for the low water months of April through October, for each year of record from 1929 to 1958, inclusive.

TABLE I
MEAN DAILY DISCHARGE OF OSWEGO CANAL NEAR OSWEGO, STATION NO. 586
For months of April - October, Inc.

YEAR	APRIL	MAY	JUNE	JULY	AUGUST	SEPT.	OCT.	MEAN
1929	66.2	40.6	35.0	26.3	49.5	50.0	48.2	45.1

The evidence relative to the facilities for power generation at the outlet of Sucker Lake when the 1909 Water Code became effective, is very meager. Contestee's Exhibit No. 5 contains, in the agreement between the Tualatin River Navigation and Manufacturing Company and the Oregon Iron Company, dated July 29, 1873, the statement that the existing dam at the outlet of Sucker Lake "is constructed so as to pond the water of said Sucker Lake about eleven feet above its natural level, creating a reservoir or pond of water for use during the dry season." And at another place in said agreement, "that it and they (Tualatin River Navigation and Manufacturing Company) will deliver and let flow from its said dam into the dam of the party of the second part (Oregon Iron Company) water to an

amount equal to thirty cubic feet per second, providing such an amount can be obtained by ponding the water flowing into Sucker Lake".

Contestant's Exhibit "G" which consists of 28 pages of miscellaneous notes, page 4 of which was introduced and received as Contestee's Exhibit No. 16, contains several memorandum reports from which the condition of the canal from the Tualatin River to Sucker Lake, and the quantity of water diverted therein, may be determined. Page 3 of said Exhibit, entitled "Notes in regard to Water Power of Oregon Iron and Steel Company, December 28, 1903" contains the statements, "Dam at Oswego in 1883 was 15 feet high, and afterwards was increased four feet in height, according to E. W. Crichton, but at present a number of boards have been taken off." and "Canal is now as it was in 1883, according to Crichton."

Relative to the dam being 15 feet high, this apparently refers to its total height from the stream bed to the dam crest, which would check closely with the statement contained in Contestee's Exhibit No. 5 that the dam "is constructed so as to pond the water of said Sucker Lake about eleven feet above its natural level."

Relative to the canal, it appears that no enlargement thereof was made since 1883. Page 11 of Contestant's Exhibit "G" contains the statement, "The canal was cleaned out so as to make it six feet wide at the narrowest place." This statement was dated as of Sept. 16, 1909.

Relative to the quantity of water being diverted from the Tualatin River, Contestee's Exhibit No. 16, being page 4 of Contestant's Exhibit "G", is an original letter written and signed by Mr. William B. Chase, Civil Engineer, dated July 26, 1906, stating that on July 25th he had "measured the flow of water in the canal connecting the Tualatin River with Sucker Lake with a new Price Meter and found the amount flowing to be sixteen hundred and sixteen (1616) cubic feet per minute." 1616 cubic feet per minute is equivalent to 26.9 cubic feet per second.

Page 5 of said Exhibit "G" is a memorandum entitled "Measurements of the Canal from the Tualatin River to Tualatin Lake, taken by A.S. Pattullo, August 25, 1904." Using the figures given in said memorandum and applying a float measurement coefficient of 0.80, the computed discharge of the canal would be 20.8 cubic feet per second.

Page 6 of said Exhibit "G" is a memorandum on "Canal to Tualatin Lake", written in longhand, stating in part, "On Sept. 23, 1903 Mr. Williams of Ladd Estate and A.S.P. visited canal down about one-half way to county road bridge and found a depth of 3' 3". A cork took 2 minutes and 22 seconds to travel 200 feet." Using the above figures and applying a float measurement coefficient of 0.80, the computed discharge at that time would be 25.6 cubic feet per second.

Relative to the head which could be utilized for power generation, page 8 of said Exhibit "G", which is also contained in Contestee's Exhibit No. 8, page 8, consists of a tabulation of water levels bearing the signature of P. Mieseher. From said tabulation it is noted that the difference in elevation between "Sucker Lake above dam at Oswego, May 29, 1883" and "Willamette River, May 29, 1883, opposite proposed mills" was 88.90 - 14.80 (assumed datum) or 74.10 feet. And from the water surface above the dam to "Willamette River, May 29, 1883, to usual low water", 88.90 - 2.00 (assumed datum) or 86.90 feet.

Contestee's Exhibit No. 11 comprises 12 pages and pages 11 and 12 thereof are a letter from William S. Turner, M.S., Consulting Civil and Electrical Engineer of Portland, Oregon, dated Sept. 19, 1923 and addressed to the Oregon Iron and Steel Company. Said letter is relative to an evaluation of the Oswego Lake Power Plant, requested by the Oregon Iron and Steel Company. In said letter Mr. Turner asked for certain information and two of Mr. Turner's questions are:

"Maximum fall or head on water wheel." and "Minimum fall or head on water wheel." Opposite said questions appears the answers, entered in indelible lead pencil, "85' effective" and "65' effective" respectively. This was in 1923, 13 years after the electrical power

generation plant was constructed and placed in operation.

Contestee's Exhibit No. 15 is a photostat of the original "Annual Statement of Power Claimant" filed with the State Engineer on behalf of the Oregon Iron and Steel Company by A. S. Pattullo, Secretary, on January 1, 1913 for the year 1912, in compliance with Chapter 236, Legislative Session Laws of 1911. In answer to the question, "Total average fall utilized ___ft." the figure "80" was inserted. In answer to the question, "Height of dam ___Feet." the figure "24" was inserted.

Summarizing the data thus far determined from the evidence submitted, we have:

Quantity of water utilized for power development, Agreement
dated July 29, 1873 -----30.0 c.f.s.

Quantity of water diverted from Tualatin River:
Current meter measurement by W. B. Chase, July 25, 1906-----26.9 c.f.s.
Float measurement by A. S. Pattullo, August 25, 1904-----20.8 c.f.s.
Float measurement by Mr. Williams and A.S.P. Sept. 23, 1903---25.6 c.f.s.

Available head for power generation:
Water level notes by P. Mieseher, May 29, 1883-----74 to 87 feet.
Answers Annual Statement of Water Power Claimant, 1912-----80 feet, average.
Answers to letter of W. S. Turner, Sept. 19, 1923-----85 feet, effective.

The natural inflow to Sucker Lake came from four small tributary streams and from the surface run-off from precipitation during the rainy season. While no records of the natural inflow to Sucker Lake are available for the early years under consideration, it may be assumed that the normal natural inflow at the present time is no greater than it was in earlier years.

It appears obvious that the original water power requirements were dependent upon the natural inflow to Sucker Lake and the storage of water in the lake during periods of non-operation. That subsequently said inflow and storage was augmented by the construction of the canal and the diversion of water from Tualatin River into Sucker Lake. And that the "notice of appropriation" posted at the intake of the canal, by the Oregon Iron and Steel Company in 1906, was to initiate and insure the appropriation and diversion of sufficient water into Sucker Lake to provide the quantity of water at the outlet necessary to operate a power generation plant of a capacity to be determined at a later date.

As previously noted, pages 11 and 12 of Contestee's Exhibit No. 11 consist of a letter from William S. Turner, M.S., Consulting Civil and Electrical Engineer, to the Oregon Iron and Steel Company requesting certain information concerning the properties and facilities of said Oregon Iron and Steel Company, to be used in a valuation of said companies plant. Pages 5 - 10 inclusive of said Exhibit 11 consist of two copies of a letter to said William S. Turner, dated September 29, 1923, containing the requested information, said copies of said letter being unsigned but bearing the typewritten "complimentary close":

Yours truly,

THE OREGON IRON & STEEL CO.,

ASP/OW

Sect'y.

which indicates that the information contained in said letter was compiled and the letter prepared by A. S. Pattullo, Secretary of the Oregon Iron and Steel Company.

The following excerpts relative to the facilities of the power plant are taken from said letter:

WATERWHEEL: The waterwheel is a Double Francis Turbine direct connected to a 500 K V A Generator operating at a speed of 360 R. P. M. Turbine has a maximum capacity of 900 H. P.

GENERATOR: The generator consists of a Westinghouse 500 K. V. A. alternating current Revolving Field Waterwheel Type Generator, wound in three phase 2200 volts, 60 cycles, speed 360 R. P. M. with 20 K. V. Direct Current Exciter 125 volts; also one three phase Generator panel with equipment.

PIPE LINE: 910 feet of 60" pipe line constructed in 1921 at a cost of \$7420. Besides this, there are two 48" pipe lines from the Surge Tank to the Power plant, measuring in all about 600 Ft. These were erected in 1910.

SURGE TANK: Concrete Surge Tank was erected in 1919.

DAM AT EAST END OF OSWEGO LAKE: Dam at East end of Oswego Lake was constructed in 1921 at a cost of \$38,140.

DAM IN TUALATIN RIVER: This is an old dam made up of rock placed in cradles across the river and faced with planks and decked with planks. This dam has been in existence for many years and requires very little in the way of repairs although it leaks a considerable amount of water.

The monthly load in Kilowatt hours ranges from 50,000 to 63,000. The maximum head on the waterwheel is 85 feet effective - minimum 65 feet effective.

The physical facilities of the Oregon Iron and Steel Company were inspected during the year 1958 in connection with this proceeding, and were found to be generally as stated in the above quoted excerpts.

The Engineering Report entitled "Adjudication Report, Tualatin River and Tributaries" prepared by Geo. V. Naderman, Assistant State Engineer, December 17, 1958, which was introduced and received in evidence as State Engineer's Exhibit No. 2, contains the data relative to the present specifications of the various facilities incorporated in the works of the Oregon Iron and Steel Company. Said power generation equipment consists of one unit, a Westinghouse AC Generator, Serial No. 733,344, the original manufacturer's specifications being 500 Kva, 2200 V., 131 Amp., 3 ϕ , 60 Cy., 360 R.P.M., driven by a 30 inch Double Francis Turbine, under a maximum effective head of 90 feet.

During operation on January 23, 1948, according to the daily plant operation records, the generator burned out and during the remainder of January and February, was rewound by the Westinghouse General Electric Company to 600 Kva. and 2400 V.

Assuming a 0.9 power factor, generator efficiency of 0.90, turbine efficiency of 0.86 and neglecting friction losses in the conduit and penstock, the theoretical horse-power required to operate the plant to capacity is 935. Under a head of 90 feet, the water requirement to produce 935 theoretical horse-power is 91.5 cubic feet per second.

Plant operation records covering the period August 1, 1935 to December 31, 1958, were introduced and received in evidence as Contestant's Exhibits "H" through "W". From these records the following tabulation has been prepared, showing the number of days the plant was operated and the power generated in 1000 Kwh for each month; total output for year in 1000 Kwh; total days operated during year; total hours operated during year; average hours operated per day and average Kw per hour for year.

TABLE II

YEAR	NUMBER OF DAYS OPERATED AND POWER GENERATED IN 1000 KWH FOR EACH MONTH												Total for year (1000 Kwh.)	Total days Operated	Total hours Operated	Average hours per day	Average Kw per hour for year.

Average for period of record

1940.1 219.6 3680 16.8 522.8

To further analyze and evaluate the evidence contained in the daily record of plant operation certain other data must be obtained and utilized in the computations involved. The natural tributary inflow to Oswego Lake, the quantity of water diverted from the Tualatin River through the Oswego Canal, the quantity of water lost through evaporation and the quantity of water flowing in Oswego Creek below the Oswego Lake dam, are necessary factors involved.

During the low water season of 1958 weekly measurements were secured of the natural tributary inflow to the lake. A water stage recorder was installed on Oswego Creek a short distance below the dam and weekly measurements were secured of the flow from which the station was rated. A water stage recorder was installed on the lake at the dam to obtain a continuous record of stage from which the actual drawdown and storage in the lake could be computed. The records of mean daily discharge of Oswego Canal at the station maintained by the U.S. Geological Survey, Water Resources Branch, since 1928, provided the necessary record of inflow through the canal.

Since the only question to be determined is the quantity of water which the Oregon Iron and Steel Company is entitled to divert from the Tualatin River for the normal operation of its power generation plant at Oswego, only the quantity which has been and may be beneficially utilized in the normal operation of its presently existing facilities may be considered.

From the evidence introduced, and other data secured, a tabulation has been prepared showing actual operation during the months of May, June, July, August, September and October, 1958 which is presented on following pages. The several columns of said tabulation are numbered and titled as to content, and an explanation of each is here presented.

- Column 1 - Month and date.
- Column 2 - Mean daily discharge of Oswego Canal expressed in cubic feet per second, computed by the U.S. Geological Survey, Water Resources Branch.
- Column 3 - Combined inflow from the natural tributaries to the lake, expressed in cubic feet per second. Figures preceded by an asterisk, (*) are measured quantities on that date, other quantities are interpolated.
- Column 4 - Daily loss by evaporation expressed in cubic feet per second. This value was determined from the mean of the daily evaporation records of the Cottage Grove, Dorena, Detroit and Fern Ridge Reservoirs, secured from the Monthly Records of Climatological Data for the year 1958, published by the U. S. Department of Commerce, Weather Bureau.
- Column 5 - Mean daily discharge of Oswego Creek below dam, expressed in cubic feet per second.
- Column 6 - Cubic feet per second available for power plant operation, being the sum of Columns 2 and 3 minus the sum of Columns 4 and 5.
- Column 7 - Acre feet available for power plant operation, being the values in Column 6 converted to acre feet.
- Column 8 - Average number of kilowatts of electrical energy generated per hour during number of hours plant was operated each day.
- Column 9 - Cubic feet per second required to generate average kilowatt hours with existing facilities, assuming 0.86 turbine efficiency.
- Column 10- Total number of hours plant generated power during day.
- Column 11- Number of acre feet of water consumed in generating average kilowatt hours for number of hours operated during day.
- Column 12- Acre feet drawdown from lake storage to compensate for deficiency as shown between columns 7 and 11.
- Column 13- Acre feet available but not utilized for power generation during that day, and assumed to remain in storage. Column 7 minus column 11.
- Column 14- Acre feet drawdown from lake storage, on an accumulative basis.
- Column 15- Acre feet available for power generation but not utilized, on an accumulative basis. Assuming storage at capacity on first of each month.

TABLE III

Month and Date (1)	All quantities in Cubic feet per second.					Acre Feet available for Power Generation (7)	Power Plant Operation				Acre Feet	ACCUMULATIVE TOTAL ACRE FEET

				Totals		3750.14				3273.11				

From the foregoing tabulation it is clearly evident that the quantity of water diverted from the Tualatin River through the Oswego Canal was greatly in excess of the quantity utilized for the generation of power by contestee.

The records of the U. S. Geological Survey, Water Resources Branch, obtained at the Oswego Canal Station, No. 586, show that the quantity of water diverted from the Tualatin River through the Oswego Canal during the months of May - October, inclusive, of 1958, corrected for natural tributary inflow, evaporation loss and discharge through Oswego Creek below the Oswego Dam, as reflected by Columns 3, 4 and 5, provided a total of 17,892.42 acre-feet available for power generation. That the total computed quantity required and utilized for the generation of power was 11,420.49 acre-feet, 63.83 per-cent of the quantity available. That 6,471.93 acre-feet or 36.17 per-cent of the total quantity available was not utilized for power generation, but was used for unauthorized purposes or wasted.

During the period July 31 to September 30, inclusive, while the power plant was not operated, a total of 3,314.38 acre-feet was diverted from the Tualatin River of which 2,117.15 acre-feet were available for power generation, but were consumed in unauthorized uses or wasted.

The records of the State Engineer show only one recorded water right to the use of the waters of Oswego Lake, acquired under and in conformity with the provisions of the Oregon Water Rights Act. Said right being for domestic use to the extent of 0.01 cubic foot per second, confirmed by the issuance of a certificate recorded in State Record of Water Right Certificates, Volume 8, page 8547. The only right to the use of the waters of Tualatin River through Oswego Lake is that for which a claim was submitted in this proceeding by the Oregon Iron and Steel Company. Consequently any use of the waters of Oswego Lake, including the waters diverted from the Tualatin River through the Oswego Canal, by any person, firm or corporation, other than the Oregon Iron and Steel Company and the owner of said Certificate No. 8547, is illegal and in direct violation of the Oregon Water Rights Act, unless such uses are a continuation of uses initiated prior to 1909.

In the foregoing tabulation, the quantity of water diverted from the Tualatin River for the generation of electrical energy by the Oregon Iron and Steel Company, has been reasonably corrected or adjusted to compensate for natural inflow, evaporation loss and waste by leakage or otherwise, through the channel of Oswego Creek below the Oswego Dam. The following tabulation shows, for the months of May - October, inclusive, of 1958:

- Column 1. - the month.
- Column 2. - the total quantity of water diverted from the Tualatin River, in acre-feet.
- Column 3. - total quantity in acre-feet available for power generation, being column 2 adjusted for natural inflow, evaporation loss and flow in Oswego Creek below dam.
- Column 4. - total computed quantity in acre-feet required to generate kilowatt-hour output of power plant as shown in plant operation records. (Contestant's Exhibit "W")
- Column 5. - per-cent of total acre-feet available used for power generation.
- Column 6. - total quantity in acre-feet not used for power generation but dissipated for unauthorized uses or wasted.
- Column 7. - per-cent of total acre-feet available not used for power generation.

TABLE IV

Month	Total quantity diverted from river Ac.Ft.	Total quantity available for power generation Ac.Ft.	Total quantity required and used for power generation Ac. Ft.	Per-cent of total available	Total quantity not used for power generation Ac. Ft.	Per-cent of total available
(1)	(2)	(3)	(4)	(5)	(6)	(7)
May	4,120	3,964	2,771	69.90	1,193	30.10
June	4,430	4,276	2,569	60.08	1,707	39.92
July	4,140	3,823	2,808	73.45	1,015	26.55
August	889	646	-----	0	646	100.
Sept.	2,370	1,434	-----	0	1,434	100.
October	4,630	3,750	3,273	87.28	477	12.72

From the above tabulation it is observed that during the low water months of 1958 approximately 27 per-cent more water was diverted from the Tualatin River than was necessary for the generation of the total kilowatt-hours of electrical energy produced by the Oregon Iron and Steel Company during that period, as disclosed by Contestant's Exhibit "W".

Applying a similar analysis, on a yearly basis, to the entire period for which records are available, August 1, 1935 to October 31, 1958, inclusive, the following tabulation is presented, showing:

- Column 1.- Year and months of plant operation.
 Column 2.- Total kilowatt-hours generated during year.
 Column 3.- Total hours operated during year.
 Column 4.- Average kilowatt-hours per hour generated during year.
 Column 5.- Cubic feet per second of water required to generate average kilowatts per hour.
 Column 6.- Acre-feet of water consumed per 24 hour period for continuous generation of average kilowatts per hour.
 Column 7.- Acre-feet of water consumed during year in generation of total kilowatt-hour output at average hourly rate.
 Column 8.- Total quantity of water in acre-feet diverted from Tualatin River during year.
 Column 9.- Per-cent of total quantity of water diverted during year, utilized in generation of electrical energy during year.
 Column 10.- Quantity of water in acre-feet diverted from Tualatin River only during months power plant was operated.
 Column 11.- Per-cent of quantity of water diverted during months power plant was operated, utilized in generation of electrical energy.

TABLE V

Year	From Plant operation Records (Contestant's Ex. "H" through "W")			Cubic feet per second required	Ac. Ft. per 24 hours required	Total acre-feet consumed for year	Total Canal disch'ge for year Ac. Ft.	Per-cent of total power used for power generation	Canal disch'ge for months of operation	Per-cent used for power generation
	Total Kwh generated	Total hours operated.	Average K.W.H. generated per hour

	No record for March, assume no operation.									
1957	2,373,000	4382	541.5	82.50	163.636	29,876.66	54,220	55.10	54,220	55.10
1958	1,785,000	3225	553.5	84.33	167.266	22,477.21	46,275	48.57	43,016	52.25
	No operation August and September. Computed to November 1, 1958.									

From column 9 of the above tabulation it is observed that from 30 per-cent to almost 65 per-cent of the total quantity of water diverted from the Tualatin River during the period for which complete records are available, has not been beneficially used for the generation of power by contestee. That the maximum quantity utilized was during the year 1955 when 37,535 acre-feet of water, being 42.25 per-cent of the total quantity diverted, was used for the generation of 2,981,000 kilowatt-hours of electrical energy during 4,942 hours of plant operation at a rate of 603.2 kilowatt-hours per hour.

The daily plant operation records for 1955, (Contestant's Ex. "T") show that the plant was operated during each month of the year with very few periods of non-operation other than week-ends. The "remarks" column of the daily plant operation record contains the following notations:

January 26 - "Rec'd word to drop lake 8 ft. for month of Feb."

March 3 - "Raising lake to normal."

August 24-26-"Closed down account of low water in lake."

There are no records for the period March 1 to 14 inclusive which would indicate that the plant was not operated while the water level in the lake was being restored to normal.

Other than each Saturday and Sunday during the year and the periods mentioned above, the plant was not operated on the following days: Feb. 28, Monday; May 30, Monday, Memorial Day; June 24, Friday; July 4, Monday, Independence Day; Aug. 2,3,4, Tuesday, Wednesday & Thursday; Sept. 2, Friday; Sept. 5, Monday, Labor Day; Nov. 24, Thursday, no record of operation; Dec. 26, Monday.

During the year of 365 days, the plant was not operated a total of 126 days, leaving 239 days of plant operation during which time the record shows 4,942 hours of operation or an average of 20.68 hours per day.

Assume continuous operation of 20 hours per day, 5 days per week, with claimed requirement of 91.5 cubic feet per second to operate at capacity output of 600 kva under turbine efficiency of 86 percent. The quantity of water necessary to be diverted from the Tualatin River to provide complete storage recovery over each week-end and to compensate for evaporation loss and minor leakage from the dam and conduit may be readily computed.

Plant requirement:

$91.5 \text{ c.f.s.} \times 1.983471 \times 20/24$ equals 151.24 acre-feet per 20 hour operation

151.24 ac.ft. per day x 5 day operation equals 756.2 acre-feet per week.

Evaporation loss:

Records obtained during the summer months of 1958 show the minimum average tributary inflow to be 0.48 c.f.s., occurring during the month of September. Evaporation loss computed for Oswego Lake by comparison with published U.S.D.C., Weather Bureau records for Cottage Grove, Dorena, Detroit and Fern Ridge Reservoirs, was a maximum during the month of July when a computed 208 acre feet was lost by evaporation. To produce 208 acre-feet in 31 days would require a mean flow of 3.38 c.f.s. Deducting the minimum inflow of 0.48 c.f.s. from the rate of flow of 3.38 c.f.s. leaves 2.90 c.f.s. required to balance the maximum loss by evaporation.

2.90 cubic feet per second flowing for 7 days will produce 40.26 acre-feet.

Then the total weekly requirement would be 756.2 plus 40.3 equals 796.5 acre-feet.

Continuous canal inflow of 57.4 cubic feet per second would produce 796.96 acre-feet per week. 796.96 acre-feet canal inflow minus 756.2 acre-feet plant requirement would leave 40.76 acre-feet to compensate for the 40.26 acre-feet loss by evaporation. During the five day period of plant operation at the rate of 20 hours per day, the maximum computed drawdown on the lake surface elevation would be 0.46 foot.

It is noted from Table II that the average number of hours of plant operation per day, during the period for which daily plant operation records are available, (Contestant's Exhibit "H" thru "W") ranges from 13.9 for the year 1938 to 21.5 for the year 1958, the mean for the period of record being 16.8. Only two years, 1955 and 1958 averaged more than 20 hours per day.

It therefore appears that 20 hours per day, five days per week, represents a fair and economical factor for the continued operation of the plant, and that the diversion of 57.5 cubic feet per second of the waters of Tualatin River through the Oswego Canal, is adequate for such continued operation.

The Oregon Iron and Steel Company is, therefore, allowed a right to the use of 57.5 cubic feet per second of the waters of Tualatin River for the generation of 934 Theoretical horse-power in its hydro-electric plant at Oswego, under date of priority of July 25, 1906. And to store said waters in Oswego Lake during periods of non-operation of its plant, to the present capacity of said Lake, and to maintain its diversion dam in the Tualatin River at the present location of said structure. Provided that at no time shall said diversion dam be maintained and operated so as to impound the waters of said Tualatin River to an elevation higher than necessary to effect the diversion of said 57.5 cubic feet per second into the head of the Oswego Canal through the head-gate thereof, said headgate to be maintained at an effective width of not less than 7 feet and floor elevation not higher than presently constructed.

Provided further that said head-gate and diversion dam shall be so regulated as to prevent the diversion of more than 57.5 cubic feet per second, and in no case more than is being utilized for the beneficial operation of said hydro-electric plant.

Said right is more particularly set out under the tabulation of water rights herein.

-21-

SUB-SURFACE IRRIGATION.

A number of claimants in this proceeding have asserted rights to the use of water for the irrigation of certain lands by means of sub-surface application. It appears that in most instances such sub-surface irrigation is accomplished by placing checks or obstructions to free flow in the ditches or tile systems which have been constructed for the purpose of drainage and reclamation of the lands for agricultural purposes. Such systems serve a dual purpose, that of draining the land during the wet season and of providing a means of controlling the water table elevation and capillary fringe by applying moisture to the soil during the dry season by sub-surface application.

It appears that man has taken advantage of the provisions of nature in this respect and has initiated a method of irrigation which has proven to be sufficiently effective as an aid in growing crops to promote the continuation thereof to the present time. Moreover, modern soil science has recognized the value of artificial sub-surface irrigation, particularly in the irrigation of peat soils, such as are herein involved, even though the more modern method of overhead sprinkler irrigation may be preferable.

In the main, the lands for which a right by sub-surface application of water is asserted are lands which, in their natural state, were low and swampy and too wet for the growing of such cultivated crops as were adapted to the locality. Early settlers, recognizing the potential value of such lands, if properly reclaimed, proceeded to drain the lands and supplant nature's lush growth of various types of swamp vegetation with cultivated crops of garden produce, grains and grasses. By so doing, the water normally consumed by such natural vegetation in plant growth and transpiration, as well as by evaporation from standing surface water among the vegetation, was salvaged and used in the sub-irrigation of cultivated crops.

While in most cases there is no convenient way in which the water so applied may be measured, said methods of application were initiated and adopted prior to the enactment of the water code, and have continued in practice throughout the intervening years. There appears to have been no conflicts between such water usage and other methods of water usage initiated prior or subsequent thereto. It would appear that said methods of sub-surface application of water to the lands for which a right has been asserted in this proceeding has proven valuable and effective and that the proprietors of the lands should be entitled to protection in said methods of application of such long standing.

It would appear that the duty of water in either case, would be comparable. Experiments indicate that, for any given area, in surface application of water, either by rain storm, sprinkler irrigation or other type of direct application, the rate of evaporation is great at first and gradually diminishes until the surface of the soil becomes dry after which evaporation becomes almost negligible. That the remaining moisture, so applied, is used in plant growth and transpiration, retained as soil moisture in the capillary fringe or lost by deep percolation.

In the sub-surface application of water the quantity lost by deep percolation would, perhaps, be greater due to the level of application being in closer proximity to the zone of deep percolation.

The quantities retained in the capillary fringe and used by plant growth and transpiration would conceivably be the same as in surface application, and the rate of evaporation less due to the surface of the soil remaining dry. Thus it would appear, generally, that the quantity of water essential to the economical irrigation of the land would be, in either method, comparably equal.

It therefore appears that such claimants are enjoying the fruits and benefits of the labors of their predecessors in the continuation of the application of water for sub-irrigation of their lands and that such method of application of water, initiated prior to the adoption of the water code, is a valuable right which should be protected.

Therefore, subject to the specific findings herein, valid claims to the use of water for irrigation, where some system of sub-surface conduits or channels are employed, which use was initiated prior to the adoption of the water code, now Oregon Water Rights Act, are herein recognized. Provided, that all claimants whose rights for sub-irrigation are allowed herein, and their successors in interest, shall retain such rights under the priorities thereto allowed, appurtenant to the specific lands herein described, and to the extent of the acres herein defined, so long as said lands shall continue to be irrigated. Provided, further, that said claimants, or their successors in interest shall have the right to change their method of irrigating said lands without loss of priority, and that the quantity of water to which they are entitled shall be governed by the duty of water established herein under the provisions of Finding 53.

-22-

ONION FLAT AREA.

A compact area of cultivated land comprising some 230 acres, located within the E $\frac{1}{2}$ SE $\frac{1}{4}$, Section 20, the SW $\frac{1}{4}$ Section 21, the N $\frac{1}{2}$ NW $\frac{1}{4}$ Section 28 and the E $\frac{1}{2}$ NE $\frac{1}{4}$ Section 29, Township 2 South, Range 1 West of the Willamette Meridian, is known locally as Onion Flat. This reclaimed area constitutes the bed of a former shallow lake and surrounding swampy area, situate along the channel of Rock Creek, a tributary of Tualatin River. Within the area are several springs, the flow of which originally contributed to the waters of said lake and swampy area.

The springs which remain visible or whose locations are definitely known are; two which may be called "Krause Springs", situate on land now owned by David Cereghino, are located

approximately 1000 feet south and 200 and 400 feet east of the section corner common to Sections 20, 21, 28 and 29, T. 2 S., R. 1 W., W.M. Another definite spring area is located upon land presently owned by Mary Galbreath, being within the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Section 28, and near the east line of said subdivision.

The two named ditches which traverse the Onion Flat area and are stated as sources of water in various claims, are "Cummings Ditch" and "Krause Ditch". Cummings Ditch is the continuation of a natural depression which commences within the west-half of Section 22, T. 2 S., R. 1 W., W.M. and continues westerly through the approximate center of Sections 22 and 21 to a point approximately 900 feet south and 250 feet east of the center of said Section 21. Thence continuing westerly to a point approximately 1000 feet south and 650 feet east of the quarter section corner between Sections 20 and 21, said township and range, the later point being the confluence of the Krause Ditch. Thence northwesterly through underground tile to its confluence with Rock Creek approximately 300 feet south and 100 feet west of said quarter section corner between Sections 20 and 21. That portion of said watercourse between Fischbuch Road and the confluence of Krause Ditch is the open ditch portion of Cummings Ditch.

Krause Ditch heads in Krause Springs and bears in an approximately straight line, slightly east of north, to its confluence with Cummings Ditch. The first approximately 800 feet of Krause Ditch is open, the remainder being tiled and covered over.

The other unnamed tributary ditches referred to in various claimes, are underground tile laterals, tributary to either Cummings Ditch, Krause Ditch or Rock Creek.

It appears that the reclamation of this area was accomplished in the early years of the settlement of the country by the construction of a system or network of ditches which served to sub-drain the area and conduct the surplus waters into the channel of Rock Creek. The drain ditches also served as a means of accomplishing the sub-irrigation of the lands during the dry season of the year, thereby providing the moisture necessary for plant growth, and making the lands highly productive.

Check dams were placed in the channel of Rock Creek, and check-boards in the drainage ditches, at strategic locations so as to hold the water in the ditch system and control the elevation of the water table so that, by capillarity, the lands would become and remain moist through the growing season, after which the dams and checks were removed and the lands allowed to drain, to aid in the proper maturing and harvesting of the crops. Later, the smaller lateral ditches and portions of the main ditches were covered so that the lands could be cultivated over the drainage channels.

The irrigated land bordering the channel of Rock Creek is uniformly flat and the under-ground laterals have only a slight slope toward the creek channel so that, by placing check dams in the creek channel the waters of Rock Creek are backed up in the underground laterals to effect the sub-irrigation of the lands to a distance of approximately 500 feet at right angles to the creek channel.

The area herein involved, was cropped principally to onions during the early years, hence the local name of Onion Flat. The growing of onions and, to a lesser degree, other types of garden produce, and some grains and grasses, has been the practice in this area throughout the intervening years and is still the principal industry of the area.

It appears that sub-irrigation of the land has always been practiced and is still the method of irrigation used, being, perhaps, the most successful and economical for the area, although during recent years some artificial application of water has been made by means of over-head sprinkler systems, primarily to augment the surface moisture as an aid to seed germination.

Said Onion Flat area is approximately three-eighths mile above the confluence of Rock Creek with the Tualatin River and, so far as is known, there has always been a flow of

water in the channel of Rock Creek below the Onion Flat area. While the total quantity of water which has been, and is used in the sub-irrigation of the lands comprising the Onion Flat area is unknown it is believed to be comparable to other methods of irrigation. It further appears that all of the land in said area which can be irrigated by the method of sub-irrigation used, is now and has been for many years, under crop and irrigated beneficially.

In so far as is known, there have been no conflicts between the water users of the Onion Flat area and other water users of Rock Creek whose use of water was initiated either prior or subsequent to the time of initiation of water use by sub-irrigation in said Onion Flat area, nor does it appear that any water users of Tualatin River below the confluence of said Rock Creek near the center of the NE $\frac{1}{4}$ of Section 20, Township 2 South, Range 1 West of the Willamette Meridian, have ever made any demands or filed any complaints against the water users of said Onion Flat area, that they cease their use of water in sub-irrigation of their lands and allow said water to flow down the channel of Rock Creek and into the Tualatin River for the use of appropriators of water from the channel of Tualatin River.

Rights have been asserted in this proceeding for the irrigation of 177.46 acres of said Onion Flat lands by the respective owners thereof, as evidenced by their respective statements and proofs of claim. Each Statement and Proof of Claim was accompanied by the legal description of claimants tract, or tracts of land, which descriptions have been platted on the accompanying sketch map so as to show the location of the various ownerships with relation to the lands classified as irrigated by the State Engineer's survey.

In general, the acreage claimed conforms very closely with the acreage classified as irrigated but in a few instances it appears that claimants have asserted rights for the irrigation of a total area greater than was found to be irrigated. Such claims are treated following.

Cereghino, John and James, et ux - Proof No. 24
Dittman, Herman A. - Proof No. 34
Fischbuch, Chester - Proof No. 44
Johnston, Clark L. and Bessie H. - Proof No. 65

In each instance the land descriptions submitted with the Statement and Proof of Claim encompass land lying north of the border line of the lands classified as irrigated by the State Engineer's survey, said border line delineating the toe of the hill along the northerly edge of the Onion Flat area. The acreage allowed herein under each claim is that lying below the toe of the hill.

Galbreath, Mary - Proof No. 50

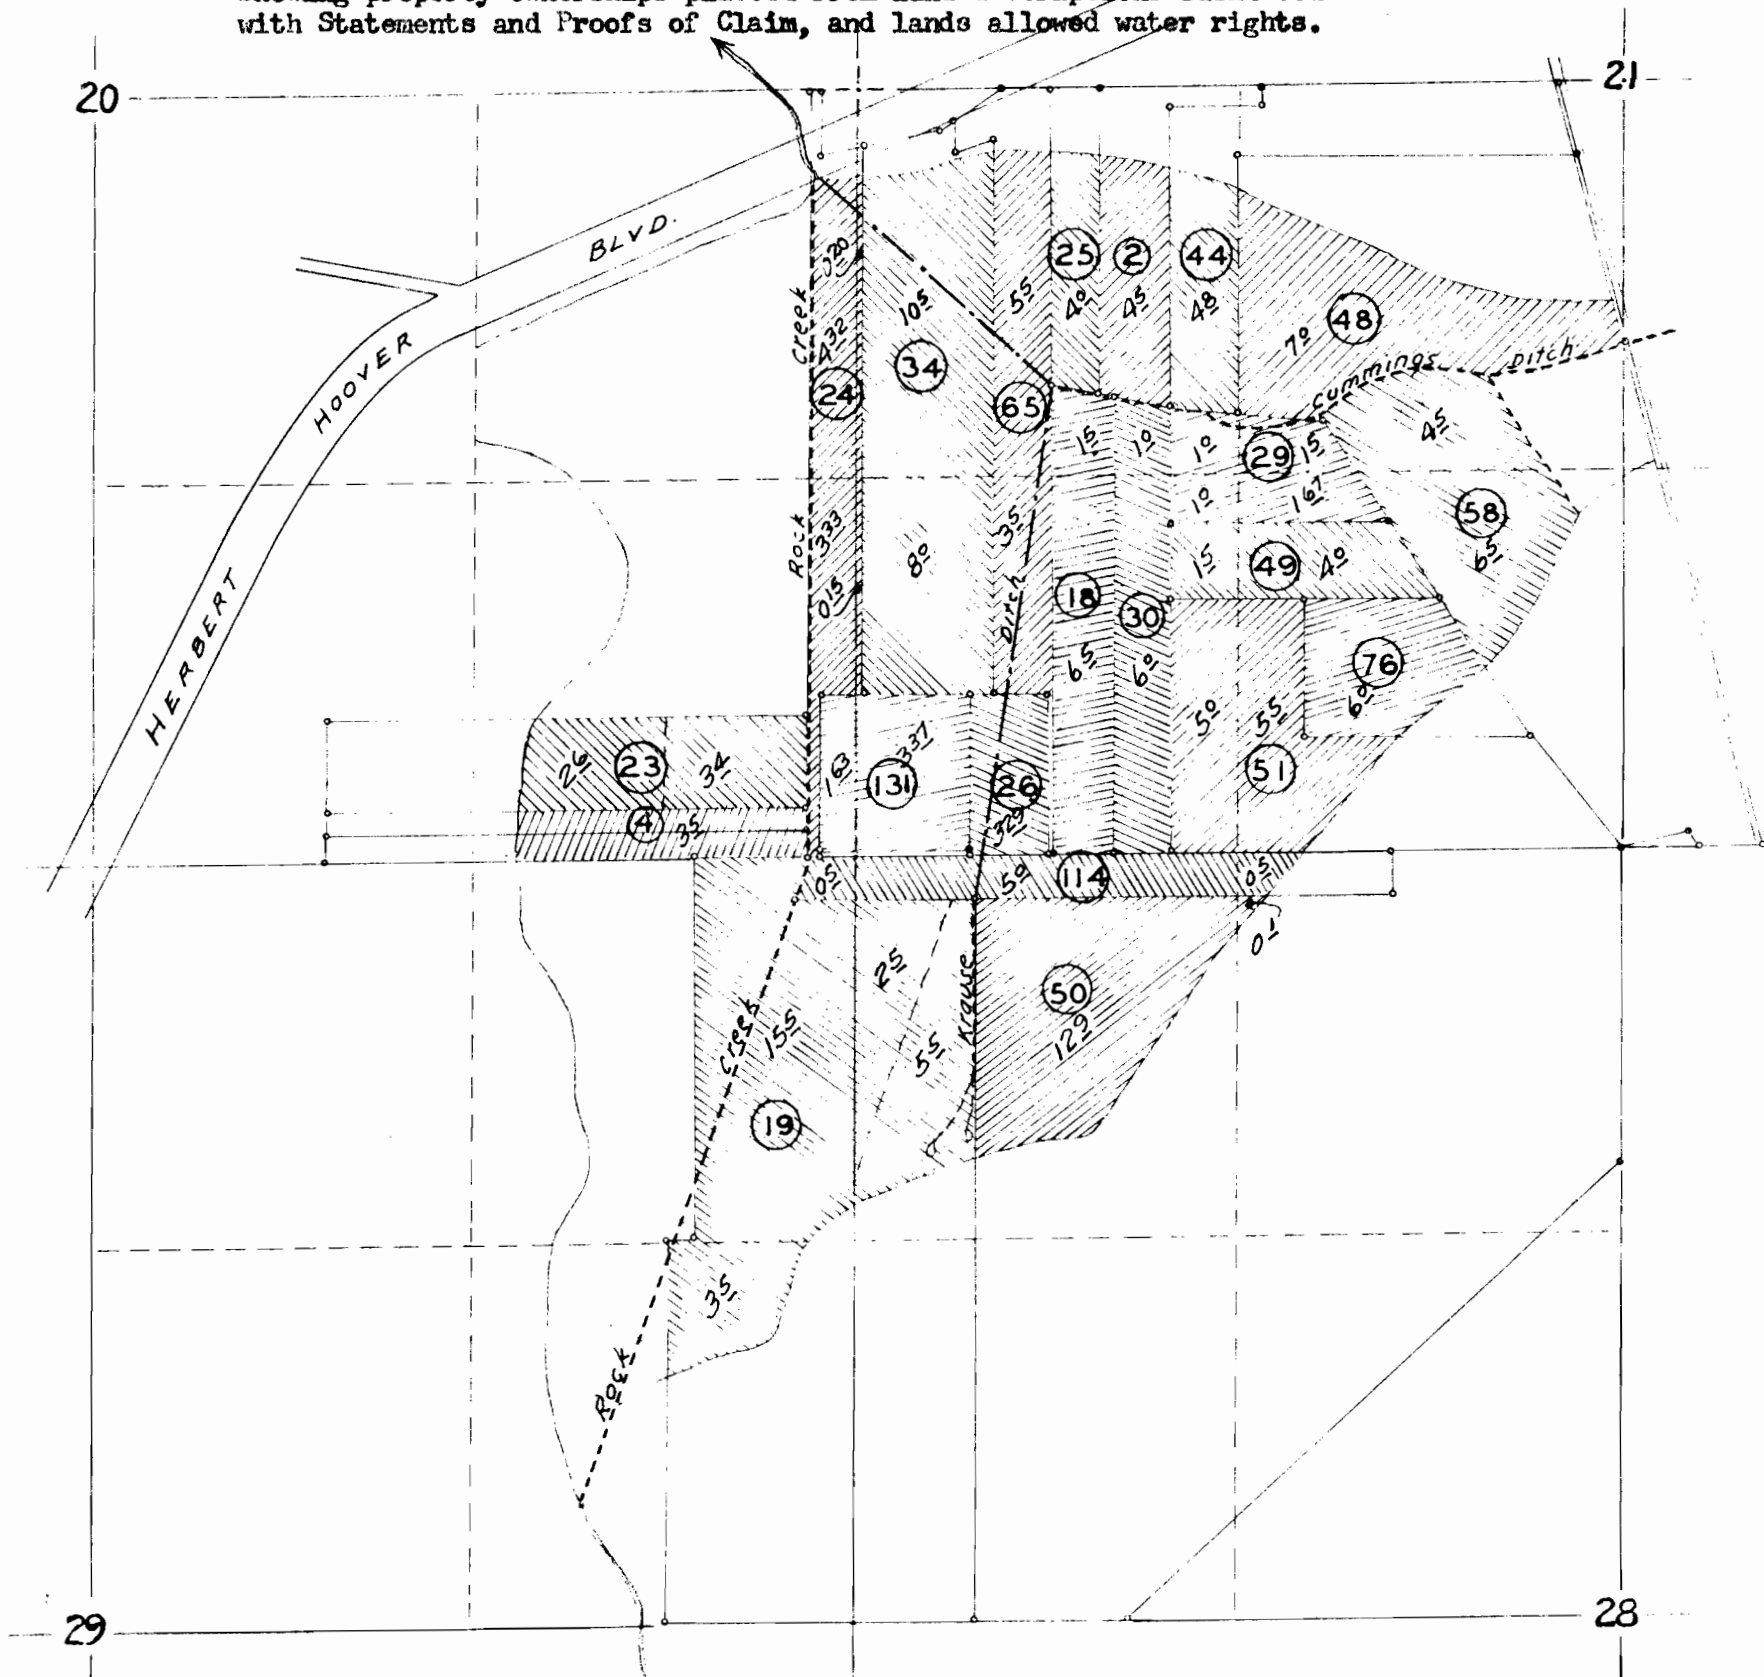

Claimant asserted a right for the irrigation of a total of 13.9 acres of land. The State Engineer's survey shows a total of 13.0 acres irrigated within the tract of land encompassed by the legal description of claimant's land.

It appears that beneficial use of water has been made in the irrigation of the lands within the Onion Flat area, and that no contests have been filed herein against said statements and proofs of claim, therefore, subject to the provisions of Findings 21 and 22 herein, the following named claimants, and their successors in interest, are hereby allowed rights for the irrigation of their respective lands by the method of sub-surface application of water, as has been their practice and that of their predecessors in interest since approximately the year 1890, in the name of, under the date of priority, and to the extent of the number of acres as herein set out and described in the tabulation of water rights under Finding 69, all of said lands being situate in Township 2 South, Range 1 West of the Willamette Meridian in Washington County:

SKETCH MAP OF ONION FLAT AREA

Part of Sections 20, 21, 28 & 29, T. 2 S., R. 1 W., W.M.

Showing property ownerships platted from land descriptions submitted with Statements and Proofs of Claim, and lands allowed water rights.

SUB-IRRIGATION OUTSIDE ONION FLAT AREA

A number of claimants have asserted rights to the use of the waters of springs, ditches and streams tributary to Tualatin River, in addition to the several owners of the lands in the Onion Flat group treated under Finding 22. Said claims are for sub-irrigation and other uses, and will be treated individually herein.

-24-

Anderson, Erwin J. & Vivian - Proof No. 1

Claimants have asserted a right to the use of the waters of an unnamed tributary of Rock Creek for the sub-irrigation of 5.0 acres of land, being 2.4 acres in Section 20 and 2.6 acres in Section 29, T. 2 S., R. 1 W., W.M., under priority date of 1900.

Said claim is accompanied by the sworn and notarized affidavits of George Borchers and Walter Schmidt, both residents of Route 4, Sherwood, Oregon, who assert that they were born in 1892 and 1885 respectively and have been acquainted with the lands for which a right is claimed since their early boyhood. That, to their knowledge, said lands have always been irrigated by means of stops placed in the lateral ditches and tile lines, which are used during the wet season to drain said lands, thereby holding the water and causing the sub-irrigation of the lands.

It appears that claimants have made beneficial use of the waters of said unnamed tributary to Rock Creek in the irrigation of their lands as claimed, and that no contest has been filed herein against said claim, therefore, subject to the applicable provisions of Finding 21 herein, claimants are allowed a right as claimed and as more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-25-

Anderson, Nels and Eleanor - Proof No. 3

In statement and proof of claim Number 3 claimants have asserted a right to the use of the waters of unnamed ditches, tributary to Rock Creek, for the sub-irrigation of 23.0

acres of land, being 20.0 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 20, and 3.0 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 29, T. 2 S., R. 1 W., W.M., under priority date of 1900.

Said claim is accompanied by the sworn and notarized affidavits of George Borchers and Walter Schmidt, who assert that they were born in 1892 and 1885 respectively and have personal knowledge and recollections of the lands claimed as having been under crop and sub-irrigated by means of placing stops in the lateral drains, since their early childhood.

Said lands were not shown as irrigated lands on the State Engineer's map, however, from a subsequent investigation of the premises it appeared that the lands were irrigated to the extent of 22.5 acres in said SE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 20, and 1.0 acre in said NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 29. No contest having been filed herein against said claim and it appearing that beneficial use of water has been made in the irrigation of said lands, claimants are allowed a right to the use of the waters of unnamed ditches, tributary to Rock Creek, for the irrigation of 23.0 acres of land, subject to the provisions of Finding 21 herein. Said right being more specifically set out and described in the tabulation of water rights under Finding 68 herein. X

-26-

Aschwanden, Herman J. & Gertrude - Proof No. 5

Claimants filed herein statement and proof of claim number 5 wherein, as riparian land owners, a right is asserted to the use of the waters of Hedge Creek for the sub-irrigation of 5.5 acres of land in Section 22, T. 2 S., R. 1 W., W.M., being 0.3 acre in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ and 5.2 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, under priority day of 1907.

Said claim is accompanied by the sworn and notarized affidavits of Arthur Galbreath, Morris Walgraeve and Harry E. Cole, each asserting that they have been residents of the immediate vicinity and familiar with the lands for which a right by sub-irrigation is claimed since 1907 and that the lands have been cropped and irrigated during the intervening years by means of a small dam placed in Hedge Creek, causing the water to back up in the irrigation ditches traversing said lands.

This claim is herein considered on the basis of an appropriation of water for beneficial use but not as a right based on riparian ownership of the lands claimed. It appears that claimants have made beneficial use of the waters of Hedge Creek in the irrigation of their lands and that no contest has been filed herein against said claim.

Therefore, subject to the provisions of Finding 21 herein, claimants are allowed a right for the irrigation of their lands to the extent of 5.5 acres, said right being more particularly set out and described in the tabulation of rights under Finding 69 herein. X

-27-

Borchers, Bertha - Proof No. 11

In statement and proof of claim number 11 claimant has asserted a right to the use of the waters of unnamed ditches, tributary to Rock Creek, for the sub-irrigation of 11.0 acres of land in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 29, T. 2 S., R. 1 W., W.M., under priority date of 1900.

Said claim is accompanied by the sworn and notarized affidavits of George Borchers and Walter Schmidt, both residents of the immediate vicinity, who assert that they have personal knowledge of the irrigation of the lands for which a right is being claimed, since their early boyhood prior to 1900 and that the irrigation of said lands has always been accomplished by placing stops in the lateral drainage ditches, thereby backing the water up to sub-irrigate the lands.

Claimant asserts that she accepts the map of the State Engineer as correctly showing the location and extent of the lands for which an irrigation right is being claimed. It appears that beneficial use of the waters of said unnamed ditches, tributary to Rock Creek, has been made in the irrigation of the lands claimed and that no contest has been filed against said

claim. Therefore, subject to the provisions of Finding 21 herein, claimant is allowed a right for the irrigation of her lands as claimed, said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein. X

-28-

Cereghino, John & Gladys - Proof No. 21

In statement and proof of claim number 21 a right is asserted to the use of the waters of Rock Creek and unnamed ditches tributary thereto for stock watering and the irrigation of 7.0 acres of land in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section ~~27~~²⁸, T. 2 S., R. 1 W., W.M. under priority date of 1890. *See Decree Vol. 16, p. 419*

Said claim is supported by the sworn and notarized affidavits of James McConnell and Clarence McConnell who assert that they were born near Sherwood, Oregon in 1873 and 1885 respectively and have lived in the immediate vicinity throughout their lifetime. They further assert that they recall the irrigation of the lands for which a right is asserted in this claim, and the growing of onions and other vegetable crops, since as early as 1890, that the lands are of beaverdam soil and were drained by small, covered lateral ditches which were utilized to accomplish the sub-irrigation of said lands during the irrigation season from May until September, by placing stops or checks in said lateral ditches.

At the time of the field survey of the lands involved in this claim and statement and proof of claim number 22 adjacent thereto, the records of the County Recorder described the property as two parcels, all in the ownership of John and Gladys Cereghino, with the channel of Rock Creek as the dividing line between the two parcels. The State Engineer's map, supported by aerial pictures of the area, show the channel of Rock Creek as traversing the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 28, diagonally, in a straight line, from a point on the south line of said Section 28, 500 feet east of the south west corner of said Section 28, to a point on the west line of said Section 28, 1100 feet north of said southwest corner. The area of land in crop and apparently irrigated within said SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28 was found to be 5.8 acres southwest of Rock Creek, and 6.3 acres northeast of Rock Creek, a total of 12.1 acres.

Claimant states, in answer to question 28, "Give description of your land as it appears in your deed?" Answer- "SW quarter of Southwest quarter of Section 28, T. 2 S., R. 1 W., W.M." From this it appears that John and Gladys Cereghino conveyed a part interest in their lands as described in the County Recorder's records under two parcels, to James and Christina Cereghino, reserving unto themselves the entire SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 28.

Of the 12.1 acres of land found to be in crop and irrigated within said SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28, claimants have asserted a right for only 7.0 acres. It appears that claimants have made beneficial use of the waters of Rock Creek and unnamed ditches in the sub-irrigation of their lands and that no contest has been filed herein against said claim, therefore, subject to the provisions of Finding 21 herein, claimants are allowed a right for the irrigation of 7.0 acres as claimed, within the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28, T. 2 S., R. 1 W., W.M.

Claimants have also asserted a right for the watering of 20 head of stock by drinking directly from Rock Creek as it exists across the property. It appears that the remaining portion of said SW $\frac{1}{4}$ SW $\frac{1}{4}$, not cultivated and cropped, is used for stock pasture and that the stock pastured thereon have access to the channel of Rock Creek. Therefore, no contest having been filed herein against said claim, subject to the provisions of Finding 58, a right is allowed for stock watering by drinking directly from Rock Creek as it flows across said SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28, T. 2 S., R. 1 W., W.M., to the extent of 20 head of livestock.

Said rights for irrigation and stock use are more particularly set out and described in the tabulation of water rights under Finding 69 herein. X

Cereghino, John & Gladys, James & Christina - Proof No. 22

In statement and proof of claim number 22 a right is asserted to the use of the waters of Rock Creek for stock watering and the irrigation of 12.0 acres of land, being 1.0 acre in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 11.0 acres in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 29, T. 2 S., R. 1 W., W.M. under priority date of 1890.

This claim is supported by copies of the same affidavits as accompanied claim number 21. The lands for which a right is asserted herein are a part of those discussed in connection with the preceeding claim number 21.

The State Engineer's map, which was accepted generally by claimants as correctly showing the location of their irrigated lands, shows 0.7 acre irrigated in said NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 9.7 acres irrigated in said SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 29. The area found to be in crop and irrigated within said subdivision is bounded on the east by the channel of Rock Creek, on the north by the right of way of the Southern Pacific railroad and on the west and south by a line defining the contour of the toe of the adjoining hills.

It appears that claimants have in the past, and are now accomplishing the beneficial irrigation of said lands by means of stops or checks placed in the channel of Rock Creek so as to hold the water in the underground drainage system thereby sub-irrigating the lands. No contest has been filed herein against said claim, therefore, subject to the provisions of Finding 21 herein, a right is allowed to the use of the waters of Rock Creek for irrigation to the extent of 0.7 acre in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 9.7 acres in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 29, T. 2 S., R. 1 W., W.M.

It further appears that stock are pastured on the premises and have been allowed to drink directly from Rock Creek as same flows across the property. No contest having been filed against said claim for stock water, therefore, subject to the provisions of Finding 58 herein, a right is allowed for stock watering by drinking directly from Rock Creek as same flows across the property, to the extent of 20 head of livestock.

Said rights for irrigation and stock watering are more fully set out and described in the tabulation of water rights under Finding 69 herein.

Conzelman, Arnold & Edith - Proof No. 32

Claimants Arnold and Edith Conzelman have filed herein statement and proof of claim number 32 wherein they have asserted a right to the use of the waters of unnamed ditches tributary to Rock Creek for the sub-irrigation of 7.5 acres of land in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 30, T. 2 S., R. 1 W., W.M. under priority date of 1900.

Said claim is supported by the sworn and notarized affidavits of George Borchers and Walter Schmidt, both residents of the immediate vicinity, who assert that they were born in 1892 and 1885 respectively, and have been personally acquainted with the lands claimed and the methods of irrigation used and the crops grown since prior to the year 1900.

It appears that the lands were reclaimed by a system of drainage channels which were later converted to an underground tile system. That the irrigation of said lands is accomplished by placing stops or checks at certain locations in said tile system thereby holding the water and sub-irrigating the land.

It appears that beneficial use has been made of the waters of said unnamed ditches, as claimed, and that no contest has been filed in this proceeding against said claim. Therefore, subject to the provisions of Finding 21 herein, claimants are allowed a right for the irrigation of their lands as claimed, said right being more particularly set out and described in the tabulation of water rights under Finding 69 herein.

Darnell, Thomas C. & Freda M. - Proof No. 33

In statement and proof of claim number 33 claimants have asserted a right for domestic and stock use and the irrigation of 15.0 acres of land within Section 21, T.1S., R.2W., W.M. from springs and an unnamed creek, tributary to Tualatin River, under priority date of 1896.

Said claim is supported by the sworn and notarized affidavits of William E. Rannow and Edgar B. Rannow who assert that they were born on the premises in September 1900 and January 1904, respectively, and are the sons of Herman Rannow who purchased the property in the year 1896. That they each have personal knowledge of the water usage for which a right is being claimed. Water for domestic household purposes was, and is now secured from a well, that 20 head of dairy stock were pastured on the property and drank directly from the creek and overflow from the springs. That the irrigation of 15.0 acres of bottom land was accomplished, partly by flood irrigation from gravity ditches and partly by checks placed in a tile drainage system for sub-irrigation.

Claimants' asserted right for domestic use cannot be recognized herein for the reason that such use is from a private well over which the State Engineer has no jurisdiction, except should it be used for the irrigation of more than one-half acre of land.

It appears that beneficial use of water for stock watering purposes has been and is being made as claimed, therefore, subject to the applicable provisions of Finding 58 herein, claimants are allowed a right for stock use by drinking directly from the waters of the springs or stream as they exist upon the property, to the extent of 20 head of dairy stock or their equivalent.

Claimants' asserted right for the irrigation of 15.0 acres of land was described as 9.0 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ and 6.0 acres in the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 21, T. 1 S., R. 2 W., W.M. From a subsequent examination of the premises it appeared that claimants were irrigating 15.0 acres of land but that said land was not located as claimed. Claimants have accepted the map prepared by the State Engineer as correctly showing the location of their irrigated lands, and from said map it appears that the 15.0 acres claimed are located in four government subdivisions, being 6.5 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ and 5.4 acres in the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 21 and 0.1 acre in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ and 3.0 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 28, all within T. 1 S., R. 2 W., W.M. Of said 15.0 acres 5.0 acres is situate south of the unnamed creek and 10.0 acres north of the creek.

It appears that beneficial use of the waters of said springs and unnamed creek is being made in the irrigation of said lands and that no contest has been filed in this proceeding against said claim, therefore, subject to the applicable provisions of Findings 21 and 58 herein, claimants are allowed a right for the irrigation of 15.0 acres of land. Said rights for irrigation and stock use are more particularly set out and described in the tabulation of water rights under Finding 69 herein.

Guild, Stanley I. - Proof No. 55

Statement and proof of claim number 55, filed herein on behalf of claimant Stanley I. Guild by his son and authorized agent, Len W. Guild, asserts a right to the use of the waters of a ditch designated as "C" ditch, tributary to Rock Creek and thence the Tualatin River, for the irrigation of a total of 18.1 acres of land in Sections 4, 5, 8, and 9, T. 2 S., R.1W., W.M. under date of priority of the year 1900.

Claimant states that the irrigation of said lands is accomplished by means of ditch and tile lines, used for drainage during the wet season and to sub-irrigate the land during the season from May to October. Claimant further states that the map of the State Engineer

shows all of the lands he is claiming except 2.0 acres lying east of and adjacent to the ditch in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 9.

From a subsequent examination of the lands it appeared that claimant was and is making beneficial use of the waters of said "C" ditch for the sub-irrigation of his lands, as claimed. No contest has been filed in this proceeding against said claim, therefore, subject to the provisions of Finding 21 herein, claimant is allowed a right for the irrigation of 18.1 acres of land as claimed, under priority of 1900. Said right is more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-33-

Heinke, Martha - Proof No. 60

Claimant filed herein statement and proof of claim number 60 wherein a right is asserted to the use of the waters of springs and unnamed ditches, tributary to Tualatin River, for domestic use, stock watering and the irrigation of 2.0 acres of land, within the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 23, T. 2 S., R. 1 W., W.M., under date of priority of 1878.

Said claim is supported by the sworn and notarized affidavit of Joe Itel who states he was born in the immediate locality in the year 1898 and has resided there during his entire lifetime. That he has personal knowledge of the property involved since about the year 1903 and that the springs have always been used for domestic and stock water, that an area of approximately 3.0 acres of beaver dam land adjacent to the springs had been drained and reclaimed for growing onions and other vegetables, being irrigated by placing stops in the drainage channels so as to hold the water for sub-irrigation through the drainage system.

It appears that the springs and unnamed ditches are actually tributary to an unnamed tributary of Saum Creek and thence the Tualatin River. The State Engineer's map does not show any irrigated land on the premises, however, a subsequent examination of the lands disclosed that an area of approximately 2.4 acres was tilled and sub-irrigated as claimed. Water from the springs is now piped to the residence for household domestic needs and to the barn for stock use.

No contest has been filed herein against said claim and it appears that beneficial use has been made of the waters as claimed, therefore, subject to the provisions of Findings 21 and 56 herein, claimant is allowed a right for domestic and stock use as claimed, said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-34-

O'Mara, Loyola F. & Julia R. - Proof No. 85

In statement and proof of claim number 85 claimants O'Mara have asserted a right to the use of the waters of Fanno Creek and several springs tributary thereto, for stock use and the irrigation of 10.3 acres of land in the NE $\frac{1}{2}$ SE $\frac{1}{4}$, Section 2, T. 2S., R. 1W., W.M., under date of priority of 1906 for stock use and 1907 for irrigation use.

It appears that the lands for which a right for irrigation is asserted were originally wet and swampy in character, from the overflow of numerous springs situate thereon, that a drainage system of tile was installed to reclaim said lands for agricultural purposes and that, during the dry season of the year, checks or dams are placed in said drainage system at convenient locations thereby obstructing the flow of water and accomplishing the sub-irrigation of the lands. The area of land thus irrigated, determined from the contour of the land, is 10.3 acres, as claimed, being 5.3 acres in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 5.0 acres in the NW $\frac{1}{4}$ SE $\frac{1}{4}$, said Section 2.

No contest having been filed herein against said claim, and it appearing that

beneficial use of the waters of said springs in the sub-irrigation of claimant's land has been made, a right is herein allowed for the irrigation of 10.3 acres as claimed, subject to the provisions of Finding 21 herein.

It appears that stock use is accomplished by the stock drinking directly from Fanno Creek as it flows across the premises. Claimants assert that, to their knowledge, the maximum number of stock pastured upon the property consisted of thirteen head of cattle and four head of horses.

It appears that beneficial use of the waters of Fanno Creek has been made for stock watering purposes and that no contest has been entered herein against said claim, therefore, subject to the provisions of Finding 58 herein, a right is allowed for stock water to the extent of seventeen head of livestock.

Claimants' rights for irrigation and stock water, as allowed herein, are more particularly set out and described in the tabulation of water rights under Finding 69 herein.

-35-

Snyder, Gordon H. & Mildred - Proof No. 103

Claimants filed herein statement and proof of claim number 103 wherein they have asserted a right to the use of the waters of Rock Creek for stock watering of a maximum of 35 head of livestock and the irrigation of 21.5 acres of land in Section 33, T. 2 S., R. 1 W., W.M. under date of priority of 1865.

Said claim is accompanied by the sworn and notarized affidavit of Andrew M. Weston who asserts that he was born near Sherwood, Oregon in May 1880 and has maintained his residence in the vicinity, except for brief periods of absence, throughout his lifetime. That he has been familiar with the land for which a right for irrigation is herein asserted, since 1890 and that, to his personal knowledge, said lands were reclaimed and cropped to general farm crops, including onions and other vegetables, and have been irrigated by the same method of sub-irrigation throughout the intervening years.

It appears that said lands were originally reclaimed by the installation of numerous drain ditches and that said drains were subsequently covered for greater ease in cultivation. That the method of irrigation has always been to place small dams in the channel of Rock Creek during the irrigation season, thereby backing the water up and holding it in the drainage system and thus causing the sub-irrigation of the lands.

It appears from the property description submitted with said claim, and from the County Recorder's records, that of the 7.3 acres shown as irrigated on the State Engineer's map and located in the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of said Section 33, and for which a right is being claimed herein, only 6.8 acres are owned by claimants, the northerly 0.5 acre lying east of the channel of Rock Creek being on the adjoining property.

It appears that beneficial irrigation of said lands has been made and that no contest has been entered in this proceeding against said claim and method of irrigation. Therefore, subject to the provisions of Finding 21 herein, claimants are allowed a right to the use of the waters of Rock Creek for the irrigation of 21.0 acres of land under priority of 1865.

Claimants' asserted right for stock watering is by allowing stock to drink directly from the channel of Rock Creek as same flows across the premises. It appears that stock have always been pastured on the lands of claimants and that beneficial use of the waters of Rock Creek has been made for stock watering purposes, and that said claim has not been contested in this proceeding. Therefore, subject to the provisions of Finding 58 herein, claimants are allowed a right to the use of the waters of Rock Creek for stock watering by drinking directly from said stream as same flows across the property, to the extent of 35 head of livestock.

Claimants' said rights for irrigation and stock watering are more particularly set

out and described in the tabulation of water rights under Finding 69 herein.

-36-

Walgraeve, Morris & Jane - Proof No. 115

In statement and proof of claim number 115 claimants have asserted a right to the use of the waters of springs which have been ditched into Hedge Creek, for stock watering and the irrigation of 4.0 acres of land in the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 22, T. 2 S., R. 1 W., W.M., under date of priority of 1904. Said claim is accompanied by the sworn and notarized affidavits of Claimant Walgraeve, and of David Cereghino, Fred Shamburg and Sam Cereghino, each asserting that he is a resident of the vicinity and well acquainted with the land for which a right for irrigation is being claimed.

It appears that said lands were reclaimed by a drainage system which was installed by former owners of the property prior to 1904. That the irrigation of said land was accomplished by placing stops or checks in the drainage system so as to hold the water and cause the sub-irrigation of the land. That subsequently said drainage system was covered over to facilitate cultivation and that the lands have been cropped to onions and other vegetable crops during the intervening years.

It appears that beneficial use of the waters of said springs has been made as claimed, and that said claim has not been contested in this proceeding, therefore, subject to the provisions of Finding 21 relating to sub-irrigation, and Finding 58 relating to stock drinking directly from the source, claimants are allowed a right for the irrigation of 4.0 acres of land and for stock watering purposes, said rights being more particularly set out and described in the tabulation of water rights under Finding 69 herein.

-37-

CHRISTENSEN BROS. - Proof #27

In statement and proof of claim number 27, filed by Ralph E. Christensen on behalf of Christensen Bros. a right is asserted to the use of the waters of Burriss Creek, tributary to Tualatin River, and Tualatin River for domestic and stock use under priority of 1900, and the irrigation of 24.0 acres of land in Section 5, T. 2 S., R. 2 W., W.M., under priority of 1908.

It appears that Christensen Bros. are the owners and operators of an extensive dairy farm upon which are located a large dairy barn and several other outbuildings used in connection with the dairy operation and that water from Burriss Creek is pumped to said buildings for stock use.

That prior to 1907 the stock drank directly from Burriss Creek. In about 1907 a dam was constructed in the channel of Burriss Creek and water piped to stock troughs, and the following year a pump and gas engine were installed and water pumped to the several buildings.

That said gas engine and pump were also used to deliver water from Burriss Creek through a six inch pipe line for the irrigation of 24.0 acres of land within Section 5, T. 2 S., R. 2 W., W.M.

The exact location of said 24.0 acres is rather indefinite, however, from available data it appears that the land irrigated was within the area described in an application to the State Engineer for a permit to appropriate water under the water code, which permit was granted and later culminated in a Certificate of Water Right, recorded in State Record of Water Right Certificates, Vol. 1 page 436.

From the map submitted with said application for permit, it appears that the 24.0 acres for which a right is claimed in this proceeding was situate, as nearly as may be determined, 10.0 acres in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, 10.0 acres in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ and 4.0 acres in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, said Section 5.

It appears that beneficial use of the waters of Burris Creek has been made for stock watering and the irrigation of 24.0 acres of land, and that no contest has been filed in this proceeding against this claim, therefore, subject to the applicable provisions of Findings 55 and 53 herein claimants hereby are allowed a right to the use of the waters of Burris Creek, for stock use and other uses incident to the operation of a modern dairy, under priority of 1900 and for the irrigation of 24.0 acres of land as herein-after described, under priority of 1908. Said rights being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

Relative to the asserted claim for domestic household use, it appears from subsequent information obtained from claimants, that water for household needs was secured from two dug wells on the premises, that a new well was drilled approximately 15 years ago from which domestic water is now obtained. Since these wells are private property and do not come within the jurisdiction of the present water code, except if they be used for the irrigation of more than one-half acre of land, said claim for domestic use does not come within the scope of this proceeding and therefore cannot be recognized herein.

Relative to the asserted right to the use of the waters of Tualatin River, it appears that the waters of said stream were not utilized directly and that such asserted right has not been substantiated, therefore such asserted right hereby is denied.

-38-

DOUGLAS, Adraen Erwin - Proof #38

Claimant has asserted, in statement and proof of claim number 38, a right to the use of the waters of an unnamed tributary of McKay Creek for domestic use and the irrigation of 10.0 acres of land in the NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 24, T. 3 N., R. 3 W., W.M. under priority of the date Jan. 11, 1892 when Homestead Certificate #3346 was issued to John & Mary Gillespie, the original owners.

From an examination of the premises, made in 1956 in connection with this proceeding, it appeared that at some time during prior years the waters of this unnamed tributary may have been used for the purposes for which a right is herein asserted.

At the time of the examination the premises were unoccupied and in a state of deterioration. A section of galvanized water pipe and an outside faucet were observed, however, there was no water in the pipe line. A careful inspection of the creek channel upstream from the house failed to disclose the intake of the pipe line, although a water-worn excavation in the creek channel may have been the remains of the diversion works. The creek was dry at the time, August 9th, and it appeared that there had been no flow for some time.

An area of between 5 and 10 acres, situate on the hillside east of the buildings, bore evidence of having been cropped to strawberries during some time in the past but had reverted to an overgrowth of weeds and briars, indicating several years of non-use.

No evidence was observed which would indicate any irrigation use although a pump and sprinkler system could have been used. An inspection of the creek channel failed to disclose any indication of a dam or pump sump, or pump location.

From statements made by claimant in his statement and proof of claim, it appears that such prior use as may have been made of the waters of said unnamed tributary by former owners of the property, has been discontinued for several years and that claimant is now contemplating certain development and water usage at a future date.

Taking into consideration all evidence obtained in the field investigation, together with certain statements of claimant in his statement and proof of claim it appears that said asserted usages of the waters of the unnamed tributary of McKay Creek, have been discontinued and abandoned for more than the statutory period of five years, therefore the asserted rights

as set out in statement and proof of claim number 38 hereby are denied.

-39-

HUTCHISON, Charles & Wealtha - Proof #61

Claimants have asserted a right to the use of the waters of a spring located on the south 15.0 acres of the SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 11, T. 2 N., R. 3 W., W.M. for domestic and stock use under priority date of April 11, 1898.

Said claim is accompanied by the sworn and notarized affidavits of Arnold Hutchison, 72 years of age and Irvin Hutchison, 71 years of age; each asserting that they have lived in close proximity to claimant's premises and have personal knowledge of the use of the waters of said spring for domestic and stock purposes, as claimed, since April 1898.

From an inspection of the premises made on August 7, 1956 and a re-inspection made on July 7, 1958 at which time claimant was contacted personally, said spring was found to be located approximately 75 feet north and 30 feet east of the southwest corner of said SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 11, upon claimant's property.

It appears that stock use is by drinking directly from the overflow from said spring, that domestic use was made by hauling water from said spring to the original homesite located about the center of the property. A new residence was built many years ago and the original house removed. A shallow well was dug near the new house and has been used for domestic water during the intervening years. Claimant stated that it was his intention to re-develop said spring and pump water therefrom for domestic use at a later date.

It appears that beneficial use has been made of the waters of said spring for stock watering purposes to the extent of 14 head of livestock, and that no contest has been filed in this proceeding against said claim, therefore, subject to the provisions of Finding 58 herein, claimants are allowed a right for stock water upon their property, herein after described, to the extent of the quantity required for the sustenance of 14 head of livestock, under priority of 1898, said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

Relative to the asserted right for domestic use, it appears from the evidence disclosed, that such use as may have formerly been made by hauling water for domestic use, was discontinued and abandoned when the new home was built and a shallow well dug to provide domestic water, therefore, said asserted right to the use of water from said spring for domestic purposes is hereby denied. Claimant may initiate such a right by applying to the State Engineer for a permit, under the provisions of the Oregon Water Rights Act.

-40-

IVORY, Elsie Kelley - Proof # 64

Claimant has asserted a right to the use of the waters of West Fork Dairy Creek for domestic and stock use within the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 4, T. 2 N., R. 4 W., W.M. under priority of 1905.

Inspections of the premises made on July 12, 1956 and on July 11, 1958 disclosed that domestic water was secured from a dug well near the residence, by means of an electric pressure system and 1 $\frac{1}{2}$ inch intake and 1 inch discharge pipes leading to the residence.

There were no stock being pastured on the premises during the time of the inspections, however there was evidence of stock having been allowed to drink directly from the creek. Claimant asserted that, to her knowledge, 5 cows and 2 horses were the maximum head of livestock pastured upon the premises.

It appears that beneficial use of the waters of West Fork Dairy Creek has been made for stock watering purposes by said stock drinking directly from the creek channel upon the premises owned by claimant. Therefore, subject to the provisions of Finding 58 herein, claimant

is allowed a right to the use of sufficient water for the sustenance of 7 head of livestock, from the waters naturally flowing in West Fork Dairy Creek upon the property herein after described, under the priority of 1905, said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

It further appears that water for domestic household needs is secured from a private well situate upon the premises, therefore, the asserted right for domestic use from the waters of West Fork Dairy Creek hereby is denied.

-41-

KRAUTSCHEID, Peter & Helen - Proof # 68.

In statement and proof of claim number 68, claimants Peter and Helen Krautscheid have asserted a right to the use of the waters of an unnamed spring and stream flowing across the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 26, T. 2 N., R. 3 W., W.M. for the watering of 16 head of livestock by drinking from said stream, under date of priority of 1886.

Said claim is accompanied by the sworn and notarized affidavits of Jacob Miller, who asserts that he has personal knowledge of such use as claimed since 1906; of Arnie E. Dickson who asserts that he resided in the adjoining Section 23 from 1903 until 1919 and has personal knowledge of such use for stock watering, as claimed; and of Claud Davis who asserts that he knows personally that said stream was used for stock watering purposes, as claimed since prior to 1909.

From an inspection of the premises made on August 7, 1956 and a re-inspection made on July 7, 1958, it was disclosed that the spring is located about 10 feet north of the Krautscheid property, being within the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 23, T. 2 N., R. 3 W., W.M., approximately 10 feet north and 800 feet west of the quarter section corner between said Sections 23 and 26. That the waters of said spring flow in a natural channel across the northwest corner of said NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 26 and thence into an unnamed tributary of East Fork Dairy Creek.

It appears from the evidence disclosed, that claimants and their predecessors in interest, have made beneficial use of the waters of said spring and stream as same flow across claimants property, for stock watering purposes, as claimed, and that no contest has been filed in this proceeding against said statement and proof of claim numbered 68, as provided by law. Therefore, subject to the provisions of Finding 58 herein, claimants are allowed a right to the use of sufficient water for the sustenance of 16 head of livestock by allowing said stock to drink directly from the waters of said unnamed stream as same flows across claimants property, under priority date of 1886. Said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-42-

KRUSE, Clarence D. - Proof #69

In statement and proof of claim number 69 a right is asserted to the use of the waters of an unnamed spring located within the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 6, T. 2 S., R. 1 E., W.M., on claimants property, for domestic and stock use, under priority of 1868.

It appears that said spring has been developed and the waters thereof pumped by electric pressure system to the residence of claimant within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, said Section 6, and to the residence of claimants brother Herbert V. Kruse, within the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of adjoining Section 7, said township and range, who filed herein statement and proof of claim number 70. That water is also piped by gravity to a barn for stock use on the adjoining property of claimants brother, Herbert V. Kruse.

It further appears that the waters of said spring have been used jointly by the owners of the properties involved in claims numbered 69 and 70 but that said stock use is entirely upon the property of Herbert V. Kruse, as asserted in his claim number 70.

It appears that beneficial use of the waters of said spring for domestic needs has been made by claimant herein and that no contest has been filed in this proceeding against said claim, therefore, subject to the provisions of Finding 54 herein, claimant Clarence D. Kruse is allowed a right to the use of not to exceed 0.01 cubic foot per second of the waters of said unnamed spring, for domestic use within the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 6, T. 2 S., R. 1 E., W.M., under priority of 1868, said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

The asserted right for stock use under this claim is hereby denied for the reason that such asserted use is not being made upon the property owned by claimant herein.

-43-

LORENZ, Victor - Proof #72

Claimant has asserted a right for stock use from the waters of an unnamed tributary to Tualatin River upon the SW $\frac{1}{4}$ NW $\frac{1}{4}$ and NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 16, T. 1 S., R. 3 W., W.M. under priority date of 1878.

It appears that such stock use has always been accomplished by the stock drinking directly from the stream as it flows across the land where said stock are being pastured.

Claimant asserts that he and his predecessors in interest have always watered stock from said unnamed stream, but that recently an upstream property owner had interfered with the natural flow of said stream to such an extent as to cause same to become polluted and stagnant.

It appears from the records that on November 20, 1952, applications for permits to store water and to use such stored water for irrigation, were filed in the office of the State Engineer, that permits were duly issued therefore but that subsequently both permits were cancelled, as of May 12, 1954 upon authorization of permittee, and that said permits are of no further force or effect.

It appears that, up to the time of such purported interference, beneficial use of the waters of said unnamed tributary for stock watering purposes had been made by claimant herein and his predecessors, by allowing stock to drink directly from said stream as it flowed across the premises. Claimant asserts that a maximum of 20 head of dairy stock has been pastured on the premises and watered from said stream.

No contest has been filed in this proceeding against said statement and proof of claim numbered 72, therefore, subject to the provisions of Finding 58 herein, claimant is allowed a right for stock watering from said unnamed tributary upon the NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 16, T. 1 S., R. 3 W., W.M. to the extent of sufficient water for the sustenance of 20 head of livestock, under priority of 1878. Said right being more particularly set out in the tabulation of water rights under Finding 69 herein.

-44-

MARSHALL, Tom & Frances; Everett & Clara - Proof #75

In statement and proof of claim number 75, claimants have asserted a right to the use of the waters of Iler Creek for domestic, stock and irrigation of one acre within the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 11, T. 1 N., R. 5 W., W.M. under priority date of 1894.

Said statement and proof of claim was executed on behalf of the above named claimants by claimant Tom Marshall, and is accompanied by his authorization as Attorney in Fact, signed and notarized by Frances, Everett and Clara Marshall.

It appears from the records of the County Recorder that said NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 11, is owned by claimant Tom Marshall. An inspection of the premises made on June 27, 1956 and a re-inspection made on July 1, 1958, disclosed that claimants are two individual families, Tom and Frances residing on the north half of said subdivision and Everett and Clara on the south-half. That each family secures water for domestic needs by gravity pipe lines from

separate springs, each of which is tributary to said Iler Creek. That the spring serving the Tom Marshall residence is located approximately 300 feet south and 500 feet west of the northeast corner of said Section 11, while the spring serving the Everett Marshall residence is located approximately 850 feet south and 750 feet west of said northeast corner of Section 11.

It appears that claimants have made beneficial use of the waters of said springs, tributary to Iler Creek, for domestic household needs, and that such claimed use was not contested in this proceeding, therefore, subject to the provisions of Finding 54 herein, claimants are allowed a right for domestic household uses from said springs, as above located, to the extent of not to exceed 0.01 cubic foot per second for each family from their respective spring, under priority date of 1894.

Claimants' asserted right for the irrigation of one acre of land was found to be a domestic garden located along the channel of Iler Creek near the center of said subdivision, and used jointly by both families. Said garden tract is irrigated by diversion of the waters of Iler Creek on property owned by claimants.

It appears that beneficial use has been made of the waters of Iler Creek in the irrigation of one acre of domestic garden and that said claim for irrigation has not been contested herein, therefore, subject to the provisions of Finding 53 herein, claimants are allowed a right to the use of 0.025 cubic foot per second of the waters of Iler Creek for the irrigation of one acre of land in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 11, T. 1 N., R. 5 W., W.M. under priority date of 1894.

Claimants' asserted right for stock use appears to be by such stock as may be pastured upon the premises drinking directly from Iler Creek as it flows across the premises. Claimants have stated that 9 head of livestock is the maximum number pastured upon said NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 11 at any one time.

It appears that beneficial use of the waters of Iler Creek has been made for stock watering purposes and that such asserted claim has not been contested in this proceeding. Therefore, subject to the provisions of Finding 58 herein, claimants are allowed a right to the use of the waters of Iler Creek for stock watering by drinking directly from said stream, to the extent of the quantity of water required for the sustenance of 9 head of livestock, under priority of 1894.

Claimant's said rights for domestic, irrigation and stock watering, as herein allowed, are more particularly set out and defined in the tabulation of water rights under Finding 69 herein.

-45-

MERZ, George L. & Maude A. - Proof #78

Claimants have asserted, in their statement and proof of claim number 78, a right to the use of the waters of an unnamed spring tributary to the West Fork of Rock Creek and the West Fork of Rock Creek, for domestic and stock requirements upon the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 5, T. 3 S., R. 1 W., W.M. dating from Oct. 21, 1868, being the date of execution of the original U. S. Government deed covering said property.

Said claim is accompanied by the sworn and notarized affidavits of Perry Weston, Lyman Murdock and Cecil Weston, each asserting that they have personal knowledge of such water usage as claimed.

Inspections of the premises were made on May 14, 1956 and on June 16, 1958 from which it was determined that water for domestic use has been secured for years past from two private wells on the premises, therefore said asserted claim for domestic use cannot be recognized herein.

It was observed that the waters of a spring located approximately 500 feet north and 750 feet west of the south quarter section corner of said Section 5, was piped into a stock water trough approximately 100 feet below said spring and also to a new barn located about 350

feet below said spring. At the time of the inspection of May 14, 1956 it was observed that the pipe line to the barn had burst from freezing and had not been repaired and at the time of the inspection on July 16, 1958 said pipe line was still un-repaired and stated to be abandoned.

It appears that stock pastured upon the premises are allowed to drink directly from the stream designated as the West Fork of Rock Creek as same flows across the property. Claimants have stated that 18 head of livestock is the maximum number for which a claim for stock water is asserted.

It appears that beneficial use of the waters of said unnamed spring, as above described and located, has been made by diversion into a stock trough for stock water and that beneficial use of the waters of West Fork Rock Creek has been made for stock watering purposes, and that said rights for stock use have not been contested in this proceeding. Therefore, subject to the provisions of Finding 55 herein, claimants hereby are allowed a right to the use of 0.01 cubic foot per second of the waters of that certain spring, as herein before described and located, to be diverted in to a stock trough for stock use, and a right to the use of the waters of West Fork Rock Creek for stock watering by drinking directly from said stream as same flows across property of claimants, to the extent of sufficient water for the sustenance of 18 head of livestock, subject to the provisions of Finding 58 herein.

Claimants' said rights for stock use, as above allowed, are more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-46-

MILLER, Raymond L. & Norabel - Proof #79

In statement and proof of claim number 79, claimants have asserted a right to the use of the waters of Prickett Creek, tributary of Gales Creek, for the irrigation 3.7 acres in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ and 5.3 acres in the NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 34, T. 1 N., R. 4 W., W.M., domestic use and the maintenance of a pond for fish propagation within said SW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 34, under priority date prior to the year 1909.

Said claim is accompanied by the sworn and notarized affidavits of Fred R. Ranes, S. R. Vermilyea, Edwin C. Allen, J. D. Rode, Melissa Prickett and Chas Williams, which affidavits bear the endorsement of R. N. Tupper, County Clerk of Washington County, attesting that said affidavits were received for record on Jan. 20, 1953 at 10 o'clock A.M. and were recorded at pages 525-536, Book 340, Record of Deeds. Each of said affiants asserts to the effect that he or she has been for many years past, personally acquainted with the property involved herein and of the water usage from Prickett Creek for which a right is asserted in statement and proof of claim number 79.

It appears that one, John B. Prickett, acquired the property herein involved, by purchase about the year 1875 and immediately thereafter constructed his home and established his residence thereon. That he commenced to use the waters of Prickett Creek for domestic needs and for the irrigation of some land. A tannery was also constructed and a large pond as a forebay for a water wheel power plant to furnish power for the tannery. Water was diverted from Prickett Creek into said pond to maintain a stable head for the operation of the power plant when needed.

It appears that said water usage has been continued uninterrupted to the present time, except for the power plant and tannery which were assertedly discontinued in the year 1926. Since that time the pond has been maintained as a fish pond and for recreation.

The premises were inspected on June 27, 1956 and the water usage at that time appeared to be substantially as claimed, except as to the area irrigated.

Domestic use was being made by diversion from the channel of Prickett Creek through 450 feet of 2 $\frac{1}{2}$ inch galvanized pipe, into a pump sump well, thence by pressure system to the house and grounds.

The pond has a surface area of approximately 0.15 acre and capacity of approximately 0.5 acre-foot. A 6" diameter pipe diverts water directly from Prickett Creek into said pond and the overflow from the pond returns to Prickett Creek on claimants' property.

Irrigation is accomplished, partly by hose and sprinklers from the domestic pressure system and partly by overhead sprinkler system by pumping from the pond.

The area presently cleared and considered as irrigated, was 2.2 acres within said SW $\frac{1}{4}$ NW $\frac{1}{4}$ and 0.5 acre within said NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 34, and consisted of the lawn, flowers and shrubbery about the residence and an area of pasture between the lawn and pond.

Claimants do not accept the State Engineer's map as correctly showing the location and extent of the lands irrigated, and have submitted a map prepared by A. R. Sorbel, Registered Land Surveyor No. 314, which shows the lands claimed as irrigated.

It appears that said lands, in excess of the lands classified as irrigated on the State Engineer's map, are lands which are susceptible of irrigation by modern sprinkler irrigation but did not bear any evidence of having been irrigated during past years, either by pumping or gravity diversion of water thereon.

It further appears that the land for which claimants have asserted a right for irrigation, in excess of the acreage classified as irrigated by the State Engineer's field investigation of the premises, are lands which claimants contemplate irrigating in the future. Therefore, a right for the irrigation of such excess acreage being 1.5 acres in said SW $\frac{1}{4}$ NW $\frac{1}{4}$ and 4.8 acres in said NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 34, hereby is denied. Claimants may acquire a right for the irrigation of said lands by proceeding in accordance with the provisions of the Oregon Water Rights Act by applying to the State Engineer for a permit.

It appears that beneficial use of the waters of Prickett Creek has been made for domestic use, the irrigation of 2.7 acres of land and the maintenance of a pond for fish propagation and recreation, and that statement and proof of claim number 79 has not been contested in this proceeding. Therefore, a right is allowed herein to the use of the waters of Prickett Creek for domestic needs in and about the residence of claimants, the irrigation of 2.7 acres of land and the storage of 0.5 acre-feet of water in claimants' pond and the maintenance thereof for fish propagation and recreation, under priority date of 1875, said rights being more specifically set out and defined in the tabulation of water rights under Finding 69 herein.

-47-

ORNDUFF, Robert and Winifred - Proof #87

Statement and proof of claim #87, filed herein by Robert Ornduff on behalf of the record owner of the property involved, Winifred Ornduff, contains an asserted right to the use of the waters of an unnamed spring, head of an unnamed creek tributary to McFee Creek, for domestic and stock use and yard and garden irrigation, under priority date of 1903.

The premises involved herein were inspected on June 12, 1956, and it appears that the unnamed spring to which rights are being claimed herein, is located within the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 25, T. 2 S., R. 3 W., W.M., approximately 500 feet west and 350 feet south of the northeast corner of said NW $\frac{1}{4}$ NE $\frac{1}{4}$, on property not owned by claimants herein.

That water is piped from said spring by gravity to the Ornduff residence and to the dairy barn and a stock water trough nearby.

The records of the County Recorder show the S $\frac{1}{2}$ SE $\frac{1}{4}$ Section 24, T. 2 S., R. 3 W., W.M. to be recorded in the name of Winifred Ornduff, however claimants' answer to item number 28 in statement and proof of claim number 87, "Give description of your land as it appears in your deed." is, "Southeast corner of the Southwest quarter of the Southeast quarter of Section 24, Township 2 South, Range 3 West of the Willamette Meridian."

It appears that beneficial use has been made by claimants, of the waters of said spring,

above located and described, for domestic and stock use and the irrigation of lawns and garden about the residence, and that said claim and water usage has not been contested in this proceeding. Therefore, subject to the provisions of Finding 56 herein, claimants are allowed a right to the use of 0.01 cubic foot per second of the waters of an unnamed spring, for domestic and stock use upon the property described in their statement and proof of claim. Said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-48-

SCHAAD, Benjamin F. - Proof #96

In statement and proof of claim number 96, filed herein by Benjamin F. Schaad, Box 414, Dayton, Oregon, a right is asserted to the use of the waters of an unnamed spring, tributary to Cedar Creek for domestic use under priority date of 1905.

Claimant asserts that the original diversion installed in 1905 served two families, Orba Woodworth and a Mr. Jenkins, who were the original owners, that later, service to three other families was added to the system, which has remained the same to the present time.

An inspection of the premises was made on June 20, 1956 from which it was determined that the spring from which the domestic use under this claim is asserted, is located within the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 14, T. 3 S., R. 2 W., W.M., approximately 575 feet west and 350 feet south of the quarter section corner between Sections 11 and 14, said Township and Range.

That said spring has been cased with a circular, brick spring box, 4 $\frac{1}{2}$ feet in diameter and 8 feet deep. The waters being diverted by pipe into a concrete cistern 6' x 10' x 8' deep, thence by gravity to the five users on the line. At the time of the inspection the water was 2 $\frac{1}{2}$ feet deep in the spring box and 5 feet deep in the cistern.

The five residences being served from this system were, at the time of the inspection on June 20, 1956, a Mr. Lewis, Orba Woodworth and Cammie Canada, all located within that part of the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 14 lying north of the right-of-way of the Southern Pacific railroad; and J. L. Plumb and Benjamin Schaad, both within the east 400 feet of that part of the NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 15 lying north of the Southern Pacific railroad, T. 3 S., R. 2 W., W.M.

It appears that beneficial use has been made of the waters of said unnamed spring, tributary of Cedar Creek, above described and located, for domestic use of five families and that said claim and water usage has not been contested in this proceeding. Therefore, subject to the provisions of Finding 54 herein, a right is allowed to the use of 0.05 cubic foot per second of the waters of said unnamed spring for domestic use in the five residences, within the tracts of land above described, under priority date of 1905. Said right being more specifically set out and described under Finding 69 herein.

-49-

VANDERZANDEN, V. J. - Proof #112

Claimant A.J. Vanderzanden filed herein statement and proof of claim number 112 wherein he has asserted a right to the use of the waters of East Dairy Creek for the irrigation of 75 acres of land under date of priority of 1886.

In said statement and proof of claim claimant states that his asserted right was initiated or based upon "Water power for grist mill and irrigation" and as to steps taken to initiate such right, "Water right acquired from State of Oregon to operate grist mill and irrigate land adjacent to mill", and as to when water was first used for irrigation, "About the time mill was built in 1886."

Unfortunately claimant was killed in an accident while operating a tractor on his farm during June, 1958 and so could not be contacted for further data relative to his statements.

A search of the records of Washington County failed to disclose any reference to

water rights upon the property, although reference is made to a mill known as "Dudleys Mill" in a deed recorded in 1879, when A. S. Dudley acquired the property upon which said mill was located. However said recorded deed did not contain any reference to water rights.

The Legislative session laws of 1885 and 1887 do not record any Legislative grants from the State of Oregon for the operation of a grist mill in Washington County. The Legislative Assembly of 1910 appropriated \$10,000 from the general fund of the State for the use of the Oregon State Agricultural College Experiment Station and it appears that experimental farms were selected for the purpose of conducting irrigation experiments in the Willamette Valley, and claimant's farm may have been one of such experimental farms. However this was subsequent to the enactment of the water code, consequently no right to the use of the waters of East Dairy Creek could be so acquired.

In answer to items 8 and 10 relative to the means of utilizing such claimed water and the date when the construction of the works for such utilization was commenced, claimants answer states, "12" tile line, 2400' long, reverse system" and "1946."

It thus appears that the actual irrigation of the land was commenced in 1946 without first having complied with the provisions of the water code in initiating such usage, and that claimant's statements, as asserted in his claim, are not substantiated by the records.

Therefore, claimant's asserted right to the use of the waters of East Dairy Creek for the irrigation of 75.0 acres of land under priority of 1886 is hereby denied.

-50-

WALL, Howard Milton - Proof #116

In statement and proof of claim number 116 a right is asserted to the use of the waters of Soda Springs and unnamed springs, tributary to Clear Creek, for the irrigation of 5.0 acres of land, livestock and domestic use within the SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 18, T. 1 N., R. 4 W., W.M., under date of priority of about 1890.

It appears that the property and works involved in this claim is that formerly operated and known as "Soda Springs Resort", an amusement park operated for profit, catering to the general public. When inspected on June 28, 1956, in connection with this proceeding, the operation of the premises as a resort appeared to have been discontinued for sometime. The old resort building appeared to be maintained by the present owner as a summer home and week-end retreat.

Two soda springs located within the NW $\frac{1}{4}$ SW $\frac{1}{4}$ said Section 18, were found to be "boxed in" but there was no visible evidence of any means of applying the waters thereof to any beneficial use. There appeared to be no natural watercourse from said soda springs and it is believed that said springs fall within the classification of private springs, not subject to appropriation under the water code, hence, the use of the waters thereof does not fall within the scope of this determination.

The two unnamed streams on the property were not being used for any purpose other than stock having access thereto while being pastured on the lands through which said streams flow.

The only water usage found on the property was that from an improved spring located N. 58° E. 1310 feet from the quarter section corner on the west line of said Section 18. The waters of this spring are diverted into a storage cistern, 12 feet by 12 feet square and 4 feet deep. The water is conveyed by gravity pipe line to the premises where it is used for domestic uses about the buildings, stock water at the barn and for the irrigation of a field near the barn, said to have been a practice field for polo, and the lawn and garden area about the buildings.

From a careful inspection and survey of the premises, the land actually being

beneficially irrigated was found to be a total of 2.0 acres in area, consisting of said polo practice field and the lawn and garden area about the buildings.

Claimant's map, submitted with his statement and proof of claim, shows an area totaling 5.0 acres as being irrigated. From the visible evidence observed on June 28, 1956 and again on June 23, 1958, it appears that the difference of 3.0 acres is land which claimant contemplates irrigating in the future.

It appears that beneficial use has been made of the waters of said spring, located as above described, for domestic use about the buildings, stock use at the barn and the irrigation of 2.0 acres of land, and that no contest has been filed in this proceeding against said claim. Therefore, subject to the provisions of Findings 53 and 56 herein, claimant hereby is allowed a right to the use of 0.035 cubic foot per second of the waters of said spring for domestic use, stock use and the irrigation of 2.0 acres. Said right being more specifically set out and described in the tabulation of water rights under Finding 69 herein.

-51-

WINDOLPH, Carl R. - Proof #123

Claimant has asserted, in statement and proof of claim number 123, a right to the use of the waters of an unnamed stream, tributary to Beaverton Creek, for the irrigation of 24.0 acres within the SE⁴ Section 5, T. 1 S., R. 1 W., W.M. under priority of 1880.

From evidence obtained locally when an inspection was made on October 10, 1957 and again on June 25, 1958, of the property involved in this claim, it appears that a former owner of the property, Mr. Natale Garbarino, who acquired the property in about 1880, used a water wheel and flume system to deliver water for the irrigation of his vegetable truck gardens on the premises. That such usage was continued until about the year 1933 when the property was sold. That the old water wheel and flume were badly deteriorated and un-usable and were finally removed so that, at the time of the inspection on October 10, 1957 no visible evidence of such irrigation works and water usage remained.

The lands were not being irrigated during the time of either of the inspections and there was no evidence of such, nor of any equipment which may have been used to irrigated said lands. It appears that the irrigation of said lands was discontinued about the year 1933 and has not been practiced since that time and up to the date of the second inspection of the premises.

Therefore, it is herein held that any irrigation rights which may have formerly accrued to the premises, have been lost by non-use during more than the statutory period of time, and such asserted right to the use of the waters of said unnamed tributary of Beaverton Creek for the irrigation of 24.0 acres of land, hereby is denied.

-52-

UNITS OF MEASUREMENT OF WATER

Standard units of measurement of water may be divided into two classes, those expressing a definite volume of water and generally used to measure water at rest, and those expressing a rate of flow or head of water in motion.

The units most commonly used are, for volume, the gallon, the cubic foot and the acre-foot. The gallon and cubic foot are ordinarily used in expressing comparatively small volumes of water; the acre-foot is commonly used in the measurement of large volumes of water such as the total quantity used per season for irrigation, or for a period of time in a hydroelectric plant, or the capacity of a reservoir. One acre-foot is the quantity required to cover a surface of one acre in area to a depth of one foot, and is equivalent to 43,560 cubic feet.

The units of measure expressing a rate of flow commonly used are the cubic foot per second and the miner's inch. The cubic foot per second, commonly abbreviated to second-foot or

c.f.s., is a rate of flow which produces a volume of one cubic foot for each second of time, in other words, a volume of one cubic foot of water moving at a rate of one lineal foot per second of time. For example: a rectangular flume twelve inches in width, carrying a depth of 12 inches of water, and placed on such a grade or lateral slope, as to give a mean velocity to the water of one lineal foot per second of time, will produce a flow of one cubic foot per second. Or, that rate of flow which will exactly fill a container of exactly one cubic foot capacity in one second of time. Generally, the cross-sectional area of a conduit in square feet multiplied by the velocity in feet per second will equal the discharge in cubic feet per second.

The miner's inch is seldom used, however, in Oregon it is defined and legally established as 1/40 of a cubic foot per second, or 40 miners inches equals one cubic foot per second. (Gardner v. Wright. 49 Ore 609; 91 Pac. 286.)

The cubic foot per second and miner's inch indicate only a rate of flow. To specify a volume or quantity of water, it is necessary to state the length of time or duration of flow. For instance, a rate of flow of one cubic foot per second will produce in one 24 hour day, as many cubic feet of water as there are seconds in twenty-four hours, or 86,400 cubic feet, equal to 646,317 gallons or 1.983+ acre-feet.

In the determination herein, of the rights to the use of the waters of Tualatin River and its tributaries, the quantity of water is expressed in acre-feet and the rate of diversion is expressed in cubic feet per second, or decimal fractions thereof. The following table shows the rate of flow or diversion in cubic feet per second and the equivalent thereto expressed in other units of measurement:

<u>Cubic Feet Per Second</u>	<u>Gallons Per Minute</u>	<u>Gallons Per 24 Hours</u>	<u>Acre Feet Per 24 hours</u>
0.01	4.48	6,463	0.0198
0.02	8.98	12,926	0.0397
0.03	13.46	19,390	0.0595
0.04	17.95	25,853	0.0793
0.06	26.93	38,779	0.1190
0.08	35.91	51,705	0.1587
0.10	44.88	64,632	0.1983
0.125	56.10	80,790	0.2479
0.20	89.77	129,263	0.3967
0.30	134.65	193,895	0.595
0.40	179.53	258,527	0.793
0.60	269.30	387,790	1.190
0.80	359.06	517,054	1.587
1.00	448.83	646,317	1.983

-53-

DUTY OF WATER, HEAD OF WATER FOR IRRIGATION USE.

Taking into consideration all of the various elements and conditions having a bearing on the quantity of water essential for the irrigation of crops within the basin of the Tualatin River and its tributaries, the duty of water, except where particularly defined in specific findings herein, hereby is fixed at not to exceed 2 1/2 acre-feet per acre during any one irrigation season.

The rate of flow or head of water to be diverted, where not specifically stated in specific findings herein, or definitely fixed in a permit or certificate of water right, hereby is fixed at not to exceed 1/80 of one cubic foot per second for each acre irrigated where the total area irrigated by any claimant herein exceeds ten acres, and where the total area irrigated by any claimant herein is 10 acres or less, the duty shall be as shown in the following table:

1 acre or less	- - - - -	0.025 c.f.s.
2 acres	- - - - -	0.032 c.f.s.
3 acres	- - - - -	0.040 c.f.s.
4 acres	- - - - -	0.050 c.f.s.
5 acres	- - - - -	0.0625 c.f.s.

6 acres	- - - - -	0.075	c.f.s.
7 acres	- - - - -	0.0875	c.f.s.
8 acres	- - - - -	0.100	c.f.s.
9 acres	- - - - -	0.1125	c.f.s.
10 acres	- - - - -	0.125	c.f.s.

Where the area irrigated exceeds one acre and contains a fraction of an acre, the quantity of water allowed shall be computed by interpolation.

It is further provided that the quantity of water which a claimant whose right has been determined herein shall be entitled to divert at any time shall be determined on the basis of the acreage actually prepared for irrigation and to which water may be beneficially applied in the production of crops.

-54-

DOMESTIC USE

Where a claimant in this proceeding asserted a right for domestic purposes and the same was allowed herein, it is to be understood that the claimant has a right to the use of the water for household purposes, the irrigation of a lawn and domestic garden not exceeding one-half acre in area, and water for such domestic animals as are required for the proper sustenance of the family, and where a right was allowed herein for domestic use and a definite quantity of water was not specified in the specific finding herein, the claimant is allowed not to exceed 0.01 cubic foot per second at the point of diversion.

-55-

STOCK USE BY DIVERSION

Where a claimant herein asserted a right to the use of water for stock purposes by diversion and it was allowed herein, it is to be understood that the claimant has a right to the use of the water for such animals as are essential to the proper sustenance of the family and also water for stock when the claimant is engaged in the raising of livestock or when claimant takes in livestock for pasturage. Where a definite quantity of water is not set out in the specific finding herein, the claimant is allowed a right to divert for this use not to exceed 0.01 cubic foot per second; provided, that where claimant was allowed a right herein for irrigation use through the same ditch, pipe line or other means of conveyance, no additional water shall be diverted for stock use while water is being diverted for irrigation purposes.

-56-

DOMESTIC AND STOCK USE

Where a claimant asserted a right to the use of water for both domestic and stock purposes, and it was allowed herein, it is to be understood that domestic use includes only water for household uses and for the irrigation of a lawn and domestic garden not exceeding one-half acre in area, and where a definite quantity of water is not set out in the specific finding herein, the claimant is allowed to divert not to exceed 0.01 cubic foot per second for both domestic and stock purposes.

-57-

DOMESTIC USE, DOMESTIC AND STOCK USE, STOCK USE.

The right to divert and use the waters of Tualatin River and its tributaries as allowed herein for domestic use, domestic and stock use or stock use shall continue throughout the year, except as otherwise provided under Finding 5⁴ herein.

-58-

STOCK USE WHERE NO ARTIFICIAL DIVERSION IS MADE

A number of claimants in this proceeding have asserted rights by appropriation to the

use of water for stock purposes where no artificial diversion of the water is made, the stock drinking directly from the stream as it flows through claimant's lands, or from springs which arise on claimant's lands. In these claims, a definite date of priority is asserted and the number of head of stock declared.

All claimants who have filed herein statements and proofs of claim wherein a right was asserted to the use of water from springs or streams for stock purposes by the stock drinking directly therefrom on lands owned by claimants, and which rights have been allowed herein, hereby are allowed, subject to the provisions herein, sufficient water from the springs, or flowing in the streams from which the respective rights are claimed, for a reasonable number of stock, not exceeding the number of stock as asserted by claimant in connection with his statement and proof of claim. Provided, that at all times there shall remain flowing from said springs and in said streams such a reasonable quantity of water and in such a manner and amount that the streams shall not become stagnant.

-59-

DUTY OF WATER FOR RIGHTS EVIDENCED BY PERMITS AND CERTIFICATES

Claimants who have asserted rights to the use of the waters of Tualatin River and its tributaries, based upon a certificate of water right issued by the State Engineer, recognized herein, or upon a permit issued by the State Engineer, which right has not yet been perfected, are limited to the quantity of water and rate of diversion set out in such certificate or permit. Provided, that the quantity of water for irrigation use, unless otherwise provided in the certificate of water right or permit, is limited to 2½ acre-feet per acre for each acre or fraction thereof, irrigated during any one irrigation season.

-60-

RIGHTS UNDER PERMITS ISSUED BY THE STATE ENGINEER

Subject to the terms and conditions and modifications herein, each and every appropriator of the waters of Tualatin River and its tributaries, who has initiated a right to the use of said waters by filing an application with the State Engineer for a permit, where the right has not been confirmed by the issuance of a certificate of water right, or where in the specific findings herein no reference is made to a certificate of water right, whether a claim was filed in this proceeding or not, shall have such rights thereunder as provided by law, and such rights shall be perfected in the manner provided by law for the completion thereof.

-61-

RIGHTS UNDER LICENSES OF THE HYDROELECTRIC COMMISSION OF OREGON

The rights to the use of the waters of Tualatin River or its tributaries of each and every appropriation initiated by the filing of an application for a license with the Hydroelectric Commission of Oregon, whether a claim has been filed in this proceeding or not, shall be in accordance with the terms and conditions of the license as issued by said commission.

In the distribution of the waters of Tualatin River and its tributaries, the water master shall have the same control over rights asserted in this proceeding which are based upon permits issued by the State Engineer or licenses issued by the Hydroelectric Commission of Oregon, which rights have not been perfected, and over all subsequent rights, as though these rights were definitely defined in this proceeding.

-62-

HEAD-GATES AND MEASURING DEVICES

The owner or owners of any ditch, canal, conduit or other means of diversion and conveyance, whether the rights are determined in this proceeding or subsequently initiated and

perfected, shall maintain to the satisfaction of the water master a substantial head-gate at the point where the water is diverted, which shall be constructed so that it can be set and locked or closed and locked by the water master. And when in the distribution of water by the water master, he may require the installation of suitable head-gates or measuring devices, such owner or owners shall construct and maintain such suitable head-gates or measuring devices at such points along such ditch, canal, conduit or other means of conveyance as may be necessary to assist the water master to determine the quantity of water that is to be diverted into said ditch, canal, conduit or other means of conveyance, from the spring, stream or other source of supply.

If any owner or owners shall refuse or neglect to install such head-gate or measuring device after ten days written notice, the water master may close and post such ditch, canal, conduit or other means of conveyance and the same shall not be opened or any water diverted from the source of supply under the penalties prescribed by law for the illegal opening of head-gates lawfully closed, until the requirements of the watermaster as to such head-gates or measuring devices have been complied with.

-63-

ROTATION

To provide a sufficient rate of diversion or head of water, the watermaster may arrange such system or systems of rotation among the water users as may best be applicable: (1) by giving a greater amount of water to a water user for a proportionately less time; provided, always, that the giving of such greater amount of water does not infringe upon any rights affirmed by this proceeding, or any rights subsequently initiated; (2) where two or more water users agree between themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the water master, and such rotation system does not infringe upon the prior rights of any water user not a party to such rotation plan, the water master shall distribute the water according to such agreement.

To provide a sufficient rate of diversion or head of water where no agreement has been provided for a system or rotation, the water master may arrange such water users in groups or systems of rotation; first, giving the water user who is first in priority in such group or system, a quantity of water equal to the combined appropriations of all water users in said group or system for a length of time bearing the same ratio to the whole time required to make the complete rotation of the whole group of water users as the said appropriation of said first water user bears to the combined appropriations of said group or system, and then, serving the next in priority with a like amount of water for his proportionate time, and so on until all the water users in said group or system have been served, then the distribution of water shall be repeated in the same manner throughout the irrigation season; provided, that no system of rotation shall be established by the water master without the consent of the water users, except by order of the Circuit Court after an opportunity to be heard; provided, always, that such arrangement of groups or systems of rotation shall not interfere or infringe upon the prior right of any water user not a member of such group or system.

The total quantity of water, measured at the source of supply, where rotation is practiced, shall not exceed, except where otherwise provided herein, $2\frac{1}{2}$ acre-feet per acre during any irrigation season.

-64-

IRRIGATION SEASON

The irrigation season for the Tualatin River and its tributaries hereby is fixed as commencing on May 1 and ending September 30 of each year.

PLACE OF MEASUREMENT.

The place of measurement of the water to which any appropriator of the waters of Tualatin River and its tributaries is entitled, whether such appropriation was determined in this proceeding, or was initiated by the filing of an application for a permit with the State Engineer, hereby is fixed to be at the point of diversion from the stream or source of supply.

RIGHTS APPURTENANT TO LAND

The rights to the use of the waters of Tualatin River and its tributaries for irrigation purposes, as herein confirmed, are appurtenant to the lands herein described in connection with such rights, and are limited and confined to the irrigation of the lands described herein, and the priorities of rights herein confirmed confer no right to the use of the waters of said stream and its tributaries on any lands other than those specified tracts to which such rights are herein set forth as appurtenant, and each and every person, association or corporation, or their respective successors in interest, shall be and hereby are prohibited, restrained and enjoined from diverting and using water from said stream or any of its tributaries on any other lands without lawful permit therefore first obtained from the State Engineer.

The rights to the use of water for other useful and beneficial purposes as herein confirmed are appurtenant to the lands and place of use as herein described and the priorities and rights herein confirmed confer no rights to the use of the waters of said Tualatin River or any of its tributaries on any lands other than those specified tracts to which such rights are set forth herein as appurtenant, and each and every person, association or corporation, or their respective successors in interest, shall be and hereby are prohibited, restrained and enjoined from diverting and using water from said stream or any of its tributaries on any other lands without lawful permit or license therefore first obtained from the State Engineer or Hydroelectric Commission of Oregon.

DIVERSIONS GOVERNED BY PRIORITIES AND BENEFICIAL USE

Except as otherwise determined herein, the order of rights of the respective appropriators of the waters of Tualatin River and its tributaries, and the order in which they are entitled to divert and use said water shall be and is according to the date of relative priority of the rights as determined and set forth herein, and the first in order of time according to the date of relative priority shall be and hereby is the first in order of right, and so on, down to the latest priority, and those having prior rights are entitled to divert and use the waters of said stream and its tributaries, when necessary for the irrigation of their respective lands, or other useful and beneficial purposes for which they were allowed a right of use, and in accordance with such right at all times against those having rights of subsequent priority, without let or hinderance, and whenever the water is not required for beneficial use by the appropriator having such prior right to its use for the purpose for which such water was appropriated, he must and shall permit it to flow down the natural channel of the stream as it was wont to flow in its natural course, without hinderance or diversion thereof, and those having subsequent rights are entitled to the use of said waters and to divert the same to the extent of their respective rights, according to the order of priority of their rights; and at all times the water diverted by the appropriator whose rights have been determined herein, shall be beneficially, economically and reasonably used without waste, and no rights of appropriation are hereby confirmed to divert a greater quantity of water into the head of the ditch, canal, conduit or other means of conveyance of the appropriator having a valid right to divert the water

than such appropriator can beneficially use for the purposes to which the water is to be used, in accordance with his right.

-68-

ADJUDICATION OF UNNAMED TRIBUTARY.

On the 26th day of March, 1936, there was filed in the office of the State Engineer an Order of the Circuit Court of the State of Oregon for Washington County, dated March 25, 1936, directing that a determination be made as to the relative rights of the various claimants to the use of the waters of an unnamed tributary and its tributaries, a tributary of Tualatin River, situate within Township 1 South, Ranges 3 and 4 West of the Willamette Meridian.

The State Engineer's Findings of Fact and Order of Determination in such proceeding were entered on April 12, 1938 and were confirmed by Decree of the Circuit Court of the State of Oregon for Washington County, dated February 11, 1939.

The notice of public inspection of claims, served upon all parties who had filed claims in this proceeding were also served by certified mail upon all parties theretofore allowed rights on such unnamed tributary stream (or their successors in interest insofar as they could be ascertained), thereby making them parties to this proceeding. The final decree entered in said former proceeding as well as the claims theretofore filed in this proceeding, were held open to public inspection at the times and places specified in said notice of public inspection.

The parties to said former proceeding shall therefore be bound by the order or decree entered in this proceeding, and the parties to this proceeding shall be bound by the orders and decree entered in said former proceeding, as though both proceedings were had as one, and in the distribution of water under the respective determinations, the rights shall be administered as one stream system, the same as if they had been determined in one proceeding. But nothing herein contained shall be construed as modifying or amending in any way the provisions of the order of determination or decree in said former proceeding.

-69-

ORDER OF DETERMINATION

To summarize and supplement the specific findings herein, the rights of the claimants to the use of the waters of Tualatin River and its tributaries as determined herein, are arranged in tabulated form, with the date of relative priority of such appropriation, the quantity or rate of flow of the water allowed such appropriation, the number of acres to be irrigated by such appropriation, the use or uses to which such water is applied, the name of the ditch or other means by which the water so appropriated has been diverted, the name of the stream or other source from which the water is appropriated and diverted, and the description of the lands upon which the water has been used and is fixed as appurtenant, the tabulated rights of each appropriator being set opposite and following his name and post office address, as stated in his statement and proof of claim, as follows:

Name and Postoffice Address of Appropriator	Date of Relative Priority	Amount Cubic Feet Per Second	Number Acres	Use	Name of Ditch	Stream	Description of Land or Place of Use
29170 Anderson, Erwin J. and Vivian Rt. 4, Bx. 85 Sherwood, Oregon (Proof No. 1) (See Findings 21 and 23)	1900	0.0625	5.0	Irrigation	Unnamed	Unnamed ditches trib. to Rock Cr.	2.4 acres in SW ¹ / ₄ SW ¹ / ₄ Section 20 2.6 acres in NW ¹ / ₄ NW ¹ / ₄ Section 29 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at the SE corner of the SW ¹ / ₄ SW ¹ / ₄ , Section 20, T. 2 S., R. 1 W., W.M.; thence south 3 chains; thence S 55° W. 7 chains more or less to the west line of the tract of land presently owned by claimants; thence north 10 chains more or less to a drainage ditch; thence N 66° E. 6.0 chains more or less to the east line of said SW ¹ / ₄ SW ¹ / ₄ , Section 20; thence south 5.5 chains to the point of beginning.
29171 (Proof No. 2) (See Findings 21 and 22)	1890	0.0562	4.5	Irrigation	Unnamed	Cummings Ditch and Unnamed Ditches	4.5 acres in NW ¹ / ₄ SW ¹ / ₄ Section 21 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at a point on the south line of the north half of Section 21, T. 2 S., R. 1 W., W.M., said beginning point being N. 88° 59' E. 829.5 feet from the NW corner on the west line of said Section 21; running thence along said subdivision line N. 88° 59' E. 556.0 feet; thence south 66.0 feet; thence S. 88° 59' W. 313.5 feet; thence south 1027.9 feet to a point in the center of the Cummings Ditch; thence along center of said ditch N. 79° 05' W. 246.8 feet; thence north 1042.8 feet to the place of beginning.
29172 Anderson, Nels and Eleanor Rt. 4, Box 237 Sherwood, Oregon (Proof No. 3) (See Findings 21 and 23)	1900	0.2875	23.0 <i>See Decree Vol. 16, p. 419</i>	Irrigation	Unnamed	Unnamed ditches trib. to Rock Creek	20.0 acres in SW¹/₄SW¹/₄ ^{SE¹/₄SW¹/₄} Section 20 3.0 acres in NE ¹ / ₄ NW ¹ / ₄ Section 29 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at the SE corner of the James Canfield DLC #41 in Section 20, T. 2 S., R. 1 W., W.M., being a point on the east line of the SE ¹ / ₄ SW ¹ / ₄ , said Section 20; running thence south 3 chains; thence S. 45° W. 23.0 chains to a point; thence west 4.0 chains to the west line of the NE ¹ / ₄ NW ¹ / ₄ Section 29, said township and range; thence north along said west line to the line between sections 20 and 29 and continuing north along the west line of the SE ¹ / ₄ SW ¹ / ₄ said Section 20 to the south line of said James Canfield DLC #41; thence east along said DLC line to the point of beginning.
29173 (Proof No. 4) (See Findings 21 and 22)	1890	0.0450	3.5	Irrigation	Unnamed	Rock Cr.	3.5 acres in SE ¹ / ₄ SE ¹ / ₄ Section 20 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at a point 10.5 rods west of the section corner common to Sections 20, 21, 28 and 29, T. 2 S., R. 1 W., W.M. running thence west 68.28 rods; thence north 10.5 rods; thence east 68.28 rods; thence south 10.5 rods to the point of beginning.
29174 Aschwanden, Herman J. and Gertrude. Route 4, Box 193 Sherwood, Oregon (Proof No. 5) (See Findings 21 and 23)	1907	0.0688	5.5	Irrigation	Unnamed	Hedge Cr.	0.3 acre in SW ¹ / ₄ SW ¹ / ₄ 5.2 acres in SE ¹ / ₄ SW ¹ / ₄ Section 22 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at a point on the south line of Section 22, T. 2 S., R. 1 W., W.M. 3.5 chains west of the south quarter corner of said Section 22; thence west along said south section line 17 chains to a point; thence N. 41° E. 6 chains to a point; thence east 14 chains more or less to a point; thence S. 28° W. 5 chains more or less to the point of beginning.
29175 Atrops, Godfrey F. Box 35 Sherwood, Oregon (Proof No. 6) (See Finding 58)	1899			Stock direct 16 head		West Fk. Chicken Creek	NW ¹ / ₄ NE ¹ / ₄ and SW ¹ / ₄ NE ¹ / ₄ Section 25 T. 2 S., R. 2 W., W.M.

Name and Postoffice Address of Appropriator	Date of Relative Priority	Amount Cubic Feet Per Second	Number Acres	Use	Name of Ditch	Stream	Description of Land or Place of Use
29176 Bake, Aubrey Ross Route 1 Box 195 Banks, Oregon (Proof No. 7) (See Finding 56)	1900	0.01		Domestic and Stock	1" pipe	Unnamed spring in SE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 7	NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 18 T. 2 N., R. 3 W., W.M.
29177 Bamford, J. R. Route 1 Box 327 Forest Grove, Oregon (Proof No. 8)	1905	0.0271	1.3	Irrigation	Unnamed	Normandin Spring Branch	1.3 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 9 T. 1 N., R. 4 W., W.M. Being within the tract of land described as follows: Beginning at a point 800 feet east and 825 feet north of the quarter section corner between Sections 8 and 9, T. 1 N., R. 4 W., W.M.; running thence east 520 feet more or less to the west r/w of county road; thence south along said r/w 200 ft; thence west 520 feet more or less; thence north 200 feet to the point of beginning.
29178 Bateman, Louis K. 781 Menlo Drive Salem, Oregon and Bateman, Charles R. Gales Creek, Oregon (Proof No. 9)	1903	0.02		Domestic and Stock	Pipe line	Unnamed Spring Branch	SW $\frac{1}{4}$ SE $\frac{1}{4}$ and SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 26 T. 2 N., R. 5 W., W.M.
Blatter, Edwin T. and Margaret L. 8212 S.W. Barnes Rd. Portland 1, Oregon (Proof No. 10)	Right acquired under State Engineer's Permit No. 13191, Certificate No. 19996.						
29179 Borchers, Bertha Route 4 Sherwood, Oregon (Proof No. 11) (See Finding 23)	1900	0.1375	11.0	Irrigation	Unnamed	Unnamed trib. to Rock Creek	11.0 acres in NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 29 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at the north west corner of Section 29, T. 2 S., R. 1 W., W.M.; running thence east along the north line of said Section 29, 14 chains more or less to the east line of claimant's land; thence south 7 chains more or less to an open ditch; thence westerly along said ditch to the west line of said Section 29; thence north along said west section line 8 chains more or less to the point of beginning.
29180 Borland, A. W., Sr. Route 1 Box 118 Sherwood, Oregon (Proof No. 12) (See Finding 58)	1850			Stock direct. 15 head		Saum Cr.	SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 20 T. 2 S., R. 1 E., W.M.
29181 Brickley, Fred Route 3, Box 85 Sherwood, Oregon (Proof No. 13)	1906	0.025	0.33	Irrigation		Unnamed trib. to Cedar Cr.	0.33 acre in SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 1 T. 3 S., R. 2 W., W.M. Being within the tract of land described as follows: Beginning at the northeast corner of the south half of the northeast quarter of Section 1, T. 3 S., R. 2 W., W.M.; thence west 26 $\frac{3}{5}$ rods to a stake on the East line of the railroad r/w; thence southwesterly along said east r/w line 50 rods to a stake; thence east 61 $\frac{3}{5}$ rods to the East line of said Section 1; thence north 35 rods and 15 feet to the place of beginning.
29182 Brooke, Ben F. Route 1 Box 197 Cornelius, Oregon (Proof No. 14)	1886	0.01		Domestic	Pipe line	Unnamed Spring in SE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 28	NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28 T. 3 N., R. 3 W., W.M.
Brown, Blaine and Vera L. et al. Forest Grove, Oregon (Proof No. 15)	Rights acquired under State Engineer's Permit No. 8849, Certificates No. 14092 and 14093						
29183 Buckley, Ralph & Fae Route 1 Box 287 Forest Grove, Ore. (Proof No. 16) (See Finding 58)	1875			Stock direct 45 head		Unnamed spring stream	SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 23 T. 1 N., R. 4 W., W.M.

Name and Postoffice Address of Appropriator	Date of Relative Priority	Amount Cubic Feet Per Second	Number Acres	Use	Name of Ditch	Stream	Description of Land or Place of Use
29134 (Proof No. 17) (See Finding 56)	1875	0.01		Domestic and Stock	Pipe line	Unnamed spring in NE/4NW/4 Section 23	NE/4NW/4 Section 23 T. 1 N., R. 4 W., W.M.
29135 Cereghino, David and Gerda Route 4 Sherwood, Oregon (Proof No. 18) (See Findings 21 & 22)	1890	0.10	8.0	Irrigation	Unnamed	Cummings Ditch trib. to Rock Cr.	1.5 acres in NW/4SW/4 6.5 acres in SW/4SW/4 Section 21 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at an iron pipe, S. 89° 01' W. 1762.5 feet from the quarter corner on the south line of Section 21, T. 2 S., R. 1 W. W.M.; thence S. 89° 01' W. 214.5 feet to an iron pipe; thence north 1618.5 feet to an iron pipe; thence north 7.0 feet to the center of the present Cummings Ditch; thence S. 79° 05' E. 218.4 feet to a point in said ditch; thence south 7.0 feet to an iron pipe; thence south 1573.3 feet to the place of beginning.
29136 (Proof No. 19)	1890	0.2688	21.5	Irrigation	Unnamed	Rock Cr.	2.5 acres in NW/4NW/4 Section 28 15.5 acres in NE/4NE/4 3.5 acres in SE/4NE/4 Section 29 T. 2 S., R. 1 W., W.M.
(See Findings 21 and 22)	1890	0.0688	5.5		Unnamed Ditches trib. to Rock Cr.		5.5 acres in NW/4NW/4 Section 28 T. 2 S., R. 1 W., W.M. Being within the tract of land described as follows: Beginning at the quarter section corner on the line between Sections 28 and 29, T. 2 S., R. 1 W., W.M.; running thence along the line between the north and south halves of said Section 29, N 89° 34' W. 660.9 feet; thence N. 0° 02' E. 1314.0 feet; thence S. 89° 50' E. 99 feet to an iron corner; thence N. 0° 13' E. 1320 feet to a point on the north line of said Section 29; thence along said northline N 89° 38' E. 379.5 feet to an iron pipe; thence S. 17° 34' W. 163.1 feet; thence S. 89° 38' E. 230.5 feet to a point on the line between said Sections 28 and 29; thence N. 89° 31' E. 406 feet to a point; thence S 2482.6 feet to a point on the line between the north and south halves of said Section 28; thence along said line S. 89° 44' W. 409.1 feet more or less to the point of beginning.
29137 (Proof No. 20) (See Finding 58)	1900			Stock direct 20 head		Rock Cr.	NE/4NE/4 and SE/4NE/4 Section 29 T. 2 S., R. 1 W., W.M.
29138 Cereghino, John and Gladys Route 4 Sherwood, Oregon (Proof No. 21) (See Finding 23)	1890	0.0875	7.0 12.1	Irrigation	Unnamed	Rock Cr.	12.1 7.0 acres in SW/4SW/4 Section 28 T. 2 S., R. 1 W., W.M. said Section 28. See Decree: Vol. 16, p. 419 Being within the W/2 SW/4 SW/4 of
29139 (See Finding 58)	1890			Stock direct 20 head		Rock Cr.	SW/4SW/4 Section 28 T. 2 S., R. 1 W., W.M.
Cereghino, John and Gladys	1890	0.130	10.4	Irrigation	Unnamed	Rock Creek	0.7 acre in NE/4SE/4 9.7 acres in SE/4SE/4 Section 29 T. 2 S., R. 1 W., W.M. Being within the east half of the E/2 SE/4 said Section 29 lying south of the Southern Pacific Railroad r/w.
29130 Cereghino, James and Christina Route 4 Sherwood, Oregon (Proof No. 22) (See Findings 21 and 23)	1890			Stock direct 20 head		Rock Cr.	NE/4SE/4 and SE/4SE/4 Section 29 T. 2 S., R. 1 W., W.M. Within the above described tract of land.
