

BEFORE THE STATE ENGINEER OF OREGON

Polk and Benton Counties

IN THE MATTER OF THE DETERMINATION)
OF THE RELATIVE RIGHTS TO THE USE OF)
THE WATERS OF LUCKIAMUTE RIVER AND ITS)
TRIBUTARIES, POLK AND BENTON COUNTIES)

FINDINGS OF FACT
AND
ORDER OF DETERMINATION

Now at this time the above-entitled matter coming on for consideration by the State Engineer, and it appearing that all evidence and testimony have been taken in the above-entitled proceeding, and the State Engineer having carefully considered all such evidence and testimony and the engineering data and information gathered in accordance with law, and being fully advised in the premises, makes and orders to be entered of record in his office the following:

FINDINGS OF FACT AND ORDER OF DETERMINATION

-1-

The watershed of the Luckiamute River and its tributaries is a rather small basin comprising the lower half of Polk County and the upper third of Benton County. It is bounded on the west by the Coast Range, on the east by the Willamette River, and on the north and south by unnamed ridges running from Fanno Peak and Green Mountain on the Coast Range divide to the Willamette forming a basin primarily oval in shape.

The Luckiamute River, a tributary of the Willamette River, has its beginning in Township 9 South, Range 7 West, W.M., its highest point of drainage being from Monument Peak at elevation 3,246 feet, flowing thence in a counterclockwise, semicircular direction down and around the base of the above named peak for a distance of approximately five miles, picking up the drainage from the Coast Range, into Section 19, Township 9 South, Range 7 West, W.M.; thence southeasterly for a distance of about ten miles into Section 29 and 30, Township 10 South, Range 6 West, W.M.; at which point the stream turns sharply in a northerly course through Kings Valley for about five miles, thence northeasterly for about eight miles to the confluence of the Little Luckiamute River in Section 15, Township 9 South, Range 5 West, W.M.; thence easterly for about four miles, thence southerly and southeasterly for about five miles; thence northerly for about two miles to its confluence with the Willamette River in the SW $\frac{1}{4}$, Section 26, Township 9 South, Range 4 West, W.M.; approximately seven miles north of the town of Albany.

This basin comprises an area of approximately 310 square miles of which only about eight square miles in the drainage of the main stream and about eleven square miles of the drainage of the Little Luckiamute River is above 2,000 feet elevation.

The Little Luckiamute River, the main tributary of the Luckiamute River, arises on the easterly slope of the Coast Range in Township 8 South, Range 8 West, W.M., on the easterly slope of Fanno Peak and the southerly slope of Riley Peak at an elevation of about 3,300 feet; thence flowing in an east southeasterly direction for about 18 miles to its confluence with the Luckiamute River in Section 15, Township 9 South, Range 5 West, W.M. The major tributaries to the Little Luckiamute River, in downstream order, are: Berry Creek, Waymire Creek, Teal Creek and Cooper Hollow Creek.

The major tributaries to the Luckiamute River, other than the Little Luckiamute River, in order of their confluence, in downstream order, are: Vincent Creek, Plunkett Creek, Price Creek, Maxfield Creek, Jont Creek and Soap Creek.

The Luckiamute River is a perennial stream with its run-off derived principally from precipitation in the form of rain, and some snow melt from the Coast Range likely to occur in March, varying with the seasons.

-2-

That on the 11th day of December, 1950, there was filed with the State Engineer a petition for the determination of the waters of the Little Luckiamute River, tributary of the Luckiamute River, signed by E. B. Hamilton, a user of said stream, petitioner praying that a determination of the relative rights of the various claimants to the waters of said stream system be made by the State Engineer in accordance with the provisions of the Oregon Water Rights Act.

That the State Engineer thereafter fixed a time for the making of the necessary surveys and examinations and the beginning of the taking of such testimony as would enable him to determine the relative rights of the various claimants to the use of the waters of the Luckiamute River and its tributaries, as provided by law.

-3-

That a notice was prepared by the State Engineer setting forth the date on or about which the State Engineer, or his assistants, would begin the investigation of the flow of water in the Luckiamute River and its tributaries, and the existing works for the utilization of the waters thereof; and said notice was published in two issues of each of the following newspapers:

The Polk County Itemizer-Observer, Dallas - Published each Thursday

Corvallis Gazette-Times, Corvallis - Published daily except Sunday

That each of said newspapers are of general circulation in their respective localities and that complete coverage of the Luckiamute River drainage basin was obtained. That said two issues of said newspaper were those of June 4, and June 11, 1970, the date

of the last publication being more than ten days prior to the date fixed for the beginning of the taking of measurements and the making of investigations of said stream system by the State Engineer, as provided by law.

-4-

That the State Engineer did send by certified mail to each person, firm or corporation, owning or being in possession of lands in, or bordering on or having access to said stream or its tributaries, in so far as said claimants and owners and persons in possession could reasonably be ascertained, a notice similar to such published notice, and included therewith an explanatory statement and a blank form upon which the claimant or owner could prepare in writing his notice of intention to file a statement and proof of claim of his right to the use of the waters of said Luckiamute River and its tributaries, if any he had.

-5-

That the following named persons, firms or corporations were duly notified of the proceeding by certified mail, as provided by law, of the commencing of the investigations by the State Engineer, or his duly authorized assistants, and were furnished an explanatory statement and pamphlet of information and a form upon which to declare their notice of intention to file a claim to the use of the waters of said Luckiamute River and its tributaries:

That duly qualified assistants to the State Engineer did proceed to make examinations, surveys and measurements of said Luckiamute River and its tributaries, and of ditches, canals and other works diverting water therefrom, and surveys of the lands irrigated, and gathered such other data and information as were essential to the proper determination of the relative rights of the parties interested, which observations and measurements were reduced to writing and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats, showing with substantial accuracy, the location of all streams in the drainage basin, the location of each canal, ditch or other means of conveyance of appropriated water and the points of diversion thereof, and the number of acres of land being irrigated in each legal subdivision, or other character of use of water, prints of said maps or plats being on file and a part of the record herein.

That as soon as practicable after the examinations and measurements were completed, as described in the preceeding finding, the State Engineer did prepare a notice setting forth a place and time certain when he would begin the taking of statements and proofs of claim as to the relative rights of the various claimants to the use of the waters of said Luckiamute River and its tributaries; that said notice was published in two issues each of the following named newspapers, The Polk County Itemizer-Observer, printed and published weekly at Dallas, Polk County, Oregon; and the Corvallis Gazette-Times, printed and published daily except Sunday at Corvallis, Benton County, Oregon.

Said issues of each newspaper being those of June 3 and 10, 1971, the date of the last publication being at least thirty days prior to the first date set for the taking of statements and proofs of claim by the State Engineer.

That the State Engineer did send by certified mail to each person, firm or corporation who had filed a declaration of intention to file a claim to the use of the waters of Luckiamute River and its tributaries in this proceeding, in response to the notice described in Finding 4 above, a notice similar to such published notice described in the preceeding finding, setting forth the date when the State Engineer, or his authorized assistants, would receive the statements and proofs of claim to the use of the waters of said stream and its tributaries. That said notice was mailed at least thirty days prior to the date set therein for receiving of said statements and proofs of claim in each instance. And the State Engineer did include with each notice a blank form upon which the claimant or owner could prepare in writing, all the particulars necessary for the determination of his right, under oath; and a pamphlet of information for water users in connection with the preparation of their statements and proofs of claim and with the adjudication of water rights.

That the times and places where the State Engineer, or his duly authorized assistants, did appear and receive the statements and proofs of claim of the various parties, were fixed in said notice as follows:

On Thursday, July 15, and Friday, July 16, 1971, in Room No. 14, Old Building, Polk County Courthouse, Dallas, Oregon;

And for a period of 10 days, beginning with Monday, July 19, and ending with Friday, July 30, 1971, at the office of the State Engineer, 1178 Chemeketa Street N. E., Salem, Oregon.

That the following named persons, who had filed their notice of intention to file a statement and proof of claim, were duly notified by certified mail, as provided by law, of the commencing of the taking of statements and proofs of claim of their rights to the use of the waters of said Luckiamute River and its tributaries:

DUTY OF WATER, HEAD OF WATER, FOR IRRIGATION USE

Taking into consideration all of the various elements and conditions having a bearing on the quantity of water essential for the irrigation of crops within Luckiamute River and its tributaries, the duty of water, except where particularly defined in specific findings herein, hereby is fixed at not to exceed 2.5 acre feet per acre during any one irrigation season.

The rate of flow or head of water to be diverted, where not specifically stated in specific findings herein, or definitely fixed in a permit or certificate of water right, hereby is fixed at not to exceed 1/80 of one cubic foot per second for each acre irrigated.

It is further provided that the quantity of water which a claimant whose right has been determined herein shall be entitled to divert at any time shall be determined on the basis of the acreage actually prepared for irrigation and to which water may be beneficially applied in the production of crops.

DUTY OF WATER FOR RIGHTS EVIDENCED BY PERMITS AND CERTIFICATES

Claimants who have asserted rights to the use of the waters of Luckiamute River and its tributaries, based upon a certificate of water right issued by the State Engineer, recognized herein, or upon a permit issued by the State Engineer, which right has not yet been perfected, are limited to the quantity of water and rate of diversion set out in such certificate or permit. Provided, that the quantity of water for irrigation use, unless otherwise provided in the certificate of water right or permit, is limited to 2.5 acre feet per acre for each acre or fraction thereof, irrigated during any one irrigation season.

RIGHTS UNDER PERMITS ISSUED BY THE STATE ENGINEER

Subject to the terms and conditions and modifications herein, each and every appropriator of the waters of Luckiamute River and its tributaries, who has initiated a right to the use of said waters by filing an application with the State Engineer for a permit, where the right has not been confirmed by the issuance of a certificate of water right, or where in the specific findings herein no reference is made to a certificate of water right, whether a claim was filed in this proceeding or not, shall have such rights thereunder as provided by law, and such rights shall be perfected in the manner provided by law for the completion thereof.

DOMESTIC USE

Where a claimant in this proceeding asserted a right for domestic purpose and the same was allowed herein, it is to be understood that the claimant has a right to the use of water for household purposes and water for such animals as are required for the proper sustenance of the family.

If specifically listed, domestic use shall include the irrigation of a lawn and domestic garden.

STOCK USE BY DIVERSION

Where a claimant in this proceeding asserted a right to the use of water for stock purposes by diversion and it was allowed herein, it is to be understood that the claimant has a right to the use of the water for such animals as are essential to the proper sustenance of the family and also water for stock when the claimant is engaged in the raising of livestock or when the claimant takes in livestock for pasturage and is limited to the use of such quantity of water as is necessary for the number of stock claimed;

provided that where the claimant was allowed a right herein for irrigation use through the same ditch, pipeline or other means of conveyance, no additional water shall be diverted for stock use while water is being diverted for irrigation purposes.

-61-

STOCK USE WHERE NO ARTIFICIAL DIVERSION IS MADE

A number of claimants in this proceeding have asserted rights by appropriation to the use of water for stock purposes where no artificial diversion of water is made, the stock drinking directly from the stream as it flows through claimants lands, or from springs which arise on claimants lands. In these claims, a definite date of priority is asserted and the number of head of stock declared. The Oregon Water Code is based on the Appropriation Doctrine which requires a physical diversion of a measurable quantity of water for beneficial use at a specific location. Stock drinking directly from a stream does not meet all the requirements of an appropriative right. The accessibility of water for this purpose was a prime consideration in the claiming of land by the early settlers of the Oregon country. Therefore, this use, which is a benefit to the claimant, is hereby recognized and made a matter of record, as a privilege but is not an appropriative right subject to change in use, place of use, or point of diversion.

All claimants who have filed herein statements and proofs of claim asserting a right to the use of water from springs or streams for stock purposes by stock drinking directly therefrom on lands owned by claimants, and which rights have been recognized herein, hereby are allowed, subject to the provisions herein, sufficient water from the claimed source for a reasonable number of stock, not exceeding the number of stock asserted by claimant in connection with his statement and proof of claim.
