

IN THE CIRCUIT COURT OF THE
STATE OF OREGON FOR
JACKSON COUNTY.

IN THE MATTER OF THE DETERMINATION OF THE RELATIVE RIGHTS OF THE VARIOUS CLAIMANTS TO THE WATERS OF ROGUE RIVER AND ITS TRIBUTARIES, ABOVE THE MOUTH OF THE ILLINOIS RIVER, IN JACKSON, JOSEPHINE AND CURRY COUNTIES.

FINAL DECREE

Now, at this time the above entitled matter coming on for hearing upon the Findings of Fact and Order of Determination of the State Water Board herein, including supplemental findings of the said Board on file herein, and the exceptions to said original findings and supplemental findings, and the Court having heretofore made findings of fact and conclusions of law herein in certain particulars, modifying the said Findings of the said Board, and in other respects confirming the same, and the Court having filed its said Findings of Fact and Conclusions of Law in the above entitled proceeding, and being fully advised in the premises.

NOW THEREFORE, Based upon the testimony and evidence and records in the above entitled proceeding and Findings of Fact and Conclusions of Law so made by the Court herein, it is now hereby CONSIDERED, ORDERED and DECREED, as follows, to-wit:

1.

That Rogue River is a natural water course, and so far as said stream is involved herein, is a non-navigable water course, flowing through Jackson, Josephine and Curry Counties, Oregon; that this decree includes Rogue River and its tributaries named in the tabulated statement of rights hereinafter set forth and does not include or affect, adjudicate or determine, any rights or claims to the waters of the Illinois River, or any of its tributary streams, which last-mentioned waters and the relative rights of the several claimants thereto are hereby expressly excluded from consideration, determination or adjudication in these proceedings or by this decree, without prejudice to or effect upon prior or subsequent adjudications or determinations of the relative rights to the said Illinois River or any tributary thereof.

That each and every of the streams named in said tabulated statement herein is a natural, non-navigable water course, and directly or indirectly tributary to said Rogue River.

2.

That Little Butte Creek is a natural non-navigable water course, situate in Jackson County, Oregon, and tributary to Rogue River within said county; that the relative rights of the various claimants to the wa-

ters of said stream are involved in and to be determined by, separate adjudication and determination proceedings now pending in this court; and are expressly excluded from consideration, adjudication or determination in this decree, in so far as said relative rights of said claimants to said waters are concerned; and the said relative rights of said claimants shall be adjudicated and determined in said adjudication proceedings to which they were originally parties, as between themselves, by a decree to be entered therein; that in respect to the rights of each and every claimant whose rights are adjudicated in this decree to the waters of Rogue River or its tributaries, in so far as such rights are relative to, or affect the said waters of Little Butte Creek and its tributaries, and the several claims or rights thereto, this decree is intended to and shall be a final adjudication and determination, with respect to each and every of the rights herein and hereby adjudicated, as to priority and extent of such right hereby determined.

3.

That irrigation is necessary and essential for the profitable production of crops upon the lands described in the statement of rights herein; that the lands irrigated from the streams herein named in said statement, and therein described, are situated within the county indicated in each case, and within water Division No. 1 of the State of Oregon, and the various diversions for said lands are made within said water division and state.

4.

That the following named persons, firms, associations, and corporations, although duly and regularly notified as required by law of the commencement of these proceedings and although afforded opportunity to present their respective claims, and to be heard herein, have failed and neglected to appear in these proceedings, or to submit or offer any proof herein of any right, title, interest, or claim thereto, in or to the use of, or the waters, or flow of the waters of said Rogue River or any tributary thereof involved in these proceedings; that the said persons, firms and corporations hereinafter named being in default herein, as more fully appears from the findings of fact of the State Water Board herein, are hereby declared to be in default, and are not entitled to any right, title, or interest in or to the waters involved in these proceedings, nor any part thereof, nor to any riparian rights, rights by appropriation or prescription or otherwise in respect to the diversion or use of said waters or any thereof, or to appear herein and subsequently hereto assert any right, claim to, or interest in, said waters, or any of them, acquired, initiated or owned by them at or prior to the time of the commencement of these proceedings; and each of said persons firms and

corporations shall be, and hereby is, forever barred and estopped from hereafter asserting any rights heretofore acquired upon said Rogue River or any of its tributaries embraced within these proceedings, and shall be held, and hereby is declared, to have forfeited all rights to use of the waters herein involved, if any he had prior hereto, theretofore claimed by him; the persons, firms and corporations so being in default herein being as follows, to-wit:

7. INCHOATE

That in accordance with the findings and order of determination herein, it is hereby further ordered, considered, adjudged, determined, and decreed that each of the following named persons, firms, associations and corporations, are entitled

to perfect and complete rights of appropriation of the waters herein embraced heretofore initiated by them, as of the priority and to the extent set forth in the tabulated statement of such inchoate or conditional rights below set forth in this paragraph; and to have such right or appropriation, in each case, relate back, upon completion of the right, to the priority set forth in such tabulated statement, if completed in accordance with the limitations in time herein set forth. That each of the following described rights of appropriation is inchoate and conditional in character, and further proof of completion of such right in each case shall be required; that each of said rights of appropriation shall be perfected and completed; and the water thereby appropriated applied to the beneficial use described during or before the irrigation season of 1919, and on or subsequent to the first day of October, 1919, the Superintendent of Water Division No. 1 of Oregon shall take the proofs of the several claimants hereinafter named, or their successors in interest, respecting the completion of said rights and the final application of water to the beneficial use herein named. That the said State Water Board shall thereupon prepare its supplemental findings of fact and order of determination with respect to said inchoate and conditional rights, and the extent to which the same shall have been completed; and that supplemental decree or decrees shall be entered herein, confirming and establishing the said rights of appropriation to the extent that application of the waters appropriated is applied to the beneficial uses designated herein; that water right certificates shall be thereafter issued in accordance with such supplemental decree or decrees.

That for good cause shown the said State Water Board shall have authority to extend the time within which such rights, or any of them, shall be perfected, beyond the limitation of time herein fixed.

That the following is a statement of the name and post office address of each of said claimants entitled to such inchoate right, set forth under the particular stream from which such appropriation is to be diverted; the priority of each such right, provided the same shall be completed as herein conditioned, to which priority such right, if so completed, shall relate back; the quantity of water in cubic feet per second representing the maximum quantity to which such claimant may become entitled upon complete application thereof to the use described, or, if completed in part, such part thereof as shall have been so applied, not exceeding the rate hereinafter limited; the acreage for which each such appropriation in each case was initiated; the use or uses, to which such right is limited; the name of the ditch or ditches; and a description of the lands to which such appropriation shall to the extent completed be and become appurtenant.

That the quantity of water hereunder set

forth in each case shall be a conditional quantity or amount, and shall represent the maximum quantity or amount to which each such claimant may become entitled upon complete application to beneficial use. That upon the expiration of the time herein limited for application of the waters appropriated in each case, the Board shall take proof or evidence and make such necessary investigations as shall be proper for the determination of the maximum quantity of water to which each such appropriator is entitled in proportion to the extent to which each such right shall have been perfected, and shall determine the quantity in each case. In making such determination, in the case of rights for irrigation purposes, the quantity of water to which each such appropriator shall be entitled shall be determined by determining the area of land actually irrigated in each case, within the time herein limited, or lawful extensions of such time, and the acreage thus determined shall be multiplied by the quantity or rate per acre of water allowed in the following statement, which amount of water per acre shall be determined by dividing the maximum quantity of water, as set forth in the following statement, by the maximum acreage of land, as set forth therein. That each of the following named claimants is hereby determined to be entitled to divert the quantity of water per acre continuous flow thus determined for each and every acre of the lands actually irrigated by such claimant, at the time of the entry of this decree, and to have relative priority as of the date hereunder set forth; and shall be entitled to increase the quantity of water diverted, according to the rate so determined, as additional of the lands described opposite such claimant's name shall be actually reclaimed and irrigated; that in distributing the waters embraced herein, the water master shall determine, so far as practicable, the actual area of land irrigated by each claimant named hereunder, and the quantity to which such claimant shall be entitled, determined as herein provided, and the quantity of water thus determined shall represent the maximum quantity, continuous flow, to which such claimant is entitled at the time of such distribution. The quantity of water in no case, however, shall exceed such quantity as such appropriator actually requires for beneficial use, nor the maximum quantity herein allowed per acre, except under a rotation system, as herein provided, and such appropriator shall be entitled to divert and use water only at such times as he shall actually need and require the use of the same for the uses described herein, and when not needed and required by him, the said waters shall be subject to the use of subsequent appropriators, in the order of their priority rights.

That the said statement of inchoate or conditional rights is as follows, to-wit:

8.

The claimants named in paragraph 7 shall complete and perfect their several rights of appropriation within the time herein limited, and shall proceed with due diligence to reclaim their said lands and apply the waters claimed therefor to the irrigation thereof, and to the extent that said rights shall not have been completed and perfected within the time herein limited, or such further time as the Board shall allow, the said claims and inchoate rights shall be deemed to have been forfeited and abandoned. That after final proof shall have been taken respecting the several rights hereinbefore set forth, the Board shall enter its order determining and establishing the extent and area of land reclaimed and actually irrigated of the lands above described in each case, and the quantity of water to which each of said claimants is entitled by virtue thereof, and supplemental decree or decrees shall be entered herein, and thereafter water right certificates in accordance therewith shall be issued.

9.

That the following named claimants have initiated rights of appropriation to the waters of said Rogue River, or its tributaries, under the provisions of Chapter 216, General Laws of Oregon for 1909, by the filing of applications in the office of the State Engineer, and permits have been issued to said claimants by said State Engineer. That said rights shall be completed and perfected in accordance with the terms and conditions of the said permits, or such modifications and extensions thereof of which shall hereafter be made by the State Water Board, and water right certificates shall be issued to said claimants upon proof according to law of the completion of their said rights. That all other applicants not herein named having heretofore made application to the State Engineer under the provisions of said Chapter 216, General Laws of Oregon, 1909, whose rights have not heretofore been abandoned or forfeited by failure to comply with the provisions of said law, or the terms and conditions of permits issued, shall be perfected and completed under the terms and conditions of the permits issued to said claimants or extensions thereof and when completed and perfected, said claimants shall be entitled to the issuance of water right certificates as if they had appeared herein and made proof of their claim. That no person, firm or corporation, or association of persons who shall have heretofore made application to the State Engineer under said statutes shall be deemed to have abandoned or forfeited

any rights of appropriation to the waters herein involved by virtue thereof, by reason of his failure to appear herein and heretofore submit proof of his respective claims to the waters herein involved, and none of said claimants and applicants shall be deemed to be in default herein by reason of said failure. That the names of the claimants and applicants who have appeared herein and submitted proof of their rights under such applications and permits, together with the number of their statement and proof, the date of filing their several applications, the stream from which water is proposed to be diverted, the number of the application, the number of the permit, the use, and if for power the number of horsepower proposed to be developed, and if for irrigation the number of acres proposed to be irrigated, are set forth in the following tabulated statement, to-wit:

10.

That the Golden Drift Mining Company, a corporation, J. A. Wharton, Receiver, is entitled to complete a right of appropriation to the waters of Rogue River for mining and power purposes, to the extent of 600 second feet. The quantity of water which said corporation is entitled to have flow down to its said dam and power plant does not exceed, during the months of August and September 600 second feet of water. That final proof shall be taken as hereinbefore provided, on the completion of said rights and the application to beneficial use of the waters claimed by said claimant, and the quantity of water required by said claimant at said dam for mining purposes shall be thereby determined; provided, that the quantity of water which said claimant is entitled to for power purposes shall include the quantity to which said claimant is entitled for mining purposes. That said claimant has no right and has established no right to the use of the waters of said river for irrigation purposes. That the right hereby confirmed for power purposes does not confer any right upon said claimant to consume or substantially diminish any of the waters diverted or used therefor, but the right of use is limited to the use of the water and the return thereof to the stream after use substantially undiminished in quantity.

11.

That the California-Oregon Power Company is entitled to divert and use not to exceed 1560 second feet of the waters of said Rogue River at its Gold Ray plant during the months of September, October, November, December, January, February, March, April, and May of each year, or such part of said amount of water as the said California-Oregon Power Company needs, requires and actually uses for the development of power at said Gold Ray plant; and not to exceed 1060 second feet of water during the months of June, July, and August of each year, or such part thereof as the said California-Oregon Power Company needs, requires and actually uses for the development of power at said Gold Ray plant during said months; and at all times not to exceed the quantity of ten second feet additional of the waters of said stream at its said Gold Ray plant for the purpose of supplying and operating the fish ladders now maintained and op-

erated at its said Gold Ray dam; and all surplus waters over and above the quantity required to supply the needs and requirements of said California-Oregon Power Company at its said Gold Ray plant, or in excess at any time of 1560 second feet during the months from September 1st to June 1st of each year, and 1060 second feet during the months of June, July and August of each year, and the additional quantity of ten second feet at all times for the operation of its said fish ladders, shall be subject to diversion and use at points above said Gold Ray dam and plant for irrigation, domestic, stock and other beneficial purposes by subsequent appropriators. That the use of the waters of said Rogue River at its said Gold Ray plant by said California-Oregon Power Company confers no right upon said company to consume or substantially diminish the flow of said stream, but that the rights hereby conferred are for the diversion of said waters for the development of power, and the return thereof to the stream below said power plant at its present point of return substantially undiminished in quantity. That the diversion proposed by A. W. Silsby, claimant herein, of the waters of Rogue River under and by virtue of Permit No. 666 issued by the State Engineer of Oregon, and having a priority of January 17, 1910, will not tend in any way to impair or injure the prior rights of said California-Oregon Power Company at its said Gold Ray plant.

That the rights of appropriation of the Table Rock Ditch Company, a claimant herein, and C. H. Veghte and Elizabeth Bergman, claimants herein, of the waters of said Rogue River to the extent set forth in the tabulated statement herein are prior in time and right to any right, title or interest in and to said waters of the said California-Oregon Power Company. That the proposed diversion by B. L. Dodge, a claimant herein, under and by virtue of permit issued from the State Engineer's office, will not tend to in any way impair or interfere with any of the prior rights or use of the waters of said stream of the California-Oregon Power Company.

That the said California-Oregon Power Company, as successor in interest to the Rogue River Electric Company, a corporation, is not entitled to any rights of appropriation claimed within its statement and proof of claim No. 35 in Vol. 1 by virtue of an appropriation attempted to be initiated for the irrigation of certain lands described in the original findings of the State Water Board herein, and the said company has no right to the use of the waters of said river by virtue of said alleged or attempted appropriation for the irrigation of the lands described in said statement and proof of claimant.

12.

- ① That the California Oregon Power Company, a corporation, has the right to divert and to use not to exceed one hundred fifty (150) second feet of the waters of the North Fork of Rogue River for its present needs and requirements in the de-

velopment of power at its Prospect Power plant, situated in the West half (W $\frac{1}{2}$) of Northwest quarter (NW $\frac{1}{4}$) of Section Six (6), Township thirty-three (33) South, Range Three (3) East, Willamette Meridian, in Jackson County, Oregon; and upon the installation of additional unit or units for power development, and the application of the said waters to beneficial use in the development of said power, said company shall be entitled to increase the quantity diverted to a total quantity or amount not exceeding Four hundred (400) second feet. That said appropriation shall be completed during or prior to the year 1920, or within such further time as the State Water Board may, for cause shown, allow, on application made prior to the expiration of the time herein limited. On or after the 1st day of January, 1921, or after the expiration of such further time as the Board shall allow, the Board shall cause proof of the final completion of said right to be taken, and to the extent the same shall have been completed and perfected within the time herein limited, or otherwise allowed as herein set forth, a water right certificate shall be issued to said California Oregon Power Company and the right of said California-Oregon Power Company shall thereupon relate back to the extent thereby confirmed to the date of initiation of said right set forth in the statement of rights herein, to-wit: October 8th, 1904. Such quantity of the waters of said stream within the proposed appropriation as herein limited as shall not have thus been applied within the time hereby limited herein shall revert to the public and be subject to use by subsequent appropriators.

12 $\frac{1}{2}$.

That in the proof filed by G. H. Carner, it is set forth that said claimant derived his right to the use of the waters of Applegate River through the Red Bluff ditch by virtue of a certain deed of right of way, whereby he is entitled for the use of the lands described in the Statemnt of Rights herein to the use of the waters of the Red Bluff irrigating ditch, as then constructed, from seven o'clock A. M. Saturday, until seven o'clock A. M. Sunday, of each week during the summer months. That said right to water is recognized and acknowledged in the proofs of the several owners of said ditch. That in the distribution of the waters of the Red Bluff ditch the said G. H. Carner shall be entitled under a rotation system among the owners of said ditch to the use of such amount of water for the period aforesaid as may be necessary, not exceeding the equivalent for said period of the amount to which he is found entitled in the tabulated statement in continuous flow; that is, the accumulated quantity which said amount in continuous flow will furnish for the period of time during which he is entitled to utilize water from said ditch.

13.

That it appears from the proof and evidence offered by T. J. Mackin, J. R. Mackin and Margaret McCaslin (Proof 580, Vol. 9)

that the owners of the Alta or Steam Beer ditch taking water from Grave Creek have been using the waters flowing in said ditch in accordance with certain agreements, one of said agreements being of record at page 81 of Vol. 1, Mining Deeds of Josephine County, Oregon, and another of said agreements being of record at pages 38 and 39, of Vol. 8, of Mining Records of said Josephine County. That in the distribution of the waters from said ditch the Water Master should observe the terms and conditions of said agreements, and the distribution among said owners should be made according to said agreements in so far as such distribution shall not conflict or interfere with the rights of other claimants to waters of the stream from which said ditch diverts water.

14.

That as between the Gold Crest Fruit Company, a corporation, Mary J. Lawrence, R. M. Cook, Thomas Dungey, and the Golden Standard Mining Company, claimants to the waters of Galls Creek, a tributary of Rogue River, the following stipulation and agreement made and entered into by and between said claimants is hereby incorporated in and made a part of this decree, and the rights of said claimants are hereby adjudicated and determined subject to the terms and conditions thereof, to-wit:

"It is hereby stipulated by and between the respective parties hereto that the irrigation season on Galls Creek extends from the first day of May of each year until the first day of October of each year, and that the mining season of said stream extends from the first day of October of each year to the first day of May of the following year:

"That said irrigation season shall be divided into periods of fourteen (14) days each:

"That the lands of the claimant, Mrs. S. J. Hays, whose name was filed herein as S. H. Hays, shall be entitled to the full flow of the entire stream of Galls Creek for a period of four consecutive days out of each and every fourteen day periods; that the said waters shall be conducted through the Pfeil ditch and turned down through the stream at or near the end of said Pfeil ditch; that she shall at all times be entitled to use any of the waters of said stream which find their way down said stream and below the lands of any of the other parties hereto:

"That as between the other parties hereto the ditches and irrigated acreage is as follows:

Gold Crest Ditch, owned by the Gold Crest Fruit Company, twenty-five (25) acres; Lawrence Ditch, owned by Mary J. Lawrence, ten (10) acres:

R. M. Cook Ditch, owned by R. M. Cook, fifteen (15) acres:

Pfeil Ditch, owned by Galls Creek Mining & Development Company, as follows: Thomas Dungey, six (6) acres:

R. M. Cook, fifteen (15) acres:

Golden Standard Mining Company, two (2) acres:

"That the balance of each of the four-

teen-day periods, after deducting the four days for the lands of Mrs. S. J. Hays, shall be by said Board divided between the said ditches in proportion to the irrigated area under each as above specified:

"That the State Water Board in their findings and order shall designate a rotation system, whereby each of the parties hereto shall become entitled to the use of all the waters of said stream for the periods aforesaid, to be determined according to the respective irrigated acreage under each ditch; that the board in its regulation of said rotation system shall allow sufficient water to remain in said Pfeil ditch at all times for the protection of said ditch, but the water kept in said ditch for said purpose shall not substantially or materially diminish the quantity of water to which any of the parties hereto are entitled. The purpose of this provision in this stipulation is to protect the Pfeil ditch and flumes as far as possible during the period that the same is not used for irrigation, but such use shall not materially interfere with the use of said waters by any of the said parties hereto. If it shall develop that keeping water in said ditch during the time said ditch is not being used for irrigation purposes materially diminishes the quantity of water herein provided for any of the parties hereto, then the board shall have the right to require all of the waters of said stream to be kept out of said ditch during the periods of time herein provided that none of the parties hereto are entitled to said waters through said ditch for irrigation purposes.

"That none of the parties to this stipulation, or their successors, shall make use of any of the waters of said stream at any time that will interfere with the rights granted to any of the other parties by this stipulation.

"Now as to the rights of the Golden Standard Mining Company for irrigation out of the Pfeil ditch, it shall use water for irrigation only during that period of time allotted to the said Pfeil ditch. As between the Golden Standard Mining Company and the other claimants herein out of said Pfeil ditch, the said Golden Standard Mining Company shall, during the period allotted to said Pfeil ditch, be entitled to the use of sufficient water through said Pfeil ditch for the irrigation of said two (2) acres, which are located in the northwest quarter of the southwest quarter of Section 33, Township, 36 South, Range 3 West of the Willamette Meridian.

"As to the rights of the Golden Standard Mining Company for the use of water for milling purposes, it is stipulated that, as between the parties hereto, said Golden Standard Mining Company shall be entitled to the use of the quantity of water which will run through its three-inch pipe under a six-inch pressure for milling purposes in connection with the mining claims described in the proof of claim of said Golden Standard Mining Company; that while the Golden Standard Mining Company shall be using the water for milling purposes it shall not divert more than enough water

from the ditch to fill the three-inch pipe under a six-inch pressure for either milling or irrigation purposes or both.

"That as to the Galls Creek Mining & Development Company, it shall be entitled to use water for mining purposes according to its claim filed for the mining season between the first day of October and the first day of May of each year on all mining lands now owned by it, but the right of the Galls Creek Mining & Development Company to use said water during said mining season shall be subject to the right of the Golden Standard Mining Company to the use of water for milling as aforesaid.

"It is stipulated between the Gold Crest Fruit Company, by its attorney, A. E. Reames, and S. H. Duffield and James Burns, that the contestees shall, during the mining season, be entitled to water for mining purposes according to their claim filed herein, but that they shall not be entitled to any water for irrigation except for the irrigation of one (1) acre out of the nine (9) acres claimed by them in their said claim, and that the quantity of water necessary for the irrigation of said one acre shall be determined by the State Water Board.

"It is further understood and agreed that the various owners of the above mentioned ditches and those interested in the use of water there through shall install, keep and maintain in good condition throughout the irrigating season suitable headgates in accordance with the requirements of the water master in charge of the distribution of waters on said stream from time to time."

15.

That C. E. Selleck, claimant to the waters of Applegate River through the North Side Applegate River Ditch Company ditch, by virtue of the purchase of certain shares of stock from one L. W. McKeel, as set forth in subdivision 2 of paragraph 35 of the findings herein, is not entitled to divert or use any of the waters of said ditch upon the lands of said claimant described in his statement and proof of claim herein, until such time as he shall enlarge or cause to be made an enlargement of said ditch sufficient to convey the water so claimed by virtue of said shares of stock down to said lands and his laterals from said ditch; that the water rights represented by said shares of stock were not intended to, and did not, convey any right of use beyond the west line of the land of said L. W. McKeel to which said water rights were, prior to the transfer thereof to said Selleck, appurtenant; that at all times the water rights claimed by said Selleck as set forth in subdivision 3 of paragraph 35 of the findings of the State Water Board herein, and in his statement and proof of claim, were appurtenant to, and still remain appurtenant to the lands of said James W. Gilmore, as described in said findings, and were not subject to transfer or severance therefrom to the lands of said Selleck described in his said

proof of claim herein, and that said Selleck has no right, title or interest in or to the waters represented by the said fourth interest in the shares of stock in said North Side Applegate River Ditch Company as described in said findings. That said Selleck by virtue of the said shares of stock purchased from said McKeel, is entitled to an inchoate and uncompleted right of appropriation through the said North Side ditch, and is entitled to complete and perfect the same within the time limited herein for completion of inchoate rights, and upon the further condition that upon the taking of final proof of the completion of said right that said Selleck, or his successor in interest, shall establish to the satisfaction of the State Water Board that he has complied with the conditions attached to said shares of stock, and has enlarged, or caused to be enlarged, the said ditch sufficiently to convey the waters by him claimed to his said lands, and has contributed his proportionate part of the cost and maintenance of said ditch down to his diversion point; otherwise said Selleck will be deemed to have abandoned any right he may have to the waters of said stream by virtue of the ownership of said shares of stock.

16.

That J. P. Atkin, claimant to the waters of Applegate river through the Grand Applegate ditch, is entitled to the use of the waters of said river as set forth in the tabulated statement herein, for mining purposes, and incidental power development but is entitled to no rights to the use of the waters of said river for irrigation purposes prior to the year 1909. That the use of said waters for mining and power purposes confer no right upon said J. P. Atkin, his successors and assigns, to substantially diminish the flow of said stream below the present point of return of the waters diverted through said ditch to said stream, nor to change the character of the use to which water has been applied by virtue of the appropriations confirmed in said tabulated statement to irrigation or other purposes. That the extent of said Grand Applegate ditch, and the diversion of the waters of said stream through the same, and the application thereof, and the change of character of use to irrigation purposes by virtue of said appropriations initiated prior to said year 1909, would be to the substantial injury and detriment of subsequent claimants and appropriators of the waters of said stream below the present point of return of the waters diverted through said ditch to said stream.

17.

That John D. Kerr and Oliver Morrison, claimants to the waters of Slate Creek, a tributary of Applegate Creek, have no right, title or interest in or to the Jones or Lovelace ditch from said Slate Creek, or the use thereof, and that Hannah D. Jones is the exclusive owner of said ditch and water rights appurtenant to her lands, described in the tabulated statement here-

in, free of any claims of said John D. Kerr and said Oliver Morrison.

18.

That as between E. J. Davidson, Peter W. Caris, William Meske, W. S. Bailey, and J. W. York, claimants to the waters of Caris Creek, the following stipulation made and entered into herein as set forth in paragraph 37 of the findings of the Board herein, is hereby incorporated in and made a part of this decree, and the rights of said claimants hereby adjudicated and determined in the tabulated statement of rights shall be subject to the terms and conditions thereof, to-wit:

"It is hereby stipulated and agreed by and between the parties hereto, that said three (3) first named parties, to-wit: E. J. Davidson, Peter W. Caris, and William Meske, shall have the use of all of the waters of the said stream during the irrigating season of each and every year for the first five (5) days, beginning with Monday of each week thereof, of each week during said irrigation season, and the said last named parties, to-wit: W. S. Bailey and J. W. York, during the said first five (5) days of each and every week, shall be entitled to only such waters from the said creek as shall be waste or seepage from the irrigation systems of the three (3) first named parties, and that the said W. S. Bailey and the said J. W. York shall be entitled to all of the waters of the said stream for the last two (2) days of each and every week during the irrigation season of each and every week thereof, to-wit: Saturdays and Sundays of each week.

"And the said three (3) first named parties do hereby expressly agree that, during the irrigation season of each and every year after the date of this stipulation, they will turn down past the intakes of their ditches, and each thereof, all of the waters of the said creek for use by the said W. S. Bailey and the said J. W. York, for the period of two (2) days of each week, to-wit: Saturday and Sunday, and that they will in no wise or manner interfere with the said W. S. Bailey or the said J. W. York in their use of the said water of the said stream for beneficial purposes on the lands of the said W. S. Bailey and the said J. W. York, during said two (2) days of each of the said weeks.

"And the said W. S. Bailey and the said J. W. York do hereby expressly stipulate and agree that they will in no wise or manner or interfere with the use of all, or any, of the waters of the said stream for irrigation upon the said premises of the said E. J. Davidson, Peter Caris and William Meske (excepting such waste water as shall waste and escape through their said ditches or rise in the channel of the said stream below the intakes of the first named parties' said ditches), for the said five (5) days of each and every of said weeks during said irrigation season.

"And the said three (3) first named parties hereby further agree that they will, in the said two (2) days when the waters shall be used by the said two (2) last named parties, close their said ditches on

or before seven (7) o'clock in the morning of Saturday of each of said weeks, and will keep them closed continuously until seven (7) o'clock on the Monday morning following, and will permit the said waters of the said stream and all of its tributaries to flow down the said stream uninterruptedly to the ditches of the said two (2) last named parties, to-wit: W. S. Bailey and J. W. York.

"It is understood and agreed by each of the parties hereto that the irrigation season on said creek shall begin on the first Monday in March of each and every year, and shall extend to and including the third Monday in October of each and every year.

"And the said W. S. Bailey and the said J. W. York, for themselves particularly, hereby stipulate and agree that the said W. S. Bailey shall have the use of all the waters flowing past the intake of the ditches of the said three (3) first named parties in said stream, on Saturday of each and every week, beginning with seven (7) o'clock in the morning and continuing until seven (7) o'clock on Sunday morning, and the said J. W. York shall have all of the waters of said stream, as hereinbefore provided, on Sunday of each week, beginning with (7) o'clock in the morning and continuing until seven (7) o'clock on Monday morning of each week.

"And the said W. S. Bailey hereby expressly agrees and stipulates that, promptly at seven (7) o'clock on Sunday morning of each and every Sunday during the irrigation season of the year, he will close the intake of his ditch, so that all of the waters flowing in said stream shall flow down uninterruptedly to the said J. W. York, and that he will make no interference with the flow of the same uninterruptedly to the said J. W. York."

19.

That by nonuser for more than ten years, and by abandonment thereof, the Vance Anderson Company, a corporation, claimant to the waters of Poorman's Creek, has forfeited and lost whatever rights of appropriation it, or its predecessors, may heretofore have had to the waters of said Poorman's Creek, a tributary of Forest Creek.

20.

That the following named persons, to-wit: W. C. Sparks, R. E. Gray, Warren D. Mee, Walter Miller, M. F. Bingham, Lee Harrington, D. A. Wood, J. J. Knutzen, Herbert Elmore, Estate of C. H. Elmore, deceased, Lida and Anderson Mee, Oscar Knoz, C. C. Presley, John Bingham, and D. W. Knutzen, are the owners jointly and as tenants in common of that certain ditch and water right known as the Thompson Creek Irrigation Association ditch and water right, as described in the findings herein, and are collectively known herein and referred to as the Thompson Creek Irrigation Association, and are doing business and managing and controlling the operation of said ditch and the use of water therefrom as among themselves under that name and style, and that said Thompson Creek Irrigation Association, and the per-

sons composing the same, are entitled to rights of appropriation of the waters of said O'Brien and Sturgis Forks of said Carberry Fork of Big Applegate River, as of the date of relative priority of 1857, to the extent of 100 inches, or 2½ second feet, and as of the date of relative priority of 1906, to the extent of 250 inches, or 6¼ second feet, for the irrigation of the lands hereinafter described as actually irrigated, and for the irrigation of those lands also described and which are to be cleared and irrigated by said claimants. That the claimants named, as joint owners and tenants in common of said ditch and water rights, are entitled to the use of so much of the said waters so appropriated as among themselves as their interests appear, respectively, by virtue of the ownership of shares in said association, and their contractual relations as between themselves in respect thereto, and that said appropriations shall be and remain appurtenant to the lands of said claimants, as herein in the tabulated statement described, and that all of the lands not now irrigated by said claimants as herein described shall be cleared and irrigated, and beneficial use of the water made thereon, during the irrigation season of 1919, and proof of the reclamation and irrigation of said lands shall be required of said claimants and taken by the Superintendent of Water Division No. 1 on or after October 1st, 1919, and water right certificates shall be issued according to such proof, and such further investigations as may be required and made by said Superintendent, and according as the interest of each of said claimants in said appropriations, or his successor in interest, may appear.

That the record and evidence herein is insufficient for a proper determination of the relative rights of said claimants composing said Thompson Creek Irrigation Association, as among themselves, and their respective interests in said ditch and appropriations; but that upon taking final proof as to the completion of said appropriations, as set forth in the preceding paragraph, proof shall also be required of said claimants and taken by said Superintendent respecting their several and respective interests therein, and the quantity of water to which each of said claimants shall be entitled shall be determined from his interest, as so determined, and thereby his proportional part of said 350 inches ascertained, and made appurtenant to his particular tract of land, and water right certificate issued to him accordingly.

21.

That as between William O. Benjamin, first party, S. B. Pettengill, second party, and Charles H. Bean, Eliza A. Chapman and Dora L. Marshall, third parties, claimants to the waters of Benjamin Gulch or Slagle Creek, tributary of Grave Creek, the rights of said claimants as set forth in the tabulated statement herein are hereby adjudicated and determined subject to the terms and conditions of their stipulation on file herein, which is hereby incorporated in and made a part of this

decree, and which stipulation is as follows, to-wit:

"1. That during the irrigating season of each year from twelve o'clock noon on Thursday of each week until twelve o'clock noon of the next succeeding Friday thereafter the party of the first part shall have the use of all the waters of said stream, to which all the parties hereto may be entitled, for use upon his said lands for irrigation purposes.

"2. That during the irrigating season of each year from twelve o'clock noon on Friday of each week until twelve o'clock noon of the next succeeding Sunday thereafter the party of the second part shall have the use of all the waters of said stream, to which all the parties hereto may be entitled, for use upon his said lands for irrigation purposes.

"3. That during the irrigating season of each year from twelve o'clock noon on Sunday of each week until twelve o'clock noon of the next succeeding Tuesday thereafter the parties of the third part shall have the use of all the waters of said stream, to which all the parties hereto may be entitled, for use upon their said lands for irrigation purposes.

"4. That during the irrigating season of each year from twelve o'clock noon on Tuesday of each week until twelve o'clock noon of the next succeeding Wednesday thereafter the party of the second part shall have the use of all the waters of said stream, to which all the parties hereto may be entitled, for use upon his said lands for irrigation purposes.

"5. That during the irrigating season of each year from twelve o'clock noon on Wednesday of each week until twelve o'clock noon of the next succeeding Thursday thereafter the parties of the third part shall have the use of all the waters of said stream, to which all the parties hereto may be entitled, for use upon their said lands for irrigation purposes.

"That the full use of all the waters aforesaid shall continue in each of the respective parties hereto during the period aforesaid during the whole of each irrigating season.

"It is further provided and agreed that the provisions of this agreement may, so far as the same are permissible under the laws of the State of Oregon, be incorporated in any decree of the court that may be hereafter rendered upon the adjudication of the waters of Rogue River and its tributaries, and that the provisions of this agreement shall be deemed to run with the land of each of the parties hereto and to the heirs and successors in title and interest of each of the parties hereto, and to that end the rights hereby fixed and established are granted by each unto the other and unto the heirs, executors, administrators and assigns of each of the parties hereto forever."

22.

That R. E. Peyton and R. B. Vaughn, claimants to the waters of Tie Camp Creek, shall use the waters of said stream to the extent they are entitled thereto, as be-

tween themselves, as provided in their stipulation and agreement on file herein, which is as follows, to-wit:

"Comes now R. E. Peyton and R. B. Vaughn, claimants to the waters of Tie Creek, a tributary of the Rogue River, and stipulate and agree that their respective rights shall be as follows, to-wit:

"1. That the date of relative priority of each of said claimants shall be the year 1892 and that their priority rights are equal.

"2. That each of said claimants shall have the right to the use of the waters of said stream for stock and domestic purposes and for irrigation of their said lands as the same are described and set forth in their statements and proofs of claim.

"3. That the use of said water for stock and domestic purposes shall have the preference over the use for irrigation whenever there shall not be sufficient water in said stream to satisfy the rights of the said parties for the irrigation of their said lands.

"4. That the said parties agree to use the water of the said stream in rotation according to the respective quantities of water required for the irrigation of said lands, each of said parties to have the right to use the water for a length of time proportionate to the quantity of water each is entitled to use for irrigation purposes, it being understood that said claimant, Peyton, has a right to irrigate 6 acres, and said claimant, Vaughn, a right to irrigate 20 acres."

23.

That the Butte Falls Lumber Company, a corporation, claimant to the waters of Big Butte Creek, has no right to the use of the waters of said stream for irrigation purposes, and its rights of use are hereby limited to the use of the waters of said stream for power purposes and the return thereof to said stream after use substantially undiminished in quantity.

24.

That as between the Town of Butte Falls, a municipal corporation, the Pacific and Eastern Railway Company, a corporation, and Butte Falls Lumber Company, a corporation, claimants to the waters of Ginger Creek, a tributary of Big Butte Creek, the rights of said claimants in and to said waters are hereby adjudicated and determined subject to the terms and conditions of their stipulation on file herein, which stipulation is as follows, to-wit:

"1. Each of the parties of the first and second parts hereto shall, as against the other, be entitled to the use of one-half of the waters of said creek.

"2. Each of said parties of the first and second parts shall, as against the other, have the right to use one-half of the water from the South Fork of said creek and one-half of the water from the east fork of said creek, and each of said First and Second parties hereto does covenant and agree with the other that it will not, to the detriment of the other, take at any time more than one-half of the waters in the South Fork of said creek or more

than one-half of the waters in the East Fork of said creek.

"It is mutually covenanted and agreed between the parties hereto that in case of emergency, either party will permit the other to use any of the water of said stream which it may have stored and also as much of the flow of said stream as the necessities of the case require, reserving only for itself so much of the water as will meet its actual and necessary requirements.

"3. It is mutually agreed between the first and second parties that either party may at any time take from the creek and from either fork thereof so much of the water therein belonging to the other party as said other party shall not at said time use or desire to take from said creek; it being understood and agreed that either party may take its half of the water of said creek and of each fork thereof for the purpose of storing the same to be thereafter used by it.

"First party agrees not to use any of said water for any other purposes than that of municipal water supply, and the second party agrees not to use any of said water for any other purpose than in connection with the operation of its railroad.

"5. The party of the first part hereby covenants and agrees that it will in installing any pipe line or equipment for the purpose of utilizing any of the waters of said stream so to install and maintain said work as not to interfere with or injure the present plant and equipment of the second party, and that it will at all times protect said plant and equipment of the second party from any injury caused by it or its agents in the installation or operation of any plant or equipment by the first party.

"In consideration of the premises and of the agreements herein contained on the party of the first and second parties to be kept and performed, the third party hereby agrees and consents that each of said parties may take so much of the water of said Ginger Creek as they may require for the respective purposes above set forth.

"In consideration thereof the first and second parties do hereby covenant and agree.

"1. That they will return to Butte Creek above the dam of the third party any water taken from said Ginger Creek which may not be actually used by them for the purpose aforesaid, this to include any overflow from any reservoir or pipe line which may be constructed by them or either of them.

"2. That the third party may at any time take and use from any pipe line or reservoir which they or either of them may construct or maintain so much of the water therefrom as may be needed by the third party in the operation of any of its engines or equipment in the logging of its lands in the vicinity of said Ginger Creek, and may use water in case of fire at Mill or Lumber Yard.

"3. That they will so arrange and pro-

tect said creek and any reservoirs, intake or pipe lines used in connection with said water supply that the same shall not in any manner interfere with the logging operations of the third party aforesaid, and that the third party shall have a perpetual right of way over and across said Ginger Creek and its tributaries, and that the third party shall not be held liable for any damage or injury done to said water supply or said pipe line, reservoir or equipment by reason of its logging operations or of crossing or dragging across said creek or said reservoir, pipe line or intake or other equipment of any of its logs or machinery used in said logging operations."

25.

That as between Mary A. Bauten, contestant, and D. J. S. and Floyd Pearce, contestees herein, claimants to the waters of Poorman's Creek, a tributary of Forest Creek, the following stipulation is hereby adopted and incorporated in this decree, and the relative rights of said claimants are hereby adjudicated and determined subject to the terms and conditions thereof, as between themselves, to-wit:

"It is hereby stipulated and agreed by the above named contestant, and the above named contestee that the said contestants shall have the prior right, as against the contestees, to the use of six miner's inches of the waters of Poorman's Creek, under a six inch head, for the purpose of irrigating the four acres of land in the premises described in the application of Henry A. Bauten, the predecessor in interest of the contestant herein, which application is now on file in the office of the Superintendent of Water Division No. 1, of Oregon.

"The right to the use of said six inches of water, as aforesaid, shall be, and continue during the irrigating season beginning April 1st of each and every year hereafter.

"And it is further stipulated and agreed that the contestants shall permit any excess of the water of Poorman's Creek over and above the said six inches to flow down through Poorman's Creek to the lands of the contestee, and that said contestants will not permit any of said six inches of water to run to waste, and shall permit the seepage to also flow back into the waters of Poorman's Creek."

26.

That as between Will C. Smith and W. G. Smith, claimants to the waters of Wolf Creek, a tributary of Grave Creek, the following stipulation on file herein is hereby adopted and incorporated in this decree, and the relative rights of said claimants are hereby adjudicated and determined subject to the provisions thereof as between themselves, to-wit:

"It is stipulated between the parties hereto that the parties hereto are the prior valid claimants to the use of the waters of Wolf Creek for irrigation purposes.

"It is further stipulated that both parties hereto may use the waters of Wolf Creek until July 15th of each year.

"It is further stipulated that after

July 15th and up to October 1st of each year Will C. Smith may have the use of all the waters of Wolf Creek for the first four days in each week and W. C. Smith may use all the waters of said creek during said period for the last three days of each week.

"W. G. Smith, for the consideration of one dollar and mutual agreements, grants to Will C. Smith the right to construct a dam at the present site and perpetually maintain the same, as well as the present ditch and flume across his lands and leading from said dam.

"It is further stipulated that the State Water Board of the State of Oregon shall enter a decree in accordance with this stipulation and that this consolidated proceeding shall be dismissed.

"It is understood that as between these two claimants neither claims the prior right to the other, excepting as to the time of the use of the water in rotation during each week."

27.

That as between Oriole Gold Mining Company, contestant, and H. L. Lewis, H. J. Penney, and H. M. Barsto, claimants to the waters of Rocky Gulch, tributaries of Rogue River, contestees, the following stipulation set forth in the findings of the State Water Board herein is hereby incorporated and adopted in this decree, and the relative rights of said claimants are hereby adjudicated and determined subject to the terms and conditions thereof, as between said claimants, to-wit:

"It is understood that the contest is dismissed with the understanding that the Old Channel Mining Company takes all of the waters of the South Fork or left hand fork of Rocky Gulch, which is a tributary of Rogue River, at the present point of diversion, and that the Lewis Mining Company takes the waters of the North or right hand Fork of Rocky Gulch with its tributaries at the point where they now divert, and that there is no conflict between the two rights.

"It is understood and stipulated between the contestant by its agent, M. J. Anderson, and contestees, H. L. Lewis, H. J. Penney and H. M. Barsto, appearing by H. L. Lewis that the contestant, Oriole Gold Mining Company is entitled to the storage of waters of Rocky Gulch in its reservoirs as now constructed and according to the terms of the permits under which said reservoirs were constructed, copies of which have heretofore been filed herein, and it being further understood and agreed that said contestant, the Oriole Gold Mining Company, will not enlarge or increase the capacity of said reservoirs beyond the capacities set forth in said applications for permit without the consent and permission of the contestees, and that said contestees may have the right to use the waters of said gulch through their lower ditch to the extent of the quantity required to supply their claim on file herein and not in excess of the capacity of said lower ditch, now, therefore, based upon this under-

standing and agreement, said contest, as against said lower ditch, is in all things dismissed."

28.

That as between Malinda J. Hawk, contestant, and Laura Abbott and others, heirs at law of William Abbott, deceased, designated in the tabulated statement as the Estate of William Abbott, deceased, contestees, claimants to the waters of Clark Creek, a tributary of Big Butte Creek, the following stipulation made and entered into between said claimants and now on file herein in settlement of their conflicting claims, is hereby adopted and incorporated in this decree, and the relative rights of the said claimants are hereby adjudicated and determined herein subject to the terms and conditions thereof, to-wit:

"It is hereby stipulated by and between the Contestant in the above entitled cause and the Contestees therein, and their respective attorneys, that a Final Decree fixing and determining the rights of all parties herein in and to the waters of Clark Creek, a tributary of Butte Creek, a tributary of Rogue River, in Jackson County, Oregon, may be entered herein providing as follows:

"1. That the Contestant, Malinda J. Hawk, her heirs and assigns, shall be forever entitled to all of the waters of said Clark Creek claimed by her under and by virtue of certain water filings heretofore made by one Ira Wakefield as shown in Volume 10 at page 587 and Volume 11 at Page 107 of the Mining and Water Records of Jackson County, Oregon, as the same appears in the office of the County Recorder in and for said County and State; to which said water rights the said Contestant has succeeded through various conveyances from and through the said Ira Wakefield and his assigns for all general purposes and use upon the following described real property situated and being in the County of Jackson, State of Oregon, to-wit:

"The Southeast quarter of the southeast quarter of Section 7, and the Southwest quarter of Southwest quarter of Section 8, Township 34 South, Range 2 East of the Willamette Meridian, containing eighty (80) acres, more or less, or any other lands adjacent thereto which the Contestant may hereafter acquire or own, excepting the rights in and to said waters to be decreed to the said Contestees, as hereinafter set forth, to-wit:

"2. Said decree shall provide that the said Contestees, their heirs and assigns, shall forever be entitled to the sole and exclusive use of all the natural flow of said stream taken at or above the present point of diversion from 12 o'clock noon each and every Friday until seven o'clock of the next Monday morning, between the 15th day of May and the 1st day of September of each and every year, and shall also be entitled to all the natural flow of said stream so taken on each and every Sunday from the 15th day of April until the 15th day of May and from the first day of September to the first day of October of each

and every year, or so much of said water as is reasonably necessary to irrigate any and all the lands of the Contestees, their heirs and assigns, which they may now or at any time hereafter place under cultivation and which are contained in the following described lands, situate, lying and being in Jackson County, Oregon, to-wit:

'The north half of the northwest quarter of Section seventeen, and the northeast quarter of the northeast quarter of Section eighteen, and the south half of the northeast quarter, and the north half of the southeast quarter of Section eighteen, all in Township thirty-four south of Range two east of the Willamette Meridian, containing in all two hundred and eighty acres, according to the Government Survey, or any other lands adjacent thereto which the Contestees may hereafter acquire or own.

"3. It being understood, however, that the contestees shall permit enough water to go down the present ditch to properly keep wet the bulk head and pipe line of the Contestant. And provided further that the Contestees, their heirs and assigns shall be permitted to so take said water from the present ditch upon said premises at a point about fifteen (15) feet west of the south end of said ditch where said ditch turns from the generally north and south direction to a generally east and westerly direction.

"4. The Contestees shall also have a free right of way for the building of a lateral from said point of diversion from said ditch to their land above described across the premises of the Contestant.

"5 Said Decree shall further require the Contestant to assume two-thirds of the burden and expense of forever maintaining and keeping in repair said ditch from the point of diversion to the point from which the Contestees take out their lateral as above provided, and shall require the Contestees to forever bear the remaining one-third of the burden and expense incident to such upkeep."

It was further stipulated as between the parties to the above stipulation in open Court, as follows, which said stipulation is hereby adopted and incorporated in this decree and the relative rights of the said claimants are hereby adjudicated and determined herein subject to the terms and conditions thereof, to-wit:

"It is stipulated in open Court that the date of priority of the Contestant, Malinda J. Hawk, and the Contestees, Laura Abbott, et al, shall be equal. It is further stipulated that the contestant may file an amended statement of claim to embrace such additional lands as he may see fit, and that the Board may grant on the lands which have never been irrigated an inchoate right, with such time to complete actual beneficial use of water on such lands as shall be reasonable."

29.

That as between D. W. Pence and G. H. Storm, claimants to the waters of Elk Creek, a tributary of Rogue River, the fol-

lowing stipulation is hereby adopted and incorporated in this decree, and the relative rights of said claimants are hereby adjudicated and determined herein subject to the terms and conditions thereof, to-wit:

"Now at this time, the same being the time heretofore fixed for the hearing of the exceptions and objections of D. W. Pence to the Findings of Fact and Order of Determination of the State Water Board of Oregon, comes D. W. Pence by his attorneys, Charles Prim and H. K. Hanna, and G. H. Storm appearing in propria persona and stipulate and agree as follows in reference to their use of the waters of the West Fork of Elk Creek:

"It is hereby stipulated and agreed by and between the said D. W. Pence and the said G. H. Storm that there is no priority between them as to the use of the waters of the West Fork of Elk Creek in Jackson County, State of Oregon, and that the date of their diversion and appropriation of said waters is 1886.

"It is hereby further stipulated and agreed by and between the said D. W. Pence and the said G. H. Storm that each and every season while the waters of said West Fork of Elk Creek are sufficient for the use of each of said parties through their separate ditches they and each of them may use and divert said waters through their respective separate ditches and through which ditches they are now using the same, but during each season when the waters of the said creek become insufficient for such diversion by separate ditches, which season usually begins July 1st of each year, then the waters of said creek shall and must be used by said parties through and out of the D. W. Pence ditch of 1901.

"It is hereby further stipulated and agreed by and between said parties that during the dry season of each year all the waters of (of) the said West Fork of Elk Creek is required for the proper and necessary irrigation of the respective properties of said parties and of one Peter Joe Hanson who is entitled to six days use of said water every month as per contract between said parties.

"It is hereby further stipulated and agreed by and between the parties that during the dry season beginning July first of each year they shall rotate in the use of all the waters of said West Fork of Elk Creek in time and manner as follows, to-wit:

"That the said G. H. Storm shall commence the irrigation of his land with all the waters of said creek on the 1st day of July of each and every year and shall have the right to continue such use for thirteen (13) consecutive days; that the said D. W. Pence shall commence the irrigation of his land with all the waters of said creek on the 14th day of July of each and every year and shall have the right to continue such use for seventeen (17) consecutive days; that the said G. H. Storm out of the time allotted to him for irrigation during each rotation period shall allow Peter Joe

Hanson three (3) days use of the water for the irrigation of his property; that the said D. W. Pence out of the time allotted to him for irrigation during each rotation period shall likewise allow Peter Joe Hanson three (3) days use of the water for the irrigation of his property; and the aforesaid rotation shall continue for each and every month thereafter during each year and during the dry season of each year.

"It is hereby further stipulated by and between the parties hereto that the said G. H. Storm shall have the right to tap the said D. W. Pence ditch with a ¾ inch pipe for domestic purposes.

"It is hereby further stipulated and agreed by and between the parties hereto that at all times that the said G. H. Storm is irrigating his lands through the D. W. Pence ditch he shall allow to flow through said ditch down to the D. W. Pence premises sufficient _____ water at all times to supply his stock.

"It is further stipulated and agreed by and between the parties hereto that this agreement, all its terms and conditions, shall apply with equal force to the heirs and assigns of said respective parties."

30.

That as between T. Ralph Pittock, owner of the lands and water rights designated in the findings of the Board as owned by Estate of John Johnson, deceased, of the one part, and Anna Walter, of the other part, claimants to the waters of Humbug Creek, a tributary of Applegate River, the following stipulation made by and between said claimants is hereby adopted and incorporated in this decree, and the relative rights of said claimants are hereby adjudicated and determined subject to the terms and conditions thereof, to-wit:

"It is hereby stipulated by and between T. Ralph Pittock, the present owner of that certain ranch designated and determined in the findings of the State Water Board of Oregon in the matter of the determination of the relative rights to the use of the waters of Humbug Creek as the Estate of John Johnson, deceased, and Anna Walter representing and owning the lands formerly owned by George Walter, now deceased, and situate in Sections 35 and 35 in Township 37 South Range 4 West of Willamette Meridian, and Section Two, in Township Thirty-eight (38) South, Range Four (4) West of Willamette Meridian, that said Walter land shall have as against T. Ralph Pittock, his successors and assigns, the irrevocable first right to use the natural flow of the waters of Humbug Creek, for the purpose of irrigation on said lands, the owner of said Walter lands to make such use of the said waters that the seepage waters after such irrigation may find their way back into Humbug Creek and for application for irrigation by said T. Ralph Pittock, as can conveniently be done. The owners of the said Walter land to have the first right to use said waters for the purpose of irrigating the lands now irrigated by them at all

times, the same to be taken out of Humbug Creek at the present point of diversion.

"This stipulation to be filed with the State Water Board, and the State Water Board to find and decree according to this stipulation."

31.

That as between W. H. Flanagan and S. J. Taylor, successor in interest to J. W. Fitzpatrick, claimants to the waters of Shan Creek, the following stipulation heretofore made and entered into by and between said claimants, and filed herein, in adjustment of their conflicting claims to said waters, is hereby adopted and incorporated in this decree, and the relative rights of said claimants are hereby adjudicated and determined herein subject to the terms and provisions thereof, to-wit:

"It is hereby stipulated by and between W. H. Flanagan, by his attorney of record, A. C. Hough, of Grants Pass, Oregon, and S. J. Taylor, otherwise known as Jud Taylor, in person and by and through his attorney J. N. Johnston, of Grants Pass, Oregon,

"WHEREAS, heretofore and within the time allowed by law W. H. Flanagan filed in the above entitled court and cause exceptions to the findings of fact and order of determination of the Oregon State Water Board, in so far as said findings of fact and order of determination relate to the waters of Rogue River and its tributaries in Josephine County, Oregon, and to the findings and award made by said Oregon State Water Board to S. J. Taylor; otherwise known as Jud Taylor, as the successor in right, title and interest of J. W. Fitzpatrick as to the right to the use of said seven-tenths (7-10) of a cubic foot per second of the waters of Shan Creek, under Proof 501 of Volume 8 Records of the Oregon State Water Board, through what is known as the Bybee ditch, with the right to irrigate sixteen (16) acres in the northwest quarter of the northeast quarter, and 19 acres in the Southeast quarter of the SE $\frac{1}{4}$ of Section 10, Township 36 South, Range 7 West; and

"WHEREAS, the parties hereto have reached a mutual settlement and agreement as to the relative rights of the said W. H. Flanagan and the said J. W. Fitzpatrick and S. J. Taylor, otherwise known as Jud Taylor,

"NOW THEREFORE, IT IS STIPULATED AND AGREED by and between the parties hereto that the findings of fact and order of determination of the Oregon State Water Board, as to the water right and priority for the use thereof to J. W. Fitzpatrick and his successor, S. J. Taylor, otherwise known as Jud Taylor, amounting to .7 of a cubic second foot, with date of priority 1896, out of what is known as Shan Creek, a tributary of Rogue River, for the irrigation of thirty-five (35) acres above described, is not herein or hereby questioned by the said exceptor, W. H. Flanagan,

"IT IS FURTHER STIPULATED AND AGREED that J. W. Fitzpatrick and S. J. Taylor do not have nor claim any right, ti-

tle or interest in or to what is known as the Bybee ditch or the right to the use thereof, and that the findings and order of determination of the Oregon State Water Board may be modified in accordance with this stipulation.

"IT IS FURTHER STIPULATED that the said Bybee ditch is the property of the said W. H. Flanagan, and as to the use thereof by the said S. J. Taylor the same may be in accordance with any contract or agreement hereafter entered into between said W. H. Flanagan and the said S. J. Taylor."

32.

That C. E. Forsythe, as successor in interest to the heirs of William and Ruth Ruble, deceased, claimant to the waters of Coyote Creek and its several tributaries, and Boulder and Clark Creeks, tributaries of Grave Creek, should be and hereby is allowed the right to use the waters of said stream and its tributaries for mining purposes during the period each year commencing October first, and terminating August first, subject during that part of the irrigation season from June first of each year to August first to the rights herein adjudicated of the various claimants to the waters of said stream and its tributaries, for irrigation, stock and domestic purposes; that the right of said C. E. Forsythe to use said waters for mining purposes during that part of the irrigation season of each year from June first to August first shall attach only, and is hereby allowed in respect, to surplus waters over and above the quantities required and necessary for the use of said irrigation appropriators for stock, domestic and irrigation purposes, and only when there are such surplus waters available.

33.

That as against Malcolm MacDonald, W. N. Hiatt, and Gustav Poyer, the defendants in those certain suits described in paragraph 30 of the original findings of the Board herein, by virtue of the decrees therein described, the plaintiffs in said suits, Clara S. Birdseye and Edward N. Tilton, are entitled to a first right to the use of all the waters flowing in Birdseye Creek, a tributary of Rogue River, when said volume of water flowing in said creek between the 15th of April and the 15th of October of each year is needed and necessary for the irrigation of the lands of said plaintiffs described in the tabulated statement herein; that the quantity of water as required for the irrigation of said plaintiffs' lands and necessary therefor does not exceed the quantity set forth in said tabulated statement.

34.

That George W. Weeks, a claimant to the waters of Elk Creek, through the Johnson Bros. ditch, shall be required to contribute his proportionate share of the work and expense necessary for the proper maintenance and operation of said ditch or for the construction of suitable headgates or measuring devices at the point of diversion. The proportion which said George W. Weeks shall be required to so

contribute shall be determined by the proportion that the amount of water he is entitled to divert bears to the whole amount of water that said Weeks and Norman T. McDonald are jointly entitled to divert through said ditch.

35.

That any use by John D. Kerr or Oliver Morrison of the waters flowing in the Jones or Lovelace ditch, from Slate Creek, a tributary of Applegate River, is and shall be at all times subject to the permission of Hannah D. Jones, the owner of said ditch, to divert said waters, and said Hannah D. Jones is the exclusive owner of said ditch and water rights appurtenant to her lands free of any claim or right of said John D. Kerr or Oliver Morrison, and superior and paramount to any such claim or right.

36.

That the irrigation season commences subsequent to the 1st of April of each year, and terminates before the 1st of November of each year, and the use of the waters herein involved for irrigation purposes is hereby confined to said season. That the right to the use of water for domestic and stock purposes continues throughout the year but during the irrigation season the waters diverted for irrigation purposes shall include the waters diverted for domestic and stock purposes.

37.

That the appropriations of the following claimants to the waters of Neil Creek, a tributary of Bear Creek, are prior in time and right to any right or claim thereto of F. E. Furry and A. J. Weeks claiming the waters of Bear Creek through the Phoenix Mill ditch, or Carolita Furry, J. M. Rader and Louie Culver or any of them, so far as the waters of said Neil Creek, a tributary of said Bear Creek, are concerned; and to any right or claim thereto of John Arnold, Eugenia F. Jackson, C. F. Arant and C. B. Lambkin, or either of them, for power, irrigation, domestic, or any other purpose or use whatsoever, to-wit: C. E. Owen, Augusta Neil, Phebe M. Smith, M. P. True, John W. Wells and the heirs of Giles Wells, deceased, through the Wells-Walker-True ditch, described in the findings herein; Geo. W. Dunn, James Barrett, Daniel Chapman, J. P. Dodge and A. W. Thomas, through the Hill ditch, described in the findings herein; and W. R. Kincaid, through the Lower Kincaid ditch, described in said findings; said ditches diverting the waters of said Neil Creek.

That said contestants and claimants to the waters of said Neil Creek last above mentioned through said ditches, and W. R. Kincaid, through the Casey or Upper Kincaid ditch, and R. C. Avent and Jackson Guyger, through the West Side Neil ditch (said ditches diverting the waters of said Neil Creek) have, by prescription and adverse user, acquired a prior and superior right and title to the use of the waters of said Neil Creek in the quantities confirmed unto each of said claimants and for the beneficial uses described in the tabulated statement herein, as against any

rights or claim of right to the use of said waters of said Neil Creek as a tributary of said Bear Creek by John Arnold, F. E. Furry and A. J. Weeks, or either or any of them, through either said Eagle Mills ditch or said Phoenix Mills ditch for power purposes.

That J. J. Murphy, claimant to the waters of Walker and Cove Creeks, tributaries of Bear Creek, as against any claims or rights thereto of either said John Arnold, through said Eagle Mills ditch, or F. E. Furry and A. J. Weeks, or either of them, through said Phoenix Mills ditch for power or irrigation purposes; or said Eugenia F. Jackson, C. B. Lambkin, or C. F. Arant, for irrigation and domestic purposes, has acquired a prescriptive right and title to the use of the waters of said Walker and Cove creeks to the extent and in the amount set forth in the tabulated statement herein for the purposes therein specified; and that the appropriations of said Murphy of the waters of said Walker Creek and Cove Creek are prior in time and right to any rights or claims of either said Eugenia F. Jackson, C. B. Lambkin, C. F. Arant, or John Arnold through said Eagle Mills ditch.

That the City of Ashland, a municipal corporation, has acquired rights of appropriation and use of the waters of Ashland Creek, a tributary of said Bear Creek, prior and superior in right and time to any right or claim thereto of said John Arnold, Eugenia F. Jackson, C. F. Arant, C. B. Lambkin (through said Eagle Mills ditch), F. E. Furry, A. J. Weeks, Louie Colver, J. M. Rader, Carolita Furry, or the town of Phoenix, for irrigation or domestic purposes, and has by adverse user acquired a prescriptive right and title to the use of the waters of said Ashland Creek to the extent of 500 inches thereof, as against each and every of said claimants and contestees last named, for either power, irrigation, domestic, or any other use or purpose whatsoever. That the rights of appropriation and use of said contestees John Arnold, Eugenia F. Jackson, C. F. Arant, C. B. Lambkin, F. E. Furry, A. J. Weeks, Louis Colver, Carolita Furry and J. M. Rader are subordinate and inferior in right to the rights of the said City of Ashland to the use of the waters of said Ashland Creek. That the said Town of Phoenix has no right whatsoever in or to the use of the waters of said Bear Creek, or any of its tributaries.

38.

That as between the claimants diverting water through the Wells-Walker-True ditch, the Walker ditch the Taylor ditch, the Lower Kincaid ditch, the West Side Neil ditch, and the Hill ditch, diverting the waters of Neil Creek, a tributary of said Bear Creek, the same being the six ditches mentioned in the agreement referred to in the findings herein, the combined appropriations of the several claimants as set forth in the tabulated statement herein should be divided equally and in proportion to the area irrigated under each ditch,

and the waters used in rotation, that is to say, that all of the waters of said Neil Creek coming to the head of the highest of said ditches, to-wit: The Hill ditch, to an amount sufficient to satisfy the combined appropriations through said ditches as set forth in said tabulated statement, shall be divided among said ditches in rotation, and in cases of agreement among said appropriators as to the manner, time and method of rotation in the use of water, so far as the same does not interfere with the prior rights of use, the water master shall distribute the water in accordance with said agreement, provided the same shall be in writing and filed with him, and in the absence of such agreement the said water master shall arrange said ditches into a group or groups, or system of rotation, according to the general plan of rotation hereinafter provided for, and the rotation among said ditches shall be made according to said general provision.

That nothing in this decree, or in the findings, herein, shall be construed to be a limitation upon the rights of the various owners of said Houck-Dunn-Homes ditch, from said Neil Creek, reducing the quantity of water to which they are jointly entitled through said ditch under and by virtue of said decrees mentioned in said findings, and so long as said owners of said ditch shall maintain at the head thereof a flume in accordance with the provisions of said decrees, and shall comply with said decrees, in every particular, the rights to divert through said ditch the quantity of water specified in said decrees, and in the manner therein provided, is hereby recognized and confirmed; and the quantity to which said claimants are entitled as a prior right shall be measured accordingly in the distribution of water among the several ditches. That after the prior rights of said Houck-Dunn-Homes ditch and those entitled to the use of the water through the same are satisfied, and the rights of the said six ditches above mentioned have been satisfied as set forth in the tabulated statement herein, the water master shall distribute the water to the remaining ditches in the order of their respective priorities, or in rotation.

39.

That as against the City of Ashland, H. B. and L. B. Sander, and W. G. and Leo Sander, as to the rights claimed by them through the Meyer ditch and the Sander ditch, diverting the waters of Ashland Creek, (a tributary of Bear Creek), below the septic tank of said city, shall be entitled to no right or interest in or to the waters of said Ashland Creek, and said claimants through said Sander and Meyer ditches may at all times divert and use, as against said city, the waters returned to said stream from said septic tank, or discharged therefrom by said city.

That so long as there is sufficient water flowing from said septic tank to supply said Sander and Meyer ditches with the quantity to which each thereof is entitled, said claimants through said ditches shall

not be entitled to claim the right to any of the waters of Ashland Creek at points above by virtue of priority of appropriation, as against the various ditches and claimants diverting the waters of said stream above said Sander and Meyer ditches.

That the Oregon and California Railroad Company, a corporation, the Southern Pacific Company, lessee, in the diversion and use of the quantity of water from said Ashland Creek to which it is herein decreed to be entitled, shall at its own proper cost install, maintain and operate an automatic shut-off or other device which will effectually prevent any water running to waste from the present tank now located on the railroad depot in said City of Ashland, or any other tank of like dimensions which may hereafter be constructed.

That as against the Ashland Iron Works, a corporation claimant herein, the City of Ashland shall be entitled to divert and use all of the waters of Ashland Creek, up to the full amount of its combined appropriations and water rights, and such future rights of use as it may acquire hereafter, whenever during low stages of said stream the said City of Ashland may require the use of the waters of said Ashland Creek for use through the water system of said city, provided that said City shall use reasonable care to avoid unnecessary waste of said water.

That the appropriation and right of Ashland Ice and Storage Company, a corporation, claimant herein, is limited to a use of such surplus waters as there may be in said Ashland Creek, as against all ditches and claimants hereinbefore named having prior rights of appropriation, and when the rights of said prior appropriators shall have been satisfied, and after use by said Ashland Ice and Storage Company, the water diverted by it shall be returned to the stream at substantially the same point as now and in the past returned, without any substantial or material diminution or loss of any said water by reason of said use, and without interference with said prior vested rights.

That the right of the City of Ashland to divert and use the waters of said Ashland Creek for power purposes, as set forth in the tabulated statement herein, is subject to the limitation that such diversion and use shall not result in substantial diminution of the flow of said stream below the point where the waters used for said purposes by said city are discharged back into said stream after such use, and that such point of return to said stream shall be at all times above the head or point of diversion of the present pipe line of the Ashland Ice and Storage Company, and the heads of the various ditches of the claimants herein diverting the waters of said stream below said point where said pipe diverts water from said stream. But nothing herein contained shall be construed as a limitation upon the right of said city to divert a portion of the waters so used into its city water system for municipal, do-

mestic and irrigation purposes, and to consume the waters so diverted, to the extent of the quantity to which said city is entitled for such uses, as hereinbefore set forth.

That the use of the waters of said Ashland Creek by said Ashland Iron Works shall be subject to the limitation that after the use of the water for power purposes, said water shall be discharged back into said stream without substantial loss or diminution, above the head of the highest of the ditches of the various claimants herein, at present diverting the waters of said stream below the point where said Ashland Iron Works at present discharges said waters after said use into said stream.

40.

That as between George A. Morse, N. D. Brophy, Della M. Roper and Hannah E. Robison and Mary A. Bailey, to the extent of the amount of their combined appropriations, continuous flow, as set forth in the preceding statement of rights for the irrigation of their respective lands to be used in rotation, said claimants have the first right to the waters of Anderson Creek, and for the aggregate quantity of water represented by their combined appropriations, flowing down the channel of said stream, to their said ditches. That as between said claimants, the following stipulation, heretofore made in this proceeding by and between said claimants, is hereby adopted and incorporated herein as a part of this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions hereof. Said stipulation being as follows, to-wit:

"That Mary A. Bailey shall begin to use the waters for irrigation through the Hurley and Baldwin ditches at 6 o'clock A. M. of the first Monday in May of each year, and continue to use the full flow of water at the head of said ditch, which shall be decreed to all of the parties to this stipulation, until 5 o'clock P. M. of said day, at which time the entire flow of said stream shall be turned back into the stream and the headgate in said ditches shall be closed until 6 o'clock A. M. on the following Monday, when the said Mary A. Bailey shall be entitled to the use of the entire flow for the same period of said week, and so on during the irrigation season.

That beginning with 5 o'clock P. M. on the first Monday of May of each year and each Monday thereafter, during the irrigation season and at 5 o'clock P. M. on each succeeding Monday during the said irrigation season the owners of the Baldwin and Howell ditches shall be entitled to use, through said ditches, the entire quantity of water so decreed to all of the parties hereto for a period of twenty hours and twenty minutes, at the end of which time the waters in said ditches shall be returned to said stream and the headgates thereof closed and shall remain closed until 5 o'clock P. M. of the following Monday, and that so long as the ownership of the said ditches shall remain the

same the owners of said ditches shall have the right to use said quantity of water for said period, or any portion of said water through said Howell ditch.

That beginning at the time of the closing of the headgate of said Baldwin ditch and the headgate of the said Hurley ditch, the owners of the Burns ditch shall be entitled to the use of the full flow of the waters so adjudicated to the parties hereto through said Burns ditch, for a period of twenty hours and twenty minutes, at the end of which period the headgate of said ditch shall be closed and the water returned to said stream, and the headgate shall remain closed until a time in the succeeding week corresponding to the time when such irrigation had begun, and such irrigation for such period shall continue through the irrigating season.

That beginning with the closing of the said Burns ditch, the owners of the Robison ditch and of the Della M. Roper and Hannah E. Robison interests in the Farmers ditch shall be entitled to use, through either or both of said ditches, the full quantity of water decreed to all of the parties to this stipulation for the period of twenty hours and twenty minutes, at the end of which time no water shall be diverted into either of said ditches from Anderson Creek for the irrigation of the said Della M. Roper and Hannah E. Robison lands until a time in the succeeding week corresponding to the time hereinbefore specified for the first irrigation week and thereafter such irrigation shall continue throughout each succeeding irrigating season.

That beginning at a time when the irrigating of the Della M. Roper and Hannah E. Robison lands shall cease, as above provided, George A. Morse shall be entitled to the use, through the Farmers ditch, and the main channel of Anderson Creek, of the full quantity of water decreed by the Board to all of the parties to this stipulation, for a period of four days, beginning at 6 o'clock on Thursday morning on the first week of the irrigating season, and thereafter for a like period each week of each irrigating season shall be entitled to use said quantity of water.

And, whereas, the said George A. Morse, Della M. Roper and Hannah E. Robison are entitled to the use of certain of the waters of Wagner Creek through the said Farmers ditch, as decreed in the final decree of Davis et al. vs. Chamberlain, et al., and, whereas, this stipulation contemplates that the final decree herein shall determine the quantity of water per acre necessary and required by the various parties hereto, and whereas, it is contemplated by the said parties that the water master shall be in control of the regulation and use of the waters of Anderson Creek and of Wagner Creek under the final decree herein, that said water master shall obtain from Wagner Creek, through said Farmers Ditch, the full quantity of water to which said Della M. Roper, Hannah E. Robison and George A. Morse shall be entitled to under said

final decree in said suit of Davis et al. vs. Chamberlain, et al., and that when by the use of such waters from Wagner Creek the Della M. Roper, Hannah E. Robison and George A. Morse lands shall receive the quantity of water so decreed by the Board as necessary for the irrigation of said lands that the said Della M. Roper, Hannah E. Robison, George A. Morse, or their successors, shall not during that period require the parties to this stipulation, and who are users of the waters of Anderson Creek above the said Della M. Roper and Hannah E. Robison lands, to desist in the use of the waters of Anderson Creek.

Nothing in this stipulation shall be decreed to diminish the quantity of water which either the George A. Morse, Della M. Roper or Hannah E. Robison lands shall be entitled to, but the purpose of this last provision is to require the water master to obtain for the George A. Morse, Della M. Roper and Hannah E. Robison lands from Wagner Creek the full quantity of water to which said lands are entitled under the Davis et al., vs. Chamberlain et al. decree.

That if any controversy shall arise as to whether the Della M. Roper, Hannah E. Robison and George A. Morse lands are getting sufficient of the waters of Wagner Creek through the Farmers ditch this matter shall be referred to and determined by such water master.

That this stipulation as to the use of the waters of Anderson Creek, through the claimant's several ditches, applies to the use of the water for irrigation and domestic purposes during the periods specified herein upon the several tracts of land described as irrigated lands in the respective proofs of claims filed herein, by the parties to this stipulation; providing that Della M. Roper and Hannah E. Robison may use the water from Anderson Creek at all times for domestic purposes as they now use it; provided such use does not in any way diminish the flow of the stream substantially; but such domestic use shall not diminish the quantity of water to which the parties to this stipulation are entitled hereunder, nor prevent them taking the entire flow at the time specified herein.

That whatever waters have been reserved from the lands of the predecessors in interest of George A. Morse in any of the lands of the parties to this proceeding, and who are not parties to this stipulation, are included in the waters which the parties have herein stipulated for the division of, and that the stipulation for rotation and the use of all the waters of Anderson Creek applies to all of the waters which any or all of the parties to this stipulation shall obtain decree for.

This stipulation, as to rotation, does not provide for a division among the Anderson Creek users of any of the waters of Wagner Creek, but those are determined and to be determined by the decree in the suit of Davis et al. vs. Chamberlain, et al., hereinbefore mentioned."

41.

That as between J. J. Murphy, on the one part, and E. V. Kellogg and A. W. Silsby, partners and co-owners, on the other part, claimants to the waters of Cove Creek, a tributary of Walker Creek, which is a tributary of Bear Creek, it is determined that said Kellogg and Silsby shall have the first right to the use of the waters of the North Fork of said Cove Creek, to the extent of the quantity to which they are herein determined to be entitled, as against said Murphy up to the 1st day of July of each year; and after and subsequent to the 1st day of July of each year and to the termination of the irrigation season, shall permit at least one-half of the flow of said creek to pass the head of their said ditch for the use of said Murphy; but in the event such course is more practicable and beneficial, and a greater economy in the use of water is thereby obtained, the water master shall cause said claimants to rotate in the use of the waters of said stream, first giving to said Silsby and Kellogg for use through their said ditches the entire quantity of water to which said claimants and the said Murphy are entitled, or the entire flow of said stream when less or not more than said entire quantity for one-half of the time required to make rotation, and thereafter for one-half of the time permitting said Murphy to have the use of said entire quantity, and unless otherwise agreed upon, the period for rotation shall be one week, the said claimants Silsby and Kellogg to have the use of said entire quantity for the first half of each week, and said Murphy for the remaining half of each week throughout the irrigation season.

42.

That T. E. Scantlin has no right, title or interest in or to the use of the waters of Wagner Creek, either through the Farmer's ditch, or otherwise, and that the owners of said Farmer's ditch and water right are as set forth in the findings in said suit of Davis vs. Chamberlain hereinbefore referred to. That said Scantlin, as successor in interest to said George Dewey, is barred and estopped by virtue of said decree in said suit from claiming or asserting any rights to the waters of said Wagner Creek, either through said Farmers' ditch or otherwise.

That the rights of the various claimants to the waters of Wagner Creek, a tributary of Bear Creek, hereby confirmed shall be, and the same are, as decreed in that certain decree in that certain suit wherein Allen Davis and other were plaintiffs, and H. M. Chamberlain and others were defendants, referred to in the findings herein, and said decree is hereby adopted, and by reference herein, incorporated as a part of this order of determination; and the use and distribution of said Wagner Creek and its tributaries among the claimants thereto shall be made in accordance with the provisions of said decree, as among the parties to said suit and decree, and their successors in interest. That the water

right certificates issued to claimants herein, parties to said suit, or whose predecessors in interest were parties thereto, and involving the waters of said Wagner Creek, shall be subject to the terms and conditions of said decree.

43.

That by nonuser for more than ten years preceding these proceedings, Ed Boling and N. Hosmer, their successors, heirs and assigns, have lost and abandoned the right to divert and use any of the waters of the Left Hand Fork of the Right Hand Fork of Fooths Creek, a tributary of Rogue River, or the Middle Fork of the Right Hand Fork of said Fooths Creek, which flows into said Left Hand Fork of said Right Hand Fork of said Fooths Creek, at any point or place beyond or outside the watershed of said Right Hand Fork, and particularly upon the said mining lands situate on the Middle Fork of said Fooths Creek and described in the findings herein, through the Glenn ditch described in said findings, or otherwise. That the proposed change in place of use from the watershed of said Right Hand Fork to the watershed of said Middle Fork would work irreparable injury to, and be to the substantial detriment of the rights of use of George and Marion Lance, claimants to the use of said waters, whose rights are tabulated herein. That since said George and Marion Lance have had the use of the waters of said Right Hand Fork and its upper tributaries without substantial interference by said Ed Boling and N. Hosmer, or their predecessors in interest, for more than thirty years past, and at all times during said period said Ed Boling and N. Hosmer, and their predecessors in interest, have so used said waters above the said lands of said George and Marion Lance as described in the tabulated statement herein, as not to interfere with or prevent the use thereof by said George and Marion Lance, and their predecessors in interest, and since the use of all of said parties of said waters during all of said times has been harmonious and without injury to, or molestation of the rights of any other of said parties, and this condition having prevailed for so many years, and said George and Marion Lance, and their predecessors in interest, having had the uninterrupted, continuous and peaceable use and enjoyment of said waters under a claim of right, it appears to the Court that the claim of said Boling and Hosmer to change the place of use of said waters to said Middle Fork of Fooths Creek, and thereby disturb the settled conditions which have so long prevailed upon said Right Hand of Fooths Creek, is too stale to be considered in equity. Said claim is therefore disregarded and disallowed, and the right so claimed is considered abandoned.

44.

That as between H. S. Lynch, F. W. Combs and John Kent, the following stipulation heretofore made in this proceeding by and between said claimants is hereby adopted and incorporated in this decree

and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"It is hereby stipulated and agreed between the parties hereto, that or the 32 inches of water decreed by the Supreme Court, of the State of Oregon, as belonging to the said three tracts of land, John Kent and his successors in interest, shall have the entire use thereof, for one day; that F. W. Combs and his successor in interest, shall next have the use of the entire 32 inches for a period of 2 ½ days; and that Harry S. Lynch and his successor in interest shall next have the use of the entire 32 inches for 7 ½ days, said use in each case, is to be confined to the irrigation of the lands of the respective parties, as found and decreed in the cause aforesaid.

"WHEREFORE, the Board of Control in this proceedings is authorized and instructed to find and determine the respective rights of said claims, in accordance herewith, and the Circuit Court having jurisdiction in this matter, may enter a decree according to this stipulation and agreement."

45.

That as between Frank Kerby, Wm. Kerby, Harry S. Lynch and T. A. Lynch, claimants to the waters of Yank Gulch, the following stipulation heretofore made in this proceeding herein by and between said claimants is hereby adopted and incorporated in this decree and the relative rights of said claimants to said waters of Yank Gulch are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"Comes now Frank Kerby, William Kerby, in person and Harry S. Lynch, in person, and for and on behalf and as his attorney in fact, for T. H. Lynch and by and through attorney W. J. Moore, and having heretofore appeared in this proceeding and submitted statements and proof of claim as to the waters of the above named stream, now stipulate and agree as to their relative rights, the use and rights of the above named stream as follows, to-wit:

"First: That each of said claimants shall be and is entitled to an undivided one-fourth interest in that certain ditch known as the Yank Gulch Ditch, or Kerby or Lynch Ditch, diverting the waters of the above named stream.

"Second: That said claimants shall be and are entitled to divert and use forty inches, miners measure or one second foot, jointly, into the head of said ditch, and that each of said claimants is entitled to the use of an undivided one-fourth interest of the waters so diverted and used; and that said quantity of water is necessary for the proper irrigation of the lands of said claimants as set forth and described in their statements and proofs of claim in this proceeding heretofore filed.

"Third: That said ditch was constructed in the year 1855 and the priorities of the rights of said claimants should be and

are equal in point of time as of the year 1855.

"Fourth: That the rights of each of said claimants shall date as to priority from the year 1855 to an amount of water necessary for the beneficial use in the irrigation of their said lands, which is hereby stipulated and agreed to be not less than $\frac{1}{2}$ inches, miner's measure, for the lands of each claimant, or a total quantity for all of said lands of forty inches, miner's measure, (or one second foot) and the said water rights are and shall be appurtenant to the respective several tracts of land as the same are described in the statements and proofs of said claimants heretofore filed herein.

"Fifth: That the waters so diverted into the head of said ditch and through the same shall be used by each of said claimants in rotation so far as practicable, the said claimants to rotate in the use of said waters when necessary; the method and manner in which such water shall be used to be left to the future agreements of said claimants, as to the manner in which said claimants shall rotate in such use of said water; it being understood that each of said claimants so rotating shall have an equal right for his proportionate length of time to the use of all the water in the said ditch and that the rights of all said claimants as to the time of priority and the quantity of water are equal.

"Sixth: That at any time when the quantity of water in said stream shall be sufficient to supply one second foot of water and a less quantity is diverted, the rights of the parties shall remain the same, and a division of said water shall be made in the ratio of one-fourth thereof to each claimant, so far as practicable and possible.

"Seventh: That each of said claimants is entitled to divert and use that water in said ditch for stock and domestic use, to the extent that the same shall be required for reasonable household, domestic and stock purposes, and that whenever the waters of said stream, so diverted into said ditch are insufficient for the service of all of said parties for irrigation purposes as well as stock and domestic use, the use of all water for stock and domestic purposes have the preference to the use for irrigation, and sufficient water shall be allowed to remain in said ditch to supply the demands of each and all of said claimants requiring the use thereof for stock and domestic purposes, it being understood that the claimants have equal rights of use for stock and domestic purposes as well as for irrigation.

"Eighth: That this stipulation and agreement is entered into by the claimants upon the consideration that it is an adjustment and settlement of the disputed rights of said claimants in said ditch and water, and shall be and is binding upon each of said claimants, his successors, heirs and assigns, and shall be and is filed in this proceeding as a settlement of the disputed rights of said claimants to the end that

there shall be no contest herein involving said ditch and water right as among said claimants; and the Board of Control in this proceeding is authorized and instructed to determine the respective rights of each of said claimants in accordance herewith and the Circuit Court having jurisdiction in this matter may enter a decree in accordance with this stipulation and agreements."

46.

That as between G. F. Billings and Ralph and Francis Billings of the first part, and W. W. Dann of the second part, claimants to the waters of Wrights Creek, tributary of Bear Creek, the following stipulation by and between said claimants heretofore made and filed herein is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"First: That said W. W. Dann shall be and is entitled to divert and use for household and irrigation purposes, all or any part of the water of Dann Spring, the water of which ordinarily flowed into the West fork of said Wright Creek, such diversion to be made at a point at the head of the Dann ditch, which point is clearly shown on the plat filed with the Board of Water Control, by W. W. Dann, on the 18th day of May, 1912.

"Second: That the said G. F. Billings, and Ralph Billings and Francis M. Billings, their successors or assigns shall divert and use for domestic and irrigation purposes, all of the rest and remainder of the water flowing in said Wright Creek.

"Third: That this stipulation and agreement is entered into by the claimants hereto, upon the consideration that it is an adjustment and settlement of the disputed rights of said claimants, in said spring and creek and the water flowing therefrom and therein, and shall be and is binding upon each of said claimants, his successors, heirs and assigns, and shall be and is filed in this proceeding as a settlement of the disputed rights of said claimants and to the end that there shall be no contest herein involving said spring and creek, and the water right as between said claimants; and the Board of Control in this proceeding is authorized and instructed to determine the respective rights of each of said claimants in accordance herewith, and the Circuit Court having jurisdiction in this matter may enter a decree in accordance with this stipulation and agreement."

47.

That as between J. B. Hillis et al, claiming the waters of Evans Creek, contestant, and Paul S. Seeley, contestee, the following stipulation heretofore made in this proceeding by and between said claimants is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"It is hereby stipulated by and between

the contestants and the contestee that the contestants, as owners of the right to the use of waters of Evans Creek through the Williams and Whalen ditch, located by Williams and Whalen, February 20, 1896, under location notices of record calling for one thousand miner's inches of water out of said stream, are entitled to a first right to the use of the waters of Evans Creek, through said Williams and Whalen ditch for the irrigation of the following lands filed upon herein by them as irrigated lands and lands to be irrigated by them through said ditch respectively, to-wit:

"That they shall be entitled to the use, during the irrigating season of each year, of sufficient of the waters of said stream through their said ditch for the proper irrigation of said lands, not, however, in excess of the present carrying capacity of said ditch, which carrying capacity is to be determined by the certificate of the State Engineer, who has measured the said ditch, as to the carrying capacity.

"That the court herein shall determine in this proceeding the duty of water as respects the said several tracts of land and determine the same from the evidence herein; that the duty of water as to the land of the contestee is the same as to the lands of the contestants, that is to say, that acre for acre the lands of the contestants require the same amount of water for irrigation as do the lands of the contestee, but that the right to the use of said waters to irrigate the lands of the contestants is prior in point of time and right to the right of the contestee."

48.

That as between the Old Mill Ditch and Irrigation Company and Paul S. Seeley, claiming waters of Evans Creek, the following stipulation, heretofore made herein in settlement of the contest between said claimants and filed herein is hereby adopted and incorporated herein and made a part of this decree and the rights of said claimants are hereby adjudicated and determined, subject to the provisions of said stipulation, which is as follows, to-wit:

"In settlement of the above entitled contest, it is hereby stipulated and agreed, that a decree shall be entered herein as follows:

"That the Board of Control shall determine the quantity of water required by the contestant at the head of its ditch for the proper irrigation of its lands spec-

ified in its proof of claim on file herein. That whenever the water at the head of the contestant's ditch shall not be sufficient to furnish the quantity of water so found by said Board for said lands the contestee herein shall allow sufficient water to pass his headgate, which, with the other water in the said stream, shall furnish sufficient water at contestant's headgate to meet the requirements found by said Board. Provided, however, that at all times during all periods of the irrigating season the contestee shall be entitled to use at least three-fifths of the entire flow of said stream at contestee's headgate of the Vrooman Ditch, or at any other point of diversion above the point of diversion of the contestant's headgate, provided the contestee should change the point of diversion of said Vrooman Ditch.

"And it is stipulated that the right of the contestee to the use of at least three-fifths of the water at his said headgate at all periods of the irrigating season is confirmed. The right of the contestant to the use of the quantity of water found necessary by the Board for the irrigation of its lands or the lands of its stockholders is confirmed and ratified, subject, however, to the condition that this shall at no time impair the right of the contestee to the use of said three-fifths of said water at his said headgate, nor his right to use in excess of said amount, provided such use of such excess shall not diminish the water at the contestant's headgate below the quantity so determined by said Board.

"And whereas, one Breeding and one Estell claim rights out of said stream through contestant's ditch, that the amount which is herein provided that the Board shall find for contestant's said lands is deemed to mean and include also the quantity found by said Board and required for the lands of the said Estell and of the said Breeding under their respective proofs of claim.

"Neither party shall recover any costs and disbursements herein.

"The parties to this stipulation shall meet the expenses of installing and maintaining a proper measuring device at the head of the Vrooman Ditch, to comply with this stipulation, as follows: Two-fifths of said cost shall be paid by the contestant and three-fifths by the contestee.

"If the contestee shall change the point of diversion of the Vrooman Ditch to some point above the head of contestant's ditch then the entire expense of such change, and of a new measuring device, shall be borne by the contestee, and such new device put in by him shall be in all respects equal in efficiency and durability to that installed hereunder by the parties hereto.

"After such installation the maintenance thereof shall be borne in such proportion of two-fifths and three-fifths."

49.

That as between J. B. Hill et al, contestant, and E. D. Thompson, et al, contestees, claiming waters of Evans Creek, the following stipulation, heretofore made herein in settlement of the contest between

said claimants and filed herein, is hereby adopted and incorporated herein and made a part of this decree and the rights of said claimants are hereby adjudicated and determined, subject to the provisions of said stipulation, which is as follows, to-wit:

"In settlement of the contest of J. B. Hillis, and others, owners of the Williams & Whalen ditch, against the claim of E. D. Thompson and C. W. Wilcox, it is stipulated by the contestants, by A. E. Reams, their attorney and by E. D. Thompson, for himself and for C. W. Wilcox, that a decree may be entered upon the contest, without any costs against the contestee, as follows:

"That contestees claim no right in the Williams & Whalen ditch or water right. That they take the water claimed by them from a slough after it has been used by the contestants. That they claim no right to require such use of the water of the Williams & Whalen ditch as to put water into said slough or into the ditch of the contestees, but that they have the right to use such water when it is available for them in said slough, and at the head of their ditch."

50.

That as between the Old Mill Ditch and Irrigation Company and Wm. G. Breeding and Barbara Estell, the relative rights of the said claimants are hereby determined and adjudicated subject to the provisions of those certain final decrees mentioned in the findings of the Board herein, wherein said contestant Old Mill Ditch and Irrigation Co. was plaintiff and said Wm. G. Breeding and Barbara Estell were defendants.

51.

That as between C. E. Wickstrom, contestant, and Dan Cameron, contestee, the following stipulation heretofore made herein in settlement of the contest between said claimants and filed herein is hereby adopted and incorporated herein and made a part of this decree and the rights of said claimants are hereby adjudicated and determined, subject to the provisions of said stipulation, which is as follows, to-wit:

"It is hereby stipulated by and between C. E. Wickstrom, contestant, and Dan Cameron, contestee, by and through their respective attorneys, in that portion of the contest which applies to the contestant's high line ditch out of Pleasant Creek and the contestee's Moore Ditch out of the east or right hand fork of Pleasant Creek, which fork joins Pleasant Creek in Section 10, Township 34 South, Range 4 West, that the contestant's right under said high line ditch dating from the year 1900 is superior to any right of the contestee through said Moore Ditch out of said Pleasant Creek at any point above the junction of said right hand fork or east fork of said Creek with Pleasant Creek, but that the contestee is entitled for mining purposes to whatever water is claimed by him through said Moore ditch out of said east or right hand fork of said Pleasant Creek as against said high line ditch.

"It is hereby stipulated by the parties that as between the contestant, under the Collins ditch and the contestee under his ditches, the contestant is entitled to an equal right with the contestee for irrigation from the Collins ditch of such of contestant's lands as are cleared and subject to irrigation from said ditch, the area and description thereof, and the quantity of water required therefor to be determined by the State Water Board; that the State Water Board may cause such survey as necessary to be made, and the filing of the State Engineer or deputy of the said matter shall be considered as evidence herein.

"The above stipulation was agreed to by Mr. Gus Newbury, attorney for contestant, and Mr. A. E. Reams, attorney for contestee."

52.

That W. H. Oden has no right, title or interest in or to the use of the waters of Pleasant Creek and his proof of claim herein should be and hereby is held for naught.

53.

That as between A. H. Quatman, contestant, and Dan Cameron, contestee, the following stipulation heretofore made in this proceeding by and between said claimants is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"Now at this time this contest coming on for hearing, the contestant appearing by W. E. Phipps, his attorney, and the contestee appearing by A. E. Reames, his attorney.

"Whereupon it is stipulated, that the contest herein arose largely because of the fact that there are two ditches on said stream, sometimes called the Wakeman Ditch, first, the Miles Wakeman Irrigation Ditch on the old Wakeman place, and second, the Wakeman-Chapin Ditch, commonly known as the Big Ditch, and it is stipulated that the contestant Quatman is the owner of the Irrigation Ditch, and the contestee Cameron is the owner of the Wakeman Chapin, or Big Ditch. That said Big Ditch has a superior right over said Wakeman Irrigation Ditch for mining purposes. And that the contestee is entitled to all of the water claimed by him through said Big Ditch, with the exception that he has no right to take the waters through said ditch to a point below the intake of the Miles Wakeman Ditch owned by said contestant."

54.

That Charles Owens heretofore filed Proof No. 404 (Vol. 7) claiming a right to the waters of Pleasant Creek for irrigation purposes through the Wakeman Ditch. That in that certain suit wherein Joseph D. Wakerman, a predecessor of A. H. Quatman, a claimant herein, was plaintiff, and said Charles Owens and Katie Owens, his wife, and others were defendants, commenced in the Circuit Court of the State of Oregon, for Jackson County, a decree was entered on March 29, 1905, and re-

corded in Vol. 13, page 244 of Circuit Court Journal of Jackson County, Oregon, in which said decree it was ordered and decreed that the plaintiff and his predecessor in interest ever since the year 1877 had been and that the plaintiff then was the sole and absolute owner of the water ditch and water right and of all the water conveyed by said ditch known as the Wake-man Ditch, from the head of said Ditch on Pleasant Creek to and upon the lands of plaintiff, and of every part thereof, and that said defendants, and either of them, never had had and did not have at that time any right, title or interest therein or thereto, or to any part thereof, and that any claim of title on the part of said defendants or either of them to any title, right or interest in or to said water right or ditch or ditch right was wrongful, invalid and without foundation in law, equity or title, and that plaintiff's title to said ditch and water right and the water appropriated thereby and therefor was thereby quieted and determined as against said defendants and each of them and all persons claiming under them or either of them. That the plaintiff in said suit was the predecessor in interest of said A. H. Quatman, and that it does not appear that said Charles Owens has since said decree acquired any right, title or interest in said ditch. It is therefore decreed that whatever right said Owens may have in said ditch or to the use of the water therefrom is based upon a permissive use as against said A. H. Quatman, that said Owens is claiming a permissive right, but that said decree was made and entered in the year 1905.

55.

That as between E. E. Bagley and Lizzie Hale, contesting claimants, the following stipulation heretofore made in this proceeding by and between said claimants is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"In settlement of the above contest it is stipulated that a decree shall be entered to the effect that M. W. Hale, successor by inheritance to the claim of Lizzie Hale, deceased, is entitled to the first right out of Wards Creek, for the irrigation of 6½ acres of land described in the said Lizzie Hale's claim, the amount and quantity of the water, and the time when the same is to be used is to be determined by the Board of Control for this court, and the water to be used under the rotation system under direction of the Board of Control.

"That the right is a prior right for such water as is necessary for such irrigation of the said lands, but the Board shall have the right to enforce rotation with the lands of the contestant and that such rotation shall be consistent with the prior right of the said Hale as the successor of said contestee.

"That 6½ acres is the same 6½ acres which the stipulation filed concurrently herewith in the case of Meadowbrook Or-

chard Co. refers to. This settlement is a part of the settlement of said contest of Meadowbrook Orchard Co. vs. Lizzie Hale, and the contestee herein gets a prior right only for the 6½ acres referred to in both stipulations, being the same land in both, Provided, however, that said contestee may, subject to the approval of the Board of Control of the State of Oregon, transfer said water to any other portion of the lands now owned by said contestee, not exceeding 6½ acres, it being expressly understood that no more than 6½ acres of land shall be irrigated by the contestee in any one year, and that the decree to be entered in accordance herewith shall not be deemed or held to confer any rights whatever upon any of the lands of the contestant, nor construed to be a consent to entry of the contestant, nor construed to be a consent to entry upon contestant's land for the purpose of diversion."

56.

That as between the Meadowbrook Orchard Co., contestant, and Lizzie Hale, contestee, to the waters of Wards Creek, the following stipulation heretofore made in this proceedings by and between said claimants, is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined, subject to the provisions thereof, to-wit:

"In settlement of the above contest it is stipulated that a decree shall be entered to the effect that M. W. Hale, successor by inheritance to the claim of Lizzie Hale, deceased, is entitled to the first right out of Wards Creek, for the irrigation of 6½ acres of land described in the said Lizzie Hale's claim, the amount and quantity of the water, and the time when the same is to be used is to be determined by the Board of Control or this Court, and the water to be used under the rotation system under direction of the Board of Control.

"That the right is a prior right for such water as is necessary for such irrigation of the said lands, but the Board shall have the right to enforce rotation with the lands of the contestant and that such rotation shall be consistent with the prior right of the said Hale as the successor of said contestee.

"This 6½ acres is the same 6½ acres which the stipulation filed concurrently herewith in the case of E. E. Bagley refers to. This settlement is a part of the settlement of said contest of E. E. Bagley vs. Lizzie Hale, and the contestee herein gets a prior right only for the 6½ acres referred to in both stipulations, being the same land in both. Provided, however, that said contestee may, subject to the approval of the Board of Control of the State of Oregon, transfer said water to any other portion of the land now owned by said contestee, not exceeding 6½ acres, it being expressly understood that no more than 6½ acres of land shall be irrigated by the contestee in any one year, and that the decree to be entered in accordance herewith shall not be deemed or held to confer any rights whatever upon any of the lands

of the contestant, nor construed to be a consent to entry upon contestant's lands for the purpose of diversion."

57.

That Ralph G. Jennings, Wilbur W. Cameron and Z. Cameron, co-owners of the Comstock ditch and water right, shall have the right to use, collectively, 17½ cubic feet per second for mining purposes, the water to be returned to the stream above the next lower water user on any mining ground where it can be reached without interference with the water of any water user above the present point of diversion, and without interference with any water user below the point where the water is now returned to the stream; provided further that said claimants are entitled to use the water of Applegate River through said ditch for mining purposes at all seasons of the year.

58.

That the right of J. N. Matney in and to the waters of Applegate River, through the Offenbacher & O'Brien ditch, is subsequent and inferior in point of time and right to the rights of John and Fred Offenbacher; but that said J. N. Matney has an interest in and the right to the use of said ditch for the conveyance of the water allowed him in the statement of right herein.

59.

That W. A. Heard has no right, title or interest in or to the waters of Williams Creek, a tributary of Applegate River, and his statement and proof of claim herein is held for naught.

60.

That as between C. S. Wiseman and W. R. Yeo, of the one part, and O. H. Fields, J. C. Jones, E. N. Provolt, Samuel Provolt and L. M. Spencer, of the other part, the following stipulation heretofore made in this proceeding by and between said claimants is hereby adopted and incorporated in this decree and the relative rights of said claimants are hereby adjudicated and determined herein, subject to the provisions thereof, to-wit:

"That contestees hereby consent and agree that upon the final adjudication of the waters of Williams Creek, a tributary of Rogue River, that a decree may be entered in their favor for fifty (50) inches of water, instead of for 80 inches, as demanded in the proofs. Upon the entry of the decree in accordance herewith the contestants hereby consent and agree that their contest be dismissed. This stipulation shall not be deemed to waive or abrogate any dating of priority contained in the proofs of the respective parties, but it shall be understood as absolutely waiving the claim on part of the contestees to any water of Williams Creek through the said ditch other or greater than fifty (50) inches as against the contestants."

61.

That the Estate and Heirs of J. T. Layton, deceased, have no right, title or interest in and to the waters of Williams Creek, through the Layton Ditches, for irrigation purposes upon their lands described in said

proof of claim herein, or upon any other lands, and their right to the waters of said stream through said ditches are confined to the use of the waters of said stream for mining purposes and uses thereto; and a change in the character of said use from mining to irrigation would be to the irreparable injury and detriment of the subsequent right of other water users from said stream and from Applegate River, below the mouth of said Williams Creek.

That the Estate of J. T. Layton, deceased, is entitled to divert and use, for hydraulic mining purposes, the waters of the East Fork of Williams Creek, through the Upper and Lower Layton Ditches, to the amount of not exceeding eight second feet through the Upper Ditch, and not exceeding twelve second feet through the Lower ditch, from November first until the first day of July of the following year; and subsequent to July 1st of each year and until the first of September following the amount of not exceeding eight second feet through said Upper ditch; and after the first of September until the first of October not exceeding two second feet through said Upper Ditch. That at such times as said claimant does not require or need said amounts of water through said ditches, or either of them, or less than the quantity hereby confirmed, for the beneficial use for hydraulic mining purposes, the said waters, and all surplus waters over and above the amounts hereby confirmed, or such amounts as may be actually needed and used by said claimant, shall be at the disposal of and subject to use by subsequent appropriators for irrigation and other uses in their priority order. That the rights of appropriation hereby confirmed are limited to a use of said waters for mining purposes, and confer no rights of use for irrigation or other uses than mining, or for sale or rental of water from said ditches for any purpose or use whatsoever.

62.

That as between M. J. Hosmer, protestant, and the Estate of John B. Mattis, deceased, the rights of the said parties are hereby determined and adjudicated in accordance with the stipulation referred to in paragraph XVII of the findings of fact of the Court herein; and as between Abbie J. Champlin, and M. J. Hosmer and Grant Mathews, the rights of said claimants are hereby adjudicated and determined subject to the stipulation set forth in said paragraph XVII of the findings of this Court.

That said M. J. Hosmer and Grant Mathews, as successors in interest of N. H. Hosmer, are entitled to the use of the waters of Foots Creek, through the Hosmer ditch for the irrigation of fifteen acres, as of the priority 1857; and the water right appurtenant to the said Hosmer lands is appurtenant to the Hosmer farm as a whole, and said claimants should be, and are entitled to use the said waters anywhere on the said lands, so long as no other lands are brought under said ditch to the invasion of subsequent rights; that

said claimants are entitled to a quantity of water not exceeding 0.38 second foot for said lands; and the findings and order of determination of said Board are hereby modified accordingly.

63. See: *111 Ore 237*

That as between I. W. Turvey and J. C. Kincaid, claimants to the waters of China Creek, a tributary of Williams Creek, the rights of priority of said claimants are equal in point of time and should date from the year 1877; that said claimants are hereby required to rotate in the use of the waters of said stream, under the supervision of the water master; and until otherwise arranged by and between said claimants by written agreement made with the consent of said water master, said J. W. Turvey shall be entitled to the use of all of the waters of said stream to which both said claimants are entitled, to the exclusion of any use or diversion thereof by said Kincaid, on Sundays, Mondays, Tuesdays, and Wednesdays of each and every week during each irrigation season hereafter; and said J. C. Kincaid shall be entitled to divert and use all of the waters of said stream to which both said claimants are entitled, for the purposes of his appropriation, on Thursdays, Fridays, and Saturdays, of each and every week of each irrigating season, hereafter, to the exclusion of any diversion or use thereof by said J. W. Turvey; and the rights of said claimants as herein adjudicated and determined are hereby expressly made subject to these provisions for rotation.

64.

That Emma G. Robinson, claimant to the waters of Galice Creek, Rich Gulch, Rocky Gulch, and other tributaries, has disclaimed any right to the waters of Rocky Gulch; and it is hereby decreed and determined that she has no right, title, or interest in or to the waters of said Rocky Gulch, or to the waters of Rich Gulch; and the findings and order of said Board are modified accordingly; but otherwise the said finding and order of said Board in respect to the rights of said claimant are confirmed.

65.

That Harriett E. Davis, claimant herein, has no right, title, or interest in or to the Baltimore Ditch diverting water from Williams Creek; and no right to divert or use water therefrom.

66.

That without determining whether they are entitled to any right or interest in the Gallagher ditch, or in whom title to said ditch is vested, it is determined that H. M. Forest, A. B. Saltmarsh and Cyrenus Combest are entitled to water rights by reason of their use of the waters of Little Applegate creek, tributary of Big Applegate creek, flowing through said ditch, as set forth in the statement of rights herein; but this is not intended to determine that either or any of said claimants have any right, title, or interest in said ditch, or to divert or use water therefrom as against the true and lawful owner of the same, in whom title to said ditch may

be vested; but as against all others and as against all the world, except as against the owner or owners of said ditch, the court determines that said claimants are entitled to the use of the water flowing through said ditch and to rights of appropriation of the waters of said Little Applegate creek as herein set forth.

That the lands of R. M. Forest and J. F. Crump, under the Gilson and Gleave ditch, from said Little Applegate creek, having been irrigated from said Gallagher ditch long prior to the construction of said Gilson and Gleave ditch are entitled to appurtenant water rights as of the time when water was first used for the irrigation of said lands through said Gallagher ditch.

That the priorities of the various claimants through the Gallagher, Spicer, Upper and Lower Phillips, Gin Lin, and Deming ditches from said Little Applegate creek depends upon the time when water was first used by each of said claimants respectively, or their respective predecessors, for irrigation purposes on the lands under said ditches, and that no privity of estate or interest has been established which entitles any of said claimants to antedate the priorities set forth in the statement of rights herein by reason of the construction of said ditches and use of water through the same for mining purposes.

That as respects the claim of E. J. Cameron to a right to the use of water through the Gin Lin ditch from said Little Applegate creek for either mining or irrigation purposes, the court determines that any such water rights have been abandoned and forfeited by said E. J. Cameron and her predecessors in interest for non user of the waters of said Little Applegate creek through said ditch for any purpose by said E. J. Cameron or predecessors in interest for more than ten years; but it is not intended to hereby determine that E. J. Cameron has no right or title in or to said ditch or in any way to determine the ownership of or title to said ditch.

That as between A. S. Kleinhammer and the Sterling Mining Company, said A. S. Kleinhammer is entitled for irrigation purposes, to be diverted through said Upper and Lower Phillips ditches, to the amount of 500 inches (or 12 1/2 second feet) of the waters of said Little Applegate Creek for one week at a time if they shall demand it, for five weeks between the first day of July and the first day of October of each year; and said Sterling Mining Company, or their successors in interest in the ownership of said Sterling ditch or water rights connected therewith, shall furnish to said A. S. Kleinhammer, or his successors in interest, on 3 days' notice, for the irrigation of lands under and for use through said Phillips ditches, 500 miner's inches of water (or 12 1/2 second feet) and shall allow said quantity to flow past the headgate or headgates of said company down the channel of said creek at any time as demanded during July, August, and September, of each year not exceeding one week at a time and not exceeding

5 weeks in all during those three months.

That the mining season during which water has been used for mining purposes from said stream extends from November 1st to August 1st of each year, and the Sterling Mining Company, a corporation, claimant herein, is limited to the use of water therefor to said season, and has no right to the use of any of the waters of said stream after August 1st and during August and September and October of any year, whenever such use shall interfere with the rights of those claiming the use of said water for irrigation purposes as herein set forth; but nothing herein contained is intended to prohibit said Sterling Mining Company from diverting and using water from said stream when there shall be a surplus at any time during the year over and above the amount required to satisfy the rights of those entitled to the use of water for irrigation purposes as herein set forth. That Charles A. Smith, claimant above named, is entitled, for the irrigation of the lands owned by him as described in the tabulated statement herein, to the quantity of 15 inches, or 0.375 second feet, for a period of 24 hours once in every 12 days, and this shall be the measure of said claimant's right. This determination is based upon the agreement and stipulation herein a part of the record, between said Charles Smith, of the one part, and John Devlin, H. H. Taylor, Maggie Buckley, George H. Wolf, and William Cameron, of the other part. And it is further determined hereby that said quantity of water so to be furnished said Smith as aforesaid shall be furnished and supplied by said second parties aforesaid from such waters as they in the aggregate are entitled to divert into said Farmers lateral and the Davidson ditch, or E. J. Cameron lateral. That the irrigating season extends from May 1st to October 1st of each year. That the mining season extends from November 1st to August 1st of each year.

67.

That Mrs. Ora Jones, claimant to the waters of Bear Creek, a tributary of Evans Creek, is allowed to intervene herein and submit proof of her right to the waters of said stream, and shall have all right vouchsafed by law to claimants who have been duly served herein, and have appeared heretofore and within the time required by law. That the right of said claimant is as adjudicated and determined in the statement of right herein.

68.

That as between the Sterling Mining Company, a corporation, by R. S. Bullis, mortgagee in possession, on the one side, and Andrew Cantrall, as successor in interest of Fred Kleinhammer, and Mrs. Dora Saltmarsh, on the other side, the following stipulation, made between said claimants is hereby adopted by the court, and made a part of this decree, and the rights of said claimants are hereby adjudicated and determined subject thereto, to-wit:

It is stipulated between the Sterling

Mining Company and Andrew Cantrall and Mrs. Dora Saltmarsh, the successor in interest to A. B. Saltmarsh, that the land belonging to the Sterling Mining Company and consisting of 15 acres in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ and the SW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 9, Tp. 39 S. R. 2 W. W. M., have an equal right of priority for irrigation purposes from the waters of Little Applegate, those belonging to the Sterling Mining Company through their ditch, and those of Dora Saltmarsh through what is known as the Gallagher ditch, and that said priority is of date 1885; and it is further stipulated that the rights for irrigation of said tract of land belonging to said Sterling Mining Company from the waters of said Little Applegate are inferior in priority to the lands of Andrew Cantrall and the lands heretofore belonging to Fred Kleinhammer, said Andrew Cantrall lands being known as the Riley Phillips lands, the Samuel Phillips homestead and the Yeba Harwich lands, all of which lie along the main fork of Little Applegate Creek, and it is further stipulated that 20 acres of the lands belonging to the Sterling Mining Company situated in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 19, Tp. 39, S. R. 2 W. W. M., and the S $\frac{1}{2}$ of the SE $\frac{1}{4}$ of Section 13, Tp. 39 S. R. 3 W. W. M., have a priority of irrigation right over the lands heretofore belonging to Fred Kleinhammer and lying along the banks of Little Applegate stream, and that the same are inferior in irrigation right to the said lands of the said Andrew C. Cantrall, the said Andrew Cantrall lands consisting of the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 19, and the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 20, and the N $\frac{1}{2}$ NW $\frac{1}{4}$ of Sec. 29, all in Tp. 39 S. R. 2 W. W. M., the understanding being that all references heretofore made to the Kleinhammer and Cantrall properties are references made to the lands of said parties described in the former findings and decrees of the Water Board, and covers no other property; it being understood that this stipulation does not contemplate in any manner the disturbance or alteration of the decree of the Supreme Court in favor of Andrew Cantrall and against the Sterling Mining Company.

69.

That Emma G. Robinson, claimant to the waters of Rich Gulch, is not entitled to the use of any of the said waters of said Gulch, and her claim thereto is hereby disallowed and denied; and inasmuch as said claimant has disclaimed any right or interest in or to the waters of Rocky Gulch, she is hereby decreed to have no right, title, or interest in or to said waters; but otherwise and as to other rights claimed by her, the findings and order of determination of the State Water Board herein are affirmed.

70.

That that as between Abbie J. Champlin and M. J. Hosmer and Grant Mathews, claimants to the waters of Footh Creek, the following stipulation is hereby adopted in the adjudication and determination of the relative rights of said claimants, and for that purpose hereby made a part of this decree, to-wit:

It is hereby stipulated between Abbie J. Champlin or Gold Hill, Oregon, of the first part, and M. J. Hosmer and Grant Mathews, of Gold Hill, Oregon, of the other part as follows: First. The parties to this stipulation are both land owners and the owners of irrigation rights from the waters of the West fork of Footh Creek in Jackson County, Oregon. The parties hereto both claim under an appropriation made in 1857 by what is known as the Magruder ditch and by one Edmund B. Magruder, to the extent of all of the water of the West Fork of Footh Creek during the irrigation season, for irrigation, stock, and domestic purposes. Second. The parties hereto as successors in title and interest of the said Edmund B. Magruder, and by sundry mesne conveyances from the said Edmund B. Magruder, and through G. W. Lance, have acquired and now own interests in said original appropriation as follows, to-wit: Abbie J. Champlin is the owner of one-half of the said Magruder right to the waters aforesaid, estimated at thirty-three miner's inches under a six inch pressure, that being one-half of all of the water afforded by said stream during the dry or irrigation season; M. J. Hosmer and Grant Mathews own jointly and in undivided interests the other half of the Magruder water right from said stream, estimated at thirty-three inches, miner's measure under a six inch pressure. Third. The West Fork of Footh Creek during the dry or irrigation season does not deliver water for irrigation or other purposes in excess of sixty-six inches, miner's measure under a six inch pressure. Fourth. In so far as the findings of the State Water Board vary the rights of the parties other or different from those rights heretofore set forth as to the amount of water allowed either, or as to the dating of priority of the same, the parties hereto each consent in favor of the other, that the decree of the court in favor of each and either may be so drawn as to allow unto each party to this stipulation the amount of water hereinbefore set forth, that is to say, unto Abbie J. Champlin thirty-three inches, miner's measure under a six inch pressure, and to M. J. Hosmer and Grant Mathews thirty-three inches, miners' measure under a six-inch pressure, and that said water may be used for irrigation purposes upon any and all of the lands of each, and that priority of each of said rights may be made to date as of the year 1857, and which is the year when said rights were initiated by Edmund B. Magruder, the common grantor and predecessor in interest of each of the parties hereto.

71.

That as between M. J. Hosmer, and the estate of John B. Mattis, the rights of the said parties are hereby adjudicated and determined subject to their certain stipulation referred to in the findings herein, with respect to the Hosmer ditch from Footh Creek, and it is hereby determined and decreed that the said Estate of John B. Mattis has no right or interest in or to the waters flowing in said Hosmer ditch for irrigation purposes; but this shall not be taken or construed as affecting any right or rights

which said Estate of John B. Mattis may have, as herein adjudicated and determined, to the waters of the West Fork of Footh Creek for mining purposes, as determined by the Supreme Court of Oregon in that certain suit commenced in the Circuit Court of Jackson County, Oregon, wherein John Mattis was plaintiff and Nelson Hosmer and others were defendants, reported in the reports of said Supreme Court, in Volume 37, at page 523 thereof; nor to any secondary irrigation rights which are in this decree adjudicated to the waters of said stream through any other ditch or ditches than the said Hosmer ditch.

72.

That it is hereby ordered, considered and decreed that the findings of said Water Board with respect to the contest of J. T. Hartley against the rights claimed by Frank Sutton, claimants to the water of the West Fork of Williams Creek, be in all things confirmed, and the relative rights of the said claimants in and to said waters are hereby adjudicated and determined in accordance therewith, and as set forth in the statement of rights herein.

73.

That the quantities of water herein allowed and confirmed unto the several parties, as set forth in the general statement of rights herein, are to be measured, in each case, at or in the vicinity of the heads of intakes of the respective ditches of the several claimants, with a reasonable allowance, in each case where the ditch, including the service lateral, exceeds three-fourths of a mile in length, for seepage and evaporation losses in conducting the water to the place of use for irrigation purposes. In distributing the water allotted to the various claimants herein, the water master shall, in addition to distributing to the several claimants the quantities herein allowed, for irrigation purposes, also add a sufficient quantity to compensate for reasonable seepage and evaporation losses in the case of all ditches diverting water for irrigation purposes which are in excess of three-fourths of a mile in length from the head to the place where the ditch enters the lands where the water is used. In all cases where the ditch, including service laterals, does not exceed three-fourths of a mile in length, following the course of the ditch from its head or intake at the stream, to the point where such ditch or the service lateral enters the lands of such claimant, the quantity herein allowed in each such case shall be measured at the headgate or intake of such ditch where the same leaves the natural stream, or in the immediate vicinity thereof at the most convenient point for measurement; and such quantities in each such case shall include the amount of water necessary to compensate for such seepage and evaporation losses in transit to the place of use. For all other uses or purposes than irrigation and stock and domestic supply, the quantity of water allowed in each case herein is intended to, and shall, include a sufficient amount for all reasonable seepage and evaporation losses in transit in conducting the water to the place of use, and the quantity of water al-

lowed in each such case shall be measured to the claimant at the point where the ditch or canal leaves the natural channel of the stream whence the water is diverted. The water master, in distributing the water of a stream herein involved to the several claimants, is hereby required and directed to require all ditches to be maintained so as to prevent seepage and evaporation losses in transit in excess of a reasonable allowance therefor; and the diversion of water to supply excessive or unreasonable seepage and evaporation losses shall be considered a waste of water to the extent of the excess diverted over and above reasonable losses from said sources in properly maintaining and economically operating ditches and canals; and the said water master shall, as near as may be, divide, regulate and control the use of the water from the several streams herein involved by such closing or partially closing of the headgates of the several ditches as will prevent such waste, as well as other wasteful or extravagant diversions of water.

74.

That the rights herein decreed for stock and domestic purposes entitled the owner of such a right to divert and use such amount of water as shall be reasonably necessary for his household and stock use; but during the irrigation season the amount of water herein allowed and diverted for irrigation purposes shall include the quantity to which each such claimant is entitled for stock and domestic purposes.

75.

That the rights herein confirmed for irrigation purposes are confined and limited to the irrigation of the lands herein described to which the same are appurtenant, and the waters appropriated are and shall remain appurtenant to said lands, as provided by law.

76.

That the waters of said streams herein involved shall be diverted under the several rights of appropriation thereto herein adjudicated and determined, in the order of relative priority of the respective rights of appropriation as herein set forth, and at all times when the waters of any stream herein involved are not required by those parties having priority of right thereto for the purposes of their appropriation, and actually used by them for a beneficial purpose, the same shall be at the disposal of and subject to use by those having subsequent rights of priority, in the order of their relative priorities; and at all times the waters diverted by those having a right thereto shall be beneficially, economically, and reasonably used, without waste, and no rights of appropriation are hereby confirmed to divert a greater amount of water into the head of the ditch through which water is diverted by any claimant, than the claimant can beneficially use for the purpose of his appropriation, and not to exceed the quantity herein allowed if used continuously, or the equivalent thereof if used under a proper rotation system; the amount of water allowed herein in each case being the quantity to which each such claimant is entitled in continuous flow; but noth-

ing herein construed shall be deemed to prevent the use of a greater quantity under a proper rotation system.

77.

That the quantity of water allowed in each case herein for irrigation purposes is the maximum quantity of water which each claimant is entitled to divert and use in continuous flow throughout the irrigation season herein fixed; but said claimants shall be entitled to, and may, use the equivalent of the amount herein allowed as a rate of continuous flow, under a proper rotation system, as herein provided for; and when rotation is impossible or impracticable, and the claimant does not require the use of the water continuously for irrigation purposes, he may, under the supervision and direction of the water master, divert and use during the period of actual use by him, the equivalent in acre feet of the maximum quantity to which he is entitled herein as a rate of continuous flow. It is not intended hereby to determine the quantity of water to which said claimants are entitled during the period of actual use of water, except where such use is continuous, and in all cases where it is possible and practicable the claimants are required to rotate in the use of water as hereinafter set forth.

78.

That the rights of appropriation for power purposes hereby confirmed confer no right upon the claimants entitled thereto to the use of the waters involved for any other or different use or purpose, and in each case the waters diverted for power purposes shall be so used as not to substantially diminish or consume the quantity diverted, and the said waters so diverted for such purposes shall be returned to the stream, or the present point of return thereof to the natural channel, at substantially the same place as the said waters have heretofore been returned; and no change in the place of return of the waters diverted for power purposes, or in the use thereof, shall be permitted which shall tend to substantially diminish the quantity of water diverted, or interfere with the rights of other appropriators of the same waters, it being hereby decreed and determined that the rights herein allowed for power purposes confer no rights to substantially diminish or consume the quantity of water diverted and used for such purpose.

79.

That those rights of appropriation designated herein as supplementary rights are limited to a use of said supplemental supply upon the lands to which appurtenant, in an amount and to an extent not exceeding in quantity the amount required to complete the irrigation of said lands, and the quantity diverted from both sources of supply shall not exceed the maximum quantity to which said lands are herein decreed entitled from either source of supply; that is to say, where the lands irrigated herein described are determined to have a right to a certain quantity of water from one stream or source of supply and are irrigated also from another stream, or other streams, or sources, the total and entire quantity of water to

which said lands are entitled from all sources, shall not exceed the maximum quantity to which said lands are entitled from any such source of supply.

80.

That wherever in the statement of relative rights herein it appears that the right adjudicated has been acquired through a ditch by permission of the owner thereof, the words "by permission" under the name of the ditch in such statement shall be taken to mean and indicate that the claimant has no right, title or interest in, or to the said ditch, and that the use of the said ditch for the purpose of conducting the water to which such claimant is entitled to his lands depends upon the permission of the owner of such ditch; and is subject to revocation by him, in his discretion. Except as against said owner, however, the water rights of the said claimant using a ditch by permission of the owner thereof are hereby determined to be valid and vested in him as against all others, and such claimant shall be deemed a valid appropriation of water as of the priority herein set forth opposite his name.

81.

That the rights herein confirmed to the several claimants to the use of the waters herein involved for mining purposes shall be limited to the use of said waters during the season or period of use set forth in the statement of rights herein in each case. That the mining season ordinarily commences November 1st, and terminates prior to June 1st each year, but that the season varies in different localities and on different streams, as indicated in the statement of rights herein.

82.

That the water users and appropriators hereinbefore named shall be required, whenever practicable, to rotate in the use of the waters to which they are entitled; and in the absence of an agreement between such water users or appropriators arranging for rotation and the manner in which the water shall be rotated, the water master shall arrange the appropriators in groups or systems of rotation, giving first the appropriator who is first in priority a quantity of water equal to the combined appropriations of all the appropriators in said group or system, for a length of time bearing the same ratio to the whole time required to make the complete rotation through the whole group of appropriators as the appropriation of said first appropriator bears to the combined appropriation of said appropriators; and shall serve the next appropriator in priority with a like quantity of water for his proportionate time, and so on, until all the appropriators and water users in said group or system have been served; then the distribution of water shall be repeated in the same manner throughout the remainder of the irrigation season; and in case two or more appropriators or water users in any such group or system have equal priorities, then the water master shall distribute the water as between those appropriators having the same priorities to the one whose ditch taps the stream nearest its source, first, and the next lower down, and so on; or in case two or more appropriators have equal priorities, and divert water through the same ditch, the

water master shall distribute the water as between said appropriators to the one whose lands are first covered by said ditch and nearest the head thereof, first, and the next lower down, next, and so on, according to the lateral diversions from such ditch; and whenever two or more appropriators or water users agree as between themselves as to a manner or system of rotation in the use of water, the said water master shall distribute the water in accordance with such agreement; provided, always, that such arrangements into groups or systems, or such agreement of rotation, shall not interfere with the prior rights of any appropriator not a member of any such group or system.

83.

That none of the parties prevailing in the contests hereinbefore mentioned and herein involved, or on exceptions filed in this court, shall recover costs or disbursements herein.

84.

As to the rights of claimant, Nellie Russell and to the waters of Cougar Gulch, a tributary of Hill Creek, a tributary of Rogue River, the determination thereof is reserved from this decree for further consideration, and for determination by supplemental decree, the said matter having been this day re-referred to the Water Board for the purpose of taking further testimony therein as between the said Nellie Russell and the Oregon and California Railroad Company, the Southern Pacific Company and the Director General of Railroads.

F. M. CALKINS, Judge.

Dated April 26, 1919.
