- The lease application includes the information required under OAR 690-077-0077(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(6). No comments were received.
- The instream use has been modified from the lease application to prevent injury and enlargement and is as follows:
Anna Creek (aka Annie Creek)
Tributary to the Wood River in the Klamath Basin

Instream Point: At the POD (as described in Finding of Fact #2)

Certificate	Priority Date	Instream Rate (cfs)	
		April 1 through July 19	July 20 through Oct. 31

1108	1892	1.26	1.00
Totals		3.34	2.77

- Other conditions to prevent injury and enlargement are:

The Department may require, as a condition of any future renewal of this lease, the installation of a staff gage, or other suitable measuring device, below the headgate on Stormer Ditch so that the quantity of water being diverted into Stormer Ditch and the quantity of water being water left instream at the point of diversion may be measured.

- Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
- If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.
- The lease will terminate on October 31, 2005.
